DESERET EVENING NEWS: MONDAY, JULY 4, 1904.

UTAH COUNTY FINANCES.

District Court Hearings-Wedding Bells -Stake Priesthood Meeting.

Special Correspondence.

Come Together in Deadly Provo, Utah Co., July 4.-At the Priesthood meeting Saturday, the speakers were President David John, and Counselors Keeler and Holbrook. The brethren were urged to energetic efforts in the collections of the Brigham Young undersative presentatory, building SAVES HIS BOY FROM RUNAWAY Young university preparatory building fund, and reference was made to the responsibility of Bishops and teachers in correcting evils among the people. The following brethren were sustained for ordination to the office of Elder: Thrilling Experience of William Brown Abraham H. Jones, Alexander Gilles-ple, Christian F. Olsen, Jonathan Buck-ley, Charles Allred, and John Clayton, all of Provo.

of West Weber-Little Boy Loses Finger-Another Damage Suit.

Roy Henderson and James O'Riley, ino cooks employed on the Ogden-Luen cut-off at Lakeside, had a bloody battle Saturday evening which has landed both of them in jail and may send them to the state prison besides their suffering of pain from the wounds inflicted on their bodies, Henderson having a deep, long knife wound on his back, inflicted by O'Riley, and O'Riley has a bad gun shot wound under his

Combat.

right arm, inflicted by Henderson. The trouble had been brewing for some time past, and words had been exchanged a number of times. The men were working in the same kitchen but could not agree in their work. Saturday Henderson quit his job and prepired to leave the camp, when O'Riley same out and asked him to remain stating he would quit and leave. They ssain exchanged angry words, and came together with blows. O'Riley pulled his knife and cut Henderson in the back, the latter staggered, and drawing his pistol, fired two shots at O'Riley, the first shot striking him under the am, coming out near the shoulder, but the second shot missed its mark. Special offer Cordon was on the scene and prevented any further trouble by placis both men under arrest. They were brought to Ogden Saturday night, and uned over to Sheriff Johnson of Boxhe county, who took them to Brig-

COUNTY FINANCES. County Auditor Bachman has prepared his annual statement of the fin-ances of Utah county, showing a bal-ance on hand of \$2,988.35, at the end of June. The receipts for the year amount to \$69,070.50, of which \$45,714.18 was received from taxes; from fees, \$11,937.68, and the balance from various other and the balance from various other sources. The larger amounts of the ex-penditures are \$17,033.64, salaries; \$3,-280,56, bounties; \$6,461.45, highways; \$7,-746.95, poor and indigent; \$1,237.98, in-terest; \$6,050 bills payable redemption of old notes of 1896; \$10,621.49, county infirmary. There are warrants out-standing, amounting to \$24,570.52.

FOURTH DISTRICT COURT. The following busines has been trans acted in the Fuorth district court: The petition of Mrs. Harriet Bab-cock of Spanish Fork for the adoption of her 11-year-old granddaughter, Maud Smith, both of whose parents are dead, was heard by Judge Booth, and taken under consideration till the 7th. The petition is opposed by Mrs. Jane Smith, of Springville, the grandmother of the child on the father's side, with whom the child has been living, since the death of her fater. Judge Booth has rendered a decision in

the case of Utah county vs Thomas Boardman, a suit involving the owner-Boardman, a suit involving the owner-ship of certain spring water, situated east of the county infirmary. The de-clsion is in favor of plaintiff. In the separate maintenance suit of Kate DeMoisey vs Charles DeMoisey, Jr., a decision has been rendered, awarding plaintiff \$30 a month for the support of herself and infant child

MONTPELIER, IDAHO.

FROST AND GRASSHOPPERS

Nearly Destroyed All Crops-Fruit, Vegetables and Grain Affected.

Special Correspondence.

Montpelier, Ida., June 30 .- The heavy frost which visited us on the nights of the 23rd and 24th inst. did much more damage than at first thought. Much of the fruit, especially strawberries and the more tender varieties of the larger fruits, were badly damaged and in many placed completely destroyed, which is also true of much of the vegetable crop. It is also feared that much of the early grain may be blighted. Damaging as the frost has been the grasshoppers are and have been far worse. The farmers have been fighting the hungry army since early spring, but from present indications the labor will be vain for many fields have been will be vain for many heids have been stripped and the hoppers are increas-ing very rapidly. A petition has been filed with the county commissioners for aid, but no action has yet been taken in the matter. Arrangements have been completed for a grand celebration of independence day.

ful beet sugar grower, that he will not get down on his hands and knees nor permit his wife and children to make the best care of the beet plants the way the foreigner does.

