

Saturday, November 23, 1894.

FRAGMENTS.

JAMES H. BART, Esq., and wife returned from the East last night.

The Home Missionaries will visit the country wards of the State to-morrow.

The juvenile instructor should be in every family. It is a genuine educator of the young.

Reverend services at the Ward meeting-houses at the regular hours to-morrow evening.

SERVICES of the Church of Jesus Christ of Latter-day Saints at the Tabernacle at 2 p.m. to-morrow.

The Second Quorum of Seventies will meet in the 15th Ward School house on Monday evening, at 7 o'clock.

The members of the 15th Ward choir are requested to meet in the chapel immediately after Sunday School to-morrow.

The irrepressible, indefatigable, active, self-assertive Dwight S. Dow, well known in Salt Lake, is lecturing at Laramie on the mysteries of keeping accounts.

Quite a large number of people are out of employment just now. Well-to-do philanthropists should direct themselves in procuring work for that class of unfortunate.

The Tenth Quorum of Elders will hold their regular meeting next Monday, November 24th, at 7:30 p.m., in the School House.

L. W. Richards, President.

BROTHER C. W. STAYNER has been invited to deliver his lecture on "Home and its Influence on Society," at Farmington. It will be given to-morrow evening, at the house of that town.

We learn from Mr. Robert Morris that the firm with which he is connected—Summers & Co., sell all the leather-rains and linings they make, the demand being fully equal to the supply. That is one branch of home industry that is brisk enough.

Dr. Fowler in the Tribune reporter on the election of Cleveland: "Think business will be seriously affected; that mining will be depressed and the Saints will be emboldened." We might add that the action of the grand jury on a certain case will embolden abolitionists.

The decorating of the ceiling of the Salt Lake Theatre by W. C. Morris and assistants is progressing rapidly, considering the character of the work. It will be a fine piece of ornamental painting. The fact that Mr. Morris is the artist is sufficient to insure brilliancy and beauty.

This morning a newspaper man said to Mayor Sharp: "What do you think will be the general effect upon Utah of the election of Grover Cleveland?" "I decline to answer," said he, "until you inform me what effect the expression of my view would have upon Grover Cleveland." The answer was distinctly requested that an easier one be given him, but the Mayor was inexorable.

This morning's Tribune contains a long list of opinions expressed by various citizens in relation to the expected future effects of the success of the Democracy in the late election. Nearly all the anti-"Mormons" are full of lugubrious anticipations. We regret that they should be afflicted with the "blues" at this early stage of the change. They should take a lesson from the "Mormons" and feel cheerful and happy which ever way affairs go. Don't be discouraged, gentlemen, but possess your souls in peace and patience.

LOCAL NEWS.

Died in Youth.—By notice in another column, it will be observed that the eldest son of Brother and Sister Jackson, of American Fork, has passed from this life in the bloom of manhood. He was aged 23 years and beloved by his family connections, who are thrown into the deepest grief by the bereavement. He was the dearest sympathy of many friends in their affliction.

The Abortion Case Ignored.—We stated last evening that it was reported the grand jury had ignored the case against John W. Irons and Dr. Allen Fowler. The rumor was correct. Comment is unnecessary—for the present. Whenever we consider it in order to comment, however, we will not fail to do it. The public may rest assured of that. That case, with the facts of which we are fully conversant, will do to salt down and put away.

Co-op. Furniture Co.—The Co-op. Furniture Company announce in our advertising columns that they have just received five carloads of furniture, consisting of bedroom and parlor suites of the latest designs, novelties and a large variety of all other kinds of furniture. This enterprising firm keep employed a large number of mechanics manufacturing furniture, with which they keep their salesrooms well stocked. They also keep on hand stock superior patent folding desks, which is greatly admired.

