### MINING, BUSINESS AND STOCKS

### LIGHT BUSINESS ON THE EXCHANGE

Not a Share of Nevada Stocks Transferred During the Regular Forenoon Call.

LITTLE BELL SELLS WAY UP.

Open Board Deals-One Lot of Ontarlo Goes at \$2.50-The Closing Quotations.

The damp chilly weather of today must have had a depressing effect on the brokers operating on the floor of the Salt Lake Stock & Mining exchange, for when the regular forenoon call opened there "wasn't a corporal's guard" present. The Nevada stocks are called first and Caller Goodwin went clear through the list without reporting a single sale. The only Utahs brought out were Little Bell, at \$12.50 May Day at 221/2; Beck Tunnel at \$1.071/2, and New York at 24. Daly Judge did not appear to be in demand, for it was offered at \$12, with no takers. For Daly West, \$16.25 was bid, but the lowest offering was at \$16.62½.

On the open board a 100-share lot of Ontario came out at \$2.50. Uncle Sam, Com, stiffened slightly, as did Wabash, also.

also.

RAILROAD TO SILVER PEAK. Report That One is to be Built in the Near Future.

### Today's Metal Quotations. 3 ACTIVITY OF

Local settling prices are reported by the American Smelting and Re-fining company: SILVER, COPPER, (Casting) . 181/4 COPPER, (Electro)

NEW YORK QOUTATIONS. COPPER, Firm, - 18%@19

COPPER, Firm. . \$5.75@\$5.95 

ager of that mine at a salary of \$10,-000 a year, says the Tonopah Sun. Mr. Freeburn wired his acceptance of the offer and will leave tomorrow morning for Pittsburg to have a conference with the new owners relative to the plans of future operations and the equipment of the property with

the necessary machinery.
R. J. Watson, who is one of the local men who has an interest in the Blair property, reports the receipt of a communication at the Tonopah of-fice to the effect that it has been decided to start work on the railroad at once, and as soon as the material necdessary for the work is estimated, or-ders will be placed and work start as soon as it is received. The new road will connect with the line of the Tonopah and Goldfield railroad at Coaldale and engineers will be put in the field withing few days in survey the field within a few days to survey the line of the road. It is hoped to have this survey far enough advanced to start grading within the next thirty

Although no positive figures can be obtained until the survey is completed, it has been roughly estimated that the road can be built and that the road can be built and equipped at a cost not to exceed \$15, 000 to the mile. The new road will pass close to the other large mines in the Silver Peak district and greatly facilitate the handling of their ores and supplies, and that at a much lower cost than they are now paying.

#### LOWER MAMMOTH ASSESSED.

Shareholders Called on for Five Cents A Share.

At the meeting of Lower Mammeth directors yesterday afternoon it was decided to levy an assessment of five ents a share on the capital stock of cents a snare on the capital stock of that corporation, consequently, share-holders will have to go down in their pockets and "dig up" \$7,500, which will be applied in the further development of the lower levels.

It is stated that about two-thirds of the stock is in the hands of the offi-cers of the company, therefore the as-sessment will fall heaviest on them.

#### BOOMING NEVADA

Malcolm MacDonald and Others Sound Praises of Mining State.

New York, May 15 .- A mining camp attired in the clothes of conventional civilization had a session last night in the East Myrtle room of the Waldorf-Astoria, and in eloquence and vaudeville rang the praises of Nevada, Nearly every man present was a rive of a state beyond the Rockies, Malcolm L. MacDonald, who w

Malcolm L. MacDonald, who was born seven miles from Comstock, said he was glad of it, and that the world had but a feeble conception of the ssibilities of southern Nevada. He said he would not hesitate to de-

clare that within the next ten years Nevada would produce at least 25 per cent of the metal values of the country. San Francisco, he said, would be rebuilt in greater glory than any other western city within the next ten years, and in that period Nevada would have produced enough mineral wealth to pay

for it.
C. D. Wrenn, secretary to C. M. Schwab, who owns much Nevada min-ing property, said that Mr. Schwab on his last visit to Nevada had been skeptical as to her development when he entered the state. He went away an enthusiastic boomer. Mr. Wrenn de-clared that more money would be taken out of Nevada in the next few years than from any state in the Union, Her soil had merely been scratched.

