

## RIOT AND PILLAGE IN A FRENCH TOWN

Rioters in Armentiers Wrecked  
Shops, Sacked Houses, Attacked  
Banks and Secured Money.

LANCERS CHARGED THE MOB.

This Checked Proceedings for Awhile—  
Trouble Broke Out Again—Troops  
Finally Got Upper Hand.

Armentiers, North France, Oct. 13.—This town was today given up to riot, pillage and incendiarism as a consequence of the weavers' strike. Nothing this morning foretold the serious disturbances about to occur, but at noon the strikers, not receiving answers to their demands from the employers, broke out into the wildest excesses. A mob of 6,000 gathered in the great square and urged the troops stationed there to throw down their arms, shouting: "Down with patriotism!"

The rioters then spread through the principal streets, breaking the windows of the stores, dragging out the huge display of rolls of linen, which they stretched across the streets with the object of impeding the advance of the troops. They wrecked shops, sacked the houses of persons obnoxious to the employers and attacked the banks, in two of which they succeeded in stealing a few hundred dollars from the tills.

One gang set fire to a large quantity of linen in the cellars of Messrs. Becquart's factory. Others broke the windows of the houses and threw inside burning straw. The troops, hampered by the obstructions thrown in their way by the rioters, were, for a long time, unable to disperse the mob. Finally a determined charge by lancers restored temporary quiet.

After dark the rioters tore up the sewer gratings and paving stones and stretched wires across the streets. Women brought piles of empty bottles for use as missiles, while boys swarmed up the lamp posts and extinguished the gas jets.

In spite of the efforts of the soldiers the rioters then proceeded to sack the houses, dragging out the furniture, saturating it with petroleum and setting fire to it in the street. Fire was set to two houses belonging to the strikers' employers and one big factory. The local brigade being inadequate to cope with the confagurations, an urgent appeal was sent to the neighboring towns of Lille, where a strong police and reinforcements of firemen were sent.

By midnight, however, the troops and police had gained the upper hand and dispersed the mob. The streets are now deserted except for the armed patrols. The authorities are taking measures to ascertain the names of the ringleaders in the riot. As a result of the intervention of the military the strike leaders have decided to submit the employers' terms to a referendum of the workmen tomorrow.

**Archbishop Kain Dead.**  
Baltimore, Oct. 13.—Most Rev. John James Kain, archbishop of St. Louis, died tonight at St. Agnes sanitarium, where he had been a patient since May 12. Death, which came peacefully, had been hourly expected by his attending physicians for several days. Dr. J. M. Stone and a number of priests and relatives, including his sister, a sister of charity known in the religious world as Sister Mary Joseph, were at his bedside when he died.

Heart disease was the ailment for which the archbishop was first treated when he arrived at the institution, but a general breakdown from overwork caused him much trouble. Recently appendicitis developed and the prelate rapidly sank, an operation which was deemed necessary, being unavailing owing to the enfeebled condition of the patient. No arrangements have been made for the funeral.

**Czar's Visit to Rome Abandoned.**  
Berlin, Oct. 13.—The Rome correspondent of the Cologne Gazette says that it is now certain that the proposed visit of the czar to Rome has not only been postponed but that it has been completely abandoned.

**H. C. Ferris Succeeds Supt. Ducl.**  
Omaha, Oct. 13.—Henry C. Ferris, assistant superintendent of the Nebraska division of the Union Pacific railroad, has been appointed to succeed Supt. Ducl of the Colorado division of that road, who will after Oct. 15 be general superintendent of the Nebraska division with headquarters at Omaha.

**French Strikers on Rampage.**  
Armentiers, France, Oct. 13.—Since this morning bands of strikers, who pillaged linen stores, have stretched pieces of linen across the streets to prevent cavalry charges. The banks have also been attacked, all the houses are closed and the inhabitants are in a state of terror. There are troops here but they are insufficient to maintain order.

The strikers barricaded all the corners of the streets and set fire to a factory. The cavalry charged along the streets in spite of the obstructions, wounding a number of people.

