— Something entirely new is announced in the way of musical instruments. It is a Pyrophone, a piano organ. Vibrating flames have a power to move, to move, to move. Also that in a glass tube you can make sounds that are at times very sweet. This is the "singing flame" of the scientific lecturer. A. M. Karner has been experimenting for two years, with the scientific world, and has succeeded in possessing a tone very much like that of the human voice. It has three key boards, each key being in communication with a burner in a tube. On sounding the key the burner is made apart and the complete note is sounded; when the pressure is removed from the key, the sound ceases.
