his duty is so unmistakably plain that he who runs may read. It is first and foremost our duty, and we take this occasion to state it and press it upon your consideration and through the authorities and through of Pennsylvania, to insist upon it that existing conditions of anarchy and wlesnsess of riot and rapine, a condithe which has been raging with more of less violence thoughout the anthra regions during the past months, be immediately and perma-neally suppressed. To this end we ask that the entire authority and power of state of Pennsylvania, civil and military, and if needs be that of the filted States government as well, be exercised forthwith.

"The Mine Workers' association is not within the rules regarding ordin-ary local labor organizations. On the contrary, the association and all of its members constitute a combination or conspiracy not only at common law, but also in restraint of trade and commerce among the several states, and also an attempt to monopolize the labor necessary in supply coal found in one state to the markets of other states, and this to monopolize this part of the commerce among the several states. This action had by said United Mine Workers has greatly injured the state business originating in the anthracite

coal fields. The courts have already many times held that such a combination is unlaw ful within the act of Congress of July 2, 1890, passed for the purpose of preventing restraints of interstate commerce and known as the 'Sherman act In addition, the circuit court of the United States for the Western district of Virginia, upon March 25, last held that this identical United Mine Workers' association was illegal. The case comes clearly within the Debs case. That was an effort to organize a universal association of railway employes covering the whole country for the purpose of controlling interstate merce. The government instituted suit by injunction and when the injunction was disobeyed enforced the same by the use of the United States army. This quickly disposed of the matter, and the action of the national government is therefore to proceed in accordance with precedent in the Debs case. These con siderations were called to the attention of the president and attorney-general last June. The anthracite coal companies are

making every effort to mine coal as rapidly as possible. They are obstruct-ed by the failure of the state authorities to fully protect those whose desire to work for them and by the failure of the national government to enforce the statute under which the Mine Workers' association has been already ald to be illegal.

IRRIGATION CONGRESS.

An Address by Hon. F. S. Richards

Brought the Session to an End.

The third annual session of the Irrl-

gation Congress of Utah came to a

close yesterday afternoon. After the

"News" report closed Atty, F. S. Rich-

ards delivered an address on the legal

phases of reservoir propositions under

the new irrigation law, expressing the

opinion that the law would do much for the reclamation of arid lands but that it

would benefit but very little the private

land owner. He also stated that those

desiring benefits would have to appoint

some of their number to act as guar-

antors to the government. He con-gratulated the congress on what it

gratulated the congress on what it had done through its special com-mittee, and thought that the scheme proposed would be of great benefit to the state. The congress then adjourned for one year unless called to-gether sconer by the president.