**Three Victims of the Flood.**  
Passaic, N. J., Oct. 13.—The water is rising rapidly now in the flooded portions of the city and a majority of the houses in the Dundee section will be bluish and dry in another twenty-four hours.

The death list of the flood victims here numbers three. The loss to mill property here is figured at \$1,000,000 and it may go higher.

**Textile Strike Finally Ends.**  
Philadelphia, Oct. 13.—The Mercantile and Dryers' union has given the dyers permission to return to work, thus finally ending the textile strike which began in this city on June 1. The dyers are the last of the 120,000 strikers to return to work.

**A Denial by Lord Alverstone.**  
London, Oct. 13.—The Alaskan boundary commissions held another secret session this morning and adjourned for luncheon at 10:30 a. m. Nothing of a public nature developed except that when Lord Chief Justice Alverstone came out of the conference room he asked Secy. Tower to ascertain whether the original treaty was signed both in French and English. No explanation was given of the reason for this question.

The tribunal adjourned until tomorrow without reaching a decision. Lord Alverstone has telegraphed to Premier Laurier a formal denial of a newspaper story mentioned in the Dominion parliament yesterday to the effect that he (Lord Alverstone) had said that the United States had a stronger case in the Alaskan boundary question.

## Growing Old

Ought not to mean growing weak and feeble. It does not mean weakness or feebleness for those who eat with good appetite and sound digestion. It is of the utmost importance that old people should retain power to digest and assimilate food which is the sole source of physical strength. When age brings feebleness it is generally because of the failure to assimilate the nutrition contained in food.

Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and enables the perfect digestion and assimilation of food. It invigorates the liver and promotes general physical well being.

"It is with gratitude we acknowledge what Dr. Pierce's medicine has done for grandmothers' good, in fact it has cured her," writes Miss Carrie Ranker, of Perryburg, Ohio. "She had doctored with several physicians but found no relief until Dr. Pierce's medicine was given. She has taken only three bottles of Golden Medical Discovery and is entirely well. She suffered with pain in kidneys, bladder and liver for ten years, and her limbs were swollen with dropsy so she could hardly walk. My grandmother's name is Mrs. Caroline Jensen, her age is 71 years. I will gladly answer all letters of inquiry."

Sick people are invited to consult Dr. R. V. Pierce by letter, free. All correspondence is held as strictly private and is held as strictly confidential.

Dr. Pierce's Pleasant Pellets regulate the bowels.

The lord chief justice says the report is a "complete fabrication."

Nothing was given out regarding the deliberations and apparently nothing will be issued today.

Mr. Aylesworth, the Canadian commissioner, in regard to the question of the Dominion parliament yesterday, on the subject of an interview with him today made the following statement to the Associated Press:

"Being asked a few days ago whether there was any likelihood that the declaration of the tribunal would be informed by diplomatic considerations, Mr. Aylesworth replied, speaking for himself, that he certainly would never consent to give away a single inch of territory he believed to be British."

The Canadian story created some concern. It appears certain that neither Mr. Aylesworth nor Sir Louis Jetté, attorney of the Canadian commissioner, have the slightest intention of agreeing to the American argument, and Lord Alverstone's attitude is still absolutely a matter of speculation. Though the Americans still have no reason to diminish their feeling of hopefulness that some agreement will be reached, this feeling is largely based on the trend of Lord Alverstone's interpolations during the arguments.

## POISONED DRINKING WATER.

Cobalt Found in that Used by  
Troops at Cripple Creek.

Cripple Creek, Colo., Oct. 13.—City Chemist F. V. Martin, of Colorado Springs, has analyzed the drinking water which caused the outbreak of 88 soldiers at Camp El Paso last Thursday, finding that cobalt was present in the proportion of one and one-half grains to each gallon of water.

"We are convinced from the result of the examination," said Dr. P. O. Hanford, surgeon general of the national guard, "that the poison was placed in the water by persons unknown."

## A MOST FOUL MURDER.

Edward Smith's Headless Body  
Found on a Skidway.

Wasau, Wis., Oct. 13.—The headless body of Edward Smith was found near the village of Edgar, and tonight public feeling against Arthur Young, accused of murdering him, nearly resulted in a lynching.

