

NO OVATIONS FOR COMMANDER PEARY

On Advice of Gen. Hubbard and H. L. Bridgman Decides to Accept No Invitations.

THANKS FRIENDS FOR THEM.

Controversy Settled by Competent Authority—Will Soon State His Case.

Salt Lake, Sept. 21.—Commander Peary will accept no invitations to receptions and no public honors until the question of the discovery of the north pole has been decided by scientific authorities. This he made known to the following statement:

"Acting upon the advice of Gen. Thomas H. Hubbard and Herbert L. Bridgman, president and secretary, respectively, of the Peary Arctic Club, I wish to express my thanks to friends for their kind offers and invitations and also to say that I have decided to accept any invitations to receptions or any ovations until the present controversy is settled by competent authority."

Commander Peary was asked when the public was likely to get a decision on the subject, and he replied: "I do not know, but what I have to say will not be very long delayed. Whether any statement will be issued within a week or two weeks depends on circumstances."

The explorer will leave Sydney at 7 o'clock tomorrow morning and will reach his home on Eagle Island, Friday morning. Apparently he has made up his mind to remain at that place for some time.

The reception of Commander Peary today began when the Roosevelt edged her way past Love Point, 11 miles down the bay and continued all the way to the harbor, and until the commander reached the Sydney hotel. He made a short speech and found himself the center of a great demonstration in which hundreds of people pressed about him and shook hands.

WHAT HE HAS DONE.

"Seven times I have left Sydney for the north," said the commander. "Once I brought back the largest saucer ever found; the last time I brought back my farthest north and the time I brought back the north pole."

When the Roosevelt lay at the city wharf this afternoon an eager throng of sightseers visited the ship. Souvenir hunters carried away everything portable and many valuable records and maps belonging to Prof. McMillan were lost. These were records of tides and animal life north of 82 degrees latitude, the names of all the Eskimos in the bay region, together with more than a hundred books in which many important marginal notes had been made. No record bearing on the dash to the pole was lost. The missing books are of immense value and cannot be replaced but the authorities are issuing a public appeal for their return.

Peary passed the evening quietly with his family.

His Sydney turned out early to greet the incoming Arctic steamer with

BLOOD WAS IMPOVERISHED

A Well-known Fort Worth Man Tells How He Was Cured.

Anemia and Threatened Consumption Yield to the Tonic Treatment Which Has Cured So Many Cases Dependent Upon Thin Blood.

"Anemia is the doctor's name for lack of blood. It is readily curable by the tonic treatment with Dr. Williams' Pink Pills as is shown by the experience of Mr. D. S. Landis, of No. 661 Bryan avenue, Fort Worth, Texas. He says: 'My sickness dates as far back as 1895, when an attack of bronchitis followed a severe cold. Another attack came in 1899 and was followed by hemorrhages and all the symptoms incident to anemia. I had been under the doctor's care for about two years, taking cod-liver oil and other remedies but was not helped. The doctors then advised a change of climate and I came to western Texas and laid aside doctors' medicine."

"The doctors pronounced my trouble anemia and my blood was so impoverished that I was threatened with consumption. Hemorrhages of the lungs were present and night sweats were common. I had all the varying symptoms accompanying my disease, such as palpitation of the heart, inactive liver and pressure on the chest. My kidneys also were affected. I suffered with indigestion throughout my sickness. It seemed as though I could never get sufficient air into my lungs and there was a continual pressure about them and my heart."

"I first noticed Dr. Williams' Pink Pills through reading a newspaper and bought some for a trial. Relief was apparent within a few days so far as headache and a general floating were concerned. My other symptoms gradually grew less pronounced and I took the pills as directed until I felt cured. Even now, when well and strong, I take them as a tonic."

Dr. Williams' Pink Pills are sold by all druggists, or will be sent, postpaid, on receipt of price, 50 cents per box; six boxes for \$2.50, by the Dr. Williams Medicine Co., Schenectady, N. Y.

Peary on board. Mrs. Peary and her children were taken down the bay on the steam yacht Seashell. Commander Peary saw his family in the distance and sent a boat for them.

Peary adheres closely to his determination not to discuss the Cook controversy, but when his attention was called again to the trouble arising out of his placing one of his men in charge of Dr. Cook's stores at Anaktok, he said:

"My boatman, Murphy, had written instructions which will be submitted at the proper time."

PRITCHARD'S STORY.

