MINING, BUSINESS AND STOCKS

HAS NO POWER TO CLOSE SMELTERS.

So Says Assistant County Attorney Lyon, Relative to Powers of County Boards of Health.

ORDER AN ABATEMENT

Of Smoke Nuisance-Should Operators Refuse to Obey, With the Courts Rests the Only Recourse.

Asst. County Attorney Job Lyon has informed the county board of health that while it has the power to bring about an abatement of the smelter smoke nuisance, which has caused so much contention of late between the smelting companies and the farmers, it has no authority to order the smelters closed. Further than that the whole question is one for the courts to determine.

Mr. Lyon, in his opinion, which was submitted to the members of the board vesterday afternoon, said that in event of the smelters after having been given orders to abate the smoke and fumes and upon the failure of the companies, through its managers, to obey the mandates of the board prosecutions may be commenced against the companies for maintaining a public nuisance. The laws of the state, the attorney holds, are ample to cope with the sit-

After hearing the opinion of Mr. Lyon, the board, by a vote of 6 to 1 declared the smelter smoke and fumes a nuisance, upon motion of Commissioner Wilson, and the several companies will be ordered to proceed forthwith towards

The negative vote was cast by Dr. Straup who explained his action by saying the evidence produced, did not appear to him as being sufficient to show any kind of nulsance that is dangerous to life or health and believed the board should only adjudge such nulsances that merely affect property and the employment thereof.

In rendering his opinion, Attorney Lyon said:
"Under the authority granted to the board by paragraph 1, section 1107, of the Revised Statutes of Utah, there is no question but that he board may or der the abatement or removal of nul-sances. Anything offensive to the human senses is annoying to comfort. Un-der No. 4275, anything that renders three or more persons insecure in life and the use of property is a nulsance. Under the evidence, smelter smoke is a nulsance, as it renders the air impure; but as such nulsance, it can not mental to the public health or the cause of any special disease or mortality. Any shade or business in a town or populous neighborhood which produces noxious or offensive smells to the annoxious or offensive smells to the an-noyance of the neighborhood is a com-mon nuisance, and indictable. It is not necessary that the smells shall be injurious to health. Where smoke emitted from the stacks of the smelter is offensive to the senses and is danger-out to animal and vegetable life, it is a public nuisance; and it is within the power of the county board of health to order it abated, and it is a crime, and punishable as such.

ON MINING EXCHANGE.

Stronger.

New York Bonanza and Uncle Sam Con

A very limited amount of business was transasted on the floor of the min-ing exchange today. Only four stocks participated in the trading of the regparticipated in the trading of the reg-ular call and nothing at all was done on the open board. Altogether 4,400 shares were transferred, which were bought for \$1,206.38. There was not much de-mand for anything. New York Bonan-za continued strong and 1,300 shares were sold at 55 cents. Daly-West is quoted lower, no orders being in the hands of brokers. Uncle Sam Con. hands of brokers. Uncle Sam Con., stiffened slightly.

THE UTAH-GOLDFIELD. Sait Lakeites Interested in a Very Prom-

ising Nevada Property. local officials of the Utah-Goldfield Mining company, which was or-ganized recently with O. J. Salisbury, president; ex-Congressman W. H. King, vice president; Allen T. Sanford, secretary and treasurer, who, with G. W. Moyer, Charles Crismon, R. P. Hunter and James Cleshorn, are directors, are very much encouraged over the out-

ook for the opening of a good mine. The latter is superintendent, and has the campaign in hand. At present he is stripping the ledges and making open-cuts across them, a custom in vogue in the camp and a very good one, be-fore sinking on them. The Utah-Goldfield company has ac-

quired 11 jode claims in two sections of the Goldfield district, both being well located. One group lies almost adjoin-ing the fameus Sandstorm. The other groups is situated a short distance east of the town of Diamondfield, in which a good vein of ore has been disclosed which, it is believed, with a little dent done on it will soon give satisfactory returns.

