

WAR AGAINST WORMY FRUIT

Utah Horticulturists Strongly in Favor of Repressive State Law.

ORCHARDS ARE DISCUSSED.

"Success in Orchardng"—"The Canner and the Fruit Grower"—"San Jose Scale Problem."

The splendid address of President James G. Duffin of the state horticultural society before the fruit growers' convention yesterday afternoon, was received by the large assembly of appreciative fruit men with considerable enthusiasm, which continued throughout both sessions. The interest increased with the presentation and discussion of every paper, the discussion on the exclusion of wormy fruit from the market creating the liveliest interest.

President Thomas Judd of the state board of horticulture was unable to be present and his paper on "Exhibition Fruits" was read.

THE SAN JOSE SCALE PROBLEM.

Prof. E. G. Titus, entomologist of the agricultural college, in his address on "The San Jose Scale Problem," gave a brief history of the advent into this country of the most destructive insect known to the fruit grower. It was first called by the well deserved cognomen of the pernicious scale, and was first discovered at San Jose, Cal., whence it has spread through nurseries into nearly every state in the Union. Fortunately but little of it is known in Utah, and it is not yet a pest of any importance here. It is a small, scale-like insect, and it is not yet a pest of any importance here. It is a small, scale-like insect, and it is not yet a pest of any importance here.

NECESSARY ORCHARD METHODS.

The first address at the evening session, which convened at 7:30, was presented by Prof. R. S. Northrop, horticulturist of the agricultural college, Logan, Utah, on "Necessary Orchard Methods." Speaking of conditions and prospects for the industry in this state, he said that no section in the United States was better adapted to the growing of fruit than Utah. The handicaps in the way of climate, fungus diseases and insect pests were only nominal as compared with eastern conditions. The cost of production was low, and the demand for fruit was large. He urged the necessity of producing a fancy fruit only as far as possible, and of the necessity of producing a fancy fruit only as far as possible.

THE CANNERY AND THE FRUIT GROWER.

William Craig, of Ogden, manager of the Salt Lake Valley Canning company, discussed the "Relations of the Canner and the Grower." Despite the forebodings of doubting Thomases and other discouragements, Mr. Craig said that the canner had demonstrated that industry a success. The difficulty in the inception of the industry was not in the canning, but in the growing of the fruit. The canner had to take the fruit as it came, and he had to take the fruit as it came.

PERFECT CONFIDENCE

Salt Lake City People Have Good Reason for Complete Reliance.

Do you know how—To find quick relief from backache; To correct distressing urinary ills; To surely cure sick kidneys? Just one way—your own kidneys! Have used Doan's Kidney Pills. Have proved their worth in many tests.

A LASTING CURE.

On Sept. 19, 1907, Mrs. Clark confirmed her previous statement, when she said: "Doan's Kidney Pills cured me of kidney trouble in 1905, and it gives me pleasure to state that I have not had any recurrence of the trouble since. I am glad to confirm the statement I previously gave in favor of Doan's Kidney Pills."

A Reliable CATARRH

Ely's Cream Balm

It is quickly absorbed. Gives relief at once. It cleanses, soothes, heals and protects the diseased membrane resulting from catarrh and drives away a cold in the head quickly. It restores the voice. HAY FEVER. Taste and Smell. Full size 50 cents. Half size 25 cents. Ely Brothers, 55 Warren Street, New York.

TROUBLED WITH COUGH OR COLD?

A simple remedy—taken in time—will give relief. If you are not feeling just right your clerks are always willing to give you the benefit of their experience. For that cold we strongly recommend Syrup, White Pine and Tar or Quinine Laxative Tablets.

ONLY 25c.

can use to best advantage, and the fewer varieties the better. The idea of establishing a factory to find uses for cull or surplus fruit was a delusion.

A general discussion followed on washes for San Jose scale. Prof. Titus, one of the best authorities on this question, said that if the growers tried in Illinois, the properly prepared home made mixture of lime and sulphur was the only satisfactory preparation. No commercial prepared mixture was so satisfactory or so cheap, and any intelligent fruit grower could learn to make it with very little trouble.

In response to a question as to which were the best fruits for canning, Mr. Craig named the twenty-ounce pippin apple, the Elberta and George A. Lowe peaches, the Jones apricot, for this state, and the Golden Wonder cherry. Any first class apple would make a good canning fruit.