With regard to the story told by his cabin boy, William Pritchard, he said he had heard that Pritchard had been informed by Dr. Cook he was at the pole. He declined, however, to discuss this matter. Asked when he first heard that Dr. Cook had been at the pole, the explorer started to reply by saying:

"I knew before I reached Etah," but did not finish the answer he intended to give.

tended to give. He ruled the question out as a forbidden topic.

Commander Peary said that when he parted company with Harry Whitney in August the latter said he expected to be home Oct. 1.

Regarding his observations, Peary said he would first send a general report of his trip to the Peary Arctic Club and then a detailed statement of tidal and meteorological observations and soundings to the coast and geodetic survey.

GOVERNOR GILLET COMMUTES SENTENCE

San Francisco, Sept. 21.—Gov. Gillett commuted today the sentence of William Buckley, convicted in San Francisco of the murder of George Rice during the labor troubles of 1901 and sentenced to death, to 15 years imprisonment. This commutation will enable the state board of prison directors to parole Buckley and the governor eventually to pardon him.

The governor intimated that he was convinced that Buckley was innocent of the crime of which he was convicted.

VISION MAY BE TRANSMITTED OVER WIRES

Mexico City, Sept. 22.—Albert Sanchez, an electrical engineer, at present an inmate of Rejon prison, says he has invented an apparatus whereby vision as well as voice may be transmitted over an ordinary telephone wire. He calls his invention a tele-telegraph. Prison officers admit that successful tests have been made with models.

HE SAVED THE DOG.

Chicago, Sept. 22.—While trying to avoid running over a playful dog which was barking at a automobile, Dr. George Walford, of Lansing, Ill., plunged his machine into the Grand Calumet river near South Holland yesterday, and was probably fatally injured. Dr. Walford was crossing the bridge in a touring car when the dog ran at the car. The machine was swerved and its occupants plunged into the river. James Spain, 15 years old, the other occupant of the car, was not hurt.

Dr. Walford was caught in the steering gear and dragged to the bottom of the river. He was released and removed to a hospital. The machine is still in the river.

HOPPIST HOP.

Are you just barely getting around by the aid of crutches or a cane? Unless you have lost a limb or have a deformity—your trouble is rheumatism, or like nature use Ballard's Snow Liniment and in no time you can throw away your crutches and be as well as anyone. Price 25c. per bottle. Sold by Z. C. M. I. Drug Dept. 113 and 114 South Main St., Salt Lake City.

BROKE CONTINUOUS PIANO PLAYING RECORD

Richmond, Ind., Sept. 22.—Ray J. Harding broke the world's record for continuous piano playing in a contest that ended last night. He played 36 hours and 33 minutes which is four minutes better than the record. Harding was almost a wreck when the test ended, but it is not believed he will suffer permanent ill-effects.

ROCKEFELLER GIFTS TO UNIVERSITY OF CHICAGO

Chicago, Sept. 22.—John D. Rockefeller has contributed \$24,900,000 to the University of Chicago since its founding, according to a statement made in the annual register of the university, issued yesterday by the University of Chicago press. Mr. Rockefeller's original subscription of \$600,000 came in May, 1883, and he has been constantly increasing that sum and adding to the endowment.

JOS. CHAMBERLAIN BETTER.

London, Sept. 22.—Mrs. Endicott, mother-in-law of Joseph Chamberlain, before she left Liverpool yesterday for Boston after her visit to Highbury, said that Mr. Chamberlain is greatly improved in health, though still physically weak.

THOS. HAMMOND DEAD.

Hammond, Ind., Sept. 22.—Former Congressman Thomas Hammond, founder, with his brother H. G. Hammond, deceased, of the Hammond Packing company of this city, died yesterday of a complication of diseases. Mr. Hammond was born in Massachusetts 64 years ago. He removed to the village that is now Hammond, 34 years ago, and served three terms as mayor. He left the packing company several years ago and entered other business, chiefly banking. He is survived by a widow, two sons and two daughters.

SMALL MUTINY ON CRUISER NORTH CAROLINA

Norfolk, Va., Sept. 22.—"This is a hell of a ship," was the great sign read on the side of the cruiser North Carolina, the last night it lay at anchor in Hampton Roads. The letters extended two-thirds of the way along the hull of the cruiser and had been painted in luminous paint used in making targets visible at night.

It was a small sized mutiny due to the fact that for acts of insubordination and violation of rules off the cases in target practice, shore leave been denied the 500 men aboard. It was hard to trace the cause of the trouble and the officers decided to punish all alike. It is known that a number of sailors are confined in the brig as a result of the trouble on the practice grounds at sea.

