down to defeat after successfully defend-ing the fille for two years. It was 3:30 before the ball was put in-to play because of the delay in the B. Y. Ut team showing up. The Loganites wait-ed for about twenty minutes before the fight was on. The Frovo boys were full of confidence and looked like winners. The Loganites appeared to be ill at ease but were soon cheered up by their large crowd of rooters. It was almost as interesting to watch the friends of the rivel teams as to watch the game. The rooters were placed at opposite sides of the big U. sym and kept up college yells and shouts of defance.

Anti-Fain Fills and they gave me great relief. I have spells of ter-rible pains in my ribs, and in the small of my back, and the Anti-Pain Pills help me right away. I am now well of the rheumatism and think Anti-Pain Fills done me more good than all the other medi-cines. I first heard of the cines. I first heard of them through the following circum-stance that happened at our home stance that happened at our home two years ago. A friend, Mrs. Brown, of Orion, Mich., came to visit us. She had not been able to dress herself or comb her own hair for months. A friend of ours came in and seeing her suffering offered her some Dr. Miles' Anti-Pain Pills. She laughed at the idea of relief from such a source after doctoring for so long, but took one one of the tablets with the remark that it would at least do her no that it would at least do her no harm. She took another that evening, and the next morning she was so elated that she went to the

druggist's and got a package and took them home with her. Re-cently she was here again, and told us that she continued taking the pills, and that one box cured her, and she has not had a symptom of

er great day for tryouts in the stable of Clarke Grinthi. The oid fox tipped off the war correspondence late last night that, provided the weather permitted and the going on the diamond was good, he would test out his soutpoaw wonder, Rôy Castieton. The day broke bleak and por-tended rain and the triat had to be post-poned. Light work was done by all the players in the morning. The sun came out good and strong this afternoat, however, and before starting for the grounds Griffith ordered Trainer Martin to groom Castleton for his final tryout. Red Mike got busy in the kid's room at the hotel, and, after a good mas-sage, the youngster was fit for the start. The entire stable in the afternoon made the journey to the park on foot. Griff gave the other youngsters of his pitching staff over to Jack Kleinow and Tra Thomas, while he trotted out the veteran Jim Medure to handle the benders of the new southpay.

Theorem to Jack kielnow and Ira Thomas, while he trotted out the veteran Jim McGuire to handle the benders of the new southpaw.
The was a trying situation for the young-ster, as the critical eyes of Griffith and the correspondents were centered on him. After five minutes of preliminary work the Salt Lake find started to cut loose. Winding himself up like a mule prepared to drive his left hind leg against a dash board, he whipped one over the plate that and hells on it.
"Keep' tem going in straight. If the that one," advised Griff, and for several minutes the youngster sent a dozen pretity ones over the plate just where McGuire had his gloved hand. After gotting warmed uses the youngster sent a dozen pretity ones over the plate just where McGuire had his gloved hand. After gotting warmed uses the youngster sent a dozen pretity ones over the plate just where McGuire had a fast curve which he sent in about waist high and then broke sharp a toot or so from the plate.
This 'kid' looks as if he's got a lot of god stuff in him. He's got one of the best motions for a southpaw I have ever had, which is surprising for such a light the proper height. If he pitched a high ball and it broke where his curve broke inday, a foot or so from the plate, it would be ple for those who can hit a left-handed pitcher. The certainly pleased with what he showed me today. I din't want to let him go too fast at the start, as he has pleat by the end of the work he will be pretty well limbered and and the protty well limbered and and the protty well limbered and and the arous the him in the ogen which is got show to the scheed who and it as got show to fast at the start, as he has pleat yo the whot he showed me today. The method of their capture was as follows: The natives having discov-ered the partiality of the baboon to liquor, ostentatiously displayed cala-bashes full of meriss, a native beer. Immediately after they retired, the baboons swooped down upon the allur-ing concoction and drank so heartily that they speedily stupefied them.

The body of man is the most perfect and delicate mechanism in existence, and the least OBSTRUCTION or accumulation of filth in any part of it, will make it hobble, move IRREGULARLY and SPASMODICALLY, and if not attended to promptly may stop the machine altogether.

Isn't that plain common sense to any person that has had any experience with machinery of human invention, from the sewing machine to the triple-expansion engine? All the parts, joints, connections, gearings, must be kept absolutely pure and clean to get the best results. A careless, untidy engineer is a failure and will lose his job.

Adduce has been kind to us by handing over to us to be occupied dur-ing our earthly existence, an almost automatic, elastic mechanism, that will run itself if only properly cared for. All that She asks, is that the body be supplied with "Pure Food" fuel of the right kind, applied in the right way, that a lubricant be furnished for the joints, muscles, nerves through the marvelous distributing and col-lecting system of arteries and veins, and that all parts of the engine be used for the purposes intended without undue strain.

But, when little mistakes are made in eating and drinking, with perhaps excessive exertion, there is a liability of a stoppage in the natural cleansing process, and you are liable to become UNCLEAN INSIDE. That means obstruction, stoppage of the normal functions, fermenta-tion, poisoning of the blood by your own decaying sewage, and a diability of the development of any of hundreds of serious diseases.
