

DESERT EVENING NEWS

TODAY'S WEATHER REPORT.

(Observations taken at 6 a. m. Mountain time.)

Salt Lake City: Barometer 25.60; current temperature 35; maximum temperature 38; minimum temperature 29; mean temperature 34, which is 5 below normal.

Accumulated excess of temperature since first of month 32.

Accumulated excess of temperature since January 1st 227.

Total precipitation from 6 a. m. to 6 a. m. .02 inch.

Accumulated deficiency of precipitation since first of month 12 inches.

Accumulated deficiency of precipitation since January 1st 1.12 inches.

FORECAST TILL 6 P. M. FRIDAY.

Local forecast for Salt Lake City and vicinity:

Pair tonight and Friday: slight changes in temperature.

For Utah: Observations taken at San Francisco.

Cloudy and warmer tonight and Friday.

WEATHER CONDITIONS.

A storm of decided energy is central in the vicinity of Lake Michigan, the barometer at Chicago reading 29.29 inches. The crest of high barometer lies over northern Montana and is accompanied by the coldest weather of the season. Temperature is 38 degrees below zero at Havre and the zero line passes as far south as Colorado and Kansas. Precipitation has been general from the Rocky Mountains to the Mississippi valley inclusive, being heavy over the lower Missouri valley.

L. H. MURDOCH,
Section Director.

LOCAL BRIEFS.

Fish Commissioner Sharp reports that there are 800,000 young fish in the State hatchery. The loss from time of shipment has been about 50,000.

Governor Wells, State Auditor Richards and Treasurer Chipman went to Provo today to attend a meeting of the insane asylum commissioners.

Rev. M. E. Hogan of Park City is now pastor of the Phillips' Congregational church, he having accepted the call. He will enter upon his new charge at once.

Superintendent Park expects that at the meeting of the State board of education Saturday morning certificates and diplomas of various grades will be granted to several school teachers.

The gravelling of Third East from Tenth to Twelfth South street, under the direction of the county commissioners, is highly appreciated by the residents on that street.

Representatives of all the Christian Endeavor societies in this city will meet in the Y. M. C. A. parlors at 8 o'clock this evening to arrange for the Christian Endeavor State convention, to be held this spring.

The county assessor's deputies are busy making a house to house assessment canvass. Assessor Quinn hopes taxpayers will deal courteously with his men, and give them all necessary information on tax matters.

Frank Ward, the man who was shot through the leg in Park City Tuesday night, is resting comfortably at the Holy Cross. The bone was not hit by the bullet, therefore the wound, though painful, is nowise dangerous.

Land and Water Commissioner West-erfield is taking steps to have removed about 100 head of horses in City Creek canyon. The animals have been herded for nearly a year in the canyon, and it is said they are now pasturing on the banks of the stream and polluting the water.

Keen interest or curiosity is being aroused by the invitations to the Chinese festival to be given at the First Congregational church, Friday evening, in honor of their new year. The program is on red Chinese paper written in black ink. These curious folks will also serve a menu which will be of interest itself.

Southern Idaho Mail: Dr. J. B. Cooper has gone to Franklin, Idaho, where he will visit his daughter, Mrs. Veran, for a few days before going to American Fork, Utah, where he will spend three weeks with old friends, and then take the train for Seamsboro, Cherokee county, Kansas, where he once lived, and where he expects to make his future home.

At the session of the Salt Lake lodge B. P. O. E. last evening the following gentlemen of Evanston, Wyoming, were initiated into its awful and hazy mysteries: Tom Palmer, George Snyder, J. H. Ward, T. H. Hollingsworth, Charles Martin, W. W. Miles, George E. Pexton and W. J. Hills. After the ceremonies the company indulged in a dainty repast. The committee on buildings reported that an option on the ground at 53 south First East street had been obtained, for \$8,750, and nothing now stood in the way of erecting a building on that spot. Arrangements were also made for the entertaining of Frederick Ward.

TEACHERS GIVEN HALF PAY ONLY.

The Decision Reached by School Board Last Night.

WILL INSTITUTE TEST CASE

Warrant for Full Month Will be Issued to Mrs. McKay—Treasurer Will Refuse to Pay It—Suit to Follow.

At a special meeting of the school board last night at which the following eight members were present, Wilson, Walker, Nelson, Moyle, Young, Newman, Henderson and Critchlow, it was decided to issue warrants to the teachers for the two weeks beginning January 22nd and to issue to Mrs. Mattie E. McKay two warrants, one for the four days beginning January 23rd, the other for the remaining sixteen days of the month. This was for a test in the way of inviting a friendly suit to determine whether the teachers are entitled to receive pay for the time they were not teaching during the smallpox epidemic vacation.

