SOUTH SWANSEA CLIMBING. REPORT ON CON. MERCUR.

Yankee Con. Advances-Lower Mammoth Firm-Anchor is Weakening.

\$7.54 Per Share.

A very good business was transacted on the Mining Exchange this week. During the first five days the records of the exchange show the sale of 240,582 the Smelting and Refining comshares for the sum of \$93,242. Prices showed a slight weakening tendency early in the week, but a general stiffening is seen in the list today. One of stock. The injunction will be argued the features of the week has been the next Tuesday before Vice Chancellor increased demand for Ontario of Park City owing to assurances of a dividend next month. The fact that the company has recently sunk 200 feet deeper and is now cross cutting to the vein, her also helped to give the stock a bet-ter tone. Sales were made today as high as \$7.54 per share. Yankee Con. also shows much strength today as the result of iron stained rock being encountered in the upraise. It sold up to 13^{1/4} today after hanging around 10 earlier in the week. South Swansea put on a spurt today and climbed to \$1.11 on a spurt today and climbed to \$1.11 per share with the sale of a few hun-dred shares, Earlier in the week it sold below \$1 per share. Ben Butler has been practically stationary for several days. Sales were made today from 7% down to 7%. On Monday last sales were made at betten than 10. Manhattan has put on new life after a season of inactivity. The finding of copper stained rock in the tunnel sent the stock from % to 1%. It has since weakened to just under 1 cent per share. Lower Mam-moth is stronger at the close of the week. On Monday sales were made moth is stronger at the close of the week. On Monday sales were made around \$2.75 but it has since forged ahead to \$3, around which figure it now remains steady. Dalton of Marysvale has been active this week at lower prices, while Jos Bowers has moved up to 1%. Martha Washington, which sold at 6% on Monday was traded in be-tween 4 and 4% today. Ajax of Tin-tic has again climbed up nearly to 80 after a set back earlier in the week. after a set back earlier in the week. Anchor has weakened materially while Mav is firm around 43, at which price the shares changeh hands today. Star Con is a little firmer today at 77%, but it is still a little lower than its open-ing price on Monday. Tesora is weak around 43, while Bulliss Beck is a little firmer as the result of new develop-ments at the mine. Mammoth was very strong today On Monday it was offered strong today. On Monday it was offered at \$2.04, but it has since climbed to nearly \$2.20 per share. Grand Central is firm, while Daly West continues to get stronger.

The closing quotations were as follows: Bid. Asked. Stocks. 79% 791/2 Ajax

A dispatch from New York states that a temporary injunction was served today on the officers of pany who were present at the company's meeting in Jersey City, restraining them from increasing the capital our line.

Stevens. The officers of the company desired to increase the capital stock in order to take in the Guggenheim refinery.

The complaint on which the temporary injunction was issued, alleged that the American Smelting and Refining company had no surplus or working capital on January 1, 1991, and that in-stead, that on date, its capital was ac-capital on January 1, 1991, and that in-stead, that on date, its capital was ac-capital on January 1, 1991, and that in-stead that on date, its capital was ac-capital on January 1, 1991, and that in-stead that on date, its capital was ac-capital on January 1, 1991, and that in-stead that on date, its capital was ac-capital on January 1, 1991, and that in-stead that on date, its capital was ac-capital on January 1, 1991, and that in-stead that on date, its capital was ac-capital on January 1, 1991, and that in-capital on January 1, 1991, and that in-stead that on date, its capital was ac-capital on January 1, 1991, and that in-capital on January 1, 1991, and that in-the January 1, 1991, and that in-capital on January 1, 1991, and that in-the January stead, that on date, its capital was ac-tually and to a considerable extent im-paired. It is also alleged in the com-plaint that the Guggenheim property is not worth more than \$10,000,000 and that the purchase is proposed to be made an issue of new stock of the American Smelting and Refining company to the extent of \$10,000,000 on a basis of 80 per cent for the preferred and fifty per cent for the common stock. It is also declared in the complaint that the proposed purchase would establish a complete monopoly in the business of smelting and refining gold and silver ores in the United States and Mexico and would therefore be subjected to all the penalties which are prescribed by the statutes of the United States against trusts and monopolies. Affi-davits are attached to the complaint in support of the allegations made.

The meeting at which the injunction was served was a special one called for the purpose of increasing the capital stock of the company from \$65,000,000 stock of the company from \$55,000,000 to \$100,000,000. No business at all had been transacted when the injunction was presented and the meeting took a recess until later in the day. The re-straining order was obtained behalf of S. V. White & Company, h...ders of 400 shares of common and fity shares of preferred stock; Wm. H. Curtis, owner of 600 shares; A. Sartorius, holder of 500 shares and Wm. Donnelly and of 500 shares, and Wm. Donnelly and Henry Zeimann, owner of 100 shares each. The hearing on the injunction will be held in Newark.

CON. MERCUR REPORT.

State Engineer Gemmel Hands it Over to Company's Officers Today.

