Mrs. Semira L. Wood, relict of Lyman S. Wood, who died a few months ago, passed away in this city yesterday. She was a resident of Springville, but was here on a visit to her children, one of whom is George H. Wood of the city treasurer's office. Ten days ago, at the home of her daughter, Mrs. Zella Gifford, she was stricken for the third time with paralysis, and yesterday the end came.

Mrs. Wood was a native of Missouri, and was born June 4, 1838. She came to Utah as early as 1852, and two years later was married to Lyman S. Wood. They moved to Springville, being among the first settlers there. That place was thereafter their permanent home. Besides the two children already mentioned, five others survive their mother, namely, Mrs. Luella Haymond, Gideon S. Wood, Mrs. Heber Cummings, Mrs. William H. Mitchell and Ralph E. Wood.

The remains were taken to Spring ville this morning, and the funeral will be held at 2 o'clock Friday.

In the early days of amateur theatrical work in this city Mrs. Wood was prominently identified with the entertainments that were given in the Social hall and other places of amusement.

Had it not been for the great coal strike in Colorado the syndicate might never have conceived the idea of get-ting hold of this road. The great de-cline, coupled with the fact that the

was the first step. The next will prob-ably be the election to the Hawley board of some new directors, who will represent not the Rock Island, but the pool which has bought a great block of the Colorado & Southern voting trust cetificates and will receive the new stock when it is issued, on April 1. This election will include B. F. Yoakum of the Frisco and Rock Island board, and may even go further and include at least one more Rock Island board, and may even go further and include at least one more Rock Island director. The purchase of the Cripple Creek line was another step. The syndicate which bought it was quite another and distinct syndicate. Rock Island was not asked about it at all. When it goes to the Rock Island it will probably be transferred as an integral part of the Hawley system. As yet it is not even that. It has simply been taken over by a group of men using their own money. cline, coupled with the fact that the voting trust was willing to step out when the time came, opened the way to an accumulation of stocks that would amount to a control. A clear control without a voting trust in the way was essential to the carrying out of the plan, and this was obtainable at low prices as a result of the great coal strike. Mr. Edwin Hawley, B. F. Yoa-kum, and others, are the moving spirits that. It has simply been taken over by a group of men using their own money. They are taking a chance on selling it later for a better price. There is little doubt that when they take up their options they will be able to deliver the road to another system at a 10 per cent profit. In the meantime they will op-erate the lien and are in a position to make the Hawley line a great tonhum, and others, are the moving spirits in the enterprise. They are in entire harmony with the voting trustees and with Hallgarten & Co., fiscal agents of the Colorado & Southern. supply to the Hawley line a great ton-nage of the best grade collectible in

The entire deal, as yet quite incom-plete, is a reproduction of the Alton plate, is a reproduction of the Alton deal, with the expection that there is no Kuhn, Loab & Co. to oppose it. The road is not sicilen from a powerful rival, but is merely gathered in from scat-tered stockholders, who are glad The public mind has become confused by these developments. A conception has arisen that Rock Island has bought or is shortly going to buy nearly all the railroads in Colorado with the exception enough to get rid of it, on the terms offered. Heavy private sales of the offered. securities were made at the time the preferred dividend was cut. As a re-sult this stock, which sold down near 50 when it was a 4 per cent issue, is now selling around 60, without a divinow selling around 60, without a divi-dend. There are only a few thousand shares of it left afloat. The shares bought are held in a great number of names so that no one can say who owns it. The number of shareholders is not visibly reduced. Like Alton, it is largely in the names of brokers. INTENTIONS OF ROCK ISLAND. What does the Rock Island intend to do with all these lines when the whole do with all these lines when the whole affair is cleared up and the control of half the railroads in Colorado is in the Rock Island treasury? This is the question around the Wall street of-fices. The answer is to be found in the names of the men who pass on the blang of Western Davids. It is not plans of Western Pacific. It is not generally known that the executive board of the Western Pacific Construc-tion company is in New York. It has occasional meetings. One of its biggest members represents the Goulds, la an experienced railroad engineer, and speaks with authority in these meet-ings. Another of the members is a director of Colorado & Southern. Still director of Colorado & Southern. Still another is a director of Rock Island. This last named member speaks as a private capialist, and at all times makes it clear that he has no con-nection with Rock Island, so far as his membership of this syndicate is concerned. For a private gentleman of capital, his voice is influential in this community.