The board sat first as a committee of the whole and discussed the matter very freely and although there was some doubt expressed as to the court sustaining them in paying the teachers for the full month, all the members felt that they were morally obliged to pay the entire month's salary, however, they did not feel to render themselves personally liable should the courts decide against them. The first two weeks of January 22nd and 23rd were put on the minutes of the board as an extension of the Christmas vacation and it was feared that that point might be raised to bar the teachers from drawing their salaries for that period. The schools opened on Tuesday, January 23rd, and remained open four days, up to and including January 26th. The board was willing to consider this period as one week. The schools then closed and remained so far another week, but during that time the teachers met frequently in order to do something to bridge over the beneficial effects of the interruption of their work, and inasmuch as they were all active the board considered that they were working for the interests of the schools, and were willing to compensate them for the two weeks' work.

It was then decided, on motion of Judge Henderson, to issue two warrants to Mrs. McKay, one of the teachers, for the two periods already indicated. The treasurer of the board will promptly pay the lady for the four days she actually taught, but will refuse to pay for the sixteen days, whereupon Mrs. McKay will promptly bring suit for a writ of mandamus to compel the treasurer to pay the warrant, and in this way the matter will be brought before the court.

When this decision was reached the following resolution was adopted, the members being in clerk capacity:

"Resolved, That the clerk of the board is hereby instructed to make up pay-rolls and issue warrants to teachers, except as herein provided, in payment of their salaries for the two weeks beginning January 22nd and ending February 2, 1900.

"Resolved, second, That the clerk be and is hereby instructed to place Mrs. Mattie E. McKay on the payroll for the school month beginning January 8th and ending February 2, 1900, and that he be and is hereby instructed to issue two warrants to her for the two periods already indicated, to wit: One for \$14 for the four days beginning January 23rd and ending Friday, January 26, 1900, and one warrant in payment for salary from January 8th to January 19, 1900, inclusive, and from January 20th to February 2, 1900, inclusive, sixteen days, for \$55."

Newman wanted the teachers to receive pay for the full month, urging that they were in no way responsible for the suspension of the schools and the amendment to that effect. He further stated that many teachers had been made ill through complying to an absurd rule of the board requiring the teachers to be vaccinated.

This motion did not receive a second and was not voted upon. The original resolution was carried. Newman and Moyle being the only dissenting voters. Glaugue and Bamberger were not present.

Moyle subsequently asked to be recorded as voting aye on the first motion of the resolution and on the second.

The teachers, while they feel that they are justly entitled to their full pay, do not desire to antagonize the board, as that body has manifested an earnest desire to do all they can for them without making themselves personally liable for obligations they are not able to meet. Pay day comes on Saturday, and it is expected that during the week following the matter will be settled.

BIG WIRE PURCHASE.

Telephone Company Buys 250,000 Pounds for Connection with Denver.

The Rocky Mountain Bell Telephone Company has closed a deal with an eastern firm for 250,000 pounds of copper wire, that being but one-half of the amount of copper wire that will be strung during the year. The delivery will be made at Ogden, on April 1st, to be distributed from that point to the places where it is needed. The contract for all the poles necessary to complete the connection with Denver, has also been closed, the number being based on thirty-five poles to the mile. The poles are purchased in sections of the country contiguous to the places where they will be used. The ex box between Fort Steele and Laramie is covered by four contracts. Cedar poles cut in northern Idaho, will be used from Ogden to Fort Steele. There are camp outfits and material for three gangs of workmen now on the ground, and the work will be pushed without delay. Between Salt Lake and Denver there will be two through copper wires, and local lines in addition as fast as called for, including local lines from Granger to Kemmerer and Diamondville; also between Rock Springs and Green River. It is confidently expected that the through lines will be completed by the first of next November.

Superintendent Murray hopes to have wires projected from this city south through Sanpete and Sevier valleys to Marysville this year, which will be of great commercial value. He is of the opinion that the Wyoming lines will result in being a great benefit to Salt Lake, in the business world. They will concentrate the business for miles around into Salt Lake City.

OLD INDUSTRY MOVES AWAY.

Wool Pulling Plant is Now Established Near Tooele.

PROCESSES ARE DESCRIBED.

Howe, Morris & Summerhays Company Have Erected a New Mill of Enlarged Capacity.