After several weeks' work, State Engineer R. C. Gemmelll completed his port on the properties of the Con-

product, gross weight. President Snyder of the California at Park City, left for the camp today, after purchasing about \$3,000 worth of new machinery. The latest number of the Mining Re-

view contains a lengthy description of the Montezuma mine in Markham

secretary Boggs of the New State Smelting company says the resignation of R. H. Terhune from the presidency of the company will not effect the en-terprise in the least.

President J. A. Coram of the Bingham Copper and Gold Mining company arrived in the city last night for the put-pose of looking over the new smelter which is working so successfully.

The Wells (Nev.) Herald says a Sait Lake man by the name of Bacon has taken hold of the coal prospects south of Elko, lately operated by Joseph Lang Jr., and George Bruce.

H. C. Brownlee's interest in the Min-ing Review has been purchased by W. H. Korns, an old newspaper man from Nebraska, Mr. Korns will hold up the business end of the paper.

Tintic Miner: Underground whispers report a strike of a nice body of ore in the north workings of the Beck mine not a great distance from the end lines

Tooele Transcript: Notices are up for driving a tunnel 400 feet on the Tim-pay mine, situated in the Timpay can-yon, bonded to the Bell Mining com-pany of Park City, and owned by J. P. Mecham and John Peterson. There is all reach a upred 150 feet in the same all ready a tunnel 150 feet in the same mine and indications are good.

gold brick to Denver yesterday, ing a little over 20 pounds and valued at about \$5,500. The gross receipts of the company have been about \$11,000 per month for the past few months. Everything is now in readiness to start up the roaster next week.

Heavy Decrease of Surplus in Bank Statement Prompted Their Action.

Opening Showed Changes Each Way - The Tone of Speculation Was Confused.

New York, Feb. 16.—There were changes extending to a point or more in various stocks, some of them gains and some of them losses. The tone of speculation was much confused. Burlington opened wide on the sale of 6,000 shares, selling at 1.43½ to 1.44, compared with 1.43¼ last night. St. Paul, Delaware and Hudson, General Electric and Toledo. St. Louis and Western preferred were up a point each. Smelting broke sharply, selling lown 2¼, and the preferred yielded a fraction. The steel stocks were also fraction. The steel stocks were also heavy, Steel and Wire and Federal Steel going down almost a point. Denver and Rio Grande declined a point. Openand Rio Grande declined a point. Open-ing prices were immediately shaded. The heaviness of the steel stocks and the absence of any important demand were depressing factors. The Grangers and Steel and Copper stocks, Pacifics, Tractions, Coalers and Sugar all ave way decidedly, some of them yielding well over a point from the opening. There were a few gains of importance, including 2½ in National Steel pre-ferred.

ferred. The market was pushed up in the second hour under the lead of Burling-ton, which rallied 2% to 1.45 with the Delaware and Hudson Delaware and Hudson

SALT LAKE CITY, UTAH. 700 foot station in the new shaft. Within an hour the 25 foot sump was

Within an hour the 25 foot sump was filled with water, and but for prompt action the mine would have been sub-merged. The water subsided, how-ever, the flow having come from the lower levels of the Four-Aces, which had been allowed to remain idle for some time past.

and been anowed to remain the for some time past. The incline from the 300 foot level in the Eagle-Blue Bell broke into a cave Monday that seems to be lined with ore, a veritable "jewelry box" where Dame Nature stores her treas-ures. For some time the management has been following a cross-fissure that leads from the main ore channel west toward the Centennial-Eureka, and at a favorable point the incline was sunk that has, at a depth of 50 feet, disclosed the cave, which promises to be a bread winner. Samples from the ore exposed assay 16 per cent lead, 51 ounces silver and 38 gold.

MYSTIC SHRINE ORE. A Two-foot Body of Fine Ore in the

Tin Horn Claim. Manager E. W. Young of the Mystic Shrine is very much encouraged over samples of ore which reached him yesterday from that Bingham property. Assays show 11.5 per cent copper, 11 ounces silver, and \$2.80 in gold per ton. The ore was taken from the Tin Horn claim recently purchased by the com-pany. An incline shaft has been sunk about 60 feet on this property. The ore was encountered near the grass roots. where about 6 inches of ore was opened up. This has since widened out to two feet. The ore looks well and it would not be surprising if a big body should be disclored about be disclosed shortly.

