DOINGS OF THE CITY COUNCIL.

These Cheap "Down to the Jordan River Sidewalks."

THE SEWER TAX INSTALLMENTS.

The Debate on Employing One-Eyed, One-Armed and One-Legged Police Officers.

Acting under the instruction of the council, City Engineer Doremus has prepared a preliminary estimate of the cost of constructing sidewalk sidewalks on both sides of Second South street between Fifth West street and the Jordan river.

Mr. Doremus says the council's instruction did not prescribe the kind of foundation to be used and that he has been informed by property owners that they desire to try the experiment of having the sidewalk on a gravel foundation in the belief that it is cheaper and will answer every purpose.

Regarding this proposed experiment Mr. Doremus expresses himself as follows: "In this matter I desire to say that while a gravel foundation may serve the purpose on the higher and dryer streets, I very much doubt the wisdom of using it on the low lands as in this case contemplated. The only difference to me between the gravel and concrete foundations will be the price of the material used in the gravel foundation, but if in case of failure, the cost of replacement will fall on the city, I suggest that the experiment be made by having natural gravel foundations."

PRELIMINARY ESTIMATES.

The preliminary estimates of these walks on the street named are as follows:
