

## UNIVERSITY OF UTAH.

Salt Lake City.—President J. F. Kingsbury returned from his official visit to the branch normal at Cedar City last Sunday. He says the work on the new building there is being pushed as rapidly as possible. This new building is larger than the old one. The heating plant in the old building is being enlarged to supply heat and ventilation for both buildings. The new frame building for manual training is also being built on the campus. President Kingsbury says the crops in southern Utah are better than they have been for years.

Thursday morning Instructor Will Hay was operated on at the Holy Cross hospital for appendicitis. The operation was attended to by Dr. S. H. Allen, assisted by Drs. Richards, Wilcox and Cannon, and was very successful. Mr. Hay began suffering on Wednesday evening about 11 o'clock. He called at home in his study. He was taken to the hospital and made as comfortable as possible. His case is a severe one but it is believed he will soon recover.

Waldo Kingsbury, B. S., '02, is still confined to his bed with typhoid fever. The other members of President Kingsbury's family have recovered.

The Steele beams for the Metallurgical building will be here on Monday.

Yesterday morning at 8 o'clock the football team left over the R. G. W. for Denver, Colo., where they will play with the team from the University of Colorado at Boulder. The Boulder eleven is one of the biggest teams in the west. The line up will be as follows: Hulse, center; Ray, right guard; Carlson, left guard; Peterson, right tackle; Strobel, left tackle; Russell, right end; Fennell, left half; Renshaw, left half; Pitt, sub. The boys will leave Denver for home Sunday night. The party was accompanied by Coach Holmes. This is the first trip out of the state for a Utah football team.

Professors Benson, Evans and Arnoldson have arranged a photographic exhibit of the university at the state fair. There are 50 pictures in the group. Those illustrating the school of arts and science occupy the center with the mining school on the right and the normal school on the left. The exhibit is in charge of members of the instructing force.

On Tuesday afternoon the football team will line up with the Soldiers from Fort Douglas at the state fair grounds.

On Wednesday there was an important meeting of the student body in the interest of student body organizations. President Kingsbury gave a talk encouraging the students along these lines. S. J. Claridge, editor and manager of the University Chronicle, briefly outlined the policy of his paper this year and urged the students to patronize the merchants who advertise in the Chronicle. Elbert Thomas, president of the student body, Dan Alexander, of the arts students, and E. Meyer, of the engineers, were appointed a committee to revise the student body constitution. The students were favored with a violin solo by Miss White.

The fourth year normal girls met on Tuesday and perfected their "Bachelor Maids" organization. Miss Emma Savage was elected "Most Illustrious Bachelor Extraordinary." The "Bachelor Bees" are: Margaret Crook, Clara Williams and Mildred Ott.

The 64 normals will give a dancing party in the museum building next Friday evening.

Mr. W. King Briggs of Pleasant Grove visited the university Wednesday and Thursday.

Next Tuesday all class work will be suspended to give place for the department meetings of the State Teachers' association. The following is a list of the meetings to be held one day in the university buildings. The kindergarten section, high school and college section, superintendents' section, school board section, parents' section, music, elocution and physical education. The section for physical education and elocution is a new feature of the department work. It was created last year by a resolution introduced by Professor Alaud May Babcock of the university.

Mr. K. K. Steffensen, '03 N., is employed as supervisor of manual training in the state industrial school at Ogden.

Mr. David White of Ogden visited the university on Wednesday.

This morning the State Federation of Women's clubs visited the normal school to inspect the work in domestic science. At 11 o'clock they were served luncheon by the students under the direction of Supervisor Lanchmond, Miss Wheeler and Madame Root.

The engineers will meet on Monday to elect officers for the year.

On Wednesday the '05 normals elected Nicholas Morgan class president, H. L. Marshall, vice president, Lucille McMaster, secretary and treasurer, and H. F. Syndergaard, representative on Chronicle staff.

The committee on graduation, consisting of Professors Marshall, Stewart and Benson, have posted notices to the effect that all candidates for graduation in 1904 must make application therefor in the form of a petition not later than Oct. 15.

## SALT LAKE CITY SCHOOLS.

The past week has been one of especial importance to the schools, owing to the fact that all the preparations for the school exhibit at the state fair were completed. The work dates from last spring when the different departments were assigned their respective lines, which was to be their quota of the samples to be given in to the committee composed of a body chosen from the corps of principals. The school exhibit from Salt Lake City, however, will not enter the circle of competition, the only motive being to exhibit the nature of the work being done by the schools.

A principal's meeting was held last Thursday afternoon in Supt. Christensen's office. Matters relative to the coming state teachers' institute, especially to the distribution of the great body of teachers which will visit the local schools next Wednesday forenoon, were discussed.

A detailed program of the Teachers' association has been gotten out in pamphlet form for the convenience of teachers.

The local board of education has granted the city teachers a "Fair Day" which will be enjoyed next Tuesday. In addition to this one day's school, no session will be held Wednesday afternoon. The teachers will

be allowed to attend the lectures to be given by visiting educators that afternoon.