BREAKS A COLD IN A DAY

Or Cures any Cough that is Curable. Prescription of Noted Physician.

Mix one-half ounce of Concentrated oil of pine, with two ounces of glycerine and half a pint of good whisky. Shake thoroughly and use in doses of a teaspoonful to a tablespoonful every four hours.

A renowned throat and lung specialist declares that the above formula is one of the very best remedies obtainable for an acute cold and that it will strengthen the lungs, relieve coughs and heal the bronchial tubes. Also, that it will cure any lung trouble not too far advanced.

These ingredients are procurable of any good prescription druggist and easily mixed at home and it should take its place as one of the most valuable remedies in the family chest.

Inquiry at one of the leading druggists elicited the information that Concentrated oil of pine is put up for dispensing only in half ounce vials sealed in tin screw top cases to protect it from heat and light. The oils sold in bulk are of inferior quality and are sold as "Oil of Pine," and put out in wooden boxes, should be avoided because owing to their impurities they only produce nausea and are harmful.

WORMY FRUIT FROM MARKET, AND UTAH WAS MADE THE DUMPING GROUND FOR WORMY FRUIT.

To permit any one to grow wormy fruit was spoiling a market in the making of a good horticulturist. The marketing of wormy apples spoils the market for good fruit, and those who buy it are disgusted with it and less fruit is bought as a consequence. The man who insists, through neglecting his orchard, on growing wormy fruit should be compelled to eat it, and not impose it upon others. If the ban were put upon diseased and wormy fruit, little or none would be grown and good clean fruit would be the rule and its price cheapened so that all could eat good fruit. Mr. Taylor went on to say that the law making it a misdemeanor to sell or barter or offer for sale any wormy apples or fruit infected with San Jose scale. He urged that this fruit growers' convention go on record as in favor of the enactment of such a law in this state. The speaker urged the use of cull fruit in orchard by products, cider, vinegar and dry fruit.

THE HANCOCK BROS. PRODUCE COMPANY, SALT LAKE CITY, AND WILLIAM H. WILCOX, SECRETARY SYRACUSE HORTICULTURAL SOCIETY, OF CLEARFIELD, METHODS.

Mr. William H. Wilcox, secretary of the Syracuse Horticultural society, of Clearfield, Pa., discussed the question of wormy fruit on the market. The first urged the importance of putting up an honest pack and a full bushel in each box of strictly clean fruit. The last speaker urged the necessity of the need of growing clean fruit, free from worms, and was in favor of the enactment of a law prohibiting the sale of infested fruit.

THE HANCOCK BROS. PRODUCE COMPANY, SALT LAKE CITY, AND WILLIAM H. WILCOX, SECRETARY SYRACUSE HORTICULTURAL SOCIETY, OF CLEARFIELD, METHODS.

ELKS' EXCURSION.

Elks' third annual excursion to California, Feb. 8. For information, tickets and reservations, see A. W. Raybould, secretary, phones 47, Elks' club, Salt Lake.

W. C. SULLIVAN RELEASED.

W. C. Sullivan, bookkeeper who was arrested and charged with embezzlement on the complaint of Herman and Wheeler, saloon keepers, was released from the city jail last evening. He is said to be light and well, and is said to be light and well, and is said to be light and well.

CURRENCY COMMISSION'S CAMPAIGN OF EDUCATION.

Chicago, Jan. 21.—A campaign of education was decided upon by the currency commission of the American Bankers' association at its meeting in Chicago last week. It is proposed to furnish pamphlets, documents, and prepared articles to be used by country and other newspapers. The commission desires to have its views on the currency question understood by many persons who it is believed, can be reached in no other way. In addition, state bankers' associations will be asked to communicate with their constituent banks and impress upon them the necessity of some remedial legislation. Large commercial bodies throughout the country will be invited to appoint committees to consider the currency question, and invite discussion over pending bills.

SUCCESS IN ORCHARDING.

"Success in Orchardng" was the theme of a paper read by Moroni Mortensen, a prominent fruitgrower of Bear River City. To be successful in this industry love for the work and enthusiasm in his calling are of prime essentials. A willingness to learn all possible from the experience of others will go far to make the undertaking successful. The care of the orchard, the irrigating, cultivation and spraying of the trees, and everything done in the right way, at the right time are details that make for success. Honest packing of fruit is another most important factor for success in the business end of fruitgrowing.

