RODE A BIGYCLE THOUGH BLIND Helen Keller, Minus Sight, Hearing and Speech an Adept. WAS MANAGED BY SIGNALS.

Remarkable Accomplishment by Fred St. Onge, Old Time Cyclist, Now In Salt Lake,

It might be possible to teach a blind fit to ride a bicycle, but the average man would balk at giving lessons to one that is not only blind, but deaf and dumb into the bargain. There is a man in sall Lake right now who has accom-lished this and, of course, the girl was the worderful deaf, dumb and blind Heter. the wonderful deaf, dumb and blind Helen Keller of Boston, Mass., who received so much attention at the hands of the newsmuch attention at the names of the hews-papers and magazines 10 years ago. Dixon of the registration committee of the Amat-eur Athletic union, yesterday, notified Francis M. Clarke, secretary of the Na-tional Skating association, that all the men who competed at Montreal had been disqualified by the Canadian Amateur Athletic union and that he had notified all the branches of the American Ath-letic union that they could not com-pete in any contests whatever. Many well known skaters are affected. San Francisco, Feb. 6.-According to a cable received today from Australia, Bill Soulires, the champion heavyweight boxer of Australia, will leave there on the steamer Ventura for this city, accompa-nied by his backer. In the cable he chal-lenges all the heavyweights in America, and says be will post his forfolt upon ar-rival. The Ventura will arrive in San Francisco about March 12.

Against Hard Game in Utah. The famous Crescents from Evansion, III., the basketball team which has swept nearly everything before it, seems to have bumped into a bunch of snags in Utah. The All Stars ware defeated by the Y. M. C. A. team the other night and last evening went to American Fork conduct of trimming the Apollos but the that shad made different atrangements and when the struggle was over the Crescents had the short end of it. The that soore was H to 3, close 'the true, but one point was enough to win. The visious played a brilliant game but were given a surprise that amounted to a shock. The result pleased the large crowd of spectators. The Apollos played a splendid game, doing the best work in the first half at the end of which the score was 24 to 17 in their favor. the duties a man could undertake none was higher or more difficult of fulfillment that hose siven him, and if he had iot been encouraged by so many friends he might have hesitated in undertaking them. Mr. Bryce reviewed the relations of Greot Britain and the United States for the past century, and referred to the steady growth of better feeling be-tween the two countries since the time of his first visit to America in 1870. "The United States have grown so great that they no longer need, as they did a century ago, to be self-assert-ive," said Mr. Bryce, "having become the targest and the wealthlesst among civilized communities, they are re-spected everywhere and know it. "During the last 40 or 50 years Great Britain and the United States have come to know and understand each other better and to read one another's writings.

other better and to read one another's writings. "With these guarantees, there is a better chance that their friendship be durable. Neither has any cause to quarrel with the other. Each country has as much territory as she can pos-sibly require, and each country is proud of the other. We in England are proud of having such a child as America, and the Americans are proud that the achievements of Great Britain, in which they shared, have been sus-tained since the separation. "This is the sentiment of pride and brotherhood that the Englishmen are required to represent in the United States. Never has the spirit of peace been more conspicuously the ruling spirit of both peoples. If a tunnel un-der the Atlantic ocean was suggested, no objection would be raised in this country."

no objection would be raised in this country." Mr. Bryce said he was encouraged by the thought that the message he had to deliver was a plain and simple one, It was a message of true sympathy in weal and woe: a message of friendship between Great Britain and America that both countries trusted and stand unbroken through all the ages. War Secy. Haldane, Lord Roberts and others spoke, and a cable message from H. Choate, for the Pilgrims of the United States, was read concluding the proceedings. the Savoy hotel under the presidency of Field Marshal Lord Roberts. Mr. Bryce occupied the post of honor at the right of the president. Ambassador Whitelaw Reid sat at Lord Roberts' Whitelaw Reid sat at Lord Roberts' left, with War Seey. Haldane and Lord Fitzmaurice of Leigh, under secretary of state for foreign affairs. Govern' ment officials, diptomars, including the Japanese ambassador, and many others made up an assemblage of exceptional brillancy. The Japanese ambassador, replying to the toast, "The Guest," made a significant reference to Japa-nese-American relations. "I am glad," the ambassador said. "to be present at this demonstration to the new ambassador to the United States, with which country both Japan and Great Britain have maintained the most cordial relations."

