Captain Harper, who went out from Silver City, yesterday, with 20 men to attack the Bannocks, was reported at South Mountain. He sent back for reinforcements.

A party of about 17 men went by way of Flint district to join Capt. Harper's company, and came upon a body of Indians estimated at 100, four miles east of South Mountain, on Rail Creek, and had a fight. The volunteers lost one killed. O. H. Pendy, ex-county auditor of Owyhee County, and Tom Jones, a saloon keeper, were wounded, and six men are missing. The volunteers were worsted and had to flee. Do not know whether any Indians were killed or not. Great excitement prevails in Silver City over this news. General Howard is daily expected.

NEW YORK, 10.—The Herald's Washington special says: Notwithstanding our frequent treaties and extensive commercial relations with China, that country has never been represented here, even by so humble a diplomatic official as a consul or consular agent, but the State Department is advised that the present government of China is about to send to the United States a full diplomatic and consular corps, and it is probable that the next Pacific Mail steamer, arriving at San Francisco, will bring a Chinese minister plenipotentiary and his suite, and possibly some of the consuls who are to be stationed in our larger ports of entry. The arrival of a Chinese minister will doubtless make quite a sensation in diplomatic circles at Washington.

The Times' Washington special gives a piece of secret history. In an interview with Senator Ben. Hill, he said 42 ex-confederate congressmen had pledged themselves to abide by the decision of the electoral commission, so that despite the sensational rumors that filled the air, toward the close of the count, there never was the remotest possibility of trouble. "We held the balance of power, and did not propose to permit another war if our votes could prevent it."

Hill further said he thought the President was an honest, pure, and upright man. "If anybody attempts to inaugurate a revolution, the ex-rebels will put it down. We will not allow it."

The Herald's Paris special, speaking of the exhibition says: The French journals all praise our agricultural implements and say they are unrivaled in Europe. The mineral exhibition from the Pacific Coast, embracing 1,400 specimens, many of them of great size and value, all from famous mines in California, Nevada and Arizona, are represented in the collection which, as a whole, is the finest ever brought to Europe. Among the curious things just added to our section is a superb jewel casket from the private collection of Mrs. Sunderland, of San Francisco. It is made entirely of gold and gold-bearing quartz, from the Pacific Coast mines. In beauty of workmanship and novelty it is unrivaled. It is in the exhibit of Thomas Oakey.

AUGUSTA, GA., 10.—A heavy storm of wind and hail blew down Wynn's gin manufactory at Belair, outhouses and fence, and cut down the corn and cotton. Three children were killed.

for the publication of socialistic writings.

Numerous manufacturers have resolved to discharge all their workmen attending socialistic meetings.

A fearful explosion has occurred in Evans' colliery, near St. Helen's, Lancashire. The first explorer descended the shaft five minutes after the explosion. Ten men were rescued alive and sent to the surface. Eight other men are alive and have taken refuge in a working of the mine. Two hundred and thirty-two are dead. The explorers state that they found bodies decapitated and reduced to a shapeless mass and some blown to pieces. A large crowd of men, women and children surround the mouth of the pit. The cause of the explosion is unknown.

LONDON, 8.—A St. Petersburg dispatch says: The terms of the Russo-English arrangement are said to be more satisfactory than expected. Great confidence is felt in the result of the congress. The most serious difficulty for the moment is Austria's objection to the cession of Antivari to Montenegro.

Not Russia only, but Germany likewise hinted to the Porte that unless the fortresses were surrendered an invitation to Turkey to attend the congress would be withheld. With his failing health the Sultan becomes more capricious and difficult to manage. Rumors have been prevalent that he is very seriously ill.

Parliament has adjourned for the Whitsuntide holidays, the Commons to the 13th and the Lords to the 17th.

The explosion in the Evans coal mines, at Haydock yesterday, occurred at eleven in the morning. The Wood Pit colliery, consists of two mines, Ravenshead and Florida. The explosion was confined to the last named. The men went to work at six a.m. The condition of the mine had been examined as usual, and ten minutes before the disaster it was, to all appearance, safe. There were 250 men in the Wood Pit colliery, 18 in Ravenshead, and the remainder in the Florida mine. The men in the Ravenshead mine were got out immediately; one died and the others were much affected by after damp. The two mines are connected by a tunnel, and it was in the working of the Florida mine beyond the tunnel that the explosion occurred. It is the general opinion that every man in that part of the mine is dead.

The explorers found the dead-bodies of men and horses on every side, fearfully burnt and mutilated, giving evidence of the dreadful force of the explosion. A great fall of coal occurred. The men engaged in exploring the mine are working day and night endeavoring to reach the place where most of the bodies are supposed to be.

Great crowds of men, women and children have assembled in the vicinity of the pit, and general grief prevails, nearly every family in the village of Haydock having suffered the loss of one or more of its members. No powder was used in the mine.

The manager of the mine went down the shaft five minutes after

the explosion, and finding a number of men at the bottom lying on their faces, opened the ventilating doors, and thus saved the lives of 18 men in the Ravenshead mine. The bodies already found are all much disfigured. It may probably be days before all the bodies are recovered. The explorers have suffered greatly, and have had to be constantly relieved, a large staff of doctors being in attendance. Crowds of women surround the pit since the explosion, weeping and begging for news from the explorers, but, on the whole the people are very quiet and orderly.

Fazli Pasha threatened to forcibly expel the Russians, being apparently ignorant of the reported arrangements for the surrender of Shumla.

The Telegraph's dispatch from Pera says: It is stated that a recent council of members decided not to surrender any of the fortresses pending the debates in congress.

St. PETERSBURG, 10.—Count Schouvaloff and Prince Doubrell, Russian Plenipotentiaries to the congress, started for Berlin last night.

In a recent issue of your paper there appeared an article over the signature of M. B. Sowles, "dealer" in sewing machines, in which we find an implication (not an assertion?) that the agent of The Singer Manufacturing Company, in this city, has been palming off on the people of Utah, old machines for new. In justice to our patrons, we will say that our instructions from the home office in this matter are imperative and are as follows: "You are in no case to sell second-hand machines for new, but sell them for what they are, and at reduced rates." In no case do we depart from these instructions.

A Company, which by its combined energy and skill through nearly 30 years of experience, has placed upon the market a machine unequalled, whose factories are turning out 6,000 machines per week, whose sales for the last three years nearly equal those of all other companies combined, and which to-day, stands head and shoulders above all of its competitors is certainly not driven to sell old machines for new, much less to practice any kind of deception.

Again, this implication becomes much more absurd when we consider that this "dealer" gets his machines from a firm in Chicago, which every one in the sewing machine business knows has been for years dealing in second hand and inferior machines, highly finished and sold throughout the country by irresponsible parties.

The machine built by the Singer Manufacturing Company, and which has won a world-wide reputation, may be known by the patented trade mark on the side of the arm, and is found only in the hands of responsible agents.