Fatal Accident.—The Ogden Herald says that about 11 o'clock on Thursday evening an accident happened on the Union Pacific, to an eastbound freight train, No. 2, at Fort Bridger through a switch being left open. The engineer named Nelson, who was at one time a resident of Ogden City, but whose home was more lately at Evanston, was killed and two or three others were seriously injured. Undertaker S. M. Preshaw has gone to Evanston with a burial case, to attend to the obsequies of the unfortunate man.

MacKnight's Next Lecture.—Next Friday evening, November 23rd, J. A. MacKnight will give the first presentation of his illustrated lecture on the "History of the United States." The forty five views which will accompany the graphic outline of history are partly in colors, and the one showing the assassination of President Lincoln is a mechanical view which vividly portrays the enactment of that great tragedy. They will all be given about 25 feet in diameter, and carefully explained by the lecturer. A feature of the evening will be the performance of national patriotic airs by the Sunday School Union Band, under the leadership of Prof. Fowler.

On Saturday afternoon next (Nov. 24th) at 3 p.m., the same lecture and pictures will be presented for the day school and Sunday school children, who will be admitted for 10 and 15 cents—adults 25 cents. To enable the older pupils to have the benefit of the entire lecture (as it will be abridged somewhat to prevent wearying the younger ones) who attend the lecture, they will be admitted on Friday evening, all pupils and students for 15 cents. General admission will be given at 25 cents—reserved seats 35 cents.

MORRIS K. WHITNEY.

MIS. LIFE AND DEATH.

It is with feelings of sadness mingled with resignation, that we chronicle the death of Brother Morris K. Whitney. He passed away as the clock struck eleven this morning, at his residence in the 15th Ward. The members of the News are familiar with the fact of his long illness, which commenced last June and continued with little respite up to the hour he died. His disease was of the heart, principally, though dropsy and rheumatism were the ultimate cause of death. Speaking generally, it was the breaking down of a constitution, naturally strong, under the pressure of years of faithful and incessant toil.

The first marked symptom of his final illness, was felt on the night of Sunday, June 1st. He came home from a visit to one of his sons, complaining of shortness of breath, and suffered much during the night from coughing. The next morning, however, he went to the office and struggled through the day's labor, and in the evening returned home to undergo another night of suffering. This continued for two weeks, during which time he would not feel of his condition outside of home, and though seized with spells of faintness at the desk, rather than reveal the truth to his fellow-clerks, who would have insisted on his going home for rest and care, he would turn his face to the window, as if gazing out on the street, all the space had passed. At the end of about a fortnight he could endure no more; he fell sick at home and remained away from the office till the 1st of July, when he thought he was able to return to work, being too conscientious to stay away and let others do the labor he was paid to perform. His return back to work was against the expressed wishes and counsel of his employers, fellow clerks and friends generally.

His strength, as foreseen, was not equal to his anxiety and desire to be up and doing. He found he could only spend a few hours at his post each day, and would then have to wait his way home, waiting for the first time in his life, a case to support his tottering steps. Returning home one evening in the latter part of September, the weather being cold and rainy, he took a chill and suffered a relapse. From that time he was confined to his room, though he was slowly riding out to take the air, and for weeks remained in about the same condition. He was unable to lie down at night, and slept mostly sitting up, with his arms and head resting against a pillow upon the table before him.

The last few weeks, as his body grew weaker and weaker, his mind began failing also, and his memory, which was extraordinary, for the first time began to show symptoms of decay. He grew haggard and emaciated, and though at times hopeful and even cheerful, it was evident that his departure for the next world was only a question of a little time. Since last Sunday he has sat helpless in his chair. Dropsy had set in before, and was followed by rheumatism, and he suffered much agony from the pain in his feet and legs. He was treated for this and seemed considerably better only a day or two ago, though still suffering pain. He began talking in his delirium, about 10 o'clock last night. Opiates had been administered for his relief, and he lost consciousness and sense of pain about an hour later. He never revived afterwards, but slept the rest of his life away and died without suffering. About half past twelve, when he was sitting upright, looking into the fire, and his son Joshua, who watched with him, asked him if he did not think he had better lay his head down on the pillow. "Yes, yes, yes," he replied, "but let me think." Soon afterwards, he gazed round the room as if following a row of faces, and in a low tone to himself: "fading, fading, fading." These were his last words.