### DETAILED PLANS FOR UNCLE SAM'S BIG WARSHIP

And Great Britain have maintained the most cordial relations." Ambassador Reid, in proposing the health of Mr. Bryce, spoke of the no-table company present, which demon-strated the pride Englishmen felt as Mr. Bryce set forth on his new duties. "The good will of the hour," con-tinued Mr. Reid, "will not permit any illusions as to the nature of these du-ties. He knows perfectly that he is sent, first, to look scrupulously after the interests of his own country. We should not give him half so hearty a welcome ourselves if we did not expect that of him. But, next, he knows just as well that those interests in the country, as in ours, is best promoted by keeping peace. Of course, any diplom-atist who does not steer his course by that north star in these days is a mere anarchemiam.

UNCLE SAM S BIU WANSHIF. Washington, Feb. 6.-Senator Hale to-day presented to the senate the de-tailed plans for the big battleship which it is proposed shall be built as the equal of any fighting vessel now affoat or planned. The general information as to the dimensions was made public several months ago, but very little has been known as to the strength of the batteries. This information now will be given to the public, including all foreign powers if they desire it, in the form of a public document. The plans call for a battleship S18%, feet long, with a beam of 85 feet 4 inch-ex, and a draft of 29 feet 5 inches. The armament will consist of a main bat-tery of 10 12-inch breech loading rifles, mounted on five electrically controlled turrets upon the center lines; two for-ward above the forecastle deck, the second firing over the first; two aft on the main deck upon the same level, and one ambidships, firting over the two after turrets. There are to be two submerged totpedo tubes. The sec-ond battery will consist of 14 5-inch rapid fire guns, four 3-pounders salut-ing, four 1-pounder semi-automatic; two 5-inch field pieces and two machine guns of 30 calibre. The secondary battery of 14 5-inch rapis will be located on the gun deck, forming two broadside batteries of seven guns each; the corner guns will be equipped for head and stern firing respectively. Smaller guns will be lo-ated in a commanding position so as to give a large unobstructed range of that north star in these days is a mere marchronism. that north star in these days is a mere anarchronism. "But duty is nowhere else so clear, so overpowelring, as with the diplom-atist in any way intrusted with respon-, sibility for the relations between the two great nations nearest to each other in the whole world, in history, lan-guage, blood, belief and common ideals and aspirations. and aspirations. King Edward VII and Theodore Roose-velt. It is not too much to say that each has the confidence not only of his own people, but of the world alike, in his desire for peace and his knowing how to secure it. How well they are supported in their respective foreigt. offices is known to all who have busi-ness with them. Your ambassador will' find our Mr. Root very much the same man as your Sir Edward Grey, wit' the same elevated views, the same calm lucidity of thought and that habitual fairness of temper and habit in look-ing a subject over on all its sides before reaching a conclusion about it whit's i may be permitted to call by the large name of Anglo-Saxon. "And under such chiefs discussions proceed with the idea of discovering justice, and conclusions are facilitated by absolute cander. There has never been a time when the two peoples were so glad to be friends, or when they looked with such inpatience on the idea of permitting anything to prevent it. SATARRH & UNIVERSAL BLOOD DISEASE

Catarrh is usually worse in Winter, because of the cold, damp and suddenly changing climate. Colds are contracted, and neglected and as the secretions from the different inflamed membranes are absorbed into the blood the unpleasant symptoms of the disease commence. The nostrils are stopped up and a constant dropping of mucous back into the throat keeps up a continual hawking and spitting. The patient has dull headaches, ringing noises in the ears, and often slight fever and a depressed, half-sick feeling accompanies the disease. The blood becomes so fully charged with catarrhal matter that stomach troubles are brought on, the kidneys and bladder are affected, and if the blood is not purified of the poison the lungs become diseased because of the constant passage of impure blood through them. Catarrh cannot be cured with washes, sprays, inhalations and such treatment: these cannot reach the poison-laden blood where the real cause is

located, and can only give temporary relief and comfort. A disease which affects the entire blood supply as does Catarrh, must be treated with a blood purifier. S. S. S. is the best remedy for Catarrh, which has grown to be a universal disease. It goes to PURELY VEGETABLE the bottom of the trouble, rids the blood of

culation, and cures this disgusting disease permanently. When S. S. S. has purified the blood every part of the system receives a supply of fresh, healthy blood; then the inflamed membranes heal and every symptom of Catarrh passes away. Write for our book containing information about Catarrh, and ask for any medical advice you desire. No charge is made for either. THE SWIFT SPECIFIC CO., ATLANTA, GA.
