

of the United States Smelting, Refining & Mining company on the fifth floor of the Dooly block. At this gathering the committee on permanent organization, appointed recently, is expected to submit its report. For this reason it is urged that there be a large attendance as matters.othe 23 Co

than the forming of a permanent organization will come up for considera-None have been more active in tion. the formation of this Tintle organization than Harry S. Joseph, who hur-ried back from a trip to Los Angeles in order to be present

Tintic mining men are in Some clined to take a discouraging view of the prospect of getting any reduction from the present schedule of freight rates on ore shipped from the Juah county camp to the Sait Like valley smelters. One of them expressed him-self in this manner today "We may get some concession, but I am inclined to believe it will be practically nothing. I still believe the shippers of the Tintic district are being discreiminated against and this seems to be particularly the case with the camp of Bing-ham. I think it is the proper thing for Tintic shippers to effect a permanent organization at this time for by united effort we are more apt to get a fair

ON MINING EXCHANGE.

Busy Sessions of the Brokers Today-Closing Quotations and Sales.

It was almost noon when the brokers operating on the floor of the Salt Lake Stock and Mining exchange ceased trading at the opening sessions of the day. The market for stocks was brisk, and the bidding lively, yet the close was marked by prices a shade lower with some of the principal par-ticipants. Tintle stocks, as usual, were conspicuous, with a sprinkling of Park City favorites getting in action, among them being Wabash and Daly Judge.

Nevada Hills displayed considerable weakness, closing on the sale of 100 shares at \$2.87%. The closing quotations and sales were:

of Las Vegas, who is interested in the smelting enterprise, has been looking over the filed at Bullfrog, Nev., with a view to ascertaining the amount of prospective tonnage for the new smelt. ng plant soon to be established by the company at that place.

The plant is to have a 100-ton furnace, using oil for fuel exclusively and will produce either lead or copper matte, or both. A site together with water supply, Mr. Wellman states, has secured and construction is start right away. The water jackets are now being built.

The company, which is a branch of Greenleaf & Riverall, contracting en-gineers, has recently completed an \$0ton plant at Chloride, Ariz., using oil for fuel.

CONSOLIDATION RUMORS.

Union of Boston Con. and Utah Copper Again Revived.

A prominent mining man who is a close friend of Samuel Newhouse said today that he believed the time is not far distant when the Boston Consolidated and Utah Copper companies will he consolidated and operated under the same management. "Just how this will be brought about," he said, "I am unable to say, nevertheless I am sure that wires are being worked and that the Guggenheim or American Smelting interests will figure conspicuously in Bos-ton Consolidated affairs in the future. "Mr. Newhouse is in New York now and I would not be surprised if the deal is consummated before he con back to Salt Lake. I may be wrong, but I have every reason to believe that the matter of consolidating these mines is being discussed. A New York dispatch to a morning paper indicates that a consolidation of the Utah Copper, Nevada Consolidated and Cumberland-Ely mines is being considered, with no reference to Bos-It is proposed to ton Consolidated organize a large holding company along the lines of the Amalgamated in Montana.

at Newberry Mountain, 18 miles south. east of here, by John Thurman and Charles M. Hamill. Two different prospecting parties have been out in this district for some time past and reports heretofore sent in have been very discouraging. Three miles north of Beaver Lake lies Newberry moun-tain, with a series of low hills and many washes. The district is honey-combed with veins having a north-south, and eastwest trend. The eastwest veins are as a rule cut by dykes of porphyry while the northsouth veins run parallel with the dykes. The fornation is horn blend schist and the ein matter is quariz porphyry and altered country rock. The surface ores are free milling, but turn into sulphides with depth. The veins are trac il-sures and give every indication of permanency. Several sacks of ore taken from the scene of the new strike at the Thurman Camp, were brought into Searchlight. The ore is an oxinto Scarchight. The ore is an ox-idized quartz, heavily impregnated with free gold and easily visible to the naked eye. Most of the ore brought in will run better than \$300 per ton while quite a few samples will run into higher figures. Water is abundant in the new district and can be obtained in any of the low gulches. in any of the low gulches.

Supt. Edw. Carison has resumed sinking in the main shaft of the Wyoming Searchlight. The shaft is down 210 feet and preparations have been made to sink to the 500 ft. level. Crosscuts and drifts will be run at every they on the year other. every level on the ven. Three shifts are now at work. Sinking is being prosecuted with all speed possible. The 15 h. p. holst is in active operation and the machiner. the machinery and pumps are on the ground.

The Searchlight Mining & Milling Co. is erecting five cottages, new office building, zinc, boiler and lime houses ne. Three of the 20 tanks beat the mi longing to the cyanide plant will be in active operation in 30 days. The pump is raising upwards of 15,000 gallons daily. The mill is running three shifts pounding out 30 tons daily

Supt. John Wheatley reports excel-lent developments from the Nevada Consolidated mines, formerly the Mc-Laughlin group. In the Black Dog shaft at a depth of 113 feet, a 27 ft. yein was cut that will average from \$8 to \$10 per ton. Another ore shoot was

Utah Cop. Co 600,000 \$20 \$12 60,000,000 Nev. Con. ... 1,300,000 20 20 60,000,000 Cum.-Ely Co., 700,000 11 1 30,000,000 Balklala 400,000 25,000,009

175,000,000 Total ... The Utah Copper company is buildng a 6,000-ton concentrating mill. be later increased to a capacity of 10,. 00 tons.

