MEETING TODAY.

Report Shows Receipts from Ore Sales to be \$652,200.50.

BALANCE ON HAND \$57,587.69

Amount of Work for Year, 4,090 Feet -Developments on 900, 1,200 and 1,400 Levels Northern Light.

The shareholders of the Daly-West Mining company met this afternoon at the company's office on Brigham street and listened to the manager's report, which referred to the rich and extensive ore bodies that have been opened up. the purchase of the Morgan property, and the effects of the completion of the Union Pacific spur to the Ontario-Daly tunnel.

The reports sets forth that three levels have been opened from the main-working shaft, viz.: the 900, 1,200 and 1,400 levels. Two more levels have levels of the working shaft.

ON THE 900 LEVEL The drifts on the 500-foot level extend 25J feet. There is also a 130-foot winze and an upraise of 185 feet. Several very rich and extensive ore bodies have been epened up on this level, and it is from this level that the greater part of the shipping ore has been extracted.

THE 1,200 LEVEL.

The i,200-foot level was the first level to be opened up in the mine. It has not been the scene of very active operaquantity of cre is reported to be blocked out at the mine for future stoping. The western ore zone on this level is shown to be 750 feet on the strike, 1,500 feet on the dip and to have a thickness of from 40 to 60 feet in limestone, which is said to furnish the limit within which prospecting may be carried on with a reasonable certainty of finding paying ore bodies. The eastern part the 1,200 level furnishes big bodies of low grade ore, which is a free milling silletous ove similar to the Daly and Outario cres. It will in all probability be necessary to secure more enconomical methods of treatment before this grade of ore can be made to pay.

The marketing of this ore may be

possible by mixing it with the rich sulphides and zine ore of the western egular 115; old 4s coupon 115; 5s regu. part of the mine. It is said to carry enough sliver and lead to make up for loss in high treatment by reducing the zinc in the other grade below the 20 per cent limit. The crude ore at present mined exceeds the 20 per cent limit and a penalty is incurred in its

> THE 1400 LEVEL. A large station has been cut in the shaft at a depth of 1400 feet. A 50-foot sump was sunk during the year. From this level an 850-foot cross-cut has been run in a northerly direction to the vein. An easterly drift has been run on the vein a distance of 550 feet, while a west drift extends 225 feet on the vein. An upraise from the 1,400 les have been opened up by this work, No stoping has been done on this level and little is therefore known of the characetr of the ore bodies. The ore appears to be the same in character as that which is directly over it on the 1,200 foot level. This leads to the belief that the ore bodies on the 1,400

are virtually the same as those on the 1,200 level.

RESUME OF WORK. During the year, besides the 50-foot sump, there were 3,160 feet of drifts completed, 1,625 feet of which was done on the 1,400 level. Seven hundred and sixty feet of upraises was also completed, with a 130 foot winze, making a total of 4,090 feet of work during the year, and increasing the total openings in the mine to 19,497 feet.

CONCENTRATING MILL.

Although the concentrating mill was doing very good work, some changes were made during the year. Thought the completion of the improvements were unavoidably deleaved until quite recently, it is now said to be giving full satisfaction. A total of 17,169 tons of ore were treated up to Dec. 31, '99, which contained 10.3 per cent lead and 20.3 ounces silver per ton. Ninety per cent of the lead and 68 per cent of the silver was saved and the above bulk of crude ore was reduced to 4.785 tons of crude ofe was reduced to 4,785 tons of concentrates, having an assay value of 33.46 per cent lead and 49.8 ounces silver per ton. This product, which contained also a little gold and copepr, was sold to the smelter for \$194,-571.68.

MR. SHERMAN'S REPORT.

In his report Superintendent F. W. Sherman reported 7,782 tons of first class ore mined, dry weight. From this ore was obtained 495,484 ounces of silver, 3,988,891 pounds of lead, 461,385 pounds of copper and 406,63 ouncesof gold, which was sold for \$334,445.54, making, with the value of the concentrates and \$20,793.92 worth of ore in the bins, the total production amount to \$549,721.14. The mining and milling expenses as set forth in detail were \$147,076.44, sampling and assaying expenses reached \$9,973.61. When these In his report Superintendent F. were \$147,076.44, sampling and assaying expenses reached \$9.973.61. When these amounts, with the value of 4,000 tons of ore (\$14,760) on the dump January 1, 1899, are substracted from amount of the total production it leaves a net profit of \$377,912.09, or 68.76 per cent of the gross earnings.

MACHINE SHOP. A machine shop has been built during the year at a cost of \$1,207.39. Through this means the machinists and others who are needed at the mine, are kept busy all the time in doing repair work, making cages and cars, etc., which saves a good deal of money to the company. A compressor has also been in-stalled, a boarding house has been built, also a new office and other build-

WATER SUPPLY.

