

MINING, BUSINESS AND STOCKS

ROBERT WHITE ON
THE BALAKLALLA.Returns From New York With In-
structions to Build Smelter
At Mine.

ORIGINAL PLANS ARE CHANGED

Copper Matte Will be Shipped to
American Plant on San Fran-
cisco Bay.

All doubt that has existed during the past few days about the building of a smelter in Shasta county, Cal., for the Balaklalla Consolidated Copper company was set aside today by Robert T. White, chief engineer, who returned from New York last Saturday.

When Daniel Guggenheim, president of the American Smelting and Refining company was here last week he made the statement that the American Smelters Securities company had purchased enough Balaklalla stock to give it control; at the same time adding that the output of the big California copper mine would go to the new plant of the American Smelting and Refining company about to be erected at San Bruno, on the San Francisco bay, near the city of San Francisco. This statement of Mr. Guggenheim led to the belief that the original plans of the Balaklalla company, as regarded the construction of a smelter plant, had been abandoned, and that the ores as they came from the mine would be forwarded in the crude state to the smelter on the bay for treatment.

But this does not seem to be the case, according to a statement made to a representative of the "News" today by Mr. White. "My instructions when I left New York," said he, "were to proceed with the drawing of plans for a smelter for the Shasta county mine, which is to be equipped to reduce to a copper matte, 750 tons of Balaklalla mine ore per day and with additional equipment to take care of what custom ores are offered for treatment there."

"Originally," continued Mr. White, "it was the intention of the Balaklalla company to install a set of converters. The decision to reduce the ore to a matte only has, of course, made it necessary to begin all over again. The plans drawn some time ago will be discarded entirely."

Mr. White has the work, in accordance with his latest instructions, under way, and expects to have it sufficiently advanced so that he can visit the mine about a month later.

It was originally the intention of the Balaklalla company to build a smelter to handle an output of only 600 tons daily.

PARK CITY STOCKS.

Were Active During Today's Sessions
Of Mining Stock Exchange.

The week opened with the sale of 20,942 shares for \$27,833.65 this forenoon. The mines of Park City were represented very conspicuously in the trading. Some brokers were not after Little Bell, with the result that the stock sold 40 cents higher at the close than it did at the opening. Daily-Judge did not budge from where it left off on Saturday, but there is every indication that this stock is going to move forward again soon. Silver King was offered, but the demand for it was soon supplied; however, a little more than 300 shares changed hands, the stock selling at \$29 and down to \$27.75. May Day opened strong and continued so throughout the calls. Sacramento moved up slightly. Ohio Copper was offered freely on the open board, but only 15 shares could find a buyer. The closing quotations and sales were:

UTAH COPPER MILL.

Warehouse Nearly Completed—Material for Main Building.

Chief Engineer George O. Bradley of the Utah Copper company expressed considerable satisfaction during the day over the progress being made with the construction of the new steel buildings at the site of the company's Garfield plant. The warehouse building is nearing completion, and within the next few days contractors will commence the erection of the powerhouse. The steel structural material for the main mill building, Mr. Bradley states, has begun to arrive.

AT THE LITTLE BELL.

Uprise From Lower Level Looks Better Than Ever.

It was reported from Park City early in the day that in upraise from the lower workings of the Little Bell mine the showing of ore is better than at any time in the history of that property. It is expected that regular shipments of ore from that property will be inaugurated within the next few days, notwithstanding that the roads are anything but good.

TINTIC MINING NEWS.

New Bullion Property is Looking Good—Improvements at Undine.

C. F. Adams and Eugene Sanchi of Salt Lake came to Eureka on Monday after a few days' visit at the New Bullion mine in North Tintic, says the Eureka Reporter. They were highly pleased with the manner in which the ore body is opening up, and state that they will be ready to make a shipment just as soon as the roads are in better condition. The development work is being carried on under the direction of H. Gustaf of Eureka, and while the ore body was small when it was tapped on the 15th of August, it is getting bigger with every shot.

Messrs. Adams and Sanchi did not care to give out figures showing the value of the ore, but it is apparently a very desirable shipping grade, and it is beginning to look as though the stockholders are to be rewarded for their faith in the property.

J. P. Turner was in Eureka yesterday and says that the storms have not only cut down the output of several of the mines at Mammoth, but have made it almost impossible for them to get sufficient coal hauled from the railroad to keep their plants in operation. It has been many years since as much snow fell in the mountains of Tintic.

James B. Creighton, who is now in charge of the Bingham Con. Mining company's property at Bingham, was in Eureka the early part of the week doing some work for the company at the Eagle and Blue Bell mine, over which he was formerly superintendent. Mrs. Creighton accompanied him to Eureka and spent a few days visiting friends.

S. A. Kennear and Charlie Parker shipped another carload of ore during the week from their lease at the Undine mine at Silver City. The ore body is still holding out well, in fact there has been a marked improvement in the showing recently, and shipments will be made regularly.

D. D. Hanks says that work will be commenced upon the property the Farragut Mining company in North Tintic as soon as the weather moderates. The company has made arrangements for the use of a whim which will be moved to the property.

