MINING, BUSINESS AND STOCKS.

FURTHER SLUMP IN THE STOCKS

Bear Contingent Makes a Haul of Booty This Morning.

BUSINESS WAS FAIRLY GOOD

Prices Realized, However, Were Lower Than on Yesterday—Few Exceptions to the Rule.

Compared with yesterday's closing quotations on the Salt Lake stock and mining exchange, there was a decided change to a loss in many of the stocks. For some reason Daly-West was more prominent upon the bargain counter and registered sales of 465 shares without bringing better than $25, nearly half of them going at $24.50. Yesterday's close showed figures of $25.50 bid and $26 wanted and this morning there was a slump of 90 cents on the one hand and an even dollar on the other. Lower Mammoth sold at 80 and 75 and closed at the latter figure asked for the stock this morning, while yesterday 88 was asked. Carisa, which secured a prominent array of sales, was bettered somewhat in the trading, but towards the end of business in that security it reverted back to a poor figure, the last trade showing a realization of 43 cents for each of 1,300 shares. The stock closed at 42⅝ bid and 43½ asked, with an inclination to reserve itself against further reductions. Uncle Sam Consolidated was the recipient of considerable attention, at very poor figures, the stock going at 52½ in the opening and being pushed down to as low as 50 cents in the course of the business. It closed at an average of 3 cents to the bad as compared with yesterday afternoon's closing prices and 6 cents under yesterday morning's quotations. May Day was in the market for business and sold seven thousand pieces at a little less than yesterday afternoon's final postings, but was successful in resisting the more damaging assaults. The realizations, however, were inferior to yesterday morning's close by quite respectable margins. Consolidated Mercur was one of the stocks that stiffened up and showed a gain of 1½ cents in the bidding. To the extent of 200 shares this stock was purchased at from $1.75 to $1.78. California kept Con. Mercur company on the rise and the sales made this morning secured returns in advance of yesterday afternoon's close and still better than yesterday morning's quotations. Yankee Con. was immovable in the quotations, and brought better figures in the trading, 100 shares reaching $2.12 each. Century was posted up for a loss of 5 cents, but sold 1,500 shares at 17 and 16½ cents.

On the whole lot the bear contingent got the best of the morning's work, the scars from the onslaught being visible in the subjoined array of quotations:

WASATCH COUNTY IS AN OIL FIELD.

Charleston Reports Location of Some Good Prospects.

FIELDS RAPIDLY SECURED.

An Arizona Company Takes Up Over Three Thousand Acres of Ground Near Charleston.

The people of Wasatch county were greatly surprised when they learned that a new financial star had appeared in the vicinity of Charleston. Old settlers have for years noticed oil on the top of the water in springs and sloughs in the valley and in holes along the foot hills. They believed that there might be valuable deposits of oil beneath the surface of the ground.

While at work the other day Wm. Allen's attention was drawn to this oil on the water. He secured some in a bottle and noticed that it had the peculiar odor of petroleum. Being a man of some experience in this business, he quietly prospected the whole surrounding country with most satisfactory results. His next step was to send for Mr. Robert Forester, oil and coal expert of the Rio Grande Western railway, who went to Charleston, and after viewing the country and seeing the oil, pronounced it a most favorable and encouraging prospect. This was a stimulus to continue prospecting and investigation, which culminated in Messrs. Holcomb and Gage, representatives of an Arizona company, inspecting the ground and locating some 3,000 acres for their company. These men are experts and say there are the best indications at Charleston they have seen in Utah, and think the oil is of a very high test, and judging from what is visible there is a great quantity here.

Another company has organized and located a large tract of land on the east side of Provo river, opposite the Arizona company, which is anxiously watching the movements of the latter company, which expects to sink a well during May.

When the location papers were recorded and the facts made public, many parties became quite enthusiastic and eager to get a piece of land.

As everyone knows, Heber valley is a basin with large coal deposits, on the north and east, extending to the reservation. Where the Arizona company intends to drive a well is the lowest part of the county, among the sand stone and slate rock which have the color and odor of petroleum and will burn freely.

