Williams' partner, Mort Fletcher, has returned to Salt Lake to secure provi-sions, and they will continue work on Caller-"Mr. Ardup, you said last month of I would come on the 15th you'd be ready to meet this note, and their rich claims all winter, trans-porting ore to the railroad by burro, and state that they can clean up big I've brought it." Mr. Ardup--'Why, the fact is, I'm--er-rendy to meet it, for old acquaint-ance sake, but it's simply impossible for me to be chummy with it. Can't money even by this crude mode of

handling. The great disadvantages to be met in water and transportation lines in trying to work mines in the Death Valley are counterbalanced by the ex-treme richness of ore so far discovered within the horrow waste of description within the barren waste of desert land and old prospectors who have time and again risked their lives by exploring its depths, assert that mines richer than any yet discovered in this country have

been opened up, but cannot be worked to advantage until better facilities for transportation are afforded. MOAPA VALUES.

Morton Blake and Fred Williams, owners of the Golden Crown group of mines near Moapa, received assays of \$42 gold and 130 ounces sliver per ton on samples sent to Salt Lake last week, then from a the salt Lake last week,

on samples sent to Salt Lake last week, taken from a three foot ledge at breast of tunnel now in 230 feet, with a depth from surface of 120 feet. The quartz is heavily oxidized and the vein lies between quartzite and shale walls. Louis McNamee and Fred Woolsey, owners of the Golden Dawn group of gold mines on the upper Virgin river, have struck a three foot vein of free gold, showing coarse gold throughout the width of the vein. The values run in a white honey-combed quartz, very brittle and panning about \$100 to the brittle and panning about \$100 to the ton. They are elated over the rich strike and have gone to Denver to con-sult with the real estate firm of Grey & Noble, their associates and backers.

in regard to the building of a stamp mill on their properties. They have five claims in the group and abundant water from the Virgin to handle the

WILL BUILD A MILL.

George Brown and Fred Calles, own-ers of the Red Light group of geld claims on Virgin river, struck a four foot vein of ore which assays \$659 per ton. They will at once erect a mill and start milling ore by the first of Febru-ery. This is the best strike, considering the size of the vein, yet reported from that district. The values run in white honey-combad quartz between quart-zite and shale walls.

zite and shale walls. Len Meyers and Joe Peters, owners of the Black Bird and Fairview mines, northwest of Caliente about 65 miles have struck a ledge five feet wide at a depth of 160 feet, of black tack going 450 ounces silver and 45 per cent lead per ton. They are elated over the strike, and have bought a lot of provisions and returned to the camp to push work and if possible will interest capital in erect-ine a mult. ing a mill.

CONCENTRATES. A. Hanauer, Jr., left today for a two weeks' trip to the east.

Reports from Park City indicate that the New York Eonanza is looking fine.

Capt. Henry Stern, president of the Tintic Mining & Development company, also the Yampa Smelting company, re-turned to the east yesterday, The Taylor-Brunton sampler received today 10 cars of ore from Tintic, one

from Tonopah and one from Bingham. The May Day reported at the Pioneer sampler today with two cars of firstclass of and a similar shipment of second-class. The sampler also had two cars from the Miller mine in Am-erican Fork canyon.

Frank D. Kimball, cashier of Mc-ornick & Co.'s bank at Eureka, reports some interesting movements on Godiva hill, where lie the May Day, Beck Tunnel and other properties. He says the scene is a changed one, and advises skeptics to look into the matter for themselves if they would be coned that that section is a good field for investment.
