

MINING, BUSINESS AND STOCKS

SALT LAKE AT ROUND MOUNTAIN

Property Being Developed Under Direction of E. N. Mead. Showing up Well.

CUTS SUNNYSIDE LEDGE.

Ground Formerly Owned by Louis D. Gordon—Option to Pennsylvania People.

Special Correspondence.
Manhattan, Nev., July 1.—Shipping ore has been opened up in three places on the property of the Round Mountain Mining company, located east of the estate of the Round Mountain Mining company, and carrying a continuation of the latter's vein system. Development is progressing under the management of E. N. Mead of Salt Lake and has already reached a point where regular shipments are reasonably assured.
About 700 feet of the famous Sunnyside ledge is embraced within the boundaries of Combination acreage, and when opened in showing three feet with well defined walls. Gold values average about \$50 per ton, but the tale in the vein is encased frequently yields a gold content of high shipping grade.
This property was formerly owned by Louis D. Gordon, owner of the Sunnyside group and other choice pieces of mining realty on the Round Mountain country. Gordon optioned the holdings to a syndicate of Pittsburgh, Pa., capitalists some months ago, but the latter eventually decided not to buy. Later the claims were taken over by a party of Goldfield and Salt Lake City mining men, and development has proved them to be worth many times the nominal figure at which they were offered for sale to the Pennsylvania people.

ON MINING EXCHANGE.

Columbus Con and Thompson Stiffen Slightly—Closing Sales.

All things considered, trading in mining stocks was very fair during today's forenoon calls although there was no stiffening in prices to speak of. A few gold upward, notably Columbus Consolidated and Thompson. Daily Judge opened weak, but there were buyers for the stock at \$12, at which figure, 700 shares changed hands. Ohio Copper found takers at \$14.00, while Ajax went at \$2 1/2 and 23 cents.

The closing quotations and sales were:

GEORGE ROBINSON'S DEATH.

Noted Mining Engineer Passed Away in New York Yesterday.

A message received from New York yesterday announced the death at the hotel Saville, in that city, of George H. Robinson, one of the noted mining engineers of the country, and who was at the time of his demise identified with the Tintic Mining & Development company, owner of the Yampa mine at Bingham, and other associated concerns in the capacity of managing director.

While Mr. Robinson's associates and a good many of his warmest friends were aware of the serious nature of the malady with which he was afflicted and from the effects of which he succumbed, they were not without hope up to the last hour. Only a few days ago, the attending physician gave encouragement in a message which inferred that the patient had not been so well in months. But the end came at an early hour yesterday morning and at the bedside when the last spark of life became extinguished were Mrs. Robinson and the two daughters.

That Mr. Robinson fully realized the seriousness of his affliction during a visit to this city last winter there is not a doubt, for on that occasion he felt greatly impressed and told one of his most intimate friends that his "death warrant had been signed," feeling that his physicians had told him to prepare himself for the final summons.

Mr. Robinson had just reached the point in his career when he could begin to enjoy some of the comforts of life by the amassing of a fortune. The ruins of his busy life had just begun to pile up. He told the friend to whom he confided that he had planned to retire from the active management of the mines with which he was connected and be with his family who had been possible in the past.

George H. Robinson came to Utah in 1883 from Montana, where he had been for a long time general manager of the famous Drum Lumber mill. He was made general manager of the Mammoth company's properties and while in the district organized the Tintic Mining & Development company to exploit the Sioux and Utah properties. His company finally took hold of the now magnificently developed and equipped Yampa properties at Bingham.

Later he went with F. Augustus Helms, in the capacity of chief consulting engineer, in Leadville, Mr. Robinson was confidential man for David H. Moffat and Henry M. Tabor, and at one time was manager of the mining interests of Captain J. R. DeLamar. Mr. Robinson was 53 years of age at the time of his death.

LITTLE BELL ORE.

Park City Mine Made a Good Record During June.

The officials of the Little Bell Mining company at Park City, have issued a statement to shareholders covering the operations of that company during the month of June, which shows that there was marketed 877 tons of ore from which was realized, after deducting costs of transportation and smelting, \$47,827.15.

This gives the ore a net value of \$54.50 per ton. No stopping has been done and all the ore marketed was that encountered in the course of development.

The Little Bell is one of the big mines of Park City and will no doubt continue to be for a long time to come.

CLEARING AWAY RUINS.

Penn-Wyoming Copper Company Will Rebuild Concentrating Plant.