Saturday afternoon while driving Mr. and Mrs. Henry Gebel discovered the body of a young man on a skidway used in the operation of a coal cart covered the head of the corpse. The body was barely identifiable. The head was separated from the body and the side of the skull was badly fractured. The bullet hole was found in the front and back of the skirt and the hat was gone.

Smith bought a new hat the day of his disappearance, and Arthur Young, the accused murderer, was wearing at the time of his arrest. Smith was known to have \$500 at the time of leaving, but only \$10 was found in his watch pocket at the time the body was discovered.

## The Tingey's Trial Successfully.

Baltimore, Oct. 14.—After successfully undergoing a test for speed and endurance under a trial board of officers of the navy, the torpedo boat Tingey has returned to the builders' yards here. The boat was run over the Barren Island course under severe conditions as to wind and sea, owing to the recent storm. In the speed test she made 25 knots, being one knot in excess of contract requirements. In the endurance test she maintained steam pressure at 240 pounds throughout the run. The trial was conducted by a board composed of Capt. Charles J. Train, Capt. L. C. Logan, Commander W. C. Cowles, Lieut. Commander W. S. Smith and Naval Constructor J. J. Woodward.

## German Naval Estimates.

Berlin, Oct. 13.—The German naval estimates for 1904 are in the hands of the finance committee and have not yet been made public but it has been learned that they contain nothing except statements of the sums required for the maintenance and the construction of vessels already under way, and they have been placed on an irreducible minimum for keeping the fleet on its present effective basis. Such new ships as will be asked for under the naval program will be included in a supplementary budget, which, it is understood, will be included in the supplementary budget.

Small babies quickly grow to large babies when fed on Mellin's Food. Mellin's Food furnishes material for growth.

A sample of Mellin's Food costs you nothing but the asking. Will you not then ask for it for your baby's sake?

MELLIN'S FOOD CO., BOSTON, MASS.

stood, will provide for two battleships, one armored cruiser and five torpedo boats.

Besides, the government finds it will be necessary in the next two or three years to rearm the army. It is supposed, with some certainty, that the government has already ordered the artillery from Krupp without waiting for an appropriation, and that the firm is now manufacturing the guns.

The rifle now in use in the German army is measurably obsolete, or at least it is not so effective as the latest model. Hence it is planned to manufacture the 3,000,000 rifles necessary for the regulars and reserves. The old rifles will be sold for what they will bring, although new weapons will cost from \$18,750,000 to \$22,500,000.

## NICARAGUA A SCARECROW.

Panama Papers Assert that in Referring to Canal Controversy.

New York, Oct. 14.—Under the heading "The Lion Not as Fierce as Painted," local newspapers have published an article referring to President Roosevelt's policy regarding canal matters, cables the Herald's Panama correspondent.

"Evidently Nicaragua is merely a scarecrow," says one paper. "Columbia must continue to maintain herself with dignity." The foregoing is but a sample of many similar articles.

The approaching elections, which should take place within six weeks, will be a test of the peace of the republic. An outbreak is feared, however, before the end of the month, as the situation is rapidly approaching a critical stage. According to late mail advices from Bogota, canal matters are now completely ignored in the capital, and presidential aspirations and the various phases of the political struggle are the all-absorbing topics.

## MOTHERS

Who would keep their children in good health, should watch for the first symptoms of worms, and remove them with White's Cream Vermifuge. It is the children's best tonic. It gets digestion at work so that their food does them good, and they grow up healthy and strong. 25c at Z. C. M. I. Drug Dept.

## RISING BREAST

And many other painful and serious ailments from which most mothers suffer, can be avoided by the use of "Mother's Friend." This great remedy is a God-send to women, carrying them through their most critical ordeal with safety and no pain. No woman who uses "Mother's Friend" need fear the suffering and danger incident to birth; for it robs the ordeal of its horror and insures safety to life of mother and child, and leaves her in a condition more favorable to speedy recovery. The child is also healthy, strong and good natured. Our book "Motherhood," is worth its weight in gold to every woman, and will be sent free in plain envelope by addressing application to Bradfield Regulator Co. Atlanta, Ga.