The company is well supplied with water through the purchase, for \$14,-258,90, of a one-third interest in the Silver Lake Water Company which Silver owns several small lakes at an eleva-tion of about 500 feet above the mine. Besides the first cost the company has paid out the sum of \$5,993.54 for addi-tional pipe line, etc.

year. It secured 335,679 shares out of a total of 348,815 shares issued by the Morgan Mining company at a cost of 108,952.75. It is believed that the Daly-West ore bodies pass under the Morgan side lines at depth, and the purchase does away with the liability Silver King's domains. f litigation. RAILROAD SPUR.

The completion of the Union Pacific spur to the Ontario tunnel is considered an important move. ound where before they were preventough the snows of winter. cost of hauling ore to the railway last year was \$15,250.75, but the saving effected by the railroad supr and the use of the Ontario-Daly tunnel on the same quantity ore will now be \$11,-259. Instead of paying 85 cents per ton for hauling the ore to the railway and \$1.40 per ton for hauling back supplies the company secures the haul of both ore and supplies from the mouth of the tunnel to the mine and vice versa for 15 cents a ton, and the railroad freight rates remain the same as the ore was booked from the old ter-

ANCHOR SUIT. In regard to the suit which was filed against the Anchor company last year the report states that surveys show that 93,690 cubic feet of ore have been extracted from Daly-West territory by he Anchor company. It is stated that no question of apex can enter into the sult, and that in sulng for \$200,000 the Daty-West company seeks only what is due it.

SUPPLEMENTARY.

The ore sales since January 1st of this year amount to \$115,514.31, which with \$52,649.45 on hand at that date gives \$170,963.76. The operating expenses have been \$28,048.24, which with dividends-Nos. 5, 6 and 7, amounting to \$112,500, leaves \$30,415.42 available cash. In addition to this amount there is also \$44,172,17 to be derived from 777 tons of crude ore and 334 tons of con-centrates in transit, which when the perating expenses to February 1s deducted leaves an excess of \$57,587,69 in the treasury.

SUMMARY. Altogether from January 1st, 1899, to February 19th, 1990, the sum of \$652,-200.50 was received from the sale of crude ore and concentrates. With ore in transit and receipts from interests Ontario Silver Mining company and sampling rebates the total receipts to date amount to \$732,222.98. The items of disbursement comprise the Morgan wale \$108,962.76, Silver Lake Water com-pany \$14,258.90, railway spur \$5,334.08, water works, mill and mine construc-tion \$30,132.35, and dividends Nos. 1 to

t was officialy stated this afternoon that the Bambergers would control the election, and that as the mine has changed hands a new board and new officers will be elected.

THE NORTHERN LIGHT.

Meeting of Shareholders - Company Shown to be Nearly \$8000 in Debt.

The annual meeting of the Northern Light Mining company took place this afternoon. The report showed that \$19,233.27 was received from ore extracted during the year. The mill run our months last year and treated 2,223 ons of ore, from which 60 per cent of the values were saved or \$1.20 per ton. Two thousand feet of work has been done during the year. The milling ore now in sight is said to be much better that that which was treated last year The company closes the year \$7,886,50

WEEK AT PARK CITY.

Daly-West Product-Strike in Apex-Lucky Bill Crosscut.

In its weekly resume of mining affairs at Park City the Record says: The handling of the Daly-West product at the mouth of the tunnel is going on at a lively rate these days. At the old leacher, where the ore is un-loaded from the mine. Foreman Pearson 2nd ten men are steadily employed sorting and loading, and when the repairs and improvements now under vay and in contemplation are completed, more men will be added to the present force for handling the material

daily issuing from the tunnel. Concentrates from the mill are now level connects with a winze from the coming through the tunnel and an 1,200 foot level. Several good ore bod- average tennage of 160 tons of ore and concentrates every two days, or eighty tons per day, are at present being sorted and loaded on the railroad cars for shipment to the sampler and to the smelter. This makes up a train of from five to six cars each every other day-or an average of a little over three

trains a week.

A large coal bin from the upper railroad track is completed to receive the coal supply for the Daly-West. It is dumped directly from the railroad cars into the hin, from which five chutes lead to the mine track on the tunnel level. The mine cars after coming out loaded with ore and concentrates, are loaded in a remarkably short time with coal from the chutes and taken to the nine on the return trip.

The loading and unloading is of the

simplest character and enables operators to handle a vast amount of material in a short time, and of course Manager Daly is more than pleased, with the great success of the undertak-

The Valeo is on the list again this week as a shipper.

James T. Kescel is again at his old post as foreman of the Anchor mill. and is receiving the congratulations of his many friends.