An enterprise that is no mean factor in the industries of Utah, has been established in Tooele county, or rather it has taken up its abode and walked out there, for it is one of the oldest enterprises in the State. It is the wool-pulling plant, operated and owned by the Howe, Morris & Summerhays company, who have had such a hard time in securing a permanent habitation for their ward. But now it has been placed where its odiferous breath will not offend the nostrils of city folks, and its running on a larger scale than ever. Its place of residence is known as the "half-way-house," on the railroad, and there is no State in the West that can boast of having as large an industry of the same kind. The tannery, which is operated by the same company, retains its old stand on Fourth North between First and Second West streets.

The wool-tearing process involves the shift work of a dozen men or more. The aroma emanating from the vats and the like is not as pleasant as the scented breath of the heliotrope. The first thing done with the pelts is to take them, greasy, hard and dirty, and dump them in the store rooms on the second floor of one of the buildings, they are carried from there into another room and I dropped down into vats filled with water, where they are left to soak until they become soft and pliable. They are then run through the burring machine, an arrangement fashioned something like the saws of a cotton gin, in which all the grease and extraneous matter that is attached to the wool is torn off. This machine runs out 300 pelts each day.

After being cleaned the hides are then placed into ten vats each, each of which has a capacity for 160 pelts. Prior to this, however, they are given a coat of arsenic and potash, a preparation which keeps the skins from decaying. The pelts are kept in these hot vats from three to six days, the time depending on the condition of the hides, the temperature being retained at from 80 to 90 degrees. The steam is conveyed to these boxes through pipes. This heat causes ammonia, which loosens the wool, and when it has been subjected to this heating process long enough, the hides are then conveyed to the pulling beams up stairs, where there are three. They are merely boards on which the pelts are laid, while the wool is being scraped off. There are three men who do this work and they are artists, a fact which may be ascertained by visiting the plant.

The most important feature of this work is the grading of the wool. The wool on the sheep's back is a better quality than that on his belly and legs, and naturally there is better wool on some sheep than on others, so it can be seen that the work of grading this product of the sheep, in the proper grades, requires quick and correct judgment, but it soon resolves itself down to a matter of reflex action and the men work mechanically.

The grades are kept apart and gathered up and placed in a peculiar machine called the extractor. The wet wool is placed into this machine, which is shaped like a tub, three feet deep and four feet in diameter, having within it a sack like the sacks in which wool is placed, and set to whirling like the wheels of Achilles' chariot. This action presses the wool against the side of the tub which is perforated like a sieve and the water is in that manner extruded.

The product is then taken to driers, each of which contains its respective grade. It is placed on a wire netting and hot air is fanned into the room and in a short time the wool is dry enough to sack. The sacks hold about 100 pounds. This whole process consuming about ten days. "Green pelts," however, do not require so much time. The stripped hides are sent to the tannery in the city, where they go through a process requiring one week. From the time of placing the pelts in the warehouse to the time they are turned out as finished leather three weeks have been consumed.

TO UTAH CLUB WOMEN.

The movement that has been quietly afoot for sometime past amongst the Women's clubs of Utah to agitate the question of local industrial reforms for the purpose of aiding in bringing about improvements in industrial conditions in the State, has taken something like definite shape in the issuing of a circular by the State Industrial committee of the Utah Federation of Women's clubs, asking the women's clubs throughout the State to appoint delegates to inquire into existing industrial conditions, a report of which will be made at the coming biennial meeting to take place in May at Salt Lake. The State committee has been requested to make such report at the convention, and the result will doubtless be the inauguration of steps towards the betterment of industrial conditions such as have been initiated by the club women in the larger cities.

The questions to be reported on are as follows:

What are the sanitary conditions of dry good stores, factories and offices?

Are seats provided for clerks in dry goods stores, and are they permitted to use them when not busy?

What is the condition of streets and alleys?

Has a law against expectation in public buildings and street cars and on sidewalks been passed; if so, is it enforced?

Do women have a voice in controlling public schools and public libraries?

Have they the inspection of all institutions where women and children are confined, and the appointment of matrons at the city jail and penitentiary?

Do women receive equal wages with men for the same services?

For club study and investigation the committee recommended the following subjects: Postal savings banks, municipal ownership, direct legislation, the truck system, the evolution of industrial occupations, the history of crafts, guilds and labor unions; the city ordinances, the eight-hour law, etc.

The committee concludes its appeal with these words: "Attention to the above subjects by the women's clubs will aid in improving the condition of the working people, and in the solution of the all-important problem: 'How can every one have an opportunity to obtain a better living?'"

