FOR \$17,500,

# GUGGENHEIM SECURITIES.

Figures Showing Tremendous Depreciation During Past Few Months.

The paper losses sustained by holders of securities of the various Guggen-heim corporations total approximately \$55,000,000 from the highest point of this year.

It will be recalled that Smelters comnon was rushed above 150 on talk of a 10 per cent dividend and at that time there was an eager scramble for the

laxed a bit in his amothous plans for increasing the prestige of the United Copper company, of which he is presi-dent. Those plans are progressing rapidly and may make the United the biggest mining, milling and smelting company in America, but Mr. Heinze believes there is plenty of room for all and that financial and legal strife result in nothing but wasted effort.

# EUREKA MINING NEWS.

# Great Activity Among The Properties Of Tintie District.

Eureka, Aug. 23.-J. C. Jensen te-turned Wednesday evening from Salt Lake and Provo where he spent several turned Wednesday evening from Salt Lake and Provo where he spent several days attending to mining business in connection with the East Crown Point company. Mr. Jensen states that a small force is at work at the East Crown Point under the direction of Supt. Joseph Reese, but the company has not yet decided just where the main working shaft will be located. The company has thought of using a Keystone drill in prospecting the ground, but there seems to be some question as to whether the govern-ment will accept this kind of explora-tion work when a United States patent to the ground is asked for. The mat-ter has been taken up, with the right people at Washington, and if this will be allowed in the procuring of a pat-ent the East Crown Point company will in all probability secure a Keystons drill and commence prospecting. Mr. Jensen has resigned as foreman of the Uncle Sam mill, a position he has been with since that plant was erected four years ago. The necessary grading has been completed for the enlargement of

Uncle Sam mill, a position he has been with since that plant was erected four years ago. The necessary grading has been completed for the enlargement of the Uncle Sam mill, and the changes in the building will be made at once. Preparations are under way for the formation of another important min-ing company for the East Tintic coun-try, under the name of the Iron Hat Mining company, which will be incor-porated for one million shares of the par value of 25 cents each. A substan-tial block of stock has already been placed for the carrying on of develop-ment work. Among those who are in-terested in the new company are George N. Lawrence and N. A. Robertson of Salt Lake, H. Gustaldi, C. E. Huish and Harry Evans of Eureka, and Dr. Harvielle, of Mammoth, and others. August W. Schmidt, the president of the old American Mining company has rssued a call for a meeting to be held on the 29th of this month, at which time the final details in the transfer of the company to Jesse Knight shall be attended to. A new list of officers will then be élected, and the principal place of business changed from Eureka to Provo. Prenarations for a more ac-

will then be élected, and the principal place of business changed from Eureka to Provo. Preparations for a more ac-tive campaign at this property, which adjoins the Beck Tunnel on the east, will be made as soon as the details are arranged. John Davis, the veteran prospector of Tinite who has been living at Suit

John Davis, the veteran prospector of Tintic who has been living at Salt Lake for the past year, expects to re-turn to this city within a few days for the purpose of doing the assessment work upon his North Tintic claims. During the past visitors have been permitted to inspect the underground

Iowa was the only state west of the Mississippi whose production of coal in 1906 exceeded that of the preceding year. In each of the last 10 years, in-deed, its coal production has made some gain over that of the year before. None of these gains has been exceptional, but the increases have been normal and regular, indicating a steady and healthy growth in the population and industries of the state. The total production for 1906 amounted to 7,266,224 short tons, having a spot value of \$11,619,455. Com-pared with 1905, when the production amounted to 6,798,609 short tons, valued act \$10,586,381, the output in 1906 examounted to 6,798,609 short tons, valued act \$10,586,381, the output in 1906 ex-hibited an increase of 467,615 short tons, or 6.9 per cent, in quantity, and of \$1,-033,074, or 9.8 per cent, in value. The average price per ton advanced from \$1.56 to \$1.60. In the 10 years from 1896 the production has increased 3,312,-196 tons, or \$3.8 per cent. The total production of coal in Mis-souri in 1906 was 3,758,008 short tons, having a spot value of \$6,118,732. Vir-

# ON MINING EXCHANGE.

## Week Closed With Dull Market for Mining Stocks.

sales of the week on the floor of the Sait Lake Stock & Mining exchange amounted to considerably more than a quarter of a million dollars. The marquarter of a million dollars. The mar-ket has been sluggish and prices at the close were found to be generally lower, but brokers are of the opinion that the better stocks are sliding close to the bottom now and that a reaction for the better may be anticipated almost any day, particularly upon the clearing up of the eastern markets.