STRIKE IN THE APEX. Another strike of fine carbonate ore

is reported to have been made in the crosscut at the Apex, and the strike is reported to be more extensive than the one previously cut. Messrs. Flindt & Rookledge are to be congratulated on their good fortune and have the best wishes of their many friends. LUCKY BILL CROSSCUT.

Six men are pushing work at the Lucky Bill mine on a crosscut from the 1,000 level. A load of supplies went up yesterday. Nothing of a sensational nature has yet been disclosed, but every-body connected with the company seems perfectly satisfied with the show-

ing.
Ore sufficient to keep all the stamps of the Marsac mill busily engaged is being regularly delivered from the Ontarand enough additional to guard against any delays in the transporta-tion of materials. The Tefinery: has been undergoing repairs and alterations and next week will be actively operat-

SALE OF THE ALMANCE. Finally Consummated Saturday Af-

ternoon for the Sum of \$60,000. At the meeting of the stockholders At the meeting of the stockholders of the Alilance Mining Company held on Saturday afternoon the property was transferred to the Silver King Mining Company for \$80,000 or 60 cents a share for the 100,000 shares of the company's stock. The property consists of a number of patented claims which adjoin the to get out of the proposition at that irics. The water supply from the Al-

IN THE HEATH DISTRICT.

High Grade Pyritic Ore in A. W McCune's Abbey Property. H. D. Andrews of Salt Lake is guest at the Overland. Mr. Andrew represents the interests of A. W. Mc Cune, the prominent Utah mining man

in the Heath mining district, says the Boise Statesman. Mr. McCune re cently secured an option on the Abbe lairs in that district and Mr. Andrew has been to the district looking over the work that has been done. He will return to Salt Lake today, take ing with him a big sack of samples. Mr Andrews says the development work far done makes a very favorable show. ing, but not such as would justify a prophecy, besides he was not given to prophesying. The Abbey was being developed by a shaft, which was being sunk on the ledge. High grade pyrites occur in the ledge. This ore was practically unoxidized and might prove the keynole. the keynote of the situation. The grade pyrites ran 20 per cent and better copper. There was lots of low grad pyrites and carbonates, averaging 3 t per cent copper, that could be worked very nicely on the ground. As a ship-ping proposition the property, said Mr Andrews, had not as yet developed any. thing particularly alluring. indications were good and as had atrong hopes that a producer would be developed. Mr. Andrews says he has great confidence in not only the Heath district but in the Seven Devils countries. try as well. He does not believe it pos-sible that there can be such remark-able surfaces showing without a number of very good mines.

RED WARRIOR MINES. Renewed Activity in This Promising

Idado Property.

Mr. E. F. Phelan, manager of the Red Warrlor Chief company's group mines, came down from the camp Mon day on business connected with his works, and yesterday started on return to the property, says the Mountain Home Bulletin, published in Elnore county, Idaho. Mr. Phelan is an experienced California mine manager and since taking hold of these mines he has been pushing tunnels, making cross-cuts and stoping out very rich ore frem the old works of John Shields. short time ago Mr. Phelan started a cross-cut from the shaft of the Bar de, which was driven only about thirty feet when a blind ledge with well defined walls and three feet in width was cut. This ledge has been thoroughly tested and he is confident the ore will

ot be less than \$60 per ton. The old Henry Clay tunnel is being extended northerly with a view of tapping the original Shields ledge and others that have proven very rich on p, and ultimately cutting the Bray, Summit and Champion lodes.

White here Mr. Phelan engaged th services of eight miners to go to Red Warrior, which will increase his force to eighteen men, some of whom are working eight-hour shifts. He is paying \$3.50 and \$5 per day, according to location of workmen.

FULTON IS MISSING. An Old Salt Laker is Lost in Alaska.

Some anxiety is felt at Skaguay, according to the latest advices from that city, over a second mysterious disap-pearance similar in some respects to the ing to be a mining expert representing Eastern capital, arrived at Skaguay several weeks ago. He went from Ketchikan, where he is said to have inspecied copper properties. After making a flying trip to Seattle he returned to Skaguay December 16th, and a week later left there, saying he was going to White Horse. Since then nothing has been heard of him. He was a large man, elderly and quite gray.-Seattle

Post-Intelligencer.