The following schools have been assigned eighth grade work. On the East Side, the Bryant, on the West Side, the Union, Lincoln and Fremont.

A piano has been installed in the Bonnevile.

Rev. Brown paid the Utah a visit last Friday.

Department meetings will be suspended during the week owing to the state association.

L. D. S. UNIVERSITY.

Salt Lake City.—No school on Monday and Tuesday, the 31st and 1st, on account of the Fair and conference.

Mr. T. D. Mendenhall of Deal Bros. A Mendenhall visited the bookkeeping department this week. He was especially pleased with the banking and office practice work.

The instructors in telegraphy and bookkeeping have organized a special class in bookkeeping for the telegraph students. Every student in the department is taking the course, and all are interested in the work. No other business college known to us gives a course of this kind and the results are being waited for with interest.

Student Joseph Stanton has been elected captain of the athletic track and basketball teams. The material for work in these lines is being selected and systematic practice will shortly be

Miss Meech delivered a lecture at the Seventh ward Y. W. M. I. A. last Thursday evening.

Meadames Kerr, Langton and Ostien have been in Salt Lake during the past week attending the annual meeting of the Utah Federation of Women's clubs.

The classes in stenography are very large this year.

A complete set of 25 volumes of the Transactions of the American Society of Mechanical Engineers has been received by the library.

Through the kindness of the secretary of state, a complete set of Documents of Utah have been placed on the shelves of the library. An effort is being made by the authorities of the library to build up a complete library on the history of Utah. Any books or pamphlets along this line will be gratefully received. It is desired that the work be especially complete concerning the Indians.

Professors Merrill, Clark, Hutt, Dryden and Jensen went to Salt Lake last Tuesday to aid in arranging the college exhibits at the state fair. Two car loads of exhibits were taken, one of stock and the other filled with many things of interest to the people of the state.

Dr. Eagle gave a very interesting address at chapel last Wednesday on the place of athletics in education.

President Kerr was in Salt Lake last Wednesday.

Mr. Nelson, farm foreman, has gone

## MAXIN'S NEW AUTOMATIC GUN DISCOVERY.

Sir Hiram Maxin, who announces an important invention by himself which will be more far-reaching and important than his automatic gun and will be used alike for the arts of war or peace. He vaguely hints that it will be an aerial wonder and says that the dirigible balloon will never serve for practical purposes.

under way. Owing to the work of lowering the floor of the new chemical laboratory during the past few days, the gymnasium practice has been interrupted. The floor is now solid again, and next week the teams may be at work.

The first issue of the students' paper, "The Gold and Blue," has been announced for next Wednesday. George A. Fisher has been chosen business manager and Elizabeth Cannon editor. The other members of the staff thus far selected are William Dobson, literary notes, Vernon Felt, cartoonist, E. J. Bloom, night school, Florence Grant, class of '04. Others are yet to be elected.

The class of 1905 met and organized on Thursday, electing the following officers: President, Ray Gledhill, vice president, Alonzo Tanner, secretary, Edith Grant, assistant secretary and treasurer, Vera Noall, class speaker, Noel Pratt.

From the department of bookkeeping it is learned that George A. Fisher, president of the commercial class of last year, has just returned school again that Stanley F. Kimball has just left the department to accept a position as bookkeeper, and that there are more lady students taking the work in accounting this year than ever before.

Wednesday morning brought its usual presentation of good things. Miss Maude Symons played two choice selections on the piano and Dr. J. M. Tanner, general superintendent of church schools, addressed the general assembly. In happy vein, he showed the superiority of faith and possibility in the lives of young people over knowledge and certainty. The developments of the future are wisely hidden from our view in order that we may strive after what is possible rather than wait contentedly for what is sure to come.

Faith in the future is, better than knowledge of the future, and the ambitions of youth will be realized largely because of the uncertainty and the possibility that is unrevealed but possible for man.

## AGRICULTURAL COLLEGE

Logan, Utah.—Meadames Ball and Madison went to Salt Lake last Wednesday, as delegates to the Utah Federation of Women's clubs.

The registration is considerably larger than at the same date last year.

The Law club has been reorganized and at the last meeting elected the following officers: S. G. Rich, president; W. H. Kerr, vice president; W. A. Jensen, secretary; and J. L. Jenkins, treasurer.

Prof. Gibson, formerly professor of mathematics at the B. S. U., who has spent the past year in study at Cambridge, England, visited the college last Wednesday.

A telephone has been placed in the office of the director of the department of commerce.

The offices to be used in business practice will be installed Oct. 15.

Miss Fleming has gone east for a six weeks' visit with relatives in Omaha and Louisville.

Prof. Joseph W. Jensen is improving and will probably be able to meet his classes in a short time.

The classes in domestic science are larger than usual. This department is now admirably equipped, having 15 rooms for the work in cooking, sewing, laundering, and recitation. There are two large kitchens, separate rolling doors, furnished with the students' working desks, four large double ranges, an Aladdin oven and an electric stove.

