

## MINING, BUSINESS AND STOCKS

NEVADA STOCKS  
ON THE EXCHANGE

Much Interest Was Manifested in Them During the Forenoon Calls Today.

BROKERS ARE VERY PLEASED

With the Showing Made With Them—May Day Continues Weak—Closing Quotations.

The big attraction of the day on the mining exchange was the calling of the Tonopah, Goldfield, Bullfrog and Manhattan stocks for the first time. Considering that this was the first day, and that the local holdouts in these stocks are not extensive, brokers expressed themselves as being well satisfied with the results of the first session.

The demand for the Nevada local interest is being aroused in the new stocks now listed.

Of the Utah stocks called, May Day and Lower Mammoth were the most active. The former opened weak, and remained so throughout the call. It was stated by a well known broker that much of the stock offered has been marginated and holders are attempting to realize as much as they can, even though it is at a loss in many instances. Columbus Consolidated was disposed of at 47 on the open board, while Thompson found takers at 30 and 30 1/2.

The closing quotations and sales were:

## BUYS MORE GROUND.

Bingham Central Increases Holdings in Camp of Copper.

Since his arrival in the city, C. L. Dignowity, the well known mining engineer and promoter who now makes his headquarters in Boston, closed up a deal for the sale of the Protection and Bonanza lode mining claims, located in the upper part of Bingham. The property was purchased by the Bingham Central Mining Company. The deal was made on a cash basis and the formal transfer of ownership was made today when the purchase price was deposited to the credit of the vendors in a local bank.

Associated with Mr. Dignowity in the ownership of the ground was Mrs. Nina Ellison and son, the latter drawing down as much as \$25,000 for their interest.

Mr. Dignowity expects to get away for Nevada tomorrow and will look into the merits of some gold propositions that have been brought to his attention.

## BUY INTO NEVADA.

Loganites Organize Company and Finance It Without Difficulty.

Special Correspondence.

Logan, Utah, May 4.—A number of local people have taken an interest in a number of mining claims located at Tonopah, Nevada. An option has been obtained on a property by Alfred Hansen, who proposed to organize a company and float the stock in California but was induced to take in local parties. Four thousand dollars, the amount necessary to show the deal, was paid over yesterday and nearly all of the stock has been subscribed. The company will be incorporated for \$1,000,000, and development work will begin at once.

Two mining experts were here last week looking over the Blue Bell property and were very favorably impressed with it. They also took a look through the local stock market and expressed their surprise at the evidence of a large ore body to be seen there.

H. C. Hansen of the Amazon is back from California and will begin work on that property in the near future.

## FOR A GREATER EXCHANGE.

On Account of Listing of Nevada Stocks Calls Will Begin Earlier.

The members of the Salt Lake Stock & Mining exchange are showing a disposition to get down to business in a manner which indicates that they are going to succeed in making this city the great mining stock market of the west.

At the meeting held yesterday afternoon, which was presided over by President James A. Pollock, perfect harmony prevailed and each one seemed to have the feeling that now is the time for all to pull together and boost for a greater exchange.

The listing of the Nevada stocks will make the call much longer than heretofore and in order to get started in good shape, it was decided to begin the regular forenoon call at 9:30 a. m. instead of 10, and the afternoon regular call at 1:30, instead of 2 o'clock as heretofore.

A rule was also adopted providing that no dealing in futures, as far as Nevada stocks are concerned, for at least 60 days and it was also decided to increase the regular monthly dues of members belonging to the organization which was agreed to without a dissenting voice.

A daily market sheet will be issued immediately following the closing of the regular forenoon call and quotations will be forwarded at the same time east by wire to the principal market centers.

## TO LEAVE FOR TONOPAH.

A. R. Parsons to be Mill Superintendent For Tonopah Company.

A. R. Parsons, former superintendent of the Hammerberg Delamar mines at Leadville, Nev., is in the city and will leave for Tonopah, Nev., in a few days to enter upon his duties as superintendent of the new mill plant now under construction by the Tonopah Mining Company at Silver, about 12 miles from the city of Tonopah.

Mr. Parsons will be the guest of Manager Sidney Hammerberg of the Fortuna mine at Bingham tomorrow and will make an inspection of that property.

## CONCENTRATES.

L. A. Jeffs expects to leave for Denver tomorrow on mining business.

W. C. Orem, general manager of the Utah Apex mines, is in Bingham today.

Secretary Lambourne of the Daly-Judge Mining Company is in Park City today.

W. H. Clark departed today for Fairview, Nev., to look after his extensive mining interests in that camp.

Superintendent Ed. Hoffman of the Carlsbad mine in the city today to confer with Manager Harry H. Joseph.

President M. L. Requa of the Nevada Consolidated, arrived from the west yesterday afternoon, but departed again today for Elko.

Manager L. A. Amsden of the Yankee Con. has placed an order for a new air compressor plant to replace the one recently destroyed by fire.

E. W. Clark, manager of the Ophir Hill and Overland mines in Tooele county has returned from a trip to Mexico on mining business.

Captain Edmund McVie, Frank P. Swindler and Surveyor Henry Fitzhugh, departed this morning for the Deep Creek country with the Gold Hill property the objective point.

T. R. Jones, manager of the ore purchasing department of the United States Smelting, Refining & Mining Company, has returned from a vacation of several weeks on the coast.

The ore and bullion settlements reported last yesterday by McCornick & Company were reported as follows: Crude ore and concentrate, \$33,000; base bullion, \$26,500; gold bullion, \$6,000.

The insurance adjusters have settled the loss occasioned by the recent fire at that Tintic mine. The company received \$3,300, considerably less than the actual valuation of the property destroyed.