STOCK BROKER SUED.

Asked to Make Business Showing on Account of Certain Deals.

Alexander Hamilton, by his attorney S. P. Armstrong, this morning filed a suit in the district court against A. T. Kerr, the stock broker, praying for an accounting of all business transactions between the parties.

The complaint alleges that on or about the 5th of August, 1901, defendant made an agreement with the plaintiff to buy from time to time at his request stock in the May Day Mining and Milling company and forward the money to plaintiff to enable him to hold and carry such stock, for which Hamilton agreed to pay a commission and 1 per cent per month for the use of the money. That, during the month of August and at various times Mr. Kerr purchased stocks in said May Day company for plaintiff aggregating 4,400 shares and also purchased for him 200 shares of Ajax, which he agreed to hold until instructed to sell by the plaintiff. But between the 24th and 26th of October, defendant sold said stock at a profit of not less than $3,535.-30 which he refused to turn over to Hamilton and has failed to render any account of the money in his hands by reason of said sale. Wherefore plaintiff prays that defendant be compelled to render an accounting and that he turn over the $3,535.30 which he cleared on the transaction.

RESUSCITATING EGYPT.

Operations May be Resumed in Ancient Mining Country.

In its last issue the Engineering and Mining Journal says that Egypt, which in all probability is the oldest mining country in the world, may take its place again as a producer of gold after an intermission of many centuries. Recent explorations in the desert section along the borders of the Red Sea have shown the existence of very ancient workings, and also the probability that some of these may be reopened with profit. Several English companies have been organized to exploit these mines, and their value will be thoroughly tested. It is not unlikely that before long some of the mines which supplied gold to the treasury of the Pharaohs may be shipping bullion to London.

IN PERU.

Description of a District Taken Up By American Company.

Secretary Neill of the United States legation at Lima, under date of November 25, 1901, reports the formation of an American syndicate, with headquarters in New York City, for the purchase and working of copper and other mines in Cerro de Pasco, Peru. He says that Cerro de Pasco is situated 14,300 feet above the sea level at a distance of about 220 miles from the port of Callao. The ores of this district contain gold, silver, lead, and copper. The amount of silver coined, smelted, and exported from Peru from 1750 to 1850, was 285,-613,796 ounces, of which 161,451,731 ounces were from Cerro de Pasco alone. The exportation of copper ores from Cerro de Pasco in the year 1900 was 11,-944.2 metric tons, besides 5,138 tons of copper bars.

May Elect Tonight.

On account of the fact that Mr. Bransford, a member of the newly-elected governing board of the mining exchange, is on the jury no election of officers for the exchange was had yesterday, but that duty may be discharged this evening if an attendance of the entire board shall be secured, which is required by the rules of the organization.

Petroleum Briquettes.

In a United States consular report of recent transmission is noted the formation of a company at St. Etienne, France, to manufacture briquettes from petroleum. They will cost more per ton than coal, but it is claimed that their calorific power is much greater and that they present many advantages where a comparatively light and compact fuel is required, as on shipboard. The company will also manufacture briquettes of a mixture of coal dust and petroleum.

How Can They Say It?

News comes from Niehart, Mont., that two prospectors, Dave Llewellyn and W. H. Harmon, who are leasing on the O'Brien mine, have struck what is believed to be a mine of pure silver. They have secured 13 tons of the ore, which is almost malleable. An average assay is eighteen thousand ounces, which gives a value to the ton of nearly $8,000 in the white metal.

Documents Filed.

Provo, Jna. 28.—The following mining documents have been filed with the county recorder.

United States patent in favor of Thos. C. Leetham et al. for the Last Chance and Ranger mining claims, situated in Tintic mining district.

Location notices of the Moonshine and the Last Luck mining claims, one mile east of Spring lake, in Eldorado mining district, by R. L. Henry et al.

Location notices of Grey Bird and Grey Bird Extension mining claims, near mouth of Crab creek in Eldorado mining district, by Varius Simmons et al.

