

The meeting the hostess served a dainty lunch.

The engagement of Miss Jessie Morrison and L. C. Shaw of Salt Lake City is announced. Their many friends are anxious to see them in their new home in the near future.

The state officers of the Young Ladies' M. I. association, delightfully surprised Mrs. Emma Simmons and Miss Mary Hoshard at the home of the former on Thursday evening. Both ladies were earnest workers in the state and recently when they found it necessary to resign. The evening was a very pleasant one and was an evidence of how much the efforts of both Mrs. Simmons and Miss Hoshard were appreciated.

Mrs. J. B. Twelves entertained a few guests at dinner Tuesday at her beautiful new home in honor of Mrs. C. O. Newell.

Miss Edith McGuire was the guest of Mrs. R. Schaub the early part of the week.

The B. P. O. E. delightfully entertained at their club room Monday evening in honor of Mrs. C. O. Newell. A very enjoyable evening of cards, interesting with music, was enjoyed by the guests. The evening was given by Mrs. C. O. Newell. Delicious refreshments were served.

Mr. and Mrs. Fred Tuille announce the engagement of their daughter, Miss Eva, to Lee Warner, the marriage to take place some time next month.

Miss Pearl Bennett has returned home after a very pleasant visit with her mother, Mrs. O. Johannim in Idaho Falls.

Miss Tella Boardman and Rondo Simmons were married Friday at the home of the bride, Bishop O. H. Berg officiating. The ceremony was a large wedding reception and dance was given in their honor by the bride's parents, Mr. and Mrs. Robert Boardman, at the first ward social hall. About 100 guests were present to wish the happy couple and to spend through the journey of life.

Mr. and Mrs. William B. Ward delightfully entertained the Tri club at their home Wednesday evening. Sixty-three was played and greatly enjoyed by all. An elaborate lunch was served by the charming hostess.

Miss Annie K. Smoot delightfully entertained a number of her young friends Saturday evening, in honor of her sixteenth birthday. The evening passed merrily in games and various amusements, and an elaborate lunch was served.

Mrs. Benjamin Bennett was a Salt Lake visitor a few days this week.

A DAINTY MODEL IN MAIS SATIN.

Any dressmaker of moderate skill could fashion a satisfactory costume along these lines. The material is a pale yellow satin of heavy yet supple texture. The skirt is a simple, straight pattern in trailing length, with a four-inch bias fold just above the hem. The bodice, richly braided with soutache in matching shade, is attached to a lace yoke by a stitched strapping of the satin, and on this strapping are set large, round buttons, which emphasize the bodice effect of the bodice. The lace yoke is fastened the long sleeves, also of lace. The gown has a crushed grille of satin in the same shade. The fringed scarf, however, which is carried as a graceful adjunct to the costume, is in a deeper yellow tone, and this deep yellow is repeated in the shaded ruffles on the hem.

EUREKA.

Mr. and Mrs. Clarence Bray were tendered a farewell party Wednesday evening at the home of Mr. and Mrs. William Burton. The affair was given in the way of a surprise to Mr. and Mrs. Bray, and those who attended certainly had a very delightful time. Mr. and Mrs. Bray will move to Provo next week, where they will in the future reside.

Miss Nellie Murphy of Park City has been in Eureka this week, visiting with Mr. and Mrs. Bert Lee.

Edward Emberton of Salt Lake was here several days during the week, visiting his parents, Mr. and Mrs. William Emberton.

Miss Cleo Hulse returned to her home at Payson Wednesday after a visit of a week in this city.

Captain Hugo Demeritz, D. D. Hanks, P. E. Hixon, William Owens, S. E. Ware and David Mills, of the local Masonic fraternity, were in Salt Lake City Tuesday and Wednesday for the purpose of attending the sessions of the thirty-eighth annual communication of the Masonic grand lodge of Utah.

Frank Shultz left yesterday for a visit with his family at Provo.

D. A. Dupuc has moved with his family back to Robinson, from Tonahvale.

Frank Davis and Frank Beeley left on Monday for Los Angeles, where they will spend a month and then return home by way of San Francisco.

The Mozart orchestra of Provo conducted a dance here Tuesday night.