Horace Kimball Whitney was the oldest child of Newel K. Whitney, late Presiding Bishop of the Church, and Elizabeth Ann Whitney, both of whom preceded him to the spirit world. He was born July 25, 1828, at Kirtland, Ohio, where he was also baptized, his parents having embraced the Gospel there, when he was a boy seven or eight years of age. He attended the Hebrew school taught in Kirtland, where the Prophet Joseph Smith and other notable Elders were his fellow students, and attained marked proficiency in Hebrew, Greek and Latin, as well as his mother tongue, besides mastering other branches of education.

He was possessed, in many respects, of a remarkable mind, and loved books almost inordinately. When sent to bed to prevent him from studying to excess, he would raise his chamber window and pore over his lessons by moonlight. His memory was "like books of steel." He had a habit of jotting down important events in his history as they passed, and would relate them with detailed exactness at the expiration of thirty or forty years as clearly and graphically as if they had happened but yesterday.

He left Kirtland with his father's family in the fall of 1838, Bishop Whitney having been summoned to Missouri to preside at Adam-ondi-Ahman. But ere the reached their destination, the Saints were driven and scattered from the State, and they stopped at Carrollton, Greene County, Illinois, where the deceased, while his father returned to Kirtland on business, taught school and helped to support the family. He was but sixteen years of age, and according to the laws of the State was not qualified to teach school. However, he answered so well the questions put to him by the board of examiners, and having a matured appearance, none suspected that he was not old enough. In concluding the examination, one of the board said: "If you are Mr. Whitney, you are about twenty-three years of age." "You needn't guess again," was the response, and the young teacher passed without further question.

Later on, Bishop Whitney and his family fled from Carrollton to escape mobbing, the people there having found out that they were "Mormons," and next settled at Nauvoo, or Nauvoo, in 1842, just before starting on a mission to the Eastern States, the deceased was ordained an Elder under the hands of the Prophet Joseph Smith. The Prophet, with whom Horace was a favorite, was murdered while he was away.

He left Nauvoo in 1845, in the exodus, and early in the following year went from Winter Quarters, as one of the "Mormon" pioneers, to hunt a home for his people in the wilds of the Rocky Mountains. Arriving in the valley July 24, 1847, he made it his permanent abiding place.

His teaching school here in early days, and when the District News was established in 1850 was one of the original force of compositors. He had previously set type on the Times and Standard in Nauvoo. One of his earliest fellow-laborers in this office was President George Q. Cannon, President John Taylor being editor.

For over thirty years he has been a clerk in the District Office, during the life-time of President Brigham Young, since his death, and up to the hour when his own health broke down. He was a man of more than ordinary ability, but very retiring in disposition, and though one of the most sociable and genial of natures in private life, he was instinctively shy from the glare of publicity. He was one of the original members of the Deseret Dramatic Association, and after leaving the stage played the fiddle for many years in the Theatre orchestra.

In business he was the soul of honesty and uprightness, punctual and faithful, and conscientious almost to a fault. His private life was equally above reproach; he was a devoted and just husband, and a loving and good father. If he had an enemy he was not aware of it. He leaves a large family and a wide circle of friends, who, while regretting the loss of his society and labors, will be glad to learn that his sufferings are at an end.

The funeral services will be held in the 15th Ward Chapel, on Monday, November 26th, at 11 o'clock a.m. Friends of the family are invited to be present.

THE DESERT HOSPITAL.

DR. ANDERSON APPOINTED MEDICAL SUPERINTENDENT.

Editor Deseret News.