The year book of the Utah Federation of Women's clubs will be ready for distribution early next week.

WILL OPERATE BY LIQUID AIR?

Likelihood that Salt Lake-Ogden Line Will Use New Force.

IS COMING MOTIVE POWER.

Will be Used in Domestic, Commercial, Surgical, Mechanical and Scientific Operations.

The fact that the erection of poles and the stringing of necessary wires in the construction of a railway to be operated by electricity forms one of the largest items of expense, is causing builders of railways to turn seriously to the great new force which is coming into use—liquid air. Its possibilities are so wide that as yet, like electricity at first, the scope of its field of usefulness appears to be boundless. In the articles of incorporation, recently filed in the county clerk's office, of the company which proposes to build a local line from Salt Lake to Ogden, liquid air is mentioned as the possible element to be used in the production of locomotion. By the time the local line is ready to commence active work it is expected that the system of conversion of liquid air into locomotive power will have been so perfected by the Tripler Liquid Air company, that its use on the new road may be expected. The ease with which liquid air may be stored and carried and its enormous expansive power make its future use for transportation and navigation purposes an absolute assurance. It is destined to become a factor in domestic, commercial, surgical, mechanical and scientific operations.

DECIDED UPON NEW TRAIN.

Also Agreed to Use Uniform Couplers on East-and-West Cars.

The only matters considered and decided upon so far as the new road is concerned by the railroad officials who have been gathering here for a few days past were the putting on of a new train and the use of uniform couplers. It was decided to run another first-class passenger train between Granger and Port-aud, beginning April 1st. It was also agreed that upon all cars running between Chicago and the coast a uniform style of coupler be used. All the visitors have vanished and railroad men and affairs here have no appearance of disturbance.

No Increased Dividend.

The directors of the Atchison, Topeka & Santa Fe railroad met in New York today with A. F. Walker in the chair. It had been expected that in view of the increased earnings of the system there would be some discussion of an increase of dividends. Col. Walker, however, said after the meeting: "Only routine business was transacted and nothing was said about dividends. Everything is now looking well and conditions along the line continue to improve."

The new Atchison line into San Francisco will be in operation very soon and that is counted on to add materially to the Pacific coast business of the system.

Fatal Wreck in Colorado.

A freight train on the Florence & Cripple Creek road became unmanageable yesterday afternoon on account of a slippery track on a heavy grade, near Cripple Creek, twenty miles north of Florence. The engine and eleven cars of ore left the track and were demolished. Fireman Nevins and brakeman F. M. Alverson were killed and Engineer Ed Granger fatally injured.

Brown President of K. C. P. & G.

A prominent railway official and personal friend of W. C. Brown, general manager of the Chicago, Burlington & Quincy at Chicago, formerly general manager of the Burlington lines in Missouri with headquarters in St. Joseph, Mo., last night said that Mr. Brown had been offered the presidency of the Kansas City, Pittsburg & Gulf railway and had accepted.

Historic Western Spots.

The new line of the Burlington railroad to Guernsey, Wyo., will make accessible to tourists some of the most historic spots of the West. Chief of these is old Fort Laramie, around which lingers many an almost forgotten romance. At one time the principal frontier post west of the Missouri, cut off from civilization by hundreds of miles of trackless prairie and continually surrounded by hostile Indians, it was the haven of refuge sought by the weary and hard-pressed emigrant. Today it stands a mute but mournful monument to the indomitable will and courage of the old frontiersmen whose rifles have marked upon the pages of history the tales of many a Western legend.

The parade ground, upon which they assembled at the sound of bugles and saddles, is now the playground of a country school, the barracks are decayed and crumbling. The flagstaff alone remains, and though no longer proudly bearing its banner to guide the emigrant, still stands like a giant index finger, pointing out to the curious traveler this historic spot. Passing on from this point the Burlington will still traverse historic ground, past the great hematite mining camp, Hartsville, up the beautiful canyons of the Platte and Laramie, and around the base of Laramie peak, whose snow-capped crown rises 5,000 feet above all surrounding mountains and is visible for a hundred miles in every direction.

New Through Service.

On May 1st the Burlington and Northern Pacific railroads will establish through train service in both directions between Portland and St. Louis by way of Billings. To maintain this through service, ten trains will be required, and orders for the new equipment have already been placed. The new trains will carry sleeping, dining, tourist and smoking cars, as well as first and second-class coaches. The Burlington route is becoming a big factor in the passenger situation in the Northwest, and the arrangement now being perfected will undoubtedly have a tendency to make the Billings gateway even more popular than it has been in the past.