MINING NOTES.

Two new strikes have been reported from the Carisa.

Boise's mining exchange is doing a creditable little business.

It is announced that work will soon be resumed on the Homestake at Tintic.

The California-Utah Oil company has encountered another oil bearing strata in its well at a depth of 580 feet.

Supt. Grant Snyder of the Dixie at St. George, left today for New Haven, Conn., to attend a stockholder's meeting of the company.

Mammoth Record—It is rumored that there will be a radical change in the management of the Mammoth mine from the superintendent to the shift bosses.

Charles M. Watson has made an examination of the Century mine and was to have reported to the board of directors this afternoon. It is expected that a vigorous and progressive policy will at once be instituted.

C. K. McCornick and Col. Posey will sail tomorrow from New York to Paris to complete the business of transferring to French capitalists the control of the Gold Roads group of gold mines, which is located near Kingman, Arizona.

Manager Charles Scheu of the Honerine mine at Stockton has gone to Chicago to consult Hon. P. L. Kimberley with reference to the purchase of mill machinery for the property. Some rapid development and improvement work has been done on the mine of late.

The New York-Utah Mining company, of which Alex. Hillstrom, now of Price, is the manager, has let a contract to put down a well on its big block of land on the east slope of Cedar mountain. Mr. Hillstrom received word from his Oswego, N. Y., associates, to this effect a few days ago.

Last night the Dewey Consolidated held its annual meeting and the old board, as follows, was re-elected: Sig Simon, president; P. W. Madsen, vice president; John Halvorsen, secretary-treasurer, and Richard P. Morris, manager. An assessment of ¼c. per share was levied on the capital stock of the company.

Arguments have begun at Nephi in the big mining suit of the Grand Central-Mammoth companies. The litigation involves damages in the sum of half a million dollars and apex rights in the ore bodies. The jury was charged yesterday and Col. Picket opened his argument for the Mammoth side.

Mrs. Agnes Ireland, widow of the late Marshal Ireland, is financially interested in several oil claims in the Sinbad valley, southeast of Castledale, together with Judge Bartch and other prominent Salt Lakers, and Ira Browning of Castledale. A company controlling 640 acres of oil land is soon to be incorporated.

A deal was consummated in Baker City, Oregon, on Friday last whereby ownership of the Oregon and Cracker quartz claims, near the North Pole mine, was transferred from George B. and M. J. Janny and Clark Taber to a Minneapolis syndicate represented by Martin Hawkinson of Minneapolis. The total purchase price was near $20,000.

Manager B. T. Lloyd reports the Copper Mountain and Copper Ranch properties in Beaver county to be in excellent condition. At the first named the shaft is now down over 275 feet, with the entire bottom in ore, much of which will run all of 30 per cent copper, with usual values in silver and gold, together with a heavy percentage of iron. The new vertical shaft on the west or "Jewel mound" end of the Copper Ranch has been put down 36 feet.

Emery County Progress (Castledale)—Mart Olsen this week received returns from a grass roots sample of ore from a lode claim south of Thompson's Springs, in Grande county, owned by himself and Messrs. Dickson, Jeffs and Duzett. The sample was from a 4-foot vein and assayed 6.7 per cent copper, 4.10 ounces of silver and 40 cents gold. As the local company, the Clara 2½ per cent copper ore. Mr. Olsen and [illegible] assays it can profitably handle [illegible] his partners are fairly well pleased with their prospect.

A depth of 500 feet has been attained in the new shaft on the south end of the Dead Pine, at Victor, Colo., under lease to Admiral Schley & Co., and drifts are well under way in both directions. Toward the south, which is down the hill, the drift is in 50 feet, and north about 30 feet. Assays obtained show the approach of pay values but one of the rock hoisted is being saved. In a southerly direction the locality of the Gold Coin chute is being neared, and in the opposite direction some of the main chutes opened up in the other end of the Dead Pine are likely to be encountered.

