THE city of Philadelphia has the honor
 of establishing the first bronze foundry
 in America. Mr. J. A. Bailly, a sculp-
 tor of that city, has in his hands a
 model for a colossal bronze equestrian
 statue of General Grant, at which he
 has been at work for the past ten
 months. This statue is to stand on the
 south terrace of the Treasury building
 at Washington, where it may be seen
 from the Capitol. The estimated cost
 is \$65,000, which is to be raised by the
 voluntary contributions of citizens
 throughout the country. A consider-
 able portion of this money, it is said,
 has already been subscribed. It will
 take three months longer to finish the
 model. The whole group will be
 something over 16 feet in height above
 the pedestal, and is intended to be just
 twice the life size. It is expected that
 the statue will be cast in bronze at the
 foundry in Philadelphia, an operation
 which will require at least nine months.

GOOD ADVICE TO DYSPEPTICS.—If a
 man wishes to get rid of dyspepsia he
 must give his stomach and brain less
 to do. It will be of no service to him to
 follow any particular regimen—to live
 on chaff bread, or any such stuff—to
 weigh his food, etc., so long as the brain
 is in a constant state of excitement.
 Give that proper rest, and the stomach
 will perform its functions. But if he
 pass fourteen or fifteen hours a day
 in his office or counting room, and take
 no exercise, his stomach will inevita-
 bly become paralyzed, and if he puts
 nothing into it but a cracker a day, it
 will not digest it. In many cases it is
 the brain that is the primary cause.
 Give that delicate organ some rest.
 Leave your business behind you when
 you go to your home. Do not sit down
 to your dinner with your brows knit,
 and your mind absorbed in casting up
 interest accounts. Never abridge the
 usual hours of sleep. Take more or less
 exercise in the open air every day. Eat
 moderately, slowly, and of what you
 please. If any particular dish dis-
 agrees with you, however, never touch
 it, or look at it. Do not imagine that
 you must live on rye bread nor oatmeal
 porridge; a reasonable quantity of nu-
 tritious food is essential to the mind as
 well as the body. Above all, banish all
 thoughts of the subject. If you have
 any treatises on dyspepsia, domestic
 medicine, etc., put them directly into
 the fire. If you are constantly talking
 and thinking about dyspepsia, you will
 surely have it. Endeavor to forget that
 you have had a stomach. Keep a clear
 conscience; live temperately, regularly,
 cleanly; be industrious too, but be tem-
 perate.—*Boston Journal of Chemistry.*

THE STAKED PLAIN—CHEERFUL
LANDSCAPE.—On the route of the Texas
 and Pacific Railroad, says a traveler, is
 a pleasing site for a cemetery—Staked
 Plain—seventy miles wide without a
 spear of grass or drop of water, and cov-
 ered by the mummy-like carcasses of all
 the creatures that ever perished upon it.
 Even the coyote and raven shun the
 fatal region. The writer's party passed
 over part of it with a vast drove of
 cattle, and when they came in sight of
 the Pecos River, the herd, maddened
 with thirst, rushed into the pools of
 crystal alkali, and drank until they fell
 dead in their tracks, or else plunged
 headlong into the dismal blood-red river
 and were swept down by hundreds in
 its swift and treacherous swirl. When
 we left the Pecos at least twelve hun-
 dred head from our drove alone lay dead
 upon its loathsome banks, or fed their
 festering flesh to its waves.—*Ex.*