Mrs. George Hanson of this city and Mrs. K. M. Cornish of Robinson will leave next week for a visit in southern California.

Mrs. Jerry Connolly and daughter left Sunday for Baker City, Oregon, to visit relatives. They will be absent a month.

E. N. C. Stott was in Beaver county this week on legal business.

Dr. C. P. Harvill returned to Robinson last Saturday after a trip into California and Nevada.

Jackson McChrystal returned Tuesday after spending several days in Salt Lake.

Mr. and Mrs. Charles Zabriskie returned Monday evening from Spring City.

Major John and Robert Church left Wednesday for a visit of a few days at Oquirrh, their former home, where they attended a party given in honor of the eighty-fifth birthday of their father.

Sheriff Henrich was in Nephi and Provo Tuesday and Wednesday.

The local lodge of Elks had a social session Thursday evening in honor of the initiation of a class of new members into the order. An elegant repast was served after the regular lodge work was finished, and an impromptu program was carried out.

LEHI.

Lehi, Utah, Jan. 22, 1909.—Mr. J. W. Stoker and Miss Ruby Davis, both prominent young people of Lehi, were married in the Salt Lake temple Wednesday last in an elaborate reception was given in their honor in the Commercial club rooms last evening. A large number of friends and relatives being present. A sumptuous wedding supper was served in the dining room of the club. Miss Davis was handsomely attired. Mr. and Mrs. Stoker will make their home in Lehi for the present.

Mr. Parley Austin, Agricultural Agent of the Utah Idaho Sugar Co., of Lehi, and Mrs. Rose Booth of Nephi were married in the temple Wednesday last, and will take a month's wedding tour in Southern California.

Last evening the High school students gave a special dance and social in the city pavilion which was largely attended and much enjoyed.

Next Friday evening, Jan. 27, the M. I. A. of Alpine state will give a grand ball and social in the Apollo hall, American Fork, which promises to be one of the leading events of the season.

Mr. and Mrs. James Turner of Garden City, Kan. were the guests of Mr. and Mrs. William Wing the first of the week.

Mrs. J. E. Standing and children are spending a few weeks with her parents, Mr. and Mrs. Hurley of Sacramento, Cal.

Mr. H. J. Kendall of Salt Lake is visiting his father, Judge Eli Kendall.

Dr. and Mrs. W. M. Stookley of Salt Lake City were visiting Dr. and Mrs. G. L. Stookley the first of the week.

Mrs. Hyrum Kirkham of Idaho Falls is visiting Lehi relatives.

Mr. and Mrs. Eph Gough of Raymond, Canada are spending a few weeks with Lehi relatives.

Editor J. M. Kirkham of the Lehi banner is visiting Chicago friends and other eastern points.

Mrs. E. M. Jensen of Oakley, Utah has been visiting her daughter, Mrs. G. A. Gentes.

Judge Samuel Taylor and wife were guests of Mr. and Mrs. T. R. Corder, Jr., of Salt Lake City the first of the week.

Miss Ethel R. Hardy of Salt Lake City is visiting Mr. and Mrs. P. P. Hardy.

Mr. Wm. McNamee of Nampa, Idaho was shaking hands with Lehi friends a few days ago.

Mr. and Mrs. David Boston of Garfield have been visiting Lehi friends, and will visit Lehi friends Thursday.

The regular meeting of the Woman's league was held Monday at 3 p. m. Fred C. Loofbourrow discussed "Pure Food Law and Prices," an open discussion followed.

The Lloyd Alliance of the Unitarian society gave a musical at their monthly open meeting Wednesday afternoon at Unity hall, after which tea was served.

In Woman's World.

Water in which boots have been soaked and to which a tablespoonful of alcohol has been added is the only harmless rouge.

Beautiful teeth are a source of exquisite delight to beholders, in any way.

Children should be taught, as soon as they have any understanding of what the teeth are for, to brush them. If left to themselves, children will "go at" the cleaning process for themselves and so bruise the delicate tissues of the mouth. They must be taught how to hold the brush, how to lift the powder, and how to use the tooth-brush in the powder, and how to apply it in the mouth, which should not be across the teeth, but in circular movements, but in the direction of their growth, so that the spaces between the teeth are cleaned.