J. E. Fulton will be remembered by old Sait Lakers as an associate here of T. W. Bates in an effort to build a rail-road from Coalville to Salt Lake and westward, many years ago. He was also a real estate dealer here about ten or twelve years ago. He was also con-nected with Bates in starting the Seven Devils road, which is now being projected from Weiser. Several years ago Fulton and Bates separated, the former going to California, and finally to Alaska.

tyn, mining engineer, of Salt Lake, re-turned Friday from a two weeks' trip through the camps about Sumpler and Granite An arrangement has been made with the men working at the Dalsy of West Dip to continue at work for the rest of the mouth and accept the returns from the cyanide shipments in payment of the

A new strike is reported in the Humbug. It is reported that Uncle Jesse Knight has closed a contract with the smelter company for the treatment of the ores of the Humbug and Uncle Sam. Preparations are moving along for the erection of the new cyanide plant at the Deer-Lodge properties of A. W. McCune and associates. It is expected that the contracts will shortly be

MORGAN PURCHASE.

The Daily-West company also purchased the Morgan property during the chased the Morgan property during the search for ore the price is small but doubtless the stockholders were glad ed has again been secured by the Stand.

Eczema! The Only Cure.

Eczema is more than a skin disease and no skin remedies can cure it. The doctors are unable to effect a cure, and their mineral mixtures are damaging to the most powerful constitution. The whole trouble is in the blood, and Swift's Specific is the only remedy which can reach such deep-seated blood diseases.

Ecrema broke out on my daughter, and con tinued to spread until her head was entirely covered, She was treated by several good doctors, but grow worse, and the but grow worse, and the dreadful disease spread to her face. She was taken to two celebrated health eprings, but re and a second celved no benefit. Many ha. 120 11000 patent medicines were taken, but withous suit, until we decided to try S. S. S., and by time the first pettle was lintshed, her head gan to head. A per bottles cured her co

gan to heal. A on bottles cured her co-pletely and left necessity perfectly smooth. S is now sixteen year add, not has a magnific-growth of bary. Not a sign of the dready disease has ever returned. H. T. SHORE. Don't expect local applications soaps and salves to cure Erzema. The

been accomplished by arangement with the Lewisohns and the Utermeyers. Mercur Mercury: Reports of a flattering nature continue to come from the Little Pittsburg. Cresscutting has con-tinued from a point in the south drift and is now in the silver vein, showing oxidized gold values cut, with no hanging wall yet in sight. From present are very extensive and of such character as to justify the belief that they have a great mine.

Tintic Miner: George Hays returned to Silver City Wednesday night from the Oak Brush claim in the Blue Bell district. In following a small streak of ore in the property Mr. Hays reports that an immense proportioned cave, the extent of which has not yet been determined, was broken into. The cave is said to be one of the largest ever found in that section of country. Where the walls have been examined they are said to be literally covered with galena ore.

CALIFORNIA FRUIT GROWING.

The Pacific Rural Press, San Francisco, Cal., has just published the third edition, thoroughly revised to date, of Prof. Edward J. Wickson's "California Fruits and How to Grow Them. The author is an acknowledged authority on horticultural science and his work is a thoroughly reliable manual of the best methods in western orchard growing. Nothing is left to be imagined or guessed at; the book is complete in every detail, from the clearing of the land to the marketing of the fruit; all the stages of the work, from the pro pagating, planting and tending of the orchard, or vineyard, to the packing, curing and shipping of the green or dried fruit, are given with interesting minutae. In fact, it places fruit-rais-ing into something more like an exact science than the lottery which it has

With this book the prospective orchardist may sit down winter evenings and plan out every twig on every tree, with the kind of tree and its location, and what sort of soil it shall be in, and what fertilizer and how much water it shall have. The sub-headings of the book are as

follows: Clearing land for fruit. The nursery—buddings and grafting. Preparation for planting—planting

Pruning orchard trees and thinning Cultivation-fertilizers for fruit trees Irrigation

Part third is devoted to a description

and habitat of each of the many Call-fornia fruits with all their advantages and peculiarities. Grape propagation-planting and care-occupies a division by itself. Semi-tropical fruits-the date, fig. olive, orange, lemon and lime-are treated at length, and in shorter space the banana, guava, jujube loquat, per-

rickly and aligator pears.

The principle of economy is given prominence throughout the work, for in a business of as much importance as fruitgrowing is becoming, succes often depends upon small economics. Five acres under the intensive cultivation illustrated by Prof. Wickson, would in est cases pay more net profits than

160 acres in hay or grain in the old Whether viewed from the standpoint of practical money making, scientific investigation or mere romantic interest, the book is a treat for every one interested in nature.

THE BOOK OF MORMON'

Two lectures by Dr. James E. Talmage; an account of its origin, with evidences of its genuineness and authenticity. Prepared by appointment. These lectures are taken from Dr. Taimage's book "The Articles of Faith," but are presented in separate form for the use of investigators and students. Price 10 cts. For sale by the SUNDAY SCHOOL SUPERINTENDENTS

with Dr. Talmage's new Church text book, The Articles of Faith? If not, call at the "News" office and obtain the special terms offered. FIF YOU WISH TO ADVERTISE