DUCK CREEK HAS  
BIG LEAD MINES.

The Building of Idaho Northern Railroad Has Had a Stimulating Effect.

## SHIPMENTS TO BE MADE SOON

Several Provo Parties Interested in Nevada Camp—Some of the Big Assays Obtained.

## Special Correspondence.

Provo, May 4.—Mr. J. F. Brim left Tuesday evening by way of Salt Lake, for the big lead mines at Duck Creek, Nevada, owned by himself and other Utah people. While in Salt Lake he expects to meet Mr. D. C. McDonald, an old-time Ely mining man now in Salt Lake, who, like Mr. Brim, has had sufficient faith in the district to stay with his property, and is today reaping the result of his good judgment, and stick-to-itiveness.

Mr. Brim has only been away from Duck Creek for about a month, but things are moving so fast in that region now that he feels the necessity of conferring with a man just from the diggings to keep posted on the rapidly changing events in the district.

Through the efforts of Mr. Brim, who has held property in Duck Creek for many years, the Lead Bullion Mining and Milling company, composed of Provo, has been organized. This company has already secured a force of men to Duck Creek to get its property in good condition for shipping as soon as the railroad reaches the camp, which will be early this summer. The mines of the company contain ore in quantities which carry from 60 to 80 per cent lead, and this is not at all unusual in the district, it is rather the rule. Those who have been fortunate enough to get stock in the company have already evidence that they have a good investment in the fact that their stock has advanced in price to a degree that they could not close out at a good profit.

But they prefer to wait to work the property when the railroad comes in and give them a chance to ship. And they may not have to ship as the smelters which are being built at Ely to handle the immense deposits of copper ore there, will use a great amount of lead, and eastern capitalists are considering the matter of building lead smelters.

Since Mr. Brim brought the district to the attention of Provo people, they have sent representatives to Duck Creek to examine the country, and these have all brought back flattering reports, and many of them have secured ground there. They are firm in the belief that the district will become one of the greatest lead producers in the United States.

The fact that years ago one of the mines of the Lead King company (another company of which Mr. Brim is vice president and manager, with headquarters in Salt Lake) produced at the present price of lead gross receipts of \$30.37 per foot for 144 feet of development work, gives some idea of the richness and quantity of the ore. This was the early silver boom, after that no work was done in the district for several years, for the reason that the low price of lead and the long wagon haul of 120 miles to the railroad, would not permit the mines to be worked at a profit. Now conditions are different and with the advent of the railroad, the building of smelters and the general interest in Nevada mines, there are big fortunes awaiting the people who own property there.

## "NICK" TRELOAR PROMOTED.

Has Been Made General Superintendent of Robinson-Stern Interests.

The announcement has been made of the appointment of Nicholas Treloar, superintendent of the Yampa mines at Bingham, to the position of general superintendent of all the mines operated and controlled by George H. Robinson, Capt. Henry Stern and associates.

The properties over which Mr. Treloar's jurisdiction has been extended consists of the Yampa mine and smelter at Bingham, the Britannia mines on Horse canyon and situated at Crofton, British Columbia; the Mount Andrews, Alaska, mines recently acquired by Mr. Robinson and also properties in the Tintic district in this state.

The many friends of Mr. Treloar will be glad to hear of his elevation to this most important position and to know that his headquarters, although it will be necessary for him to radiate between the properties now in his charge, Mr. Treloar came to Bingham from Butte, Montana, where, for a good many years he was connected with the mining interests formerly, and now in control of F. Augustus Helme.

He was associated with Mr. Robinson in a responsible capacity, when the latter occupied the position of chief engineer and general superintendent of the Helme properties.

BEAR RAIDS  
MET NO SUCCESS

Some Feverish Fluctuations But Prices Moved Up Sharply.

## RAILROADS BOUGHT HEAVILY.

Gains Were Good and Shorts Were Compelled to Cover Heavily.

New York, May 4.—The high range of prices in London had some effect upon international stocks in the opening dealing in the stock market here today, but the early movement was much confused and irregular. Canadian Pacific rose 1 1/2 and Union Pacific and Reading 3/4, but the latter immediately lost its gain. Anaconda broke 3/4 and the opening in Amalgamated Copper was of 830 shares at 96 to 96 1/2, compared with 97 last night. Tennessee Coal fell 1/2, American Smelting 1 1/2 and National Lead 1/2.

Aside from some feverish fluctuations prices went sharply upward when it was perceived that outside support and commission houses were taking some offerings. Stock that had been sharply depressed at the outset scored large gains, notably Amalgamated Copper, Anaconda and Smelting. Representative railroads are bought heavily, especially Union Pacific and Reading. About the only element of uncertainty lay in the frequent efforts of the bears to force the market downward by concentrating their selling on a few stocks, but up to 11 o'clock these attacks had been successfully resisted. Great Northern preferred and Northern Pacific improved 3/4, Union Pacific, Reading, Amalgamated Copper, Smelting and Brooklyn Transit 1/2 to 3/4, and St. Paul, Atchafalpa, Missouri Pacific, Sugar, Colorado Fuel, Anaconda and Pacific Gas 1 to 1 1/2.

Prices made a further rise, the speculative favorite leading, Northern Pacific and Great Northern preferred rose 5/8, Minneapolis, St. Paul and Sault Ste. Marie 3/4, C. C. & St. Louis 3/4, Union Pacific, Reading, Canadian, Northwestern, Amalgamated Copper, Smelting, Brooklyn Transit and Metropolitan Street Railway Trust receipts 2 to 3/4, and Louisville &