Even with the best care it is sometimes not possible, owing to the state of one's health and what not, to prevent a slight discoloration from forming upon the teeth as they push their way forward.

A well known New York dentist: Bodum bicarbonate, 1 dram; magnesium carbonate, 1 dram; powdered orris root, 1 dram; precipitated chalk, 2 ounces; menthol, 5 grains. Flavor with oil of wintergreen.

A mild antiseptic wash should follow the use of the powder for this purpose. Iodine, tincture of iodine and glycerine are good. They must be diluted.

Dentists also have learned me that if we use bicarbonate of soda (soda) we must brush our teeth every day, rubbing it into the spaces, they would be forced to close their offices.

One-half cup of butter, one cup of sugar, one-quarter cup of milk, two eggs, well beaten, heating teaspoonful of baking-powder, a tablespoonful of caraway seeds, flour enough to roll out on a half-inch thick. These are cut in oblongs about five inches long and two and one-half inches wide. Bake in a slow oven. My! but they taste good with a glassful of milk or lemonade.

But two eggs light and add to them a half-cupful of cold boiled rice, Melt a tablespoonful of butter and put this and a pint of milk with the other ingredients stir in two cups of Indian meal with which has been mixed a teaspoonful of salt, beat well, then into shallow tins and bake in a quick oven. The batter bread of my childhood was always baked in pans which looked like pie-plates, but of later years I have eaten it baked in deeper dishes and no less good. When deep like this it is sometimes known as "green bread" from its being so tender that it must be served with a spoon. Eat very hot, with plenty of butter.

The best possible food for a baby is mother's milk, and this is what it should get whenever possible, says Dr. Leonard Keen Hirschberg, in the January Bulletin. The mother's milk is the best food for a baby, and no other such food is so good for a baby as mother's milk. The best of all Indian foods, like the best of all varieties of modified cow's milk. Nothing devised by the ingenuity of physicians and chemists can so perfectly contain the virtues of food, drink and medicines as does this natural food.

When I say medicine, I speak literally, for mother's milk gives to the baby some measure of her own acquired power of resistance to disease. There is, indeed, good ground for the old saying that, so long as a child is at the breast, the blood of its mother continues to flow through its veins. Recent investigations in aseptic and immunity have shown that this is true, at least in effect, for the breast-fed child shows a distinctly greater capacity for resisting the organisms of all the principal infectious diseases than the child fed upon artificial food. To put it simply, the baby nursed by its mother is far less likely to take measles, scarlet fever, chickenpox, and for more likely to recover quickly and completely if it does, than the baby nourished by cow's milk and cereals.

Smith's for February has an article on "Health and Beauty in the Hair," in which Florence Augustine tells how it is possible to retain a youthful gloss, and to prevent graying, baldness and torpidity of growth.

"Washing the hair is not a simple operation. To be effective, it should take fully an hour and occupy the brain as well as the hands. Four things are important in a shampoo: to have the water warm, to have plenty of it, to use a good, pure soap, to wash quickly and dry with much friction.

"The reason hair-shampoos are so seldom effective is because the soap is not sufficiently rinsed out of the hair. Most women use a thimbleful of hot water in a stationary washstand-bowl, take a bar of soap, and scrub one half of their scalp, and then repeat the process on the other half. This leaves the hair stiff and dry. As a consequence of water scrubbing, the hair is left with a certain amount of moisture, which is the ideal method for shampooing you should have a receptacle large enough to hold four or five gallons of water and change this three or four times, or oftener, until you are sure every particle of soap is out of the hair.

"Rain-water should be used whenever possible; if not, the first water should be 'softened' by a pinch of soda.

EVENING FROCK, WITH EMBROIDERED NET TRIMMINGS.

The embroidered bandings which are sold by the yard make very rich trimmings for satin evening frocks. Such a trimming is used most effectively on this charming costume of pastel rose satin. The net bands, in a soft rose tint, are embroidered with silver threads and silks of rose shades in light and medium tones. Across the shoulders go bands of more silk in a rose shade somewhat darker than the satin of the frock, and at one side of the corsage are two artificial blossoms in rose and American beauty colors. The simple lines of this model are very beautiful, the apron drapery sweeping downward to the point of the train. The hem at the bottom is set in by hand and is heavily weighted to make the skirt drag on the floor.