At a special meeting of the Board of Directors of the Deseret Hospital Association, held on Friday, Nov. 21st at 8 o'clock a.m., in the Hospital building, Dr. W. F. Anderson was appointed to the position of medical Superintendent and immediately declared to that office in the institution. It having been understood beforehand, that the matter had been decided by the board, and that he was willing to accept the position.

A vote of thanks, was also tendered to Dr. Joseph S. Richards, for the valuable services he had rendered the Hospital while attending to the duties of a visiting physician during the past few months, and the wish was expressed by all present that he should continue to visit whenever he had the time or inclination to do so, as it is the desire of those connected with the home for the afflicted to secure for it the aid and influence of the best physicians in Utah, and that it may develop, in the near future, into an institution of which the people will be justly proud.

H. B. Clawson, President.

E. B. Walla, Secretary.

Notice.—Sunday School Superintendents are requested to notify their schools to-morrow that on Saturday, November 24th, Mr. J. A. McKnight will give a lecture in the Salt Lake Theatre. Subject—"United States History."

J. C. CUTLER, Salt Lake State Superintendent of Sunday Schools.

A Judicial Appointment.—We are pleased to note the fact that Dr. W. F. Anderson has been appointed Medical Superintendent of the Deseret Hospital, a position he is eminently qualified to fill. He has taken a practical interest in the institution from its inception. He is a ripe scholar, fully up to the times in his profession, being one of the most capable surgeons in the West.

The Hospital is growing, being gradually placed upon a basis to ensure the extension of its usefulness.

Theatre.—The play of "Chipsa" produced for the first time at the Theatre last night by the Grismer-Davies combination, was played with spirit and ability and was highly successful.

It afforded an opportunity in another direction for the display of that talent so eminently possessed by Mr. Grismer and Miss Davies, and demonstrated their versatility and histrionic genius. The matinee to-day drew a big house.

To-night the intensely attractive play of "Michael Strogoff" will be presented, and we can promise all who attend a splendid play splendidly performed. This is a thoroughly good company and worthy of public patronage.

Teachers' Association.—Pursuant to adjournment the Salt Lake County Teachers' Association met in the Fourteenth Ward Assembly Rooms to-day.

Mr. David R. Allen, on the subject of School Apparatus, thought that the schools of the county should be better supplied with school apparatus than they are at present. He suggested that in districts where it is impossible for trustees to furnish all the maps, charts, etc., that are needed, the teacher, if alive to his work, might help himself very much by manufacturing these things for himself.

Miss Lizzie Stevenson read an excellent article on education, a selection from Page's Theory and Practice of Teaching.

Mr. Wm. M. Stewart on the methods of teaching primary and advanced geography, said that he considered the first thing a teacher should do was to study the mind and its faculties, and specially cultivate the child's imagination, because in the study of geography the teacher has to depend almost entirely on this faculty. In primary geography the speaker took what the child already knew about the subject, as the foundation on which to build further instruction. Commenced with the settlement at home, learned what the people were doing, what products were raised, etc. Asked many practical questions about different things that they have seen, such as how are ponds, lakes, rivers, clouds, rain, etc. formed, allowing the pupils to write out the answers themselves. In this way knowledge was forwarded, prepared the children to accept of further instruction of other countries in an intelligent manner. As soon as this point was reached the pupils were taken in imaginary journeys around the world.

In advanced geography the gentleman had the pupils do a large portion of the lecturing themselves. Considered it very proper and instructive to have the pupils draw maps of the countries studied.

The Association was here informed with a song by Miss Jessie Givens.

The proceedings were ably catenioned by the critic, Miss Emma Finch.

If the teachers of Salt Lake County could thoroughly understand what they have been doing, what products were raised, etc. Asked many practical questions about different things that they have seen, such as how are ponds, lakes, rivers, clouds, rain, etc. formed, allowing the pupils to write out the answers themselves. In this way knowledge was forwarded, prepared the children to accept of further instruction of other countries in an intelligent manner.