RICH STRIKE REPORTED. Location at Cherry Creek, near DeLamar, Nevada.

From a prospector just arrived, we learn of a strike of fabulously rich ore at a place known as Cherry Creeck, says the De Lamar Lode. This district liest to the north of DeLamar, and is in Lincoln county. The assays of the ore found runs \$60 in gold, 120 ounces sllver and 30 per cent copper. The leage is from 15 to 20 feet in width, and can be traced for about three miles. The importance of a find of this magnitude in Lincoln county only bears out the assertions which the Lode has constantly and continually made, that Lin-coln county has more undeveloped min-eral zones within its limits than any eral zones within its limits than any other like piece of terrifory in the west. With the clearing away of the present bad spell of weather a rush to the Cherry Creek district will take place, and we predict for that locality a boom eual to that which attends Goldfield and

LAST TO ARRIVE, All Material for Continental- Alta Tram-

way at Sandy. The last car load of material for the ontinental Alta tramway is scheduled to arrive at Sandy this afternoon, advices to that effect having been received by General Manager H. M. Crowther during the day from the rall-way officials. Mr. Crowther says there are two or three wagon loads of ma-chinery yet to be taken up to the head terminal and the roads are not in the best of shape for this task. However, he expects to see the tramway com-pleted by the end of the present month About a half car of ore is coming down from the mine daily, notwithstanding the roads which are covered with a deep

CONCENTRATES.

Eight cars of Tonpah ores reached the market today.

A car of Yampa matte arrived at the samplers this morning.

General Manager Duncan McVichle of the Bingham Consolidated is scheduled to reach home this afternoon. Joseph Oberndorfer, the well known broker, expects to leave shortly for a round-up of the Nevada gold camps and may remain there for sometime,

William H. Tibbals, the well known broker, has closed another deal for the sale of a promising Goldfield group to a Colorado syndicate.

The ore and bullion settlements reported lat yesterday were as follows: Crude ore and concentrates, \$31,600, base bullion, \$39,800; gold bars, \$5,000. Since Oct. 7, the leasers working at the Wyoming mine in American Fork canyon marketed 982.5 tons of ore, for which was received an average of \$42.70 per ton, or \$42,250.

William R. Allen, the Anaconda, Montana, mining man, who has been in the city for the past week on mining busiess, visited some of the big Park City boanzas yesterday.

Harrison Clement departed last night for Denver to confer with the Colorado Iron works company's officials relative to matters connected with the erection of the proposed smeller at the Lost of the proposed smelter at the Lost Packer mine in Idaho.

The jigs which have been installed at the Utah Copper company's mill at Bingham are being tried out and if the demonstration proves successful others will be added and the machines will be ome an important part of the big mill's equipment.

CONDITIONS AT THE MONTANA.

Scarcity of Water and Fuel Has Handicapped Operations During Past Three Months.

MANAGER CILLIES' STATEMENT.

Promises Large and More Regular Production of Ore During the Present Year.

The printed report of the Montana-Tonopah Mining company, containing the statements of the officers, which were submitted to the stockholders at the annual meeting held in this city last September, has been issued and copies of the same reached the city to-

Appended to the report is one of recent date from the present general manager, Don B. Gillies, bearing on physical conditions, in which is contained the following:

During the past three weeks we have suffered considerable delay, loss of time and money due to various causes, chief of which was the failure of our water and fuel supply. Due to the first cause we were compelled to close down from 12 to 15 days. I have assurance, however, that the Rye Patch plant will be doing service by March 1, and this problem will be solved. While we have done all that is possible to keep a full supply of both wood and oil on hand, it seemed impossible to do so, as the freight traffic is so badly blockaded that it has taken a car of oil over 80 days has taken a car of oil over 60 days reach here from Sacramento.