Mr. Pittman said that the object of the gathering was to pursuade New York to act as an "office" for Nevada without the interference of middlemen, particularly San Francisco brokers, Then the red curtains of the vandeville hall adjoining the dining room parted, and the prospectors, mining ex-perts and their friends thronged in.

### MINES AT CACTUS PEAK.

Late Developments in Utahna Property Are Encouraging.

Frank Jardine, manager of the Frank Jaidhe, Utahna-Goldfield company's proper-ties at Cactus peak, about 24 miles east of Goldfield, and in which a number of Lakers are interested, has arrived in the latter place with ore to be as-sayed and which gives promising valies, says the Sun of that place,

This company owns five ciaims, well known as being the Lida group, and the formation on these is certainly a very interesting study. Mr. Jardine started work alongside of a jutting quartz ledge which can be traced for miles, because there was a soft deposit like manganese or for iron phesed. miles, because there was a soft deposit like manganese or fog iron, placed there no doubt by the action of a thermal spring. This deposit, or seeming deposit, contains round boulders or accretions, from the size of one's fist to the size of the average human head. At a depth of 10 feet all this merged into the ledge upon which work will be continued to an indifinite depth. Assays have been obtained all along this depth with increasing values every foot.

There is a suspicion on the part of Mr. Jardine that owing to the surface material being of an aqueous for-mation the values have been carried

down and he proposes to go after them. He thinks it strange that the ledge should be so hard and quartzy on the surface, and yet so soft but tough at a depth of 10 feet, but the drilling at this depth is easy.

For the past few months a few men have been kept at work on this proper-ty doing superficial work in the way of

Take it all in all, Mr. Jardine thinks Take it all in all, Mr. Jardine thinks
the entire district of Cactus peak is
one of the most interesting in the state
from a geological and mineralogical
point of view, and so far as his own
property is concerned he likens it in its
formation and other peculiarities to the
famous Bassick mine of Colorado
which also had these boulders some of
which carried remarkably high values.
Much work, he says, is being done Much work, he says, is being done all over the district, but still at the present time it has not the prestige

or glamor of some other camps.

A gentleman in from the Cactus yesterday says that a strike of high grade ore was made on the Campbell claims, which lie between the McMahon James L. Freeburn, who made the preliminary report on the Blair mine, which was sold last week, has received a telegram from Senator Flinn offering him the position of resident man-

# **NEVADA'S CAMPS**

Developments at Fairview Have Assured the Permanency of That New District.

CHARACTER OF FORMATION.

Striking Resemblance to That of Tonopah-Milling Plant for East Manhattan.

Special Correspondence, Goldfield, Nev., May 12.-Not since

the first gold discoveries in southern Nevada has the outlook for the many camps which have mushroom-like, sprang into existence in almost a night, been so bright as it is today. From many sections of this already famous gold producing country come reports of improved showings, greater ore bodies, and phenomenal strikes. A dominant and phenomenal strikes. A dominant fact, indicative of conditions, in the fiscal affairs of southern Nevada has been the strength exhibited by Al se-curities since the earthquake in San Francisco. Many of the industrial and railroad stocks of the east slumped as a result of this disaster, but through it all Nevada stocks remained compar-atively strong. In fact, when the ex-change opened up about a week ago for the first time since the San Francisco disaster, the market was firm and stea-dy. This fact speaks volumes for the stability of character of the holdings which the Nevada securities represent. From Fairview, the latest theater of mining operations, come reports of re-markable strikes made in several sec-tions of the camp and the development of a mine less than six weeks old, which is destined to become the greatest producer in the state. The Nevada Hills property, in which W. H. Clark, W. V. Rice and other Salt Lake people are in-terested, the stock of which is selling for \$2 per share in New York, has, in-credible as this statement may seem, mined during the past 10 days \$200,000

