AMONG BINGHAM MINES.

Butterfield Mines Soon to Become Active The Butler-Liberal.

transpires that the Butterfield It transpires that the Butterfield mines are now the property of the Con-glomerate Mining company, a Denver corporation, which with G. Lavagnino as its manager owned the Old Tele-graph mine and sold it to the United States Mining company. It was presumed that when Lavagni-no paid off the local mdebtedness he was acting as agent for the Paris com-pany which invested so much capital in developing the Butterfield, but it seems the Paris people decided to throw

seems the Paris people decided to throw up the sponge, and now the Conglom-erate company, composed of French residents of Denver, absolutely owns the property and will resume its operation after plans inaugurated by its former owners. It is said the great Butterfield tunnel, on which work was suspended at \$,200 feet, will now be ex-tended to the Eagle Bird veln-some-thing over 600 feet-and perhaps con-tinued to Old Jordan lines, less than 2,600 feet distant. is a most encouraging indication, and while it is expected to have to run 159 or 200 feet more to strike one of the veins, it would not be surprising if one was struck sooner. W. Foster was down from the Se

vier mine last week looking for men to work in the mine and mill. He says everything is now about in readiness for regular operation. A test of the mill was made last week, and it went without a hitch or wabble. It is expected to get enough ore started to moving to put the mill into regular commission next week. J. M. Jones of the Continental Paint

and Varnish copany of Kansas City, accompanied by Ide Cummings and J. D. Dobson of Omaha, were here last week and made a trip to the mineral paint mines near Koosharem. Mr. Jones was here last year and made a number of samples of the mineral, and shipped one carload. The dirt proved of a very good quality, and arrangements were being made to ship a lot of it this spring, but the floods washed the plant away, and it was not until recently the product could be handled again.

The gentlemen have returned east, and will complete preparations to handle the product of these mines. The deposit is not very extensive, so far as developed, but there is sufficient to pay for the operation of property.-Richfield Reaper. the

Broker Cal Woods departed today noon for New York where he will meet Mrs. Wods, who has been spending sev-eral months in Europe.

Assistant General Manager May of the Majestic Copper company arrived from Beaver county this forenoon and expects to return to the mine tonight.

The stockholders of the South Wedge property near Marysvale have a desire to consolidate their interests with the Perjue-Surprise. Stockholders of the latter, however, are not a unit in favor

of the proposition. Of the big mill at the Bamberger-De Lamar mine in Nevada, the Lode says:

"The mill is now running better than it has been doing since the start, the only trouble being that there is not sufonly trouble being that there is not suf-ficient power. It is thought that this defect is either in the transmission from the wash or in some of the con-nections. However, an expert electri-cian Mr, Haywood, will be down here for the purpose of examining into the matter and inding where the trouble lies. The mill has been running through from 200 to 400 tons of ore daily, the hatter being the largest amount of rock out through the mill in twenty-four hours, and was accomplished on Fri-

hours, and wan accomplished on Fria second state of the second Treasury Balances.
