Kansas City, May 77.-Clarence Meyer, aged 22. a printer, was terribly slashed and killed in his home in the southern part of the city last night. According to Mrs. Meyer, who reported the matter to the police today, two negroes entered the house at 2 o'clock in the morning. While one held the woman to prevent her kiv' ig alarm, the other struggled with Meyer, rlashing him wil, a razor on the head, throat and body. Mrs. Meyer became un-conscious and did not recover until many hours later, when she found her husband dead. The house had been ransacked. The police have found no trace of the negroes.

COTTON MANUFACTURERS.

Meet in Convention and Discuss Serious Condition of Trade.

Serious Condition of Trade. Washington, May II.-The American Cotton Manufacturers' association con-vened here today in annual session with about 20 members present. The program of today's session included addresses by C. W. Heath of Monroe, N. C., president of the association; Secy. Cortelyou, of the department of commerce; Prof. R. C. Car-penter of Ithaca. N Y., and others. President Heath said that the most serious condition now confronted the cot-ton manufacturers is the high price of raw cotton coupled with the small re-turns for the manufactured product. The scarcity of farm laborers in the south, due to the migration of the negroes to the cities, is one of The serious conditions to be met. To meet it the immigration of Italian and other foreign farm laborers will have to be encouraged. The power of labor organizations, he said, was being put at the present time to Cangerous uses. It was menacing individual rights; it was even asking the government to fix the hours of labor. These developments, he continued, threatened the very princi-ples of the government. ples of the government.

Rising Temperature Will Do Much to Induce Growth.

According to the weekly crop bulletin issued by the Utah section, U. S. department of agriculture, for the week ending May 9, cold, cloudy and windy weather with light to heavy general rains prevalled during the greater por-tion of the week. Toward the close, however, conditions became more settled and the week ended with clear skies and gradually rising temperature. Considerable frost was observed on the 7th and 8th, but the resulting damage is thought to be slight. These varying phases of the weather were generally favorable, the precipitation soaking the favorable, the precipitation soaking the ground thoroughly and the ensuing warm sunshine inducing rapid growth of vegetation. Fall wheat was in good condition and early sown spring wheat was coming up. The seeding of the last named crop was nearing comple-tion. Early planted sugar beets were coming up, the weather being particu-larly favorable for their rapid germin-ation. Alfalfa was generally in good

THE POSTAL IS COMING.

But Visiting Officials Are Conservative In Their Statements.

Indications are that the Postal Telegraph and Cable company will be operating its wires in Salt Lake in the near future. The announcement was made this morning that providing the present visit of the officials here terminated as expected work on the stringing of wires into Salt Lake from Denver would be commenced at once. Two prominent officials of the Postal company are in the city today. Vice President Baker of New York and Gen-eral Superintendent Nally of Chicago, to remain for a day or two. They are being entertained at the Alta chub where they were seen this afternoon, by a "News" representative. The of-ficials were very conservative in their statements, and Mr. Baker said, all they had to say was that they wer here to look over the ground with a view to extending in the near future the lines of the Postal to Salt Lake City; and that the matter would be definitely determined upon in the course of the next four or five weeks. That was all that could be said for th present. Messrs. Baker and Nally will

GAMEWELL FIRE ALARM.

Tests Being Made in This City With a View of Permanent Installation.

F. M. Clements, Chicago representative of the Gamewell Fire Alarm Telegraph company of New York, is in the city, and has on exhibition at the office of Fire Chief Bywater, two of the latest improved non-interfering fire alarm tele-

proved non-interfering fire alarm tele-graph signal boxes, which he hopes to have installed in the local department. These boxes are far and away ahead of any that are now in use here, and have points of superiority that can be instantly recognized as being of great value to the invent, and to the public. The mechanism of these boxes is such that if an alarm is turned in from ono box, and another alarm is turned in from a different hox immeditely afterward, the first box sends in one alarm, and then "steps out of the way" for the second alarm to be sounded, when it resumes its course, and sounds in a repetition of its

niarm to be sounded, when it resumes its course and sounded, when it resumes its course and sounds in a repetition of its own alarm. It is likely tha this system will be in-stalled in both the Salt Lake Theater and in the Grand theater, where their use would be most important in case of fire. The gravity system of furnishing the electrical energy for the present fire alarm telegraph system is in use here now, and it could about 52.0 per year for its maintenance. It is believed that this system will be replaced by the storage battery system, which Mr. Cloments is also trying to introduce, and which will cost not to exceed the per year for main-tenance.