Nor is it at all improbable that the Burlington traffic routed to Frisc) will also be diverted. also be diverted. ANOTHER UNION PACIFIC.

These are the transcontinental plans for the Rock Island. They are not prepared by the Rock Island executive, prepared by the Rock Island executive, but by syndicates acting on the faith that Rock Island is going to be in five years another Union. Pacific, rich beyond the dreams of avarice, able and willing to take over anything from a first morgage on the moon down. They count on untold wealth and power for the Moore system. If the next few of the whole great group of promotions and prospects, and also of their fram-ers, will go to ruin and possibly worse. If the Rock Island should turn out to be, as these people expect, the great-est and most powerful of the railroads of the west, by the year 30 Rock Island will run its trains through the Ogden gateway, and will build its terminals on San Francisco bay. It is a long pull, and a dangerous one. It is a gam-ble on the crops of the great southwest-nothing more or less.

Thus spoke a prominent director of the Salt Lake Club this morning to the 'News." Then he continued:

"This talk about Lucas and McCloskey organizing another league, an eight-club circuit, is all hot air. Their league will be on paper. The people up north are on to them and know what they did to dis-

But the press up north sees things in a little different light now, The following, from the Anaconda Standard, is highly interesting and time-ly: "That the baseball situation is clear-ing up in the Pacific National league towns, there seems to be not a doubt. There is a rift in the black clouds of war that hung over Butte such a short time ago. The conflict then promised to wax warm, but now there is appar-ently only one side to the controversy. Ex-President W. H. Latcas has appar-ently by his long silence dropped out of the game, or it may be he is lying low and fortifying his position There are good reasons, judging from the develop-ments of the last week, to believe that he has not as tenable position as he and John J. McCloskey would have the fans believe. To be sure, Lucas still has the sanction of Secretary Farrell and the Na-tional association of professional base-bail leagues for his proposed northwest-era league, but where are his cities? He may have Vancouver and Victoria. B. C. and Bellingham, Wash, but his attempts to invade Spokane. Sait Lake and Butte have proved fruitles. "That he utterly failed to get any sup-port in these last named places was evi-dent from his refusal to see interview-ers on his tour through Butte to Sait Lake and back last week. He was twice in Butte, but kept the fast so quiet and got out so quickly that it was not known until he had gone. In Sait Lake he had it understood at the hotel where he stop-ped that newspaper men were not to be admitted to his room. "The Sait Lake magnatee, Rogers, Shepard and Geoghegar, are in full sym-pathy with the oid league and control the situation. He tha the situation." That Lucas and McCloskey are aware of the fact that the Pacific National league is not dead, is evident by their frantic efforts to cause trouble in the orleague is not dead, is evident by their frantic efforts to cause trouble in the or-ganization now. After failing to get in Butte and secure the franchise held by Walter Wilmot, they turned their attention to Spokane, and it is alleged try to buy off Williams. An agent of Lucas and McCloskey offered Mr. Williams \$1.600 to withdraw, but the latter spurned the offer and is standing pat. Williams is quoted as saying: "I/told the representative that under no consideration would I sell out to Lu-cas or McCloskey. All other teams in the league have stood by Spokane and efforts to disrupt the league have failed. This will be the only league in Spokane recognized by the national commission. I prosume there will be an outlaw league. "We have placed papers in the hands of the sheriff to get the league's books from Lucas, but the officer has as yet been unable to do so. Lucas asys the books are not in his possession. I know that the book must acount for \$17.907.55, and although a great deal has been taken out of that for expenses I still believe there is something coming to the league. I intend the books shall be turned over to me, notwithstanding. Lucas' statement that they are useless." game.

He is sheriff of the Yukon territory and has under him forty deputies. His jurisdic-tion covers 400,000 square miles. He is enthusiastic about baseball, and in the summer time in the land of the midnight sun he says there is a good article of the game produced and some very clever players doveloped. Last summer three teams competed, playing twenty games each. The teams were known as follows: Colts, J. M. Eli-beck, manager: N. Cs. S. D. Magnum, manager: Nonparells, E. Bolong, man-ager.

manager: Nonparena, E. Bolong, man-ager. The Celta won twelve games and lost eight, thereby winning the el. appon-ship. The other two clubs were a the for second place. The president of the league is J. M. Eilbeck, who is acting sheriff during his father's absence. S. D. Magnum is secretary, and J. J. Crawford, treasurer. The official unprice of the games was Lercy Tozier, while W. Ly-ons was the scorer. Sheriff Eilbeck says that the Yukon territory authorities appropriated \$12.009 for fine baseball grounds and that the great American game has entered the Yukon country permanently as a night's pleasure during the summer months.