The Minnie Maud Oil and Mining company, of Price, Utah has filed its articles of incorporation with Secretary of State Hammond. The company is formed for the purpose of developing oil and mineral lands in Carbon county and the principal place of business is Price. The capital stock is valued at $100,000 and is divided into 200,000 shares of the par value of 50 cents. The officers and directors, who are all residents of Price, are as follows: A. J. Lee, president; J. T. Nichols, vice president; L. C. Shingleton, secretary and treasurer; and E. M. Peyton, Thomas Fitzgerald and W. H. Donaldson.

MARKET UNDE BULL'S CONTROL

Amalgamated Copper and Sugar Leading Features.

GENERAL DEMAND BROAD.

Advances in Many Stocks—Large Buying Orders Well Distributed Through Railroad List.

New York, Jan. 28.—The stock market started with some large buying orders well distributed through the railroad list. There were 7,000 shares of Amalgamated Copper taken at 74 to 74¾, compared with 73⅞ last night. Small traders took advantage of the higher opening to sell out and there were fractional declines. Sugar rose to 127. Its strength acted as a prop to the general market and was supplemented by some inquiry for minor stocks. Buying of Alamgamated lifted it above 75 and Anaconda was benefited sympathetically a point. Some of the other metal stocks were firmer, but there was little interest in the leading railroads and industrials, which held firm at slight additional advances.

Sugar was bought heavily just before noon and advanced to 127⅝.

Bonds were dull and firmer.

Prices continued to improve, active demand for the local tractions giving tone to the market.

The bulls had the market well in hand after 1 o'clock. Amalgamted Copper and Sugar were the leading features and sold more than 2 points above yesterday's close. The general demand was broad and caused advances of a point of more in many stocks including Atchison preferred.

The demand was active in the final hour and strength permeated the list generally. Among the stocks brought up to the higher level established by the earlier movement were Southern Pacific, Pennsylvania, People's Gas and Tennessee Coal, C. C. C. & St. L., which rose 2¾ and the preferred 2¼. Nashville, Chattanooga & St. Louis advanced four on a single sale. International Pump gained 3¼ and the preferred a point. The closing was strong.

Elgin, Ills. Jan. 27.—There was no offerings of butter today. Today the market was firm at 24½. The sales for the week were 602,100 pounds.

Attempt to Raid Oats.

Chicago, Jan. 28.—Another attempt, though a weak one, to raid oats, was made late in the session of the board of trade today. Nearly everybody had them for sale and there was a speedy drop of 2⅝ to 40. After May options were kicked around awhile there was a spurt back to 42, and the close was only easy, ¼c down at 41⅞@42.

United Mine Workers.

Indianapolis, Ind., Jan. 28.—The United Mine Workers closed their doors today against newspaper men so that discussion of the report of their scale committee could not be made public.

It was reported before the convention began that the convention had agreed to present a demand for a general advance for bituminous miners equivalent to 10 per cent on run of mine basis and a differential of seven cents a ton between pick and machine mining. The committee, it was understood, would demand a uniform scale of wages for outside employes at the mines, and an increase of fifteen cents a day for inside drivers. The miners of Indiana, Ohio and Illinois, it is said, demanded an open powder market. The anthracite miners were also expected to present their demands in the shape of a resolution through the scale committee.

Whosoever has suffered from piles knows how painful and troublesome they are. TABLER'S BUCKEYE PILE OINTMENT is guaranteed to cure piles. Price 50 cents in bottles. Tubes, 75 cents. Z. C. M. I.

Burlington Route

BURN THESE FACTS INTO YOUR BRAIN.

The direct line from Denver to the East is the Burlington Route.

It is 30 miles shorter than any other line.

The running time of its fastest train, Denver to Chicago, is 27½ hours. No other train makes faster time. No other train is so uniformly "on the dot."

Burn these facts into your brain. Some day they will be useful to you.

Burlington trains leave Denver 4 p. m. and at 10 p. m. for Omaha and Chicago; at 3 p. m. and 10 p. m. for Kansas City and St. Louis.