The Nevada Consolidated company now that its 125-mile railroad is com pleted, will immediately start upon the erection of a smelter and a 5,000-ion con-centrating mill, this capacity to be

later increased to 10,000 tons. It is quite likely that the Cumberland-Ely company will own a half interest in the Nevada company's mill. The Balaylala company is building a 1,000-ton smelter in California and has closed a contract with the American Smelting & Refining company whereby that company furnishes the silicious for smelting, and in return the Balaklala company will ship its matte to the new smelter of the Amercan Smelting & Refining company at Sau Francisco bay.

The Guggenheims have actual stock control of the Utah Copper, Nevada consolidated and Cumberland Ely com panies, but not an actual ownership of 51 per cent of Balaklala stock. J. A.

Coram of Boston, is the largest individ-ual stockholder in the Balaklala company.

BROKERS AT DENVER.

Urged to Send Delegation to American Mining Congress.

President James A. Pollock of the Salt Lake Stock and Mining ex-change, through a resolution passed during the forenoon calls of that or ganization, was authorized to appoint two delegates to attend the forthcoming meeting of the American mining congress at Denver.

The matter was called up by First Vice President Joseph Oberndorfer who announced the presence of Mr. T. S. Woods who is visiting the city for the purpose of arousing local interest in the Colorado gathering. Mr. Woods was invited to talk to the memters of the exchange and undertook to impress upon brokers the importance of having a strong delegation from Utah. He spoke of the effort being made by the congress to have a national law enacted providing for the establishment of a department of mines and mining at Washington with the chief official of the departmet to become a member of the president's cabinet. He also laid considerable stress on the effort being put forth by the organization to wage war on wild cat mining promoters and spoke of other matters which can be done to insure adequate laws for the pro-tection of the investor, John Dern, representing Utah on the executive committee of the congress, also addressed the exchange in support of Mr. Wood.

TREASURE HILL DEAL.

Ore Shipments From Park City Last Week Exceeded 2,000 Tons.

As a result of the Treasure Hill excitement, first payment was made sevcral days ago, says the Park Record, on a deal for the purchase of 16 patent-ed claims owned by the Martin McGraw estate and Henry Newell, formerly of this city. The consideration was \$150, this city. The consideration was \$150, 006, \$100,000 going to McGraw and \$50, 000 to Newell, and the purchasers are O'Brien, Kenny, Thompson and associ-ates, who recently became interested in the Uintah-Treasure Hill to the extent of 100,000 shares. The group of claims sold includes the Typo, also Typo Nos. 2, 3 and 4, the Newell and other claims in the section of territory on Treasure Hill adjoining the Creole on the south. The purchases of the ground are up today, and though we cannot at this late hour learn the particulars, we un-derstand that they are already picking out a location for a shaft, and that operations on a big scale are to begin at once. The importance of this deal to Park City cannot be overestimated, as it means the exploration and development of a district which has scarcely een prospected at all, and which may be made to yield millions. The purchasers are energetic and progressive

operators and will pay every attention to this ground in which they have such great confidence. A pump is being installed at the American Flag this week, the purpose being to pump the water from the springs located just below the mine up to the works for use there. The management of the Flag is preparing for a strengous campaign of work dur-ing the winter, and with the coming of spring, especially if the Ontario water-

way is opened up, there will be good and startling news from this property. Ore Shipments-Daly Judge, 880,000; Daly Judge Middlings, 789,000; Silver King, 1,244,760; Daly West, 900,000; Littie Bell, 392,000; Ontario, 102,000. Total pounds, 4.450,760.

BULLION BOOMS.

Nevada Camp in Which Salt Lake People Are Interested.

George H. Crow, one of the Salt Lakers who was fortunate in getting into the Bullion, Nev., district at the right time, has returned from that Nevada camp more enthusiastic than ever about its possibilities and declared today that he would not be surprised to see it develop into a camp as great as any of the more famous ones in the southern part of that state.

Mr. Crow says the district is display-ing a great deal of activity now and at Tenabo, a new town which recently sprung into existence about 24 miles north of Beowowe, there are at least 30 tents and others are being pitched al-most daily. Besides, a number of wooden buildings are going up and a gen-eral merchandise store put in a few weeks ago is doing a thriving business. The Gold Quartz mine, located near Tenabo, is shipping ore to the Sait Lake smellers, and the management has sev-en hease working.

en leases working. The old town of Bullion, which displayed a great deal of activity 25 years ago, is on the revive; several old producers there are being reopened. Some new finds have been made recently at Corral, seven miles from Tenabo.

discovered on the Mocking Bird, which on the surface ran \$13.55 but with de-velopment has widened and increased in value to \$50 per ton. Development on the Lodi shaft has been likewise sensational. At 135 ft. a big vein of low grade ore was encountered, while at the 200 ft level it will average about \$35 per ton. The three hoists are now working and sinking has been resumed in all shafts.

