THE SEMI-WEEKLY NEWS.

THE GREAT COUNTRY PAPER OF THE WEST.

is issued Mondays and Thursdays and contains all the cream of the Daily and Saturday News.

LOCAL BRIEFS.

Mutual Improvement conference will be held in the Eighteenth and Cannon wards tomorrow night.

A telephone message from Logan to the "News" on today says: "We have a foot of snow on the ground, and it is still coming."

The window, sash and door men are holding meetings now to fix prices for the coming season. The indications are that prices will be pretty stiff.

Rev. Father Keenan, chaplain of St. Mary's cathedral for many years, and a good old soul, has gone to Denver to remain. He leaves many well wishers in this city.

Newsletters, agents and individuals who have any copies of the Christmas News on hand, in good condition, will be allowed full price for them if they will forward them at once to the News office.

Commencing tomorrow the following quartet will be a feature at the services of the First Congregational church: Mrs. Martha Royce King, soprano; Miss Edna Dwyer, contralto; Ed Copley, bass, and Fred Graham, tenor.

The regular monthly meeting of the Veteran Volunteer Firemen's association will be held at their hall, 271 Canyon road, on Monday evening, Feb. 2, 1903, at 8 o'clock sharp, when business of importance will be placed before the meeting. Nominations for officers for the ensuing year will also take place. A full attendance of all officers and members is earnestly requested.

Miner's consumption caused the death yesterday afternoon of Peter Kenney, who passed away at St. Mark's hospital after a short illness. He was a native of County Down, Ireland, where he was born about 45 years ago. He came to America in 1884 and had worked as a miner in the Colorado and Daly and Silver King mines in Park City, in which camps he was well known. The funeral will be held Monday at 2 p. m. at St. Mark's cathedral.

The veteran artillerymen of the Nauvoo Legion will hold their next meeting on Tuesday, Feb. 3, in the armory hall, under the Presiding Bishop's office, in the Third ward, at 8 o'clock prompt. The association is making excellent progress, the address of the officers is being caused a widespread interest to be taken in it. Since their last meeting when several ladies joined the association, a great many more have expressed their intention to join at the next meeting. The members feel much encouraged, and the outlook is bright for a large increase to the association. The purpose of the society is to encourage social relations among its members, and especially, render aid to each other and their families in cases of sickness or death. It is not a secret society.

MARVELS OF LIQUID AIR.

State University Providing for a Big Public Demonstration.

Commercial Club Considered That And Other Public Matters.

AS TO STREET CAR SERVICE.

Removal of Pest House Advocated—About Revoking Franchise—Fewer Councilmen Wanted.

Strawberries and Cranberries Frozen While Steel Pens Are Welded In the Same Glass.

Next Tuesday at 7:30 p. m. in Barratt hall of the L. D. S. university, there will be a public educational lecture of unusual interest. The subject of the lecture and demonstration is the latest triumph of applied science, the truly marvelous product called liquid air; that is, simply, air that has been reduced to the liquid state. It is a strange and almost incomprehensible thing to think of, that the common air we breathe should flow like water, yet it is a fact. And to see what is done with this strange substance produces astonishment that words cannot express. Following is a list of some of the experiments that are performed:

Liquid air is exhibited so that all can see it and some explanation given of its nature and properties.

Dipping handkerchief in liquid air—it still remains dry.

Spectacular experiment with frozen roses, rendered brittle, but retaining their color.

An ordinary rubber ball is bounced, and it bounces like a stone.

HOUSEHOLDS SHORT SESSION

Disposes of Business With More Than Ordinary Expedition.

HAWLEY'S BILL IS PASSED.

Chipman Introduces Bill on Reclamation of Arid Lands—Don'ts Insanity Measure.

There was not much business transacted in the house yesterday, the session lasting only one hour. The first business after the usual formalities was the consideration of Representative Hawley's bill No. 37, which the judiciary committee had reported favorably, which provided for the transfer of the records of railroad corporations from the office of the state auditor to that of the secretary of state. It was promptly passed.

Senator Pambarger's senate bill No. 35, creating the office of stenographer to the supreme court, came up and was referred to committee.

Representative Chipman introduced house bill No. 48, providing for the establishment of experimental farms to determine the best methods of reclaiming the arid lands of the state. There will be five under the supervision of the state agricultural college and state land board. No two there shall be in the same county. The duty of those having the farms in charge will be to secure seeds from all parts of the United States and to study the results and report the same annually. An appropriation is made of \$1,000. It was referred to the committee on agriculture and horticulture.