"Nothing. Our early growers made a blunder. They tried to cultivate beets with the hoe. They imported European labor and had their beet crops hoed and weeded by hand. The hoe does not cultivate deep enough. After the plant-nig and the thinning everything should be done with the horse cultivator."

LEARN TO PEDDLE.

Farmers have a horror of peddling their products. There are many farmers situated near large towns or cities who might send into the market almost daily produce from their berry fields. who are deterred from the horror of beddling. It is well to train one of the beys upon the farm to peddin. Encour-age him by starting him in growing strawberries, blackberries, currants and other small fruits. You will be, sur-

prised at the annual income that such prised at the annual income that such a hoy will bring in during the year. It is not well that the load be made up entirely of one item. It is far better to have numerous items upon the wagon so as to meet the wants of customers. You will find customers depending up-on you, after a time, for your superior butter, your buttermilk, your fresh laid ergs, your attractive apples, your crisp heads of cabbage, the beets, turnips, cucumbers and other articles from your garden, but the largest profits will come from strawberries and other small fruits.

MANAGING THE HEN YARD.

If the hens are confined in the yards, the best way to keep the yards clean and prevent disease is to either spade them frequently or have two yards and grow a green crop in one while the fowls will occupy the other, alternating the yards as necessity requires. If the yard is small it is an excellent plan to yard is small it is an exceitent plan to scatter air-slaked lime over it once or more a month, so as to destroy the germs of roup, as well as the gape worm.—American Poultry Advocate.

TO DESTROY GOPHER PEST.

Any Grocery

Store is the

formly saturated with the poison. The grain should now be spread out to dry where it cannot be reached by animals or children, for you have a highly r children, for you have a highly ofsoned grain. Now dissolve six pounds of sugar in six quarts of water and boil until one gallon remains, then allow to cool; when cold add a teaspoonful of anise oil, which can be had at any drug store. You now have a thick syrup, which should be poured over the symp, which should be poured over the nearly dry poisoned grain and the whole stirred so as to cover each grain with a layer of syrup. Allow the grain to thoroughly dry, stirring so as to prevent its sticking in a mass. The odor of arise oil is very attractive to the go-pher, and each kernel should contain enough poison to destroy one gopher. This sugar-coated grain can be used This sugar-coated grain can be used at any time, but care should be taken to prevent any prisoning of birds or animals. A little of this grain burled near each gopher burrow will be pretty sure to attract and destroy its victim.

..... Dry Goods at less than half price. See New York Cash Store ad.

The annual meeting of the stockholders of the Deseret Savings Bank will be held on Tuesday, the 12th day of July, A. D. 1904, at 12 o'clock noon, at its office in the

There has been considerable complaint throughout the Dakotas and neighboring states of the havoc caused by the gopher. Farmers who have ed by the gopher. Farmers who have experienced loss from these little ani-mals are anxious for some simple means for exterminating them. So urgent has this demand become that some stations have taken up the mat-ter with the intention of discovering some simple means to accomplish the Special Correspondence. Raymond, Alberta, Canada, June Z.--We are just having a slight drouth at the present in this beautiful land, but we believe that it will not be many days until we have plenty of rain. Beets are being thinned and it is not an uncommon thing to see loads of chil-dren going and coming from the beet fields. The beets are doing well here, indeed, it is said by some who have just recently returned from the south, that our beets are much farther along than those they saw in Idaho and Utah, and this should be very encouraging to those who have any intentions of ever coming to Raymond. There has just arrived from Mexico a some simple means to accomplish the death of the gopher. It is evidently time that these little animals were destroyed. At any rate this is the opin-ion of some who have given the matter attention. Speaking of this subject, Frof. E. E. Ladd of the North Da-kota experiment station has this to say: "Notwithstanding the fact that go-phers in former ages have done incal-culable good in turning over the soil long centuries before it was turned with a plow, it would seem correct to say that their work is accomplished and therefore that their days should be who have any intentions of ever coming to Raymond. There has just arrived from Mexico a company who intend putting in 7,000 agres of grain this fail and next spring. The company consists of Mr. Guy Taylor and his brothers, They are here representing Mr. Ernest Taylor's interests. The wheat crop is looking fine and the farmers expect a good harvest.

therefore that their days should be numbered. The estimated damage to alfalfa in Kansas in 1901 was \$500,000. It is the conviction that the damage to farm crops in North Dakota from the same source would aggregate even a larger sum." Some of the best work toward the

extermination of the gopher has been done by the North Dakota station. They believe they have evolved a simple pro cess by which any farmer may rid his premises of the pest when he has once become satisfied that they are doing him a serious injury. The plan recom-mended from this station's work is summed up in the following:

the solution is entirely absorbed; but the mass must be frequently stirred vigorously so that it will become uni-

SAVES BOY FROM SERIOUS IN-JURY.

