For the sake of our reputation, and to spare us further humiliation, it is to be hoped that the "verba! amendments" are unambiguous and in the sense required by Eng-land. These Wagons are designed especially for the Utah and Montana trade, with many important improvements never before used—improvements which experience has laught as are required for this section.

They are made of the toughest Oak, Ash and Hickory that the forests of Ohio, Michigan and Wisconsin can furnish.

This timber is thoroughly seasoned, being kept from three to five years in open sheds. The Haus are then subjected to a degree of heat sufficient to make them perfectly dry, wishout injuring the fibre or strength.

The Haus are of black Locust, and warranted not to check.

The fellors are socked in boiling oil before being painted, and will not shrink.

The entire wood work of these Wagons is seasoned, so as to stant the severe test of this peculiarly dry climate.

They have c ips aroun I front Axle for the hound brace, and stay-chains instead of a bolt through the Axle. The fires are fastened with the fam has double-beaded California Rivet. On all medium and heavy Wagons the tire is one eighth inch thicker on hind than forward wheel. They are the best proportioned and best in used Wagon that ever crossed the Miscouri river.

We challenge comparison on each of these points.

The bottoms of Boxes have double clear in the centre secured by double straps that hook over the top, instead of being simply rivited to the sides of the box.

Both lower and top boxes are ironed on top.

We use a Patent Thimbie Skein of our own make, set by a Patent Axle Guage, which secures perfect uniformity, and makes the Lights t Draft Wagon that can be made.

We use the Patent Bent Hound on the smaller sizes.
