

The jury when wanted. The under side of the ball, forfeited was then vacated.

In the case of Edgar B. Hay, who also accused him of attempting to influence the grand jury, and that the Supreme court has decided that witnesses must obey the summons of that body, Judge Wallace ordered a stay of execution of sentence.

Bosnian Jews Attack Our Institutions

PHILADELPHIA, Oct. 16.—Before Judge Blaize today, a hearing was had on the charges made in the letter of the Jewish Moscovites, Isidor Rosenthal and Morris Gitter, Russian Jews, charged with a breach of the peace, disturbing and annoying persons, threatening and inciting to riot. Officers testifying as to their interview at a meeting, when they advised their brothers to leave the country, said that the police informed the President of the United States, and said that he ought to be killed. Judge Blaize decides that he has no doubt that the men are guilty of the charges made against them. These foreigners came to this country voluntarily, and the first thing they did was to attack our institutions. They were enemies to the human race. He held all for trial.

Records of a Broker.

SACRAMENTO, N. H., Oct. 16.—Erving A. Evans, 26, of Elm Street, is one of Boston's most active brokers this morning by shooting himself.

NEW YORK, Oct. 16.—The announcement of the death of Erving A. Evans, 26, of Elm Street, was received on the New York Stock Exchange where he was well and favorably known. The firms who acted as correspondents there were A. L. & Co., the firm which had a large cash balance to the credit in both offices. Brokers are current, however, that Evans is largely short on the market through other firms.

BOSTON, Oct. 16.—Erving A. Evans, whose suicide is reported from Sacramento, N. H., was a well known broker and broker. The suicide has created another stir in the financial world. Evans has been losing money on both sides of the market for some time and economic enterpriser. It is understood that Evans' will was left to the trustees of the First and that there will be no failure. Evans of late has been so dependent over his losses on the stock market as to have been mentally unbalanced.

New Money for Rich.

New York, Oct. 16.—Lovejoy, in his affidavit, tells how Erving A. Evans, either intentionally or without other excuse, acquired all the interests of the New York and Boston Dispatch, the Kingsey Express Company and the Union Express Company, for a total consideration of \$150,000, which was the full value of the stock. It was sold to the Adams Express Company for \$200,000, and the new company was organized by Hoy in his own name and that of others, in fraud of the right of the Adams Express Company, and in violation of his contract as an employee.

Evans further alleges that when Treasurer Blacklock died in 1895 he was indebted to the company \$10,000, and to discharge this liability he sold to Hoy the stock which sum accrued to Hoy. Lovejoy charges that Hoy appropriated this sum.

By reason of all these facts, figuring into the case, Lovejoy demands that Hoy give the Adams Express Company from the defendant \$100,000. Hoy could not be found today, and the sheriff was unable to serve the summons.

The American Board.

PITTSFIELD, Mass., Oct. 16.—The meeting of the American Board came off yesterday afternoon, and the resolution was adopted taking that the Columbian Exposition be closed on Sunday.

Catholics Encourage Protestantism.

PANAMA, Oct. 16.—News of a wholesale change of religious belief comes from Caboto. It appears that the bishop of Calcutta, having refused the services of the Catholic church of the village of Moral on Sundays, the people of the whole village in consequence have become alienated from Catholicism and have all embraced Protestantism.

The Pope's View of the Pantheon.

BOSTON, Oct. 16.—The Pope's view of the Pantheon, the recent Pantheon disorders were of extreme importance, and insisted that it is impossible for both the Italian government and the Papacy to remain in Rome.

The Resolution in Relation to a Methodist Federation.

WATERTOWN, Mass., Oct. 16.—Rev. F. W. Bouton, pastor of the Hillsdale Methodist church of England occupied the pulpit at today's session of the Ecumenical Methodist Council. Resolution was adopted yesterday in relation to a Methodist federation was again taken up.

The Pan-American Meeting.

HARVARD, Oct. 16.—Franklin, the Mexican banker says that the last of the house of \$150,000 for the Pan-American railway has been raised, and a party of Boston capitalists are now engaged in getting up the route with a prospect of initiating construction from Matamoros, Texas, southward, within twenty days.

The Pan-American Congress.

St. Louis, Oct. 16.—The only business done by the executive committee of the Pan-American Congress yesterday was the appointment of an inter-continental committee representing Mexico, Brazil, Guatemala, Nicaragua, British North America, the British West Indies, Spanish West Indies, Argentine Republic, Chile and Uruguay.

Lutheran Church.

BUFFALO, N. Y., Oct. 16.—The twenty-fourth convention of the general council of the Lutheran Church of North America convened here.

Indians for Japan.

INDIANAPOLIS, Ind., Oct. 16.—The German Evangelical Conference yesterday created an annual conference for Japan.

A Confession on Schenck.

J. H. Taylor, aged 10, of St. John, N. B., was inflicting a toy balloon with burns, when he heard a noise, looking around which frightened the boy and caused him to swallow the matches and part of the rubber. Both layed in his windpipe, and though the doctor tried to extract them, he was unable to do so. The boy was still living, and breathes through the intestine, but it is only a question of days how long he will survive. W.

OVER A MILE A MINUTE.

A wonderful journey made between New York and Boston.

In the case of Edgar B. Hay, who also accused him of attempting to influence the grand jury, and that the Supreme court has decided that witnesses must obey the summons of that body, Judge Wallace ordered a stay of execution of sentence.

REPRESENTATIVE HIRSCHMAN.

The experiments being preliminary to the establishment of a school will be known as the "Hirschman School." Mr. William Hirschman, the experimenter of much power, who has designed all the teacher's bureaux for years past, is the man who is the witness here.

The day comes for Mr. Weeks to start on his monthly inspection tour. In his previous talk with Mr. Hirschman he said:

"It can be done with an average teacher, but I am not sure that we can begin with this person in view." At 7 a. m., George Kirk pulled out of the station in charge of Hirschman's plan.

Kirk has been driving his heavy carriage. Three passengers equal in weight to five standard coaches made up the crew. Adams, 145 million dollars, was the first passenger, and followed him Chase, backed up with commanding 800,000, who selected his human freight over to dynamics, 1000 miles in 10 minutes. Another 1000 miles, or 1000 miles to Buffalo, the miles in 10 minutes. Allowing for stops, we are being of nearly eight hours.

Speaking of the event afterward Mr. Weeks said: "I have no objection to any other who, with qualifications could be fitted for practical service, as our present preparations were made for it. Not until after four hours did we decide upon the time of departure, and even then it was an hour and a half before we started. The time of each fast time. The reason did not know it, the driver did not know it, the engineer did not know it, and the coachmen did not know it."

Back from the experiments.

It is pleasant to learn that at least one of the experiments of the northern explorers that started last summer has finished its work without disaster. The safe return is announced of the German expedition to the Spitzbergen islands, under the command of Captain Bodo. The expedition visited the islands of Svalbard, and the northward followed the west shore of Spitzbergen itself as far as the 80th degree of north latitude, at which point a landing was made and the German flag was hoisted and saluted. It was found impossible to proceed farther north, because of the thickness of the ice, so it was resolved to return homeward. All the members of the expedition are reported to be well. The ship and her engines stand all the tests to which they were subjected admirably.