Nothing of what they mean cosmetically to their possessors, and most important of all, what they mean from the viewpoint of health for a set of healthy teeth are like a watch-dog, guarding the portals of the body, whereas poorly kept teeth are like the broken-down forces, leading roads and weed-grown gardens, indicative of shiftness and shill. We cannot begin too early in life to care for the teeth, and mothers are singularly negligent in watching the condition of their children in this particular. Many believe it unnecessary to give any attention to the temporary or milk-teeth, as a matter of fact, these teeth aid in the growth and development of the second or permanent ones, which al-

ing upon the teeth. A professor of dentistry taught me the following method of discolored teeth. Try it, you will find it wonderful.

A tiny plaque of absorbent cotton upon the point of a toothpick is dipped into tincture of iodine, this is carefully run over and around each tooth, avoiding the gum as much as possible; a second pledget, similarly prepared, is then dipped in pure alcohol, and run over the iodined teeth. The result must be seen to be appreciated.

It is a great mistake to use cheap tooth-powders. They are coarse and gritty, and contain nothing to ensure alkalinity of the mouth. It is much better to have one's tooth-powder prepared at a reliable chemist's and the following formula was given to me by

CORN, OATS, Rolled Barley. Wholesale. Inter Mountain Milling Co.

risk or a few drops (only) of ammonia. Do not "soften" the rinse water. Bicarbonate of soda in the water or any of the strong alkali "laundries" are very injurious to the hair. They leave it dry and brittle.

The importance of thoroughly rinsing the hair cannot be too strongly insisted upon. The danger of allowing soap to remain any length of time in the hair was discovered by her sorrow by a girl who thought to let the "nervative" properties of Packer's tar soap sink into her hair. She was two solid months getting these "nervative" properties out of the strawlike resulting mass, and for a while she feared she would lose her hair.

"Most of the ill of the scalp are accompanied by that awful plague, dandruff. Even if it has not yet obtained in the point of a disease, dandruff may cause gray hair, only hair, baldness, and little more. Its eradication is a primary condition to health in the hair. In ordinary cases it can be removed by massage and cleanliness. If, however, the rinsing of heavy artificial "rats" is insisted in, a cure is very difficult, for these accessories heat and irritate the scalp unmercifully. They are the cause of many annoying "stray threads" of silver in the pretty heads of twenty-five-year-old girls.

"Dandruff is infectious, like any other disease caused by micro-organisms. The germ can be carried in hairpins, combs, brushes, hats, sofa pillows, and other articles of personal use. Many men contract the disease in barber-shops and women at hair-dressing establishments where the rules are not strict about cleaning the brushes and combs antiseptically after each patron, girls who are heedless of the risk they run in using strange combs on railway-trains, in hotels, and even at their friends' homes, are often the sufferers.

"An old-time remedy for dandruff is: Talcum, five ounces; olive-oil, one ounce; tincture of cantharides, one ounce. This should be rubbed into the scalp nightly. A fine comb should never be used to get rid of dandruff, for it merely irritates the scalp and makes the trouble worse. It is well to soften the patches several hours before a shampoo with olive or sweet-oil.

RESOURCEFUL SERGEANT.

At one camp where a number of recruits were temporarily stationed an old sergeant was ordered to ascertain to what religious sect each man belonged, and to see that he joined the party told off for that particular form of worship. Some of the men had no liking for church, and declared themselves to be atheists. But the sergeant was a Scotsman and a man of experience. "Ah, well," said he, "then ye have no need to keep holy the Sabbath, and the stables have not been chained out lately. And he ordered them to clean out the stables. This occupied practically the whole day, and the men lost their usual Sunday afternoon's leave. Next Sunday a broad smile crept over the face of the sergeant when he heard that the atheists had joined the Church of England.

AN IMPENETRABLE DISGUISE.

Paul Rainey, the brilliant leader of New York's very smartest set, abominates bones and dullness.

During a horse-show supper that Mr. Rainey entertained with a dozen vaudeville stars, a lady said to him: "I met your friend Blank at the masked ball last week. You call Blank a horse, but really, he told me some very interesting things."

