The management are determined that their patrons shall have their money a worth, if the stage is broad enough m compass that end; of which, we believe there are no lingering doubts.

SUBJECT VILLE. - We received a communiestion this morning from R. J. S., of soringville, which has only been seven lave coming from there, a distance of fiftywe miles, it having been written on the oticult. It contains an account of an exgeffent concert given at that place on the We are pleased to notice that such enterout our Territory.

MAYEL.-We had the pleasure of a call from Mr. Handley, agent of M'lle Marietta Ravel now in this city. Her name has come to us before her, laden with encomiums from the press. She has just comploted a four weeks engagement at Denver, where she has added insire to her laurels. Our citizens will have the opportunity of adging for themselves of furing the coming week. Her class of performances, we are confident, will take with theatre-goers, and the people generally. No community on the continent more heartily pelish the lighter character fantertainments.

MEAN BUSINESS, Some scaleway, last night, or towards morning, broke into the LOCK WOOD & HANNINGTON show case of Messrs, Stoffers & Co., photographers. Last night Jas. G. Bleak delivered a valedictory oration on the occasion of the closing session of the St. George lyceum. He reviewed the lectures which had been delivered during the past season and spoke on the subject of education.

Dau SK SERES -- We have unquestion ably less drunkenness than any other town we had nearly said, without regard to number-on earth. This, with other favorable features of the "peculiar institutions" of Utah, is remarked by well-nigh every Young, Esq., supt. Utah Central Railroad, M. B. Clawson, Esq. visitor we have conversed with. It is a sight so rare, that a drunken man in our streats atrikes one with a species of horror. For the first time within our present recei-South atreet. He was victous and presum-ing. It was a peculiar phase of inebriacy, its had not a particle of the suavity, or feeling good for the promotion of which most men resort to special stimulants. He was an assumed friend and an implacable foe, within almost a single breath. He was arrogant and suppliant, then assailant and defender of the same individual. He threatened, stormed, entreated, petitioned DRUGGISTS' SUNDRIE and remonstrated. He swalled and con-tracted; was boisterous and subdued waxed strong and melted to puerlity; grew who and waned to imbecility; put on manliness and relaxed to effeminacy; a legislator and an authors a prince and a because a page

and retaxed to effeminacy; a legislator and an authory a prince and a beggar; a fop and a clawn; a very embodiment of self contradiction, attraction and repulsion.

What heights and depths, we involuntarily exclaimed, may humanity rough!

The other night, for the first time in our city, we saw a female dragged to the calabouse. Her force of resistance was only equaled by the structly of her blasphemies. These and their kindred moreous but remind us that the distance between us and 'the rest of mankind' has been fearfully reduced during the past two or three years. However, they can but contaminate the children of disobedience.

Poon Farrer Committee of disobedience.

Poon FRANCE.-Commissioner Capron. of the Agricultural Department, has issued a circular to the farmers of this country for contributions of seed grains, especially for the best varieties of local spring wheat of last year's crop, to relieve the needs of Fronch farmers. Winter wheat will be received, but spring is most destructed also the heaviest and most productive oats; the most theirly kinds of bariey, and the most prolific varieties of bush beams. Particular care should be taken that the seeds sent should be free from the germs of positierous weeds; the packages to be stout and well-fastened barrels, with the net weights and name of variety plainly marked on each. All donations to be sent to the relief committee of the New York Chamber of Commerce, 64 Pearl Street.

SINCER'S

New Improved Silent

The Best in the World.

Because all of them are in constant use, while a very large proportion of other makes are not used, owing to their being partially or utterly impracticable.

THE SINCER

FAMILY MACHINE

Has been brought to perfection, regardless of time, labor or expense, and is now incompar-ably the best Sewing Machine in existence. It is simple, compact, durable, beautiful, quiet, light-running, and capable of performing a range and variety of work never before attempted upon a single machine; using either fills. Twist, Linen or Cotton Thread, and sewing with equal facility the very finest and coarsest materials, or anything between the two extremes, in the most beautiful and substantial manner.

The New Improved Attachments for Hemming, (any width) Braiding, Embroidering Magic Ruffling, Gathering and sewing on (at the same time) Belf-Sawing, Cording, Tucking Quilting, Felling, Trimming, Binding, etc., are novel and practicable, and have been invented and adjusted especially for this Machine.

Folding Tops and Cabinet Cases. New designs of the unique, useful and popular Folding Tops and Cabinet Cases, peculiar to the flinger Machine, are in every variety of Wood, such as black Wainut, Mahogany, Rosswood, Satinwood, and from toe plainest to the most elaborate pattern and finish. The Machines themselves are plain or highly ornamented with pearl and gold to correspond with their tables or cabinets.

In the Singer the work is fed or passed through the Machine in the natural direction, namely, from the operator, permitting her to sil in a natural and healthy position. In many other Machines the work passes from right to left, or the reverse, compelling the operator to rit in a best and unhealthy position, and thus consing weakness of the back, etc.

Singer uses a SHORT STRAIGHT NEEDLE, which is not liable to break or miss the stitch. Many other Machines use a long

In the Singer Machine the Shuttle is carried, thus avoiding nearly all wear. It requires no oil, and does not soil the thread or goods, Other Machines drive their Shuttles, in a race, thus causing great wear, and requiring oil soiling the thread and goods.

On the Singer, the Tension on both the upper and lower threads is absolutely under the ready control of the operator, thus rendering the Machine always available for good sewing, which is not the case with any other. Many so-called cheap Machines are really worthless, and so are many of their new peculiarities and apposed sdvantages,

The SINGER is the

Oldest Practical Sewing Machine,

Being about twenty years in the market. Having been constantly improved by the employment of the most skilled ingenuity of the age and unlimited capital, it is now divested of all unnecessary parts and possesses his the Very Latest Inventions and Improvements. It is the only Machine sold on Honest Claims as all its parts are Practical and will do all that is claimed for them. Some other Machines are Greatly Compileated, to do Useless and Blily things, and thus are rendered Liable to Constant Derangement. The Singer Seldom or Never gives trouble, but is readily and easily managed by those who utterly fail on other Machines.

SINGER'S

New Manufacturing Machines Claim the same advantages over others of their class as the new Family Machines. These old and well-tried dewring Machines are applicable to all hinds of heavy and light manufacturing in Cloths, Leather, etc., and run in the most perfect and reliable manner without trouble to th