The amount of development work now being done, together with the in-creased output of ore, make a new doucreased output of ore, make a new dou-ble drum holsting engine a necessity, and such an engine would prove much more economical than the present plant. Our ore bin capacity must be enlarged, as this is now a surious hand-icap to our operations. We have built a temporary bin that relieves us for the time being.

the time being.

Since the annual meeting a total of 1,000 feet of development has been done exclusive of stopes, making the total development to date 9,074 feet. On the 500 and 600 levels, both east and west, faults were encountered. The faulted ends of the veins have been plaked up withing shows dislocation. picked up, which shows dislocation from 10 to 15 feet. The width, charac-ter and value of the ore bodies are un-

On the 500 level, north of the McDon-ald vein, a new vein is being worked. As soon as possible we expect to open up same vein on the 500.

Development work is now in progress at other points in the mine from which we hope by the time of the next quarterly report, to be able to give

ome very pleasing news. The development work on the 700 or lowest level consists, to date, cross-cut north and 100 feet of Three veins have been crosscutted, and unfortunately the main crosscut follows a transverse fracture, intersects the veins where same are in Intersects the veins where same are in a broken up condition, and drifting both east and west. The main crosscut will be extended further, and we had a right to hope to cross-cut at least two more veins by extending the same cross-cut 200 feet further. The development to date on this level is entirely satisfactory, and the grade of the ore is equal in value to that shipped from any other level in the mine.

The condition of the mine is excellent, and with a few improvements for ore handling, which are already under way and with the large amount of ore being opened by new development, two promise increased and much more regular shipments than the property has ever seen.

DAILY GRAIN LETTER.

Messrs. Logan & Bryan of Chicago telegraph their local correspondents, James A. Pollock & Co., over their private wire, on the grain and provision situation, as follows:

Chicago, Feb. 17.-Wheat-This has been an extremely nervous market. Price movements have been rapid and wide. The action of the market would indicate the selling pressure today came altogether from the fortunate tailers, taking their profits. There has been less urgent short covering, but it was noticeable on sharp breaks. The market rapidly recovered lost ground, with the closing tonight showing practically the same loss of yesterday's gain. To us the temper of trade seems the same. It is still universally bearish. The speculative situation seems unchanged. Considering the bearish feeling existing, it does not seem possible the commanding interest has succeeded in parting with much of its wheat. This leaves the speculative market in much the same position. The short interest is still large and stubborn. We continue to feel the action of market holds out only little promise for profits on the short lative situation ttle promise for profits on the short

Corn-Considering the nervousness Corn—Considering the nervousness and low range of prices in the wheat pit, corn did not act at all badly. Selling pressure has again been urgent when market warranted taking such sales. Considering the amount of corn headed this way, we doubt if market will do very much on the long side at this time. At the moment we feel the cash situation must make greater. eash situation must make greate strides to bring about and sustain

Oats-Pressure in today's session seemed to come from cash houses. The the present prevailing condition, and we doubt if market will show much im-provement until this department of

provement until this department market improves.
Provisions—Notwithstanding the larg-er receipts of hogs, lower hog market, the speculative situation shows some improvement, which to our mind comes altogether from packers supporting princes. We see no immediate prospect for better things ahead.

STOCKS WERE

Opening Showed Gains Among Industrials and Speciatlies, Losses Among Railroads.

DEMAND FOR UNION PACIFIC.

Had Effect of Rallying the Market-Northern Securities Made New Level.

New York, Feb. 17 .- The irregular opening changes in the stock market today showed gains mostly among the industrials and specialties and losses among the railroads. The recent preponderand of trading in low priced and heretofore neglected stocks was further shown. Prominent stocks participated only slightly in the rise aside from the low priced coalers. Reading was lifted 11/2 and Eric and the second preferred i. Ontario & Western touched a record figure at Among the specialties United States Rubber lead off with a rise of 314, the

preferred 4½ and Sloss-Scheffield Steel and Peoria and Eastern 2½ to 2½, and Chicago, St. Paul, Minneapolis & Omaha, Colorado Fuel, Lead, Pressed Steel Car. Republic Steel preferred, Allis-Chaimers and the Federal Mining stocks, 1 to 1½. Active stocks took a dip downward later and the small gains in the transcontinental group, Amaigumated Copper and several others were wiped out. Reading fell back a point.