"Blank interesting?" cried Rainey. "Impossible! But then, it was a masked ball, wasn't it? Perhaps he didn't want to be recognized."

Plain Facts About the Hair

The short portion of the hair follicle above its base is somewhat like a funnel, and is filled with the outer skin. Opening into this outer portion are the highly important oil and sebaceous glands which, from their location, are most exposed to disease. When these oil glands become infected with a certain microbic growth (the cause of dandruff) there is hair disease and finally hair death. Fortunately this outer portion of the hair follicle can be treated by carefully rubbing into the scalp a suitable remedy. What remedy should be used? Manifestly one that will destroy the growth that causes dandruff, itching scalp and falling hair.

Newbore's Herpicide is the first remedy that was prepared for the particular purpose of destroying this invisible vegetable growth. In fact, it is called the "ORIGINAL" remedy that kills the dandruff germ. Newbore's Herpicide was not made until after Prof. Oskar, of Hamburg, Germany, said that a doctor about him discovered that dandruff is a highly contagious disease caused by a microbe. The almost unnumbered success of Newbore's Herpicide has caused advertising writers to claim, without foundation, that their hair remedies were of which were on the market years before Prof. Oskar's discovery.

Do you think that this new claim for old remedies is a reasonable one? Remember that the hair gets its life, color and strength from the blood, and that good blood, deep breathing and sunlight favor hair development. Out-door exercise, to insure free circulation in the scalp, also a massaged hair, and some vigorous, are very helpful. Never, indigestion and sedentary habits oppose hair growth, while the dandruff germ will actually destroy the hair, unless it is eradicated and kept out of the scalp with Newbore's Herpicide.

Herpicide is delightfully cooling and refreshing to the scalp and almost instantaneous results sometimes follow its continued use. It stops itching of the scalp almost instantly.

YOU MAY BE SURE that if Herpicide is not as represented.

10 cents in stamps to The Herpicide Company, Dept. E, Detroit, Mich., for sample and booklet. Two best, 20c and \$1.00. At Drug stores. When you call for Herpicide, do not accept a substitute. Applications at Prominent Barber shops.

HAD QUIT WORK READY TO GIVE UP IN DESPAIR Restored to Health By Vinol

"I was sick, run-down and finally had to give up work. After trying a number of remedies and several physicians, I was just about ready to give up in despair. I saw Vinol advertised and decided to try it, and it has done more good for me than all other means combined. It has built me up and restored my strength until I now feel twenty years younger, and am able to attend to my work again as usual." Job Jeavons, 1031 Lind street, Wheeling, W. Va.

The reason Vinol is so successful in such cases is because it contains tonic iron and all of the strengthening blood-making and body-building elements of cod liver oil, but no oil. Vinol is unexcelled as a strength creator for old people, delicate children, weak, run-down persons, and after sickness—and is the best known remedy for coughs, colds and bronchitis.

We return your money if Vinol fails to give satisfaction.

SMITH DRUG CO. Also DRUGS & FRANKS, DRUGGISTS, Salt Lake City, Utah.

CLUB CHAT.

The Langhorne of the Pioneer held their meeting in the Lion house Wednesday, President Lillie C. Westlund presiding. Mrs. Rosa Young Glines gave an interesting talk on the "Evolution of the Mind." Music was furnished by Louisa Rodes and Alma C. Clayton.

The Utah Archaeological society will hold its regular meeting at the home of Mr. and Mrs. W. M. Rice, 214 East First South street, this evening. A piano solo will be given, commencing at 8:15 o'clock, including a paper entitled "The Archaeology of Northern Mexico," by Prof. John M. Mills. Jacob R. Leitch will also read a paper "What is the State Doing to Preserve its Historic Records?" There will also be vocal and instrumental selections.

The Ladies' Literary club met yesterday afternoon. Mrs. C. E. Richards gave a talk on "Modern Fiction." A piano solo was given by Miss Minnie Rier and Mrs. Hammer gave two vocal selections. Business followed.

The Wasatch Literary circle met Tuesday afternoon with Mrs. J. E. Berkeley, 181 1/2 street. Mrs. Thorne who had charge of the program will be assisted by Mrs. Parsons and Mrs. McCann.