The unlisted stocks were active in the bidding today. However, few sales were reported. Bingham Standard sold down to 26 cents, and Uintah Treasure Hill at The closing quotations and sales

Goldfield, Nev., Aug. 23,-The output of the mines and lease of the Goldfield district for the week ending last night was \$3,417 tons, having an estimated value of \$390,775. This is 393 tons less than was shipped and treated locally last week but the average product in tons is greater than last week by near-ly 2,000 tons, when the fact is taken in-to consideration that the Mohawk mine, the heaviest shipper in the camp, has been shut down since last Sunday aftersoon shift down since tak summay after-noon, owing to the walk-sout of the min-ers, and the Combination mine has been shut down since Wednesday from a similar cause. As a result the ship-ments from the Mohawk during the week just passed were 447 tons less than for the preceding week, while the Combination mine output was less than Combination mine output was less than the week before by 160 tons, these fig-ures show beyond question that the pro-duction is steadily increasing and with all the producing mines and leases in operation the output should reach 6,000 tons a week before the middle of Sep-tember.

# GETTING TOGETHER.

# Heinze Declares He Has no War to

Wage on A. S. & R. Since the unfolding of some of F Since the unfolding of some of F. Augustus Heinze's plans in the min-ing, milling and smelting field there has been a drawing together of the Heinze and the Guggenheim interests until now there is reason to believe that these two powerful factors in the industrial world may be found working in harmony in the near future instead of being engaged in competi-tive warfare as some seemed to think likely. likels

likely. Although Mr. Heize has acquired many valuable properties, since the settlement of his old litigation with the Amalgamated Copper company more than a year ago, and although he has been moving with character-istic energy in the development of these acquisitions, there is good ground for the opinion that he has in no way been desirous of recopening way been desirous of reopening old feuds or of engaging in new ones. He has been content to go ahead with the expansion of his own business in-terests on broad lines and to strength. en himself at various points so that his position would be absolutely independent.

According to thoroughly reliable in-formation Mr. Heinze has had an eye solely to developing his own interests so that he would not have to depend on anyone else from the taking of ores from his mines to the delivering of refined match to the consumers of refined metals to the consumers. At no time has he had any idea of engaging in a strife with the Guggen-heims or any other interests for competitive milling or smelting business unless such a warfare should be forc-

unless such a warfare should be forc-ed upon him. Just how far Mr. Heinze and the Guggenheims may have progressed toward a trade understanding cannot be ascertained now, but it is certain that no clash need be looked for through the building of the new Heinze smelter on the south shore of the Great Salt Lake in Utah. This plant will be owned by the Miners' Smelting company of Maine, which Mr. Heinze recently incorporated for \$10,000,000. In some circles this move erromeously was regarded as the

derground workings of the mines at Godiva mountain, that are owned by Jesse Knight, at almost any time they choose, but in the future this will not be allowed,

as it is impossible for the manage-ment to stop work and pilot visitors through at any and all times. The first and last Thursday of each month has been chosen as the days upon which

people may inspect these mines. The recent assessment on Little Chief stock becomes delinquent on the 4th of next month.

The new compressor at the Little Chief mine was put in operation Wed-The new compressor at the Little Chief mine was put in operation Wed-nesday and work underground will be resumed again. J. R. Van Evera, the new manager of the company, was in Eureka Wednesday and Thursday on business connected with the mine. Supt. Rasmus Nelson of the Zuma Mining company states that the shaft upon this ground is down about 20 feet. The material for the new shaft house is upon the ground and the build-ing will be erected as soon as possi-ble. The company has placed an or-der for new machinery that should arrive at any time now. There has been some delay in start-ing work upon the Addle company's ground in East Tintle, but it is said everything will be in readiness to begin operations in the near future. David Evans, the well known min-ing man who recently secured the ground of the Plutos Mining company, was in town this week. John H. McChrystal and W. R. Wal-lace were out from Sait Lake on Wed-nesday and Thursday on mining busi-ness.

Jesse Knight and his son-in-law, W. Jesse Knight and his son-in-law, W. Lester Mangum, came up from Provo Monday night and remained over till Wednesday looking after local inter-ests. Mr. Knight stated that he was highly pleased with the progress at the new properties as well as the old mines in which he is interested in Tin-tic.