The Stone-Brown Co. has just surveyed the following groups of claims for patent: Gold Sovereign, L X .L., rchlight Quintette, Gold Bar, Gold Wedge, Wyoming Searchlight, Gert-rude and the Azuşs claim. The first authentic map of El Dorado Canyon has just been issued by this firm showing all the surveyed and patented claims in this favored section

Bids have been asked for by the Searchlight Free-Gold and Duplex Extension Mining companies to sink shafts to water level. The Duplex want a double compartment, thoroughly timbered incline shaft to be sunk on the vein. The shaft is down 70 feet and it is estimated that water level

will be attained at a depth of 220 feet. The Southern Nevada company has resumed work which was suspended owing to the loss of its water supply. The new mill will be erected on the Blossom mine where the rich blanket vein was struck. Work on the Armetto adjoining this property is progressing very rapidly. The shaft is down 125 feet and is being thoroughly timbered. Supt. Williams has installed air pumps and working three shifts sinking.

ROUND MOUNTAIN MILL.

Arrangements Completed for Erection Of a Plant There,

Arrangements have been made to erect a mill at Round mountain at once hy the Round Mountain Mining company for the reduction of its ores and later it is intended to enlarge it sufficiently to receive custom ore, says the Sun of Goldfield.

George H. Gruss, Jr., who with his father had long experience in Aus-tralia and in California in the dressing of ores, has been engaged to in-stall and handle this first mill of the Round Mountain district and will start from here for the scene of his

labors in a few days. He says that the ore so far encountered in the Round Mountain company's property is wholly free milling and that the plates and a tube mill will probably be all that will be required to save anything in the rock. The plant will consist of two Nissen stamps such as are used here in the American mill and the tailings from the battery will then pass through the tube mill that the rusty gold which passed off the plates may be scoured to catch on another set of plates. Here he expects to secure all the value that remains.

In case, however, the slimes give assays worth consideration, he will save them and devise a process further robbing them of their gold. for He states that the ore is well oxidized and that so far no sulphides

NEW YO'K MINING SHOW.

have been encountered.

A letter was received by Gov. Cutler yesterday from President W. M. Porter of the International Mining exposition to be held in New York in 1908, asking him to appoint a commissioner to con fer with the exposition committee in regard to a mineral exhibit from Utah. matter will be attended to as soon as Gov. Cutler returns from Idaho.

AFTER NEW MEXICAN MINES.

A Boston publication indicates that United States Smelting, Refining & Mining company is seeking a foothold in New Mexico by the following:

In New Mexico by the following: "The annual meeting of the Navajoe Gold Mining company will be held at Portland, Me., Wednesday, Oct. 17. Stockholders will be asked to ratify a lease mude by the directors May 8, 1996, to the United Smelting. Refining & Mining company for 39 years of all the mines ended by the director and mines, mining claims and real and per-social property of the Navajoe Gold Mining company, located in the Cochiti

ANACONDA DIVIDEND.

New York; Sept. 25 .- The Anaconda Copper Mining company today declared a quarterly dividend of \$1.50 per share. This compares with its last previous quarterly dividend of \$1.37½ a The par value of the stock is \$25. a share

CONCENTRATES.

David Keith departed for Ely, Nev. yesterday on mining business. The Consolidated Mercur -quarterly

dividend of \$25,000 is being disbursed to day. Manager John C. Fox of the Annie Laurie mine in the Gold Mountain dis-

trict is in from camp. A carload of ore from the Carbonate Hill mine in Morgan county is expected to reach the local sampling mills today,

James W. Neili, consulting engineer of the East Butte Mining company, is down from Montana to give attention to local interests.

The ore and bullion settlements reported late yesterday by McCornick & Co. were: Crude ore and concentrate, \$36,000; base bullion, \$74,000.

Col. E. A. Wall has gone to Ely Nev., to look over that most interesting copper camp. He will probably remain until after the celebration next Saturday.

John M. Daugherty of Omaha, one of the directors of the Wabash and Carbonate Hill Mining companies, is in the city and will make an inspection of local interests before returning.

Supt. A. O. Jacobson of the Columbus Consolidated Mining company went up to Alta this morning on an inspection trip, having been excused from jury service for a day.

The directors of the Sacramento Min. ing company met yesterday afternoon and posted a dividend of \$5,000 for pay-ment on Oct. 1, the books to close on the 26th inst. With the coming distri-bution the Sacramento company will have paid out to shareholders a total of \$225,000.

It has been announced that the plan to consolidate the Silver Shield and United Bingham mines in Bingham has fallen through, Harry S. Joseph, who was active in the promotion of the deal, having sent out a circular letter to that The stock placed in McCornick effect & Co,'s bank under agreement has been returned to shareholders,