On the Fairview Keystone property, controlled by Patrick, Elliott & Camp of this city, the same ledge from which the tremendous product on the Nevada Hills property was taken has been dis-Hins property was taken has been dis-closing some very high assay values from the prospecting work done on it. As this great deposit of ore has been opened on two sides of the Fairview Keystone the proving of the ore deposit simply enlarges its extent and increases to a manifold degree the producing capacity of the camp. The Fairview Keystone Mining company has for its president Mr. L. L. Patrick, who pronoted the Combination mine of Goldfield. Sol Camp, vice president of the company, returned yesterday from Fairview, and gives the most glowing account not only of the immediate property in which he is interested, but

The character of the formation at Fairview is absolutely a true fissure, and the geological arrangement of affice alonely passembles that existing at fairs closely resembles that existing at Tonopali. The ores are almost identi-cal with the products of the older

southern Nevada camp. At Manhattan there is renewed activ-ity on every hand. The great Consolidated ledge, which has made the camp famous, is being proven to a greater depth each week, and not only are its uniform v. lues maintained, but the de-posit is broadening out with depth. On the Manhattan Mispah the ledge has been proven at a number of points, establishing its continuity for more than 600 feet across the Mizpah company's ground. Three of the leasers are sacking shipping ore, rock which runs in excess of \$100 to the ton. On the Manhattan Buffalo excellent progress is being made with the double compartment shaft, the first one to be started in the camp. The entire working is in milling grade ore, and for some time past high grade shipping rock has been sacked on this ground. The Combination is making an im-roved showing every day, and a mill is

soon to be built to treat—the milling grade ores on both the Buffalo and this property.

#### ZINC AT GOOD SPRINGS. Many Teams Engaged in Hauling Ore

To Railroad.

Two of the most extensive sharehold. ers in the Good Springs Zinc mining & Smelting company—H. L. Coffin and Allen McDonnell, are in the city today, having just retrued from a trip to Good Springs, where they fond conditions in a very satisfactory shape. The zinc company has a large force of men at work getting out regular shipments, which find a market with the Empire Zinc company of Denver.

Mr. Coffin stated soon after reaching the city today that the management has 74 horses engaged in the movement of ore from the mine to the railroad, and probably more will be put on a little The company owns the Potosi

Messrs. Coffin and McDowell are residents of Duluth, and will leave during the afternoon for home.

### CONCENTRATES.

L. A. Jeff departed for Nevada today

W. J. Craig is expected back from Nevada about the first of next week. M. J. O'Meara expects to pull out for Nevada again on an early train. The Grand Gulch mine of Arizona has a car of ore on the local market. The City Rocks Mining company ill soon install electric drills at its

Samuel Newhouse departed for Ne-ada this afternoon with his destination unannounced.

Developments at the Cumberland Ely property at Ely have developed the presence of sulphide ores.

The first shipment of concentrate from the new Godiya mill in the Tinle district has reached the local mar-

H. Cannon, the well known Therry Creek operator, expects to eave for camp again this evening or

The directors of the East Ledge Min-ing company, operating at Park City, have levied an assessment of one-half cent a share. Col. E. A. Wall yesterday placed

an order for an eight-drill compressor and a 100-horse power marine boller, for use at the Starless mine. Manager C. P. Snyder of the Western Ore Purchasing company with a system of sampling mills in western and southern Nevada, is in the city

business trip. He states that the company h: 1 350 men on its pay rolls at the

Edward McCarrick who was one of the Sait Lakers who secured a foothold in the Fairview, Nevada, district, expects to leave for that prosperous camp again in a few days.

The management of the Utah mine at Fish Springs drew down the proneeds from another car of ore today on controls showing 44 per cent lead and 124 ounces in silver.

The ore and bullion settlements reported late yesterday att noon by McCornick & Company were: Crude ore and concentrate, \$23,500; base bullion, \$27,900; gold bullion, \$8,400. The railroad spur to the site of the new Ogden smeller from the tracks of the Oregon Short Line have been com-pleted and the management has in-

structed the manufacturers of equip-ment to make deliveries forthwith. Auguste Mathez, who went to the Big Indian mine in the La Sai mining district for the purpose of examination in behalf of Samuel Newhouse, has returned and the samples obtained are in the hands of the assayer.

