Ogden, Feb. 10.—The home of Mrs. D. H. Peery was entered by burglars just at dusk Saturday evening, and about \$250 worth of jewelry and silverware taken.

Mrs. Peery and other members of the family were at Salt Lake City Saturday visiting with relatives. On their return the front door was found unlocked, but Mrs. Peery thought her son Harmon had been in the house and went next door to H. E. Peery's and remarked about the door being open, but had not discovered that burglars had been in the house. On going back to the house Harmon S. Peery returned with his mother and to their astonishment they found that burglars had ransacked the place, getting away with watch and chains and silverware, also a suit of Harmon's clothes. The police were notified, but have been unable to get any trace either of the stolen goods or the burglars. A short time before Mrs. Peery's return some of the members of her family had been seen in the rooms of her mother's house, but paid no attention to them as it was thought Harmon was at home. The burglary was held at Mrs. Peery's home is located only a couple of rods from the Virginia hotel on one side and about the same distance from Horace E. Peery's on the other side.

The facts emphasized by Mr. Smith were that the consolidation of the schools would be a saving to the taxpayers who are a little doubtful as to whether or not they want consolidation in the Cache county districts. The facts emphasized by Mr. Smith were that the consolidation of the schools would be a saving to the taxpayers who are a little doubtful as to whether or not they want consolidation in the Cache county districts.

Under small districts, high schools were conducted for years. The average cost per pupil was \$12 per month, and one year per pupil was given. Only seven pupils were in attendance after 12 years. The highest enrollment reached in any one year was 22. Under consolidation high schools are conducted at a cost per pupil of seven dollars per month and a two years' course giving middle of third year.

Under small districts, teachers had from 15 to 80 pupils each and taught from one to eight grades. Under consolidation, teachers average 35 pupils and two grades are the equivalent.

Under small districts the teacher's average salary was \$500. In large districts \$540. Supposing all the funds available each year for school purposes to be entirely consumed that year, each teacher and equipment cost the small district \$900, the large district \$375.

School attendance increased 20 per cent under consolidation. All supplies were obtained at wholesale cost from 10 to 20 per cent; \$1,100 saved on coal and hauling; \$1,300 saved on bonded interest.

Uniform nine months' school was had under consolidation. It seemed that the settlement of those present was overwhelmingly in favor of having the schools of this county consolidated. It was decided to have local meetings held in every district to ascertain the sentiments in every district and a general meeting will be held Saturday, Feb. 29, with the county commissioners, at which time each district will have the opportunity to give reasons why the schools should not be consolidated. The question will then be up to the commissioners, either to consolidate or to reject the measure.