DISCUSSING THE PAPER MR. J. MADISON FISHER, PRESIDENT OF THE SALT LAKE COUNTY HORTICULTURAL SOCIETY, DREW ATTENTION TO SOME OF THE MISTAKES IN ORCHARDING.

Mr. J. Madison Fisher, president of the Salt Lake County Horticultural society, drew attention to some of the mistakes in orcharding. The most serious mistakes are the planting of too many varieties, and varieties not called for in the market. To get all possible out of a limited water supply, Mr. Fisher plants his trees close together in the row and the rows far apart. He also grows small fruits very successfully in between the rows of larger fruit, thus doubling cropping his orchard.

BARRING WORMY FRUIT.

Mr. J. Edward Taylor, secretary state board of horticulture, discussed the question of "Barring Wormy Fruit from the Market." Oregon, Washington, Idaho and Montana were already in line in this matter of excluding

SULLIVAN MAKES HIS DAILY BREAK

Once More Caught in Attempt to Saw His Way Out of Jail.

TAKEN TO THE STATE PRISON.

One Theory Advanced is That He Wanted to Get There So as to Communicate With Owen.

The desperate and murderous character of Joe Sullivan, ex-convict, highway robber and alleged murderer, was again made manifest late yesterday afternoon when he made an almost successful attempt to saw through the bars of his cell at the county jail to freedom. It was by the merest accident that his efforts to regain his liberty were discovered and frustrated. He is now in the Utah state prison for safe keeping, and should be successful in getting through the bars there it will only be to fall a victim to the hands of watchmen who guard his body.

THE FLINGS OF STEEL FALLING UPON THE FACE OF DEPUTY SHERIFF JOHN CORLESS LED TO THE DISCOVERY OF SULLIVAN'S ATTEMPT TO ESCAPE.

About 2:30 p. m. Corless went into a compartment of the jail directly under the cell occupied by Sullivan and a prisoner named Elliott. Corless did not hear a sound from the cell in the rotunda above until he had wrenched the steel door falling through an opening. Securing a ladder Corless climbed to the small opening and with a piece of paper caught some of the flings. He then saw that Sullivan was sawing at the steel bars of the cell. He had forced a small and highly tempered steel saw seven-eighths of the way through one of the bars. Within an hour he would have sawed through another and then it would have been the work of but a moment to force the several bars outward giving sufficient room for him to squeeze his body through the opening. After that Sullivan would have sawed a couple of bars from the window and with a rope made from bed clothes could easily have made his way to the ground. And into the man who would try to stop him, for Sullivan was armed; not with a gun or a knife but with an instrument equally as deadly. From a water pipe in the room he had wrenched a faucet. Out of this and a strap and pieces of his clothing he made a slung shot, a deadly weapon in the hands of a man like Sullivan. He was prepared to kill anyone who would try to stop him. He had a second to gain his liberty.

SULLIVAN SMILED.

The moment Corless discovered the steel flings he quietly notified Sheriff Emery and deputies. The officers went to the cell and took Sullivan out. He showed some emotion when he realized that he had been caught. He was then taken to the state prison. He was then taken to the state prison. He was then taken to the state prison.

A Skin of Beauty is a Joy Forever.

D.R. T. Felix Gouard's Oriental Cream or Magical Beautifier.

Removes Tan, Freckles, Pimples, Blemishes, and Skin Diseases. Cleanses, Softens, and Gives Beauty and Elasticity to the Skin. It has stood the test of 40 years, and is as effective as ever. For sale by all druggists and Fancy Goods Dealers in the United States, Canada and France. FERO T. HOPKINS, Prop., 37 Great Jones Street, New York.

NEW HAVEN & HARTFORD, PENNSYLVANIA, LEHIGH VALLEY, AND LACKAWANNA, WHICH THEY CONTROL, RECEIVED ITS INITIAL HEARING.

The basis of the complaint, which is being brought by Minneapolis and Chicago merchants, with the support of the commercial associations of both cities, rises out of the increase in rail and water rates inaugurated in March and July of last year. The old freight rate for rail and water routes was 50 cents. In March all routes joined in increasing the rate to Chicago and Minneapolis merchants to 61 cents and following in July with another announced increase of one cent.

TO MOTIFY THE SHIPPERS THE COMPANIES ANNOUNCED THAT THE RATE WOULD INCLUDE MARINE INSURANCE ON ALL GOODS IN TRANSIT.

