# REGISTRATION DAY.

Increase of Over 100 Students at L. D. S. University This Year.

Baint's university brought an increase of over a hundred students to that institution. The halls and corridors were thronged with students today selecting their courses for the winter's work, and meeting their professors in the various departments. For the first time in the departments. For the first time in the history of the university it opens this year with its equipment and teaching staff complete, A full professor is at the head of each branch of the work, and his work is so arranged that he can give his whole time to his specialty. The class room space has been increased this year by the addition of enough rooms to pre-vent any such overcrowding as the school has experienced in past years. Fifty stu-dents registered today and yesterday, and it is expected that the registration will increase at the rate of about 100 a day until a total of 1.200 or more is reached.

# TRANSFORMING STATION. Utah Light & Railway Company Build-

ing a New One.

A change that will effect the entire electrical supply of Salt Lake City will soon be made by the Utah Light and Railway company. The transforming stations now in use are to be done away with, and in their place a handsome new transforming station will be built, complete in all its details, and up-todate in its electrical appliances. The new building will be situated on the banks of the Jordan river at a point

between South Temple and First South streets. Orders have been placed by the company for the equipment, and construction on the building was begun today. It will be forty-five by one hundred feet in size, and will be known as the Jordan sub-station. There will be received at the transforming house

all the power generated at the water power stations in Big Cottonwood can yon, Ogden canyon, and at Telluride. The power will come in with 28,000 and 40,600 voltage and will there be trans-formed to a 4,000 voltage and sent to the "up town" station back of the Tribune building. From that station it will be distributed over the city for lighting, power and rallway purposes. Special precautions will be taken in the construction of the new building to render it entirely fire proof. The bulk-ing is to be entirely of brick and steel.

Ing is to be entirely of brick and steel, and each transformer will be enclosed in a separate apartment opening only onto the outside. This will prevent the spread of any fire that may start in any one compartment, to another com-partment. Another big improvement will be in the switch board, which has been ordered complete with the latest improvements known to electrical sci-ence. The power of the station is de-signed to be from 8,000 to 10,000 horse power and the construction pravides for

Indefinite power expansion as business demands it. Six high fension transmitting lines will come in, two from Ogden, two from Cottonwood, and two from the Telluride Power company. Mr. Hayward, the constructing engl-neer of the company. Is rushing work upon the new station and hopes to have it ready for occupancy within a few months. When completed it will bring the electrical supply into much better control and will mean a great improvement in the city's sarvice

## DECREE FOR CITY. Wells, Clawson, Et Al, Ordered to Sell Strip in Canyon Road.

In the case of Salt Lake City vs Heber M. Wells, Spencer Clawson, and Rudger Clawson, executors of the estate of Teresa Clawson Wells, deceased, et al, Judge Hall yesterday rendered a decree wherein it is ordered

that the defendants execute a deed to plaintiff to a strip of land lying on the north side of Canyon road and running from State street back to the entrance
