town the country. Reports from parties interested in the fron county deposits indicate that capital-lists in New York have become interested, the more so because of the favorable re-parts given them from assays on the specimens of ore shioped east some time ago. It is stated that either furnacing and manufacturing will be started in iron county in a small way with hope of greater things by and by, or that the one will be shipped bodly to castern fur-naces. That the D. & R. G. is to surely extend through fron county is accepted as something to be realized in the near future, and this is proving an incentive to investment by eastern parties. There is a growing demand in this part of the country for structural steel and fron, as well as for the metal to be used in other classes of service, and the excessive cost of freights on heavy iron machinery and busing the development. The day preceding All Fool's day, 'tis said, Ben Harries and his brother Ollie, they of Sugar House, arrayed themselves one against the other. Ben, it is said, is building a house, and Ollie, it is also said, expects to occurpy said house. Well, on the aforesaid day, or night rather, for it was getting dusk. Ollie, it is further said, said some harsh things about a certain water pipe and in defense of said water pipe Ben, it is whispered, gave his brother Ollie a stiff joit in the neck, prostrating him to the very ground. The sun going down upon his wrath Ollie, it is alleged, proceeded thenceforth to his own domi-cile and, extracting a shoigun therefrom of the double barreled persuasion, es-sayed, it is said, to fill his brother ful of holes. Once, twice did he shoot but his marksmanship being not of the Wil-itam Tell order, failed to tell, and Ben, lucky fellow that he is, emerged from the skirmish practicall unseathed. Thus, it is said, the quarrel ended.

Danger of Coids and Grip.

The greatest danger from colds and grip is their resulting in pneumonia. If reasonable care is used, however, and Chamberlain's Cough Remedy taken, all danger will be avoided. Among the tens of thousands who have used this remedy for these diseases we have yet to learn of a single case having resulted in pneumonia, which shows conclusively that it is a certain preventive of that dangerous disease. It will cure a cold or an attack of the grip in less time than any other treatment. It is pleasant and safe to take. For sale by all druggists.

tures and were listened to with wrapt attention. A roll of the old publis was showing many of our heads of families now among those who first enrolled when the academy was accommodated in one room-and taught

by two instructors. Prof. Emil Maeser, the president of the school, made public announcement of his purpose to leave us and while it was painful to leave so many dear ones, and the old academy, he felt as a young man his duty to himself to take advantage of opportunities held out and ad-vance himself. He will leave for Salt Lake in about six weeks to prepare to teach in the Church schools of that city. Brother Maeser has been a factor for good with us, his untiring efforts for five years has succeeded in making this splendid institution of learning second to none in Arizona and only in size inferior to any in the Church. He has ingratiated himself into the hearts of our people and he takes with him when he shall leave, our love and kindest wishes. The acting president, Elder John Nash, was introduced and the faculty for the coming school year made

known. The afternoon was one of pleasure to all, out door games and contests were indulged in. A party in the evening closed the day's jubilations.

HISTORY OF THE L. D. S. ACADEMY

The academy began in 1890 under the name of the St. Joseph Stake academy, Prof. Joy Dunyon was principal, as-sisted by Mrs. Josie Cluff. The first half of the semester was taught in Central. It was then taken to Tnatch er and the semester finished in the dis-trict schoolhouse, a one roomed adobe pullding partitioned off by curtaina. There was also a branch established at Pima called the seminary, of which George McDonald was principal. According to the advantages the in-structors and students were in possession of at the beginning of a school of this kind, the results at the end of the first year were most satisfactory and encouraging.

By the next year a new brick house had been built at Thatcher on the corner of Layton avenue and First West street for the accommodation of a large nercase of students, with a study room upstairs and two recitation rooms heas principal. The number of students increased to that extent that it was necessary to enlarge the building capac-ity. This was accordingly done, a new addition of two story brick was added to the north of the main building.

The school flourished until 1896 it was found to be impossible to run it longer, and the St. Joseph Stake academy ceased to exist.

During the two years which followed the people began to realize the necessity of such a school. In 1898 the Lat-terday Saints academy began with Prof. Emil Maeser, a normal graduate of th B. Y. academy at Provo, as principal isted by Mrs. Lillian Maes Prof.

John Nash and Mrs. Mamie McRae. The school was organized into the normal, commercial and high school departments. Owing to the number of students it was found necessary to enlarge the building. Another two story addition was built on the north end of the building. On March 18, 1898, the academy was dedicated by Dr. Karl G. Maeser. In 1899 the school had so increased that more instructors were needed. In addition to those who Beeded. In Provide year. Prof. J. K. Burnham, Prof. W.m. Moore Claydon, Prof. McRae, Miss Lillle Curtis and Miss Snyder were added to the faculty. The first graduating class was from he commercial department. There were six in the class. In 1900 Miss Mac Curtis, Prof. Arthur T. Dalley and Prof.

Ashton Crosby were numbered among the faculty. This year there were 17 graduates, four from the normals, eight from the kindergarten and five from the commercial. In 1901 the commercials proudly took

possession of their new building on the corner of Layton Ave. and Center street. In 1902 there were seven gradu-ates from the normal department. Dur. ates from the normal department. Dur-ing this year a preparatory department was organized for the benefit of those not far enough advanced to join the form at any price.
