Wants a Speedy Trial.-A friend of Col. The Grand Jury.

After the exercise of a great deal of ingenuity, and the arrangement and use of the Carey Catechism, a grand jury was impaneled in the Third District Court last week, and, being duly and unduly as that of the ring in this Territory, charged, primed and prejudiced, were sent to their room to shoot off indictments. Their first shot was an indictment agains: and to bolster it up, signally fails one of their own number, who, declining to give the enormous bail of \$10,000 required by the preaching judge, was committed and contined in the i enitentiary. Now it is a serious question whether or not this carefully selected jury is capable of finding a valid indictment. It seems to us not at all improbable that every indictment it finds will be quashed, and that too

by the venerable Judge himself who pre-

sides in the Third District Court. His Honor decreed that the Grand Jury should be composed of twenty-three citlzens. We know of no law by which the Judge was authorized to do so. The"Poland"bill, The Third District Court opened under which this jury was impaneled, shows how the jurors are to be drawn, but makes no provision in regard to the number. It speaks of the number of names to be drawn from the list as previously directed by the judge, by which the juries are to be made up, but is silent as to the number required to form the juries. In order, then, to determine the number necessary to constitute a grand jury, we must fall back on the Territorial stat -utes, which remain in force so far as they do not conflict with the provisions of the above-named bill. By the Act approved: Feb. 18, 1870, it is provided that eightcena eligible men shall be summoned to serve: as grand jurors, fifteen of whom shall constitute the grand jury. Fifteen being the number prescribed by the law, by what right has the Judge decreed that the number shall be twenty-three? It may be answered, the judge has gone to the old common law of England to find the number. But there is no criminal common law in the United States, and the effort to extend the common law, by the jury was drawn, over Utah, was defeated by Congress, who expunged the section when making other important amendments. We, therefore, regard the present grand It may be asked, what object had the Judge in deciding that the number should be twenty-three? The question may be easily decided when it is understood that ter receiving this charge the grand indictment, and it is much easier, under the "Poland" bill, to get twelve Gentiles out of twenty-three than out of fifteen, even when the Carey Catechism is made to have the force of law; and that the grand point to be gained is the indictment There is another query in connection with this important subject. If twentythree is the proper number to form a Grand Jury how can twenty-two find a valid indictment? Col. T. E. Ricks, one of the panel, is committed to the penitentiary, leaving but twenty-two to answer the roll call and attend to business. Twelve of the whole number agreeing can bring a true bill, but can twelve out of part of a jury find a bill which will stand the test of legal scrutiny? Viewing the foregoing according to what light we have on the matter, we are of the opinion that the present Grand Jury is another of McKean's numerous blunders, and that all the acts of that body will be of no more value than the decisions of His Honor which the Supreme Court evaporated into thin air, and which drew upon him the ridicule and contempt of the whole bar of the United States .-Ogden Junction.

The Court ordered the clerk to return to the box the slips of paper with the names of parties on the jury list drawn from the box but not now serving on the grand jury, on account of their being at a distance at the time of drawing, and therefore unable to be in court within a reasonable time.