The luminous sign attracted great attention and although investigation was ordered by the officers, but as yet the persons responsible have not been found. It is reported that sailors and petty officers had several fist fights endeavoring to enforce the order not to allow any of the tars to go ashore. For three days this order was carried out, the men watching their comrades from other ships leaving to visit Norfolk, and the indignation grew. The North Carolina sailed for Greece, Del., last night.

A BURGLAR IN TOWN

His name is "Bad enough." He doesn't care for gold or silver but he will steal your health away. If he appears in your house arrest him at once with Ballard's Household Balm. It may mean consumption if you don't. A cure for all coughs, colds and chest troubles. Price 25c. per bottle. Sold by Z. C. M. I. Drug Dept. 113 and 114 South Main Street, Salt Lake City.

Five Girls Wanted

To learn hairdressing, apply "Sisters," 118 South Main St., over Hamilton's.

The meat to eat—that can't be beat—That makes you smile when you eat is that by the Inter-Mountain Packing Co. packed. The meat that by Uncle Sam is backed.

PINKERTON TELLS HOW HE DOES IT

Bank Burglars Got \$1,600,000 in Four Years, but the Banks Lost Only \$147,000.

An elaborate document is the fifteenth annual report of Pinkerton's National Detective Agency. It is directed to the American Bankers' association.

It begins with a report of forgeries, burglars, sneak thieves, holdup robbers and just plain robbers, showing the number arrested and convicted, and giving the total number of years that the miscreants were sentenced to prison.

The number of criminals arrested was 951, and of these 814 were convicted, the arrest of the majority of those caught being caused by the Pinkerton agency. The burglaries of banks from 1905 to 1909, inclusive, caused a loss of over \$1,600,000, only \$147,000 of which was lost by members of the association.

A review of crimes committed on banks follows, and the different changes that have come over criminals is pointed out, showing how old forms of theft are replaced by new ones. The professional bank thief is dying out, and is turning his attention to residences, hotels and sleeping cars. It is pointed out and it is shown how there is a decrease of crime by professional criminals on banks.

Burglaries, as committed all over the country, are itemized and interesting notes appended. An absorbing description on forgeries follows, and the case of the letter-box forgers is noted.

In October and November of last year members of the Bankers' association reported that they were receiving genuine checks, with the name of the payee erased, and the word "Bearer" inserted. It was found upon examination, that the Ford band of letter-box thieves and forgers were operating the game. Checks were abstracted from letters stolen from mail letter boxes.

In 1905, William Bradley, alias Ford, was arrested in an attempted swindle and made a clean confession of the game. When the trick was being turned last year, Ford was kept by the Pinkertons under strict surveillance. Some criminals were arrested in April of this year and their connection with the Ford band was found out and the Pinkertons believe that the band is no more.

A full-page map adorns one of the pages and it gives a graphical representation of bank burglaries committed from Sept. 1 of last year to the same date this year. The map is fully explained and explored by notes about the robberies in each particular state.

Next follows a list of criminals convicted, sentenced or awaiting trial for crimes committed from Sept. 1, 1908, to the same date this year. Most of the crimes are forgeries.

The report will hold the attention of any one who is interested in crime, and bankers will find that a perusal of the contents will give much education along lines that should interest them.

FORESTRY IN CHINA.

"The almost worldwide movement to protect and establish forests has reached China," says Percy T. Hyams, a railroad contractor of Hongkong. "The first Chinese school of forestry will soon be opened at Mukden. The Chinese empire is usually pointed out as the worst example among modern nations of forestry destruction."

"The floods which are periodically poured down from the denuded mountains are destructive beyond comparison with any other country, and the want of forests is assigned as the chief cause. Wood is scarcer in China than in almost any other region in the world, although the country is well adapted to the growing of trees."—Washington Post.

TELEGRAPHER'S CRAMP.

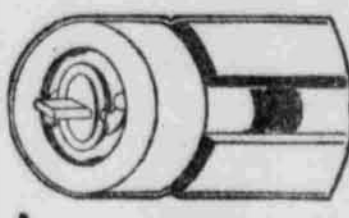

An interesting feature of telegrapher's cramps is that certain letters are nearly always the stumbling block. The most frequent are C and Y—that is, the code signals used for these letters. When a sender begins to be "conscious" about so common a letter as C his case soon becomes hopeless.

Another form of cramp attacks the receiver of the message. It takes the form of inability to write fast enough to take down a message quickly transmitted. This is easily understood when it is remembered that a receiver often has to write continuously for code dictation, so to speak, for hours at a time. The strain involved is enormous and leads fairly commonly to what is practically a form of nervous breakdown.—Dundee Advertiser.

CZAREVITCH OF RUSSIA.
