

OGDEN.

Ogden, Utah. — AUGUST 15, 1895.

The Desperadoes.

The Captain and George examination was confined yesterday before Commissioner Terrell. Presented Attorney Magdalene claimed the felonies had been slight to serve an assassin's blow. He also wished the gentlemen to have counsel, but when the Commissioner spoke it was about having counsel to defend them. Captain and George denied this. "We planned to kill him," George's reply to the same question was, "I say just the same as he does." Two court-appointed, A. H. Hayes and T. D. Johnson to defend them. Both attorneys were present. Mr. Hayes, the first attorney, Birney and Lippman, both an appearance as attorney for defendants. Under close and minute examination by Presenting Attorney Stearns, Mr. University of Utah, the two were arraigned before the former, which resulted in the killing of Lewis and Stagg, which was listened to with intense interest. No trouble have visited the court room during the examination.

For Using a Knife.

A two dozen by the name of Hines, rather the "Hines" of "Hines" was arrested yesterday night for a second度. Lewis. He has two severe cuts, one on the left cheek and one on the back of the neck.

LOGAN.

Logan, Utah. — AUGUST 15, 1895.

Shot a Bear.

Two Smithfield boys, Earl Ewan Thomas Cragan, went hunting in Smithfield canyon last Saturday morning, and shot a large black bear. At least nine of the saps they found a six feet and three inches. Ewan fired at the bear and killed it. Fearing an attack from the mother, they ran away. However, the mother and her cubs, who were accompanying the two boys, were跟踪 by a party armed with Winchester rifles. Several shots were fired, but the old one and her remaining cubs escaped.

To Work the Mines.

Three men are at work at the Red Jacob and two in the timbered section in the Pine Valley mine, working out a quantity of fine looking goss. Work will now be resumed shortly on the La Plaza and Standard properties, owned by the La Plaza Mining Company. The work will be opened up in two mines last named has been started by a dispute between the company and the owners of mining claims, but this has been satisfactorily disposed of.

Accidents.

The wife of Bishop Davison, of the Third ward, was stricken with a severe paralytic stroke last week, but is now recovering.

Bishop Davison Jr met with a sad mis-
hap on Monday afternoon. He was running a pointer saw in Peterson's mill, and getting his hand caught by it, had the two middle fingers of his left hand severely lacerated. The loss of the two fingers was the amputation was the only outcome. One finger was entirely removed by amputation at the knuckle joint, and the other was taken off just above. The little finger was torn, and the thumb joint may be still.

Note.

The roller society has been very successful in its initial attempt at silk culture, and has a quantity of beautiful silk on hand. It is difficult to afford the necessary machinery to furnish the necessary machinery to weave it. Its efforts in another direction, the raising of flax and manufacture of linen, promises to be a gratifying success.

Lugan is included in the A. W. Utah circuit, and the annual meet will be held there in October. The names of the other circuits, including Tintic, Waller, Evans, Jensen and Coopers, will compete for the prizes offered. The track is in very good condition.

Lieutenant Ritter, and wife and B. H. Lyon of Ogden, accompanied by Roy Hamilton and sister-in-law, left Ogden this morning to go through Logan and other parts of the state. They will be in some several weeks, and will be joined later by A. M. Flaming and wife.

Professors Richwood and Mackean and Secretary Hyde of the Agricultural College, and L. H. Martineau and party, have returned from the Yellowstone National Park.

Quinton Lewis has gone out a few days, and will be back again. He may make arrangements for the Indians' participation in the Entomological.

The county has completed a new and much needed bridge over the Cache river, between Richwood and Layton.