The boiler which the New Utah company purchased a short time ago was transferred to the mine this week and Supt. Timothy Manion expects to have the hoisting plant in working order at an early date. This boiler is large enough to run the pumps and hoisting works.

The shaft at the American claim is now being deepened 20 feet, and the Schmidt brothers who are working the property state that the showing is quite encouraging.

AMONG PARK CITY MINES.

Daily-Judge Second Among Camp's Shippers Last Week.

John Nelson, of the Nelson property in the Silverton district, is now trying his luck in Manhattan, Nev., and will remain there for some time looking over conditions there. He is accompanied by "Jack" O'Neil of this city, who is also going to "take a chance" at the rich gold deposits reported to abound in that section.

Ore Shipments—Silver King, 2,000,000 pounds; Daily-West, 1,150,000; Barnes Bros., 80,000; Daily-Judge, 270,000; Kearns-Keith, 185,000; Daily-Judge Midding, 654,000; total, 5,560,000 pounds.

If, as reported, several of the Thayne canyon properties are to be consolidated, it means a grand revival of operations in that district, and the making of some rich mines there. It seems now that the only hope for this section is a consolidation of interests backed by a rigid financial company, which will have capital sufficient to get down deep, where the ore bodies exist. In this consolidation, the Comstock, California, Silver Bell, D. & M. and others will be included, and work will be prosecuted through the Comstock workings, which are equipped with everything required, modern and up-to-date. The Comstock property too has explored that section quite thoroughly as far as the have gone, and indications there are such

that they are more than anxious to get down deeper and develop more thoroughly. It is to be hoped that the consolidation will be effected, and that in the near future the vast mineral bearing belt of Thayne canyon may be opened up, and on its wealth added to the camp's already great record.

NEVADA CONSOLIDATED.

Boston Paper Gives Some Figures
From Engineer Bradley's Report.

A Boston paper says of Nevada Consolidated in referring to the late report of Engineer F. W. Bradley:

"This report estimates that there are 22,000,000 tons of ore now in sight in the property—6,000,000 tons in the Ruth mine which will assay 50 pounds to the ton, and 16,000,000 tons in the Copper Flat mines, which will assay 40 pounds to the ton.

"With a 2,500-ton plant, as authorized, Mr. Bradley figures that the copper output of the Nevada Consolidated should be 30,000,000 pounds per annum, and that 'as soon as this plant is in operation we can safely consider that steps will immediately be taken to double the capacity of the plant.'

"He estimates that with 2,500 tons being mined and treated per day, Nevada Consolidated copper can be delivered and sold in New York at a total cost of 7 cents per pound, upon which basis, figuring at 15 cents per pound and a 3,000,000-pound output, the company can earn \$2,400,000, or \$2 per share.

"Present prospects are, however, that by the time this takes place control of the Nevada Consolidated company will be safely lodged with the American Smelting & Refining people."

LITTLE BELL OFFICERS.

At the stockholders' meeting of the Little Bell Consolidated Mining company, held at Cheyenne, Wyo., Monday, March 12, Solo Spiro, Sidney M. Bamberger and Herman Bamberger were elected trustees.

The board of directors was organized in this city last Saturday, with Solo Spiro president; Sidney M. Bamberger, vice president; Herman Bamberger, treasurer; and Joshua B. Bean, secretary.

NEVADA STOCKS.

Director of Jumbo Mining Co., Goldfield, Nevada.

THE STRAY DOG IS THE BIGGEST SHIPPER OF "HIGH GRADE" IN MANHATTAN.

FIVE LEASES HAVE BEEN LET ON THE PROPERTY AND ALL ARE IN SHIPPING ORE.

FOUR LEASERS ARE SHIPPING ORE REGULARLY AVERAGING FROM \$250 TO \$1,000 PER TON.

UPWARDS OF \$15,000 HAVE ALREADY BEEN NETTED FROM SHIPMENTS OF "HIGH GRADE."

A SERIES OF GREAT GOLD MINES HAVE BEEN OPENED UP IN LESS THAN 90 DAYS.

THE STRAY DOG claim is itself the center of a network of great gold mines.

THE STRAY DOG is bordered by the Union No. 9 claim of the Manhattan Dexter Mining Co. and by the Jumping Jack, Crescent, and Riley Fraction, all of which are shippers of high grade ore.

THE STRAY DOG is, beyond any question the most talked of and most frequently visited property in Manhattan, and from it the richest ore yet taken out of the ground in Manhattan is being lifted to the surface.

Specimen rock from the Stray Dog's five shafts give assays as high as thirty thousand dollars per ton, and no shipment made to the smelters to date has netted less than \$250 per ton.

STOCK OFFERINGS:

A limited number of shares is offered for public subscription at 55 cents per share. Immediately after the sale of these, application will be made for listing on the San Francisco Stock and Exchange Board. Reservation of shares must be made immediately.

Allotments will be made by priority of application. Notification of acceptance will be given promptly.

Certificates will be issued on receipt of cash subscription, which must be forwarded without delay after notice of allotment. Address the fiscal agents.—
