THE DRY BENCH PROBLEM.

A RESERVOIR PROPOSED.

The City Council committee, to whom the petition for a supply of water for the dry bench was referred, met in the City Hall last evening to consider the matter. Many of the residents of the bench were present, besides lawyers Brown and Williams and other interested parties.

Col. Stevenson presented plans, specifications and estimates for the construction of a reservoir at Little Valley, in City Creek Cañon, which he thought could be easily accomplished

at comparatively little cost, and of dimensions sufficient to afford an ample supply of water to the suffering district.

he had examined the figures and esticality of the proposed reservoir. He would take the contract to do the required work, and furnish the necessary material to make the reservoir, for the sum of \$33,000, and would give bonds to the city for the faithful performance of the contract.

Surveyor General Salomon said he had recently visited Little Valley and was surprised at the natural adaptability of the place for a reservoir. The valley is oval and the bottom, which has but little slope, is already lined with a deep layer of pure, solid clay that would be totally impervious to water. He thought the estimate of rado, saying that he had a very pleascost was not too high. A natural ant journey thus far, the only hindyke exists at the lower end of the valley which would render it unnecessary to make a very long dam. As a result of the reservoir he thought an ample supply of water for the needs of the route as simply indescribable. the petitioners could be obtained; the water for the city could settle and be clear; the pressure on the mains would be greatly increased, and justice would be done to the part of the city in question.

Wm. J. Silver said he had carefully examined Little Valley and deemed the project under consideration a feasible one. He knew the natural dyke was sufficiently strong to hold back any body of water that could be accumulated above it. He heartily endorsed the plans of Col. Stevenson, but could pass no opinion upon the estimated cost. He was confident that a proper dam could be so constructed as to take advantage of one of the most natural reservoirs that he ever saw. He said there was a strong prejudice against reservoirs in the minds of those who were ignorant of their construction, but when properly made there is no reason why they should not be successful. In India there are over thousand, which were built nity by half civilized natives, hundreds of years ago, and are still in good condition, and he thought the City ought to be able to make one successfully. He further stated that if the City would not do it, a company would no doubt be formed who would, if they could get the City Council to grant them the privilege under proper restrictions. He sat down amid considerable applause. Several residents of the dry bench enumerated the great disadvantages of the scarcity of water for garden and house use, under which they labor. In some instances people in that vicinity had actually suffered for the want of sufficient water to drink during the hottest weather. They were obliged to pay fifty cents per barrel for the necessary liquid, and often were forced to buy two barrels at once or none, and before this was used it would become foul and unhealthy. A great many wells, varying in depth from 60 to 176 received a letter from Jens N. I am in want of some one at present to assist me in farming on shares. We are two old people, belonging to the Church, and have no family. We must have a man with a team of his own.

We have a nice farm, with good supply of water, and raise plenty of hay for cattle, and could also raise plenty of grain if we had help to work it. There is also plenty of firewood just

We do not care whether the man is married or single, but would prefer a Scotchman, being Scotch ourselves.

I am, yours respectfully, DAVID CHAMBERS.

A Deeply Interesting Narrative.

The name of Rev. John H. Chandler is an honored one in the literature and labor of the Baptist Church; especially in connection with his forty years' devotion to missionary work in Burmah and Siam; a work in which his accomplished wife shared during the whole of this long period. For most of this time his residence was at Bangkok, in Siam, the capital of the kingdom. Here he rendered himself valuable to the king and his court, as translator of important documents. In 1859 he was appointed U. S. Consul at Bangkok. He was also tutor to the present king of Siam.

One of the almost inevitable results of missionary labor is the breaking down of health, and neither Mr. nor Mrs. Chandler escaped. In 1872 their condition became so serious that they returned to this country for medical treatment. They went back to Siam in 1872, intending to stay for six years, but both soon grew worse, and had to come to the United States at the end of was at the time is given in his own words, as related to a gentleman who called upon him recently at his home, in Camden, New Jersey: "I was a complete wreck. My lung weakness was so great that for months at a time I could not write or read. The lawful cohabitation. He was taken present term. Twenty-five answered nerves of my stomach were totally demoratized. My food would not digest. I had to lay aside all my teaching and literary • labor. I was unable to do either physical or mental work. I. was also troubled wish palpitation of the heart and with an obstinute catarrh of ten years' standing: altogether I was a very, very sick man. While thus suffering, the Rev. Dr. MacFarland, a Presbyterian missionary, at Bangkok, called my attention to Compound Oxygen. He had tried it for indigestion and general debility and had found it very beneficial. "While I was on my way home I 133 Martin Mankin, East Cañon Creek found myself in a very critical condition. I almost gave up hope. On 10 Wm. Groesbeck, Salt Lake City. reaching Philadelphia I consulted Drs. Starkey & Palen. I soon began the use of Compound Oxygen. It acted like a charm. Very soon I felt signs of returning strength. In the matter of diabetes the relief was particularly noticeable. Improvement went on gradually but surely. I became so that I could . eat with regularity and really enjoy my food. In time my old symptoms of wretchedness and weariness passed away and I was myself again. "You may judge of my health and strength when I tell you that I was Numbers 82 and 24 had been sum- with the Siamese embassy in New York moned but were not present; 161 and . Mathews, 606 Montgomery Street, San Francisco.

District Court Proceedings.-In the case of Rebecca Slater, administratrix, vs. Jerome B. Paxton, the motion to set aside and vacate the order requiring the Justice of the Peace at Stockton, Tooele County, to transmit the papers in this case, was denied and an exception taken.

The demurrer in the case of Wm. Fewel vs. William G. Green, which was heretofore argued and submitted, was sustained.

In the case of the Charter Oak Life Insurance Company vs. Wm. A. Stevenset al, the demurrer to the cross complaint was argued, as was also a motion to strike out a part of the answer.

Another Arrest.-This morning Mr. | acquaintance in this life. Wm. A. Rossiter, the well-known keeper of the Theatre box office, was arrested, the grand jury having found of petit jurors were called in open an indictment charging him with unbefore U. S. Commissioner McKay, and to their names: released on \$1,000 bail, his bonds being signed by William C. Spence and O. P. Arnold.

Mr. Edward Brain has also been indicted, the offenses being polygamy and unlawful cohabitation. He appeared before the Commissioner this morning and gave bonds in \$3,000 to await trial, Jos. C. Kingsbury and John Kirkman being sureties.

A Characteristic Paper. - The United States Democrat, published at Washington, D. C., is successor to the La Crosse Democrat, and is guided by the same genius. It is only necessary to say that Brick Pomeroy is at its helm to convince those familiar with the literary ability of that gentleman, that the Washington journal represents concentrated vigor. He is intensely combative, and when he strikes at an opponent he never puts on soft gloves, and injects all the force into expression that can be given in words, deftly and cleverly handled and constructed. The tides may flow and the breezes blow, but Mr. Pomeroy's Democracy never changes. He is an out and out one, and always prepared to give a reason for the Democratic hope that is in him.