## WEBER STAKE ACADEMY

Ogden, Oct. 3.—Old students are fast coming in, and the registration list grows longer.

Miss McKay left for Chicago last Monday, whether she has gone to study at the University of Chicago.

Mrs. Hendrickson of Logan, who returned from an extended visit to Europe in company with Prof. McKay, paid the school a visit on Wednesday.

Elder George Hader of Salt Lake City addressed the student body at devotional exercises on Thursday.

Prof. Terry has some new improvements under way for the library.

Jas. Widdison, one of our graduates of last year, visited school last Wednesday and spoke for a short time. He left the same day for a mission to the Northwestern states.

With the exception of William Mitchell and Jas. Widdison, who are now

on missions, and Jos. Stimpson and Izzy Pearce who are with us doing higher work, all our graduates are teaching school. Letty Cowies at Heber, Mrs. Carrie Rapp in the city, Pearl Terry at Monticello, Chas. Saunders at Citah, and Lizzie Thomas at Warren, an excellent showing for the class of 1903.

A good attendance at night school is almost certain. Courses on theology, Book of Mormon and principles of the Gospel, grammar, classics and arithmetic or algebra will be given. In addition to these a German-English class will be taught for the benefit of those Germans who desire to get a better understanding of the English language.

The domestic art class now registers about 40 members. The girls manifest much enthusiasm in their work and most of them are making excellent progress.

The committee on associations have commenced work looking especially to the lecture course which proved so satisfactory last year.

## SUCCESSION OF SMALL FRUITS

Ever farmer who grows an abundance of strawberries is anxious to prolong the season as much as possible. This can be done to some extent by growing both early and late varieties, writes E. P. Snyder in New York Tribune Farmer. My experience has been that while the earlier sorts will begin to ripen first, the later kinds will last but little longer.

It often happens that the

hours are my chief objection, and besides, there is a lack of system and good business management that takes all the spirit out of one who likes to see things kept in good shape and the work done in a thorough manner. The best men for farm work—those who have been raised on farms and understand the work—most of them go to the towns and cities, and the boys as they grow up are going, says Mr. Grundy in Farm and Fireside. A farmer who raised three strapping big boys, all now in cities, said to me that he would have to quit farming because he was unable to sustain any satisfactory help. One of his boys said a few days ago, "I wouldn't live on a farm and work like father does if I could get 12 or 14 hours for a day's work to suit him. I'm glad I'm out of it!" Rural free delivery and the telephone will not stop the exodus of boys from the farm, while the day-and-night, push-to-the-limit methods prevail. The city laborer knows that the minute the whistle blows his day's work is done. The boy on the farm and the hand on the farm know that they must work as long as the sun shines, then do a lot of wearisome chores when they go home. I do not consider the work hard, but they keep us in the field too long. We get out early, and then are not expected in until sunset. Hiding a plow or cultivator is not hard work, but 12 or 14 hours of it a day is monotonous and wearisome. It is not possible to work "regular" hours in harvest, haying time and when crops interfere much with seeding, and the boys are well aware of this, but it is not difficult to so manage that the rural and urban will not last the entire season. Farm life is not monotonous unless it is made so. It should be attractive to the boys and hired men, and it can be made so. It is not "lonesome" on the farm to any person with a normal brain and open eyes. It is lonesome only to the faddish who is everlastingly and eternally hankering for "company" and wanting to be in a crowd of some kind or other.

## DIVERSITY OF PRODUCTS.

Beginners with poultry on farms that are intended for a somewhat extensive system of cultivation, and whose capital is limited, should endeavor to produce early and late crops, so as to have cash coming in all the time, if possible. One of the essentials for quick returns is poultry. With food management the birds should lay eggs during the greater portion of the year. One or two good cows will also be found serviceable, but grapes and orchard fruits require more time. On a small farm it will not pay to depend upon the cereal crops. Stock fruit and vegetables give better profits, and bring in cash long before the harvest comes for corn. There is nothing, however, that will bring larger and quicker profits in proportion to capital invested than fowls, and as they multiply rapidly the number can be largely increased every year. The fowls will also consume much waste material.

## NEXT YEAR'S LAYERS.

Select now the pullets for winter layers. If there are a great many pullets that were hatched out, go into the poultry house and select the largest and earliest hatched. Do not be tempted to keep many because they are beautiful, if they are small, as such pullets will not be of sufficient size to begin laying before cold weather sets in. As all fowls, old and young, are subject to the conditions of heat and cold, more or less, and expense can be saved by retaining only those that come into full plumage and reach the adult stage before winter. If a pullet begins to lay before winter, she will then probably lay right on through the winter; but should she not begin in the fall, she will probably defer such work until early in the spring. Use heroic and prompt measures, by culling out the flock and getting rid of every pullet that has not reached a stage of growth that may enable it to give a profit. There is no sentiment in the keeping of fowls. The keeping of poultry should be a business matter.
