

LOCAL AND OTHER MATTERS.

THEATRE.—"The Child of the Regiment" is one of the most pleasing comedies that the inhabitants of Salt Lake City have had the satisfaction of seeing presented on the boards of our Theatre, and as "Josephine" Madame Methua Scheller achieves one of her triumphs. Her selections from the opera, rendered so famous by the voice of Jenny Lind, were given with great sweetness and abandon, while her acting was of that natural, chaste, and bewitching order that is so characteristic of Madame Scheller's renditions. She was well supported by Messrs. Hardie, Graham, Margetts and the rest of the company.

To-night the splendid romantic drama of "The Child of the Regiment" is announced for the first time in this city, which, like the "Child of the Regiment," has its plot interwoven with the soldiers of the army of La France. Madame Scheller, appearing as "Emilie, Countess de Renville," supported by all the favorites of the company. The drama will be followed by the vaudeville of "The Two Poles," whose appearance never fails to fill the house with roars of laughter.

THE TAMARIND.—A young plant, grown from a seed found in the ordinary tamarind cores sold as a medicine at the druggists, was exhibited at the late fair of the D. A. and M. Society, by Mr. William Willis, of this city. If this tree could be grown in our southern settlements and its fruit matured, as well as that of the pomelo, grape, specimens of which were among our valuable fruit collection, it would be a great boon to our community. "A laxative, refrigerant and febrifuge," rich in citric acid (acid of lemons), easily prepared and preserved, one of the best preventives of fever would be obtainable at a cheap rate. With the remedial and grateful qualities of this fruit, every frequenter of the sick chamber is furnished, but we want the aperient, cooling and fever destroying fruit for our children during the sultry season of the year especially.

SAME HERE.—The Cheyenne Leader thus describes the weather in that city. We think it describes admirably the fine spell Salt Lake City is now enjoying:

"The weather is delightful, warm, pleasant and genial as the face of a good man who loves his job, is kind to his wife and pays for his newspaper. Such weather has a perceptible influence on the minds of sensitive people. When the skies smile, they smile, and when the weather is cold and gloomy and bleak raw winds prevail, they are correspondingly depressed. Almost all of us love the merry sunshine."

HOME MADE HATS.—We were surprised and rather sorry to find, in our rambles in the late fair, that the manufacturers of gentlemen's hats in our city, had sent no specimens of their handicraft for exhibition. Though our hatters may be few in number, their productions are no discredit to the cause of home manufacture in Utah. We have lately seen a number of home made hats, offered at a lower price than the imported article, and of a superior quality, while for durability they will outlast a half dozen of the foreign made; at the same time, they are neither clumsy nor heavy. The only objection that can be urged against them is that they are not quite the present fashion and we would just hint to our hat makers that if they would obtain fashionable blocks, and mark their productions "Made in Utah," to believe their hats would sell by the thousands to the people of the Territory.

CITY CREEK IRON AND BRASS FOUNDRY.—One of the most substantial buildings lately erected in Salt Lake City is the foundry built by Young & Co., on City Creek, immediately in the rear of the Church Blacksmith Shop, and close by President Kimball's mill. The building is a rock structure in the form of a T, the foundry being 72 x 23 feet, and 18 feet to the center of the roof, and the machine shop 52 x 20 feet. It is estimated that the amount of iron casting that can be turned out will amount to 2,300 pounds a week. Brass castings will also be made twice a week. Brother Z. W. Derrick, so well known to most of our citizens, is in charge of the works.

CRUELTY TO ANIMALS.—It is a common adage that "The man of kindness is kind to his beast," and we have excellent reason for believing the remark to be true.

We sincerely believe that the people of our community, as a body, are the most kind hearted and well disposed, to man and beast, of any people in the world; but we deeply regret that there are a few in our midst whose dispositions—by no means the most angelic, manifest themselves in the way they treat the animals under their care.

We are well aware that there are many things connected with teaming in this country that are calculated to try the patience of the most placid-tempered teamster, and there may be occasional instances in which a slight administration of the whip is excusable; but the way in which some men treat the animals which God has placed in their charge is wrong, and should be put a stop to. We do not desire to see the time when legislative measures will have to be resorted to to prevent such disgraceful conduct, but we hope that the growing good sense of the people will be a sufficient remedy.

It seems to us poor economy to so overload a wagon that the animals whose duty it is to draw it have to be continually whipped till they are almost dead with fatigue and ill treatment. It is a well known and long established fact that there is a point in a man's physical nature beyond which any exertion, no matter how slight, tends to break down his system. It is the same with beasts of burden. If a horse or an ox has only strength sufficient to pull a ton weight it is clear that to require it to pull a ton and a half would not only be dangerous to the animal, but it would also be bad economy.

LAMB'S KNITTING MACHINES.—The importance of introducing labor-saving machinery in our midst is acknowledged by all who study the prosperity of our community. We have just examined several pairs of knitted stockings, made on Lamb's Knitting Machine by Sister Ashworth, of South Mill Creek Canyon. We are assured that Sister A. knits from twenty to twenty-five pairs per week, in addition to attending to her household duties. This is a great improvement upon the old knitting-needle process.

These machines were introduced a few months ago by Pres. B. Young, and parties who use them speak in high terms of their merits.

By obtaining the CURTIS "Premium Models," and learning to use them, which can be done in a very short time, any lady will be enabled to cut out all kinds of garments worn by males or females, adults or children. There may be other models in the Territory by which ladies' dresses can be cut, but the Curtis "Premium Models" are positively the only ones that will do as above stated, and abundance of unquestionable testimony can be given that they will do all that is promised. Female Relief Societies will find these Models of great service, enabling all, however ignorant of the art of cutting out, previously, to insure a perfect fit in every style of garment required. Mrs. Zee Ball, of the 17th Ward, S. L. City, is sole agent for the Territory.