A heavy demand for Union Pacific rallied the market, The activity in the specialties died out and they were inclined to react. Union Pacific touched 125½, while Northern Securities was rising to a new level. On the curb Great Northern preferred jumped 5. Other advances were Chicago & Eastern Ilinols preferred, 4½; Chicago Western preferred B 1. Federal Mining 4, and Rubber Goods and Lead preferred over 2. There were declines in Pere Marequette of 4½, P. C. C. & St. L. preferred 3, and Linseed preferred 1½. Bonds were steady at noon, Isolated points of strength dropped out during the day, but the general market was motionless. preferred 4% and Sloss-Scheffield Steel

was motionless.

The stock market backed and filled in a narrow manner until late in the day when the better known stocks were depressed sharply. Sugar sagged to 1434 and other leaders with but few exceptions sold below yesterday's closing.

SNOW TOMORROW.

Weather Man Postpones Expected Precipitation for Twenty-Four Hours.

The coming together on this meridian of high barometric areas from the northwest and southwest yesterday, excluded an approaching low area from the west, and consequently there was not the precipitation today, that was expected. However, a long, outstretched area of low pressure has now started in from the coast, and consequently, snow is looked for tomorrow. There were extensive rains yesterday, over southern California, Arizona and southern California, Arizona and New Mexico, extending into western Texas; but generally the weather was mild all over the country, and the coldest weather obtained in the central north, 10 degrees below zero at Northfield and at Winnipeg.

WEATHER REPORT

Record at the local office of the weather bureau for the 24 hours ending at 6 a. m. today:

Barometer reading at 6 a. m., 25.725 inches. Temperature at 6 a. m., 23 de-grees; maximum, 34; minimum, 22; mean, 28, which is 4 degrees below nor-

Deficiency of the daily mean temper-ature since the first of the month, 32 Excess of daily mean temperature since Jan. 1, 134 degrees.

Precipitation since the first of the month, 1,22 inch, which is .50 inch above

the normal. Deficiency in precipitation since Jan. 1, .29 inch.

FORECASTS TILL 6 P. M. SATUR-DAY.

Local forecast for Salt Lake City and vicinity: Cloudy tonight and Saturday with local snow.
For Utah: Forecast made at Denver, Colo: Cloudy tonight and Saturday with lo-

Western Wyoming: Generally fair tonight and Saturday.

WEATHER CONDITIONS. The barometer is highest over the Rocky mountain slope, middle and northern plateau, stretching over a large area from British Columbia to the south Atlantic states. A low pressure area extends over the Pacific states, southern plateau and lake re-

states, southern plateau and lake region.

Precipitation occurred over portions
of the Pacific and north Atlantic
states, plateau region, Rocky mountain
slope, extreme northwest, and lake region. It was raining this morning at
Roseburg, Los Angeles and El Paso,
and snowing at Santa Fe, Buffalo and
St. Ste Marie.

The temperature has risen in nearly

St. Ste Marle.

The temperature has risen in nearly all sections except a marked fail over the middle and northern Rocky mountain slope, Missouri valley and British possessions. Zero temperature was reported over portions of Nebraska and Manitoba.

J. B. BEAN. Excursion Agt. Office, 161 Main Street.

Only Sailing Vessels

Are bothered by "calms." The steamship does not have to wait for a breeze. And in the business world only the store that does not advertise (or that does not advertise enough) is bothered by "dull days."

Money used to buy advertising space in the "News" is money wisely spent-it always comes back with interest.

Current Time Table. In effect Oct. 9th, 1904.