Wm. Brown, of West Weber, courareously stopped his runaway horse Saturday night shortly after 8 o'clock,

thereby perhaps saving the life of his eitht-year-old son James, who was in the buggy. Mr. Brown came to Ogden with his wife and son to do some shopping. While on Twenty-fourth street aberse attached to a buggy broke loose and started down the street towards W. Brown's outfit. Fearing the dan-

W Brown's outfit. Fearing the dan-se, Mr. Brown jumped out of his ve-hide to stop the runaway, dropping his lizes for his wife to catch, but she mased them, and the horse started to run away. Mr. Brown immediately stated after his horse and buggy, and after a race for several rods, grabbed the horse by the bit. The animal bit him on the hand, but he held to the horse, and after being dragged for a stort distance, succeeded in stopping the runaway. The boy was much inghtened but uninjured.

LOSES HIS FINGER IN MOWER.

The little six-year-old son of Street supervisor L. B. Balch met with a pain-fal accident last night by having one date fingers cut off in the lawn mower. e fellow with two of his young The little fellow with two of his young-et brothers was playing in the yard with the mower, cutting paper with it, when Ernest caught his fingers be-treen the knives and cut it off at the seend joint. Dr. Conroy was sum-momed, who dressed the injured mem-ber, and the little felow is getting along nicely.

WANTS \$15,000 FOR A FOOT.

W. J. Nichter, through his attorneys, W. L. Maginnis and Chas. Stout, has field an action in the district court sgainst the Union Pacific company to recover damages in the sum of \$15,000. In the complaint the plaintiff alleges that on the 3rd of March this year he was employed as that on the 3rd of March this year he was employed as a foreman in the yards and while in the performance of his duy, supervising some switching operations, he stepped between two cas to prepare to make a coupling. The engineer operating the locomotive, without a signal from the plaintiff or any one else, backed the engine upon the cars and plaintiff's left foot was crushed as to necessitate amoutation. crushed as to necessitate amputation. For this injury he sues for the amount stated.

District conferences of the Y. M. and Y. L. M. I. A. of this stake will be held as

sive, costing from half a million dol-lars up, and the question of getting the beet pulp after the sugar is extracted back to the farm to be utilized as stock feed is a serious one. In probably the feed is a serious one. In probably the majority of cases it cannot be done economically. Many of the beets are shipped into the big factories from far distant farms, some of them a hundred miles away, and it is obviously imprac-ticable to ship the pulp back for feed. But the secretary's beet sugar experts are looking into the feasibility of estab-lishing numerous small plants at a cost lishing numerous small plants at a cost of a comparatively few thousand dollars in which the preliminary process of sugar extraction can be accomplished, in other words, where crude beet sugar can be made. If his idea can be worked out in practise it will mean a wonderful advance in both American sugar mak-

SECY, WILSON ON FUTURE

OF SUGAR BEET INDUSTRY.

Secy. Wilson is a strong friend of the American beet. He has great faith in the sugar beet as a sugar proposition

and as an adjunct to both the live stock

and dairy industries. The ordinary beet sugar factory is enormously expen-

"For instance," said he, "If they can have one big refining factory in the middle of the state of lowa and then a great number of small plants throughout the state to reduce the beets to crude sugar it will enable the farmers to utilize their pulp to great advantage and would tremendously stimulate su gar beet growing.

"Another thing, these great factories as they are operated now can make sugar for only a few months each year; then they must shut down until the next crop, during which time a large in-vestment of capital is idle. If this little factory idea is started and can do the work of raw manufacturing the big the work of raw manufacturing the big refinery can be run the year around as the capacity of the refinery will be reg-ulated according to the output of the small plants. With the small plants well distributed the beet pulp could be all utilized for stock feed; it can be kept in silos as well as can corn fodder or other green feed. Have you seen our late builetin on beet pulp?" "Yes," I answered, though I did not admit that I had not read it. "Well, that tells you all about the value of beet pulp. But this other mat-ter is just an idea. There is nothing to say about it. I am just starting some inquiries."

inquiries."