Representative Done introduced house bill No. 49 (by request), a measure making permanent insanity of three years standing a ground for divorce. Referred to the judiciary committee.

Representative Morris introduced house bill No. 50, providing that state land funds may be invested in notes of the state executed for temporary loans. Referred to the judiciary committee.

Representative Cahoon presented house bill No. 51, prohibiting the taxation of mortgages in cases where the property covered is subject to taxation. Referred to the judiciary committee.

Action on Representative Hawley's bill No. 12, permitting investments of state land funds in bonds of irrigation companies, was deferred until the bill could be printed.

Representative Done presented house resolutions No. 5 and 6. The first instructs the secretary of state to keep the United States flag displayed over the building during the session of the Legislature, which passed the house unanimously. The other was for the appointment of a committee to study the proposed commemoration of President McKinley's birthday. The speaker announced that the committee on finance and commerce have two reports. One on the proposed commemoration of President McKinley's birthday. The other on the proposed commemoration of President McKinley's birthday. The speaker announced that the committee on finance and commerce have two reports. One on the proposed commemoration of President McKinley's birthday. The other on the proposed commemoration of President McKinley's birthday.

While the new pharmacy bill introduced a few days ago by Representative Barrett (by request) meets the approval of the state board of health the measure is somewhat stringent and may meet with opposition from some pharmacists.

There seems to be a battle on over Representative Cahoon's liquor bill. The fight is between the breweries and saloons, on the one hand, and the druggists on the other. Lawyers wish to be heard on it and will be given an opportunity next week. The house adjourned until Monday at 2 p. m.

NEW TEACHERS ENGAGED.

L. D. S. University Begins New Semester With Enlarged Faculty.

The second semester of the Latter-day Saints' new university will begin on Monday next. New students will be registered in all high school, normal, preparatory, and business courses. Part of the new building will be occupied in a few days, and preparations have been made for the reception of the new students. The various courses on Monday. Among the features of special note is the provision of beginning classes for all eighth grade graduates in English, Latin, Greek, French, German, etc., just as if they were entering at the regular fall opening of the school year in September. There was an impression abroad last year that regular students could not enter at the beginning of the first semester; but pupils have been taken this year to correct his impression, and it is now pretty well known that eighth grade graduates and others can enter the various courses to advantage at this time. Among other subjects that will begin on Monday are botany, biology, higher and elementary algebra, various grades of higher English, pedagogy, the law of sales, theology, cooking, dressmaking, aesthetics, art, economics, and the various branches of bookkeeping, shorthand, telegraphy, typewriting, penmanship, higher accounting, etc.

Two new teachers have been engaged for the ensuing semester. One of them is Prof. Charles Kent, a well-known soloist and trainer in vocal work. He is to drill the school as a whole in general or devotional singing, and will also train on four days each week a ladies' and a men's glee club for special occasions. The engagement of Prof. Kent was effected under the advice of Prof. Stephens, who teaches the regular classes in vocal music and whose work does not include the parts to be taken by Prof. Kent. The other teacher newly engaged is Mrs. Marshall, a former wife of former instructor Larsen, who will assist in the shorthand and typewriting departments.

SHOOTING ACCIDENT.

Miss Woodbury May Lose an Eye as a Result.

Hattie Woodbury the 11-year-old daughter of the late William J. Woodbury, and a student at the University of Utah, was the victim of a shooting accident yesterday afternoon which may cost her the sight of the left eye. The shooting was done by her 13-year-old brother Willis, who playfully pointed a toy pistol at her with the remark that he would show her how holdups were done. The pistol was loaded with a blank cartridge and the blank charge, therefore, penetrating the young woman's eye, burning it so badly that it is feared she will lose the sight of it entirely. The accident occurred at the family home, 386 Wellington avenue, between Seventh and Eighth South and Sixth and Seventh East streets. Dr. Milligan was called in and dressed the young lady's wounds, but it will be a day or two before the extent of the injury is ascertained.

The Windsor European Hotel, located most central, rates reasonable, special rates by week or month.—J. G. Scott.

DAIRY & CREAMERY.

KEYSTONE DAIRY, 4 EAST 1ST SO. Phone 64. Dealers in pure milk, cream and butter. Bottled milk a specialty. Our motto "purity and cleanliness."

CARPENTERS AND JOBBERS.