RAILROAD NOTES

Lieutenants will no longer be dispensed in Southern Pacific hotels and eating houses.

H. M. Clay of the Union Pacific contemplates leaving for California in a day or two.

C. Clifford, formerly agent at Butte for the Union Pacific has been transferred to Omaha.

General Agent H. O. Wilson, of Butte, for the Union Pacific and Oregon Short Line, left for home this morning.

Handsome invitations are out for the

eleventh annual ball of the Brotherhood of Locomotive Engineers, which is to be given at Christensen's hall on Tuesday, Feb. 13.

Philip Wickland, the oldest locomotive engineer on the Salt Lake division of the Central Pacific, died of heart disease at Battle Mountain Friday. He leaves an estate valued at \$50,000, and a life insurance of \$15,000 to his family at Wadsworth.

WANTS HIS NAME CHANGED.

Alfred O. Clamer Prefers Being a Miller.

Alfred Oscar Clamer has petitioned the district court to change his surname to Miller. Petitioner says he is an American citizen by adoption and that he came to this country along with his parents from Denmark. He says his father's name was Miller, but his mother obtained a divorce and afterwards married a man named Clamer, a name he became afterwards known by, naming his estate after her. Petitioner says he is married and that he leaves the name of Miller to the clerk issuing the license.

UTAH LAKE RESERVOIR.

Maps and Plans, Showing the Site Are Approved by City Council.

Engineer Will File Them in Land Office—Members Will Visit the Proposed Site Tomorrow Morning.

Nine members of the city council, with the mayor and engineer associated, met in special session last evening and approved the Utah lake reservoir maps and plans as prepared by Mr. Kelsey. The following resolution, offered by Councilman Gemmell, met with unanimous approval:

Be it Resolved, That the maps of Utah lake reservoir, which have been prepared by the city engineer for the purpose of showing the reservoir site claimed by the city, are hereby approved, and the city engineer is directed to file the same in the United States land office, in accordance with the law and regulations pertaining to reservoirs.

The members will visit the site at Utah lake tomorrow and will leave the Rio Grande Western depot at 3:30 in the morning. On the road home a stop will be made at the Jordan Narrows.

SOLD YEARLINGS FOR \$31.50.

J. N. Whitney, of Evanston, Sold His Steers for That Price.

J. N. Whitney, an Evanston stockman, states that he recently sold 400 yearling steers for \$31.50, the highest price yet secured by local dealers. The reason for it was that these animals, besides being naturally large, were very fat and healthy, and being popular with the buyers.

W. H. A. Mason and C. C. Truitt of Deeth, Nev., recently sold to J. W. Chatfield and Charles Barth of Denver 500 yearling steers. Although the price is not known, it is thought to have been \$21 per head.

OLLIE LOVE FREE AGAIN.

Ollie Love, one of the defendants in the Bingham canyon slaughter house burglary case, was released yesterday afternoon upon his own recognizance. The county attorney believes Love was drawn into the affair by Higgins and Wilson, who got one year each in the State prison Monday, upon entering a plea of guilty.

There is no better medicine for the babies than Chamberlain's Cough Remedy. Its pleasant taste and prompt and effectual cures make it a favorite with mothers and small children. It quickly cures their coughs and colds, preventing pneumonia or other serious consequences. It also cures croup and has been used in tens of thousands of cases without a single failure, so far as we have been able to learn. It not only cures croup, but when given as soon as the croupy cough appears, will prevent the attack. In cases of whooping cough it liquefies the tough mucus, making it easier to expectorate, and lessens the severity and frequency of the paroxysms of coughing, thus depriving that disease of all dangerous consequences.

"PREACHING AND PUBLIC SPEAKING."

Of the 5,000 copies of this popular book published last year only three or four hundred remain and the author has decided to sell these through the ordinary agencies for Church publications. Your local agent will order a book for you or it will be sent postpaid from the Desert News Office. Cloth, \$1.50; Half Morocco, \$2.00.

THE "NOBLE COMPANY."

A Card of Denial.

To whom it may concern:

We, the undersigned, having reason to believe that our names have been used in connection with a corporation known as "The Noble Company," represented by one George O. Noble of Salt Lake City, hereby declare that such use of our names has been and is entirely without our authority or permission. We have never purchased stock in the so-called company, nor are we in any way connected therewith.