All of which Mr. Wilson is very modest in, but it is this sort of initiative effort which has brought the American department of agriculture into world-wide prominence and has made it the ost agricultural bureau of the foren

globe. "The most we are doing now in beets," he continued, "is in growing seed beets. We must grow all of our own seed in this country. We will keep seed in this country. We will keep home half a million dollars a year and we will have better seed. We can grow the best beet seed in the world, as we now grow the best beets."

now grow the best beets." "Better even than the German seed of the long unpronounceable name?" "Oh, yes, far better. We can grow bet-ter beets in America, richer in sugar, and bigger tonnage per acre; American farmers have grown beets with 28 per cent saccharine, and 38 tons per acre. The question now lies with the farmers, The avergae yield is far too low_____tebt The question how here with the farmers, The avergae yield is far too low-eight tons per acre. Our people must grow more tonnage. If we can grow an aver-age of 15 tons per acre we will not then need any protection in the form of tariff-15 tons per acre and 18 per cent sugar. That will beat the world." "Even the Philippines, where they

"Iven the Failppines, where they can grow sugar for a cent a pound?" "Yes, we can even let the bars down for the Philippines, and that is coming sometime, surely coming. The advan-tage which the farmers of our tempertage which the farmers of our temper-ate zone will have over the Philippines, or Cuba or Hawail is that while their soil fertility will decrease with a con-stant planting to a single crop, our far-mers will diversify their crops and thus keep up the fertility of their soil. Why even in Hawali now they are needing to use fertilizers very largely. They have to send to Chile for nitrogen, to Florida for phosphate and to Germany for potash and they have to take over coal from British Columbia to pump water for irrigation. Then the question of transportation from these countries is an item."

"How much of fact is there in the statement made by the opponents of the beet sugar industry that the American farmer will never make a successBring a quart of vinegar to boiling, add one ounce of strychnine, stir with a stick until fully dissolved, then add six quarts of hot water; pour that on to 20 pounds of wheat or corn and allow

FORTY YEARS AGO almost every mother thought her child must have PAREGORIC or laudanum to make it sleep. These drugs will produce sleep, and A FEW DROPS TOO MANY will produce the SLEEP FROM WHICH THERE IS NO WAKING. Many are the children who have been killed or whose health has been ruined for life by paregoric, laudanum and morphine, each of which is a narcotic product of opium. Druggists are prohibited from selling either of the narcotics named to children at all, or to anybody without labelling them "poison." The definition of "narcotic" is: "A medicine which relieves pain and produces sleep, but which in poisonous doses produces stupor, coma, convulsions and death." The taste and smell of medicines containing opium are disguised, and sold under the names of "Drops," " Cordials," " Soothing Syrups," etc. You should not permit any medicine to be given to your children without you or your physician know of what it is composed. CASTORIA DOES NOT CON-TAIN NARCOTICS, if it bears the signature of Chas. H. Fletcher.

Letters from Prominent Physicians addressed to Chas. H. Fletcher.

Dr. J. W. Dinsdale, of Chicago, Ill., says: "I use your Casteria and advise its use in all families where there are children."

Dr. Alexander E. Mintie, of Cleveland, Ohio, says: "I have frequently prescribed your Castoria and have found it a reliable and pleasant remedy for children."

Dr. J. S. Alexander, of Omaha, Neb., says: "A medicine so valuable and beneficial for children as your Castoria is, deserves the highest praise. I find it in use everywhere."

Dr. J. A. McClellan, of Buffalo, N. Y., says: "I have frequently prescribed our Castoria for children and always got good results. In fact I use Castoria r my own children."

Dr. J. W. Allen, of St. Louis, Mo., says: "I heartily endorse your Castoria, have frequently prescribed it in my medical practice, and have always found to do all that is claimed for it."

Dr. C. H. Glidden, of St. Paul, Minn., says: "My experience as a practitioner with your Castoria has been highly satisfactory, and I consider it an excellent remedy for the young."

Dr. H. D. Benner, of Philadelphia, Pa., says: "I have used your Castoria as a purgative in the cases of children for years past with the most happy effect, and fully endonce it as a safe remedy."

Dr. J. A. Boarman, of Kansus City, Mo., says: "Your Castoria is a splendid remedy for children, known the world over. I use it in my practice and have no besitancy in recommending it for the complaints of infants and children."

Dr. J. J. Mackey, of Brooklyn, N. T., says: "I consider your Castoria an excellent preparation for children, being composed of reliable medicines and plensant to the taste. A good remedy for all disturbances of the digestive organs."

Dr. Howard James, of New York City, muys: "It is with great pleasure that I desire to testify to the medicinal virtue of your Casstorin. I have used it with marked benefit in the case of my own daughter, and have obtained excellent results from its administration to other children in my practice."

Every mother feels a great dread of the pain and danger attendant upon
