> CLASS W -I HISTER BALL TOT ERREPT MEETING AT CITY HALLSO

THE Parent Society for the Introduction Improvement and Propagation of blood took bees &c. met at 6 o'clock last evening in the City Hall. The menting and proved in the shall form nd, after the reading of the minutes, detved. A vergletdellent report was handed in by the committee on bees. Delaware and Hudson Canal Co. employ-which will appear in our columns at an ing eight thomsand men; and the Pennsyl-aniv date. The committee on fowls vanis Co., employing aix thousand. This early date. The committee on fowls and swine handed in their report, which appears in to-day's NEWS. There were also reports from the committees on sheep and horses; the former we shall was retained for the purpose of being made more elaborate and complete. The committee on sheep was increased by the addition of Brother for one miner and the wages hitherto paid for this been to be added a day's work for one miner and the for this been to be added a day's work for one miner and the for this been to be added a day's work for one miner and the for this been to be added a day's work for one miner and the for this been to be added a day's work for one miner and the for this been to be added a day's work for one miner and the for this been to be added a day's work for one miner and the for this been to be added a day's work for one miner and the for this been to be added a day's work for one miner and the for this been to be added a day's work for one miner and the for this been to be added a day's work for one miner and the for this been to be added a day's work for one miner and the for this been to be added a day's work for one miner and the for this been to be added a day is the for the been to be added a day is the been to be probably publish, but the latter, at the by the addition of Brothers Samuel Bennion and John Irving, that on bees by the addition of Bro. John Morgan, of Mill Creek.

Excellent remarks were made by the best breeds of horses to infroduceinto this Territory for the purpose of crossing with the native stock; also which would be the best breeds of cows to import for city use. This latter is a subject that is worth and which will cause of the strike us bouagard al 41 .orus receive considerable consideration and study, the supply of both milk and butter now, in the city and throughout the Territory, being so limited in quantity and moderate in quality. The cows in this dity need grading up, and the members of the Committee on this subject will devote special attention to it, and endeavor to select the stock that will best answer the desired object.

We are satisfied that there are fow of the ordinary, overyday alfairs of life among us worthy and deserving of greater altention than the improvement of stock, and especially the kind. from which our supply of milk and that. ter is obtained. A good cow can har

field of usefulness before them. Their labors are for the benefit of the entire people of the Ferritory; all will watch their efforts with reat interest and wish success to the accomplishment of the effect they have in view.

bers of this society have an immense

According to the Scranton, Pa., corres pondence of the New York Herald, of the 6th instant, a big coal strike has begun, the cause being, as in most cases, a reduction of wages by the mine owners. The strike

extends through six countles,-Luzerne, Carbon, Schuylkill, Columbia, Northumberland and Dannhin, the ontire anthracite region. The striking miners number telegrap thirty thousand, nearly all of whom are slowly. Welsh and Irish; they are in the employ of three companies, the Lackawanna and Western Co., employing 16,000 men; the

entire force of workman are banded to-gether in a trade protective association, called the Miners' and Laborers' Benevolent Union. The Association is divided into districts, each of which sends delegates to the grand conneil. The miners

nine dollars and seventeen cents, out of which two dollars were paid to each of the laborers; leaving the miner, after paying for powder and oil, -a dollar each dayfour dollars and seventeen cents. The companies owning these mines have announced to the man a determination to reduced the wages on each car forty-five

beau, which, after paying his usual expen-ses, reduces the wages of the skilled miner from four dollars and sevention cents, to two dollars and forty conts; and this is the The greatest excitement prevails among the miners, and balloting was going on in their meetings, to determine whether they should offer a compromise by going to work at half the proposed reduction, one. district being in favor of deling se, or

this promises, it is said, to be one of the greatest strikes ever inaugurated in the

A strike of this kind at this season of the year will be sentirce of very great incon-venience, - to the miners and their fami-lies, and also to the multiced their fami-then proposed terms to the miners, which Mechlenburg were extremely severe, they would be sure to refuse, that mining The French are retreating only inch by d, they can scarcely be obtained at any. It is required and when it is impossible to do without it. A MACHINE has been invented in Prowhere the process of cutting off, thickamount of beel, making good work ening the heels, shaping around the Bravart, Beaumont, Messar and Beau-oxen, and, beaides combining nearly dies, and making the concave on the gency, and on the 9th several other every point to be found in breeds of back of the shoe is rapidly and perfectly accomplished, and the shoe drops from the machine finished, except punching the nail holes, which is done in another ing breeds of stock we are satisfied, is machine made especially for that pur-the only thing that can decide the pose. The new machine is five fons pose. The new machine is five tons in weight, requires four horse power circumstances. Breeds of herses that and two men to operate it when in full.