solidated Mercur and handed it over to the secretary of the company today. This report, which, accompanied by maps and photographs, will be sent to Manager Cohen, who is in California, after which it will be forwarded to the Boston exchange. Nothing shows the care taken in listing mines by the men control of the exchange bet-than this report. Three of Mr. Gemmell's maps show the claims of the company, which number 79 and comprise a total of 944 acres. One map shows the claims on the east dip, an-other shows the west dip and the third represents the company's claims at Manning. In addition, there is a big map of the underground workings of map of the underground workings of the Golden Gate and Brickyard mines; also three maps of the workings in the three veins of the Mercur property. Four maps show cross sections of the Golden Gate and Mercur. In these the relative positions of the ore bodies are shown as well as the thickness of those bodies. The results of several thousand assays are also marked in their proper places on the maps. The their proper places on the maps. The report proper covers about twenly type-written pages, and is accompanied by a number of 10x12 photographs of the big mill, electric tranway and Mercur workings, including a very inter-esting photo of the mill at night. The countless electric lights make a very ef-

fective picture of it. In the following summary Engineer Gemmell says:

1-Large bodies of pay ore are now Godiva..... Grand Central...... Lower Mammoth.... in sight; between them there is every probability of developing fully as much more ore; outside of them, in the un-prospected three-fourths of the area in the main mineral zone belonging to the company, there is a possibility of developing other large bodies of ore. 2-The company owns the ground which includes the outcrops of all the Undine veins, in addition to the large territory covering the veins, and there is no danger of its ever being put to any trou-ble or expense in the way of litigation. 3-The mine is now equipped with an electric tramway and with enough bins. Mammoth Mill..... 2 Eureka-Hill mill...... cars and tools to last for five years, and the ore can be very cheaply mined. 4-Metallurgical and mechanical skill Mammoth mill of the highest order and the best materials and machinery have been used in building and equipping the mill, and, with the improvements that are now nearly completed, it can handle 1,000 of ore.

tons per diem in a manner unsurpassed by any plant in the world. 5-From time to time, so fast as ac

tunl experience has shown their necessity, improvements and additions to the mill have been made, until now it is equipped to do the very best work, and 1 predict for the property a long and proseprous career.

REVIEW OF THE WOOL MARKET

Boston, Feb. 15 .- The Commercial Bulletin will say tomorrow of the wool trade: "The receipts of wool in Boston since, January 1st, have been 12,589,387 pounds against 19,720,000 pounds for the same period in 1900. The shipments to date are 28,847,179 pounds against sales of 27,152,509 pounds for the same per-iod in 1900. The market has ruled ac. tive and the outgo is now ahead of that of last year to date. Speculators are unloading and prices of all fine medium wools, especially short Utah, Colorado and similar clips are extremely weak. Fine wools are in better request. Fine staple Territory is in better request and has sold at 51c clean."

BUTTER AND EGGS.

New York, Feb. 15 .- Butter-Receipts, 4,950 packages; market strong; fresh

creamery, 16@22½c; June creamery, 15@ 20c; factory, 11@15c. Eggs-Receipts, 10,535 packages; market steady at the decline; western, at mark, 15%@18c; southern, at mark, 17@

Cheese-ctive, 10%@11%c. Eggs-Dull; fresh, 16c.

ST. LOUIS WOOL.

St. Louis, Mo., Feb. 16.-Wool weak and declining: Territory and Western mediums, 144@16½; fine, 11½@14½; coarse, 11½@14.

EUSINESS NOTES.

While trade conditions in the northern part of the State will probably undergo little change from last year, which left small cause for dissatisfaction, the prospect in the South is reasuring, say leading merchants of Salt Lake.

The improved conditions are due to the plentiful supply of snow in the south this year, and the building of the Los Angeles road will have a salutory effect on trade in the south which, of course, will reflect on the north to some extent. The low prices obtained for wool last season have been due to two causes-the open winter and the marked

causes—the open winter and the marked improvement in manufactured cotton goods, which largely supplanted the woolen article last winter. Leading bankers say that the out-look for the year's business at this time is good. The improved condition of the mines ought to make this one of the most prosperous years in the his-tory of the State, although the low prices obtaining for wool will, to some

It is, of course, too early to predict concerning the crops. Regarding the big 35 per cent stock dividend of the Utah Sugar company, paid during the week, Mr. J. C. Cutler, Jr., said in his business circular today: The company could well make this stock dividend, their improvements having cost upwards of \$650,000 the past two years, to meet which they having cost upwards of easily of the past two years, to meet which they have only issued stock to the amount of \$370,000, so that their assets above their liabilities amount to more than their capital stock with the above increase of 35 per cent.

Thatcher Bros. B'k'g Co., Logan., 18, First National Bank, Ogden..., 18, Rocky M't'n Bell Tel. Co. (issued) 8, Davis County Bank, Farmington, 18, Barnes Banking Co., Kaysville., 18, There is no doubt that 12 per cent per annum dividends on the increased capital, which will amount to practical-ly \$1,000,000, will be paid in the future, by \$1,000,000, will be part in the future, payable at the rate of 3 per cent quar-terly, and with the capital increased the stock will pay at the rate of 7 per cent per annum on \$17. a share, so it is believed that the stock will not sell for TO CURE A COLD IN ONE DIT Take LazativeBromo Quinins Tablets, All and gists relund the money if it fails to car i Grove's signature is on eachbox, 25c. less than \$17 per share if the money market rates remain the same as they