Chicago, Jan. 21.—Floating in the lake at the foot of Sixtieth street the body of a woman was found yesterday. The body was almost headless and there was no clothing. An attempt will be made today to ascertain whether she drowned or was thrown into the water after being murdered. The last of clothing is believed to indicate murder.

TWO CLEAN CUTS WERE FOUND DIRECTLY UNDER THE HEART.

A few wisps of blond hair were found on the back of the neck, which may aid in identification. The body, which was that of a woman weighing about 125 pounds, had probably been in the water for two months. It is estimated that she was about 5 feet 4 inches in height, and between 25 and 35 years old.

THE HANDS ARE SMALL AND THE MUSCLES SOFT, WHICH LEADS THE POLICE TO BELIEVE THAT THE WOMAN WAS OF THE LEISURE CLASS.

INDUSTRIAL EDUCATION.

Chicago, Jan. 21.—The Chicago Association of Commerce, through its ways and means committee, put itself on record yesterday as actively interested in

MANY INFLUENTIAL PEOPLE ADOPT NEW THEORY

Statements From Followers of Cooper Obtained Recently in Various Cities.

A number of statements from prominent people located in various cities where the widespread discussion over L. T. Cooper's new theory regarding the human stomach has recently waged, give an idea of the intense interest the young man has aroused during the past year. The statements are as follows:

Mr. C. D. Mitchell, of 2413 Avenue C, Birmingham, Ala., has this to say with regard to his belief in Cooper's medicine: "I have been troubled with indigestion and stomach trouble for the past year. I had heartburn, bloating after eating, gas on stomach and bowels, palpitation of the heart, pain in the lower part of my back, and various other symptoms, and was a victim of much distress. I tried many remedies but received little or no benefit from them. I had heard of the Cooper preparations, and did so. In one week's time I was improved wonderfully—the first relief I had been able to obtain. Mr. Cooper's medicine does all he claims for it."

Mr. J. O. Spradling, of 705 South Tejon street, Colorado Springs, Colo., says: "I was troubled with indigestion for two years. It caused me a great deal of suffering and misery. I did not dare to eat meat at all, and everything I did eat soured on my stomach. I tried various remedies, but found no relief. Three months ago I started

COOPER'S NEW DISCOVERY, AND AFTER USING THE CONTENTS OF THREE BOTTLES I WAS ENTIRELY CURED. I CAN NOW EAT AND DRINK ANYTHING THAT MY APETITE craves. The New Discovery is truly a great stomach medicine."

Mr. Wm. Codier, of 408 Graves street, St. Louis, Mo., is very strong in his expression of belief in the new medicine, and has the following to say on the subject: "I have suffered from catarrh of the nose and throat for four years. It must have been communicated to my stomach, for all this time my stomach has given me a great deal of trouble, and caused me much pain and suffering. My stomach was often sour, and my food did not digest. I was bothered by a continual desire to spit, and there was a constant dropping of mucus into the throat. "The relief I have been able to obtain is from Cooper's New Discovery, which I have been taking for about a week. My catarrhal condition has been greatly improved, and my stomach is almost well. Mr. Cooper's medicine has benefited me more than anything I have ever used."

These statements are from reliable citizens in various communities who have tried these celebrated medicines. We sell them and will gladly explain their nature to any one interested.—Hill Drug Co., 30 W. Second Street, Salt Lake City.

the movement for industrial education which is to be discussed in Chicago this week by educators and commercial men from various parts of the United States. As a preliminary to the convention, which will begin Thursday, a meeting of the association's ways and means committee will be held tomorrow. The meeting will be addressed by several officials and members of the society, including President Henry S. Pritchett of the Carnegie foundation, M. W. Alexander of Lyon, Mass., Prof. George N. Carman of Lewis Institute, and C. R. Richards of Columbia university. Mr. Richards, who is secretary of the society, arrived in Chicago yesterday and began preparations for the convention. In discussing the work of the society he spoke particularly of the opposition of the labor unions toward the industrial education movement, which, he said, is one of the most serious problems the promoters of the movement have to face.

HOW TO AVOID PNEUMONIA.

You can avoid pneumonia and other serious results from a cold by taking Foley's Honey and Tar. It stops the cough and expels the cold from the system. It is mildly laxative. Refuse any but the genuine in the yellow packages, E. C. Hill Drug Co., "The never substitutes."