Superintendent Day of the Yampa Smelting company reported yesterday afternoon that the five MacDougall roasters recently installed at the Bingham smelter of that corporation are in commission and that their behavior is

quate satisfactory. A letter from W. L. Harwood, who has charge of the development of a promising group of claims in the Crescent, Nevada district, for W. J. Craig and Alex Colbath, reports that the shaft is down 25 feet and is showng very satisfactory results so far.

Manager D. P. Rohlfing of the Frisco Contact and Lulu mines in Beaver county, is preparing to make a European trip. He expects to leave for New York next Saturday and will sail on an early steamer leaving that port. Mr. Rorlfing will be absent about three months. Frank Arrigoni filed suit in the dis-

trict court today against the United Consolidated Mining company to re-cover damages in the sum of \$2,000 for injuries received in the company mine on Feb. 2, 1986, and for the negligence of the company in failing to provide him with a competent physician to treat his injuries. A number of the practical mining and business men of Butte, Mont., one of which is Lee Mantle, formerly Unit-ed States senator from Montana, have

purchased a group of claims in Gold-field district from the Bulls and Bears company and have organized the Nor-cross Mining company with a capital-ization of 1,000,000 shares, par value \$1 per ghare.-Goldfield Sun

N. J. Catrow, the largest shareholder in the Ohio Copper company, departed for his Ohio home this afternoon, after conferring with lecal offi-cials of that corporation and deciding on a plan of future development. The new shaft, which is to be let down to a depth of 1,000 feet, to explore the All's Well vein, will have three compartments. Articles of incorporation of the Was

atch Copper Mising company of Og-den, Utah, have been filed with the secretary of state. The company is inorporated for fifty years to conduct general mining business. The capital stock is \$600,000, divided into 600,000 shares, of the par value of \$1 each. The company owns a group of sever The company owns a group of seven claims near Brigham City, Utah, The officers are D. S. Tracy, president; L. Skeen, Jr., vice president; Leo Harris, secretary and treasurer. The officers and P. P. Taylor, Caleb Parry, W. D. Pyper and Alex Taylor constitute the heard of directors. board of directors.

### GAINS THE RULE AT THE OPENING.

During First Hour Market Was Strong But Weak in the Second.

MUCH STOCK THROWN OUT.

Was Greater Than Demand And Prices Yielded Sharply.

New York, May 15 .- A number of the speculative market leaders opened at unchanged prices from last night, Otherwise fractional gains were the rule with the opper group conspicuous. Smelting rose nearly a point, and Amalgamated Copper %. Northern Pacific gained % and Minneapolis, St. Paul and Sault Ste Marie

Business was rather light throughout the first hour, but there was an increasing show of strength which as of late was most beneficial to the specialties Union Pacific and Reading were dealt in heavily at advances but St. Paul met stock on the rise. Smelting rose 2½ and the Railroad Equipment stocks Amalgamated Copper, Lead, Colorado Fuel, Brooklyn Transit, Reading, Union Pacific, Great Northern preferred, Norfolk & Western, Denver & Rio Grande and Rock Island preferred 1 to 1½. Northwestern ran off 2%.

Island preferred 1 to 1½. Northwestern ran off 2¾.

The market turned weak in the second hour, Prices fell to below last night, the Northwestern grangers leading the deciline. Northern Pactific lost 3, 8t. Paul 2. Great Northehrn preferred 1½ and there were declines in Federal Mining of 4½, Anaconda 4, Distillers' Securities 2¾, Tennessee Coal 2 and International Pump 1¼. Wabash preferred rose 1 and American Express 10. There were small railles before noon.

Bonds were irregular.

Considerable stock was thrown on the market for which there was no sustaining demand, and prices yielded sharply. Most of the well known stocks sold a point or more below yesterday's closing. Liquidation was evident in some of the transcontinental stocks. Chief declines up to 1 o'clock were Anaconda 10, Great Northern preferred & Northern Pacific 48, Northwestern 4, Pacific Coast 3, St. Paul 25, Pullman 2 and Union Pacific, Southern Pacific, Reading, Pennsylvania, New York Central, Louisville & Nashville, Mexican Central, Amalgamated Copper, Colorado Fuel, Lead, Sugar and Brooklyn Transit 1 to 1½.
