SENATE PROCEEDINGS.

Washington, Feb. 8.—There was a larger attendance in the senate gal-leries today than usual, owing evidently to the expectation that there would be some revival of yesterday's scenes over Mr. Patterson's caucus resolution. Mr. Patterson's caucus resolution. Mr. Tillman opened the proceedings of the day by referring to a petition vigorously presented by him from the Red Rock Fuel company of West Vir-ginia, complaining that the Baltimore and Ohio company had refused to per-mit that company to connect its tracks with those of the Baltimore and Ohio, thus as Mr. Tillman expressed it.

rate bill, on which the house votes to-

day: The bill, according to Mr. Hepburn's statement, in closing the debate on the measure, was intended, and did, so far as it could be made, he said, comply specifically with the recom-mendations of President Roosevelt on the rate question. It gives the inter-state commerce commission authority state commerce commission authority when a rate has been complained of as "unreasonable" by a shipper, to in-vestigate the rate, state whether or to be unreasonable, and if found to be unreasonable, to name a rate which is to be just and reasonable and fairly remunerative, which is to be the maximum rate to be charged. This rate so fixed is to go into effect

days after it is announced by the commission, subject during that commission, subject during that time to be set aside or suspended by the comission or by the courts. After it has gone into effect, it is to remain the rate for three years. During this time the opinion has been expressed by those who have participated in the debate, that the rate may also be re-viewed by the courts, and if found to be in conflict either with the terms of the act or with the Constitution br be in conflict either with the terr the act or with the Constitution being confiscatory, can be set aside by the courts.

Another Important feature is the de-finition of the word "railroad" and "transportation" in a manner to include all auxiliary instrumentalities of

the common carrier and to bring them within the control of the commission. This power to name a reasonable rate and the inclusion of the auxiliaries within the jurisdiction of the commis-sion are said to be the new features. All other provisions are modifications of existing law. They include pub-licity of railroad methods, which is to be aided by prescribing a system of bookkeeping and enlarging the commis-

sion to seven members and increasing salaries of members to \$10,000 a year.