#### Sais Came in Winner Again-Seven Starters in Handleap.

Sais Came in Winner Again-Seven Starters in Handicap.
 San Francisco. Feb. 31.—There were seven starters in the handicap at Oak-land today. The betting was decidedly open between Sais. Soufriere, Military Man and Bombardier. Sais, who won his race yesterday, came right work in gallant style and won easily. Bombar-dier had Minder in the pilot box today and although he rode the horse cleverly he was unequal to the task and had to be content with third money. Military Man, the hard luck horse, was again found in second position. Soufriere made a disgraceful showing. Weather, rainy: track sloppy. Summary: First race, seven furlongs-Greenock won, Poxy Grandpa second, Dotterel third. Time-1:354.
 Second race, mile and a quarter-Mo-dicam won, Glenarvon second, Erno third. Time-2:174.

 Sixth race, five furlongs-Tramotor won, Prince Brutus second, Salable third. Time-1:694.

#### Events at Ascot.

Events at Ascot. Los Angeles, Feb. 1.—An accident, which fortunately did not result in seri-ous injury to either horses or jockeys, oc-curred in the first race today. Round-ing the first turn there was a great deal of crowding and in the mix-up Turtio fell and Straggler, which was tollowing him, stumped over him. Jockeys Booker and Kunz were stunned by their fails, but both soon recovered. Daivay was a prohibitive favorite for the chief race of the day, being quoted at 3 to 0. He had no troubled in winning from Tim Payne and Oro Viva in the or-der named. Weather, cloudy; track, fast.

When Colorado & Southern is ac-quired, it may be taken for granted that the price of the stocks of this road will be standing a good deal higher in the market than they are today. The reason they are so slow to move in a general rise in the market lies in just this fact-namely that the syndicate has done its best to keep them down, while market accumula-tion has been going on. There are blocks of the stock in New York brokers offices that were bought six months ago and have been carried ever since on margin. The cutting of the preferred dividend was a playing into the hands of this inside syndicate. It brought to the syndicate blocks of

this community. OGDEN GATEWAY.

Here is the secret of this gathering in of the Colorado lines. The Ogden gateway will, in about five years, supercede the right of way over Southern Pacific through the El Paso gateway, now the sole reliance of Rock Island for California traffic. That is if the plans of the promoters are successful. They are figuring on the progress of Rock They Island. The sole connection of the Rock Island at present appears to be a kind of promise that if the conditions are all right the company will go into Western Pacific when the time comes. Meantime, Western Pacific is proceed-ing on sepcifications that will suit the Rock Island when the psychological moment arrives.

WESTERN PACIFIC.

Naturally, and correctly, the Rock Island denies all connection with West-Island denies all connection with West-ern Pacific. As a corporation it has mone. It is in close alliance with Southern Pacific, and for five years it will remain so. Not a dollar of Rock Island company money is going into the Western Pacific. Not a dollar of Western Pacific liability is assumed by Rock Island. The underwriting of the Rock Island. The underwriting of the \$50,000,000 bonds for Western Pacific is to be accomplished without any question asked of Rock Island.

HARRIMAN AND MOFFAT.

This answers also the question of why Union Pacific took its option on the Moifatt line. Every ton of freight carried to the Pacific ocean by Western cific will be taken from the Harriman railroads. Every ton of westbound freight that leaves Denver for the Pacific ocean now travels via Harri-man railroads and will continue to do For a free or box 1 on Dyspepsia, dilar bottle you box 2 on the Heart, Book 2 on the Kilneys, box 5 or the Kilneys, box 5 or the Kilneys, box 5 or the Kilneys, box 6 on Rheumatism.

The few races hastily arranged and trotted on a poor track with flat turns at the horse fair last year demonstrated the possibilities of the gurden as a mini-ature race track, and the horse fair is going to have much more and better sport this year. Purses of \$300 and \$200 each have been hung up for nineteen trotting and pacing events. Beth Griffin, builder or the Empire track and nearly all of the other fast trotting courses in the country, is to construct a track in the garden, with the turns thrown up four or five feet so that the horses can go around them at high speed.
