and gave much satisfaction to the re-ceiver, but I found that I had treated diffusely of many things that ordinari-ty I would not deem worth mention ing. If a man were desirous of writing per and plenty of pens, and have a this position he filled to the end of his life. He some and a charming man, condense your subject don't take cocaine in large dozes. No doubt a moderate quantity taken in wine will stimulate the imagination and enable one to write more brilliantly and with less effort than he otherwise could. Eugene Sue never wrote without a bottle of champagne at his elbow, and the luxuriance of his imagination displayed

in the "Wandering Jew" may be at-tributed in part to the effects of the COCAINE'S REVINING INFLUENCE.

"The difference between cocaine and alchohol as stimulants is, that alcohol has a tendency to lower the mental and moral tone and brutalize the nature, while cocaine has a refining, softening effect. Under the influence of moderate doses I became rather sentimental and said nice things to everybody. The world was going very well and I had a favorable opinion of my fellow men and women. There was not a bit of pugnacity about me and I didn't want to night, argue or dispute with any one.

"The next time I increased the dose to three grains, which unlimbered my longue in the most astenishing way. I wanted to talk, and I did talk, not in the eratorical manner, but was just purely loquacious. When nobody was present I talked to myself. There was

the subject I was treating in the book. The stuff read as a whole very much like a dream. It was a mass of ragged, disconnected ideas and notions set down in a disorderly fashion and conaining matter that did not belong to an introduction. But in spite of the campant disorder of ideas, I had no callucinations such as are produced by casheesh, no grotesque delusions or insare imaginings. The mental machinery was running with the governor belt thrown off, and the brain raced, so to speak Eight grains, three nights ater, produced similar effects, but I ild not write and the sensations became rather painful than agreeable.

vivid remembrance of a most preposvivid remembrance of of eighteen grains of cocaine is irrecoverably lost to the world. But I have
vivid remembrance of a most preposterous headache that iasted two Gays
and refused to succumb to cold baths.
I cured it with strong coffee. Then I stopped the experiments. I acquired
no habit and had no difficulty in quitting the use of cocaine. Experiments
upon others and observation of the resuits of administering cocaire in cumuiative doses for three months in cases
requiring such treatment have satisfied
me that there is no cocaine habit. When
used to cure the opium habits by persons ignorant of the proper way of
using it, cocaine has produced bad effects but an opium ester has a habit of
having a habit and no will power, and
if he were to take sawdust as a substitute for opium he would acquire a
sawdust habit. Take the opium or
morphine habit away from the patient
and administer cocaine properly and
you will cure the opium habit without
introducing a cocaine habit.

"One singular effect of cocaine is
that it will induce people to speak who
are afflicted with silent melancholia. A
woman who had not spoken for nine
months began to talk within four minutes after I had injected four grains,
and in ten minutes she talked at a rate
that made up for lost time and nothing
could stop her. Whether this preperty
of cocaine is beneficial and desirable
depends perhaps upon circumstances."

used coca wines, fluid extracts, and other forms of the drug, but had discarded the fluid extracts occause they were badly borne by the stomach, and the wines because they contained tannin and extractive matters, and differed so much in their effects. He found that two grains of hydrochloride of cocaine to the pint of pure wine was the proper preparation, and produced all the beneficial effects and none of the deleterious results. Then he began a series of experiments with hypodermic injections of the hydrochloride, to ascertain whether the stories about the cocaine that two grains of the hydrochloride, to ascertain whether the stories about the cocaine that two grains of the hydrochloride, to ascertain whether the stories about the cocaine that two grains of the hydrochloride, to ascertain whether the stories about the cocaine that twere true or false.

Wrotes o much that once was popular, would be almost forgotten now but for "Tom Bowling." Such a liet might be greatly prolenged. Lady Ann Lindsay's "Auld Robin Gray," William Spencer's "Auld Robin Gray," William Spencer's "How Happy could I be With Either" might all be cited, and many more; but enough has been said to show how little even the best critics can judge of one a poet's powers by a single specimen, and how much the accident, if it can so be termed, of one happy line or one good melody may have to do with the fame of a writer who would otherwise be unknown. These remarks apply with greater forces.

A sharp-turned paragraph in a paper I have just laid down says something mean about old maids. Why guy the same rather painful than agreeable.

NO COCAINE HABIT.

The next night I determined to make a more severe test, and so injected eighteen grains within twenty minutes. The results were stunning. I became in well up in years.