(Special to the "News").
Encampment, Wyo., July 5.—The work of clearing away the ruins of the burned concentrating plant and power houses of the Penn-Wyoming Copper company is proceeding rapidly and the site will be ready for new buildings in a short time. A contract to supply 500,000 feet of lumber for reconstruction purposes has been let to W. M. Engleheart, who expects to cut the timber in the Medicine Bow reserve.

DEAFNESS CANNOT BE CURED

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. It is not a disease of the ear, but of the throat. Deafness is caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

Write at once to J. C. Fenwick & Co., Toledo, O. Sold by Druggists, etc.

Take Hall's Family Pills for constipation.

CALL BREATH ON MINING CONGRESS

Denver Man Believes New Era Has Dawned for That Important Organization.

WRITES ABOUT FUTURE PLANS

Recent Changes in Rules of Government—Equal Representation of Mining States.

James F. Callbreath, Jr., secretary of the American Mining congress, in a communication to the "News" has expressed the opinion that the beginning of a new era for that organization, which has done much to influence favorable legislation in behalf of the mining interests of the west, was marked by recent changes in its bylaws, and declares that the organization is now upon a basis which will commend it to all mining men who realize the importance of co-operation in effecting a solution of the many problems of ore production, transportation and treatment. Among other things Mr. Callbreath says:

"The amendments recently adopted by the American Mining congress mark the beginning of a new era for that organization. Heretofore its work has consisted almost entirely of holding its annual session, at which matters of importance were discussed and resolutions adopted embodying the consensus of opinion, through the influence of which a number of reforms have been accomplished. With the creation of permanent headquarters at Denver the work of the congress was enlarged and plans were made for the creation of a permanent exhibit of commercial ores of the whole country, a complete mining library, a laboratory for qualitative and quantitative analysis, and a bureau of information on all subjects connected with mining, and a compact organization through which the problems of mining might be solved—all these so planned as to be a practical school of mining in which the practical mining man could find a solution of particular problems and the novice attracted to the mining business by the princely success of Campion, Stratton, Newhouse, Walsh and others could here gain that knowledge common to all men in close touch with the mining business, the lack of which is responsible for so many failures in the mining world. It is also planned to furnish such information to intending investors as would serve to guard them against palpable frauds, and place mining on an investment rather than a speculative basis.

"These plans could not be carried out without considerable expense, and the provision made for the expense of an annual convention only was found to be entirely inadequate. Again it was found that the fixing of permanent headquarters at Denver created the impression that the mining congress was liable to become a Denver organization rather than serve the broad purpose of a national institution with which the mining men from every section of the country could not but feel to which all could turn for assistance in the solution of those problems which require united action and which are of general interest. Another weakness of the old plan lay in the fact that the directors, necessarily widely separated and having no common meeting place, meetings and the responsibility of decision of many matters of importance must of necessity be left to the secretary.

"These problems have been met by the recent amendments providing for an executive committee with power to act in the interim between meetings of the directors, and for the increase of the annual dues from \$2 to \$10, which is believed to be sufficient to meet the necessary expenses; not so high as to prohibit the membership of any respectable mining man and yet high enough to keep out unworthy men.

"The third objection was met by an amendment to the bylaws which limits the power of any one state to control the organization. Under this clause the 1,000 members would have no greater influence in the selection of the governing body than Oregon, Washington and Idaho, with 30 members present at any annual meeting. That this amendment should have been passed by the unanimous vote of the Colorado members present at the recent meeting of members indicates a desire on their part to foster a national organization on broad, comprehensive lines."

SHAWMUT STATEMENT.

Bingham Company Has Over \$400,000 in Treasury.

A Boston special conveys the information that the Shawmut Consolidated Copper company has issued a statement to shareholders advising them of the company's condition. The statement says:

"The authorized capital of the company is \$2,500,000, consisting of 500,000 shares. Of this, 100,000 shares have been issued by the board of directors, 100,000 shares have been held in reserve. Of the 400,000 shares there were in the treasury at the time of closing the books on April 26, 1906, 154,492 shares (considerable sales of which have since been made), leaving outstanding in the hands of investors 245,508 shares. The assets consist of the Sedalia mill property, the lease and improvements of the Sedalia mine and \$454,939.62 in cash."

OHIO MAKING PROGRESS.

Mine Too Big for Present Equipment is Statement of Thomas Weir.

Thomas Weir, upon whose recommendation certain new development are being carried out at the properties of the Ohio Copper company at Bingham, in speaking of the work being done today stated that results so far had fully come up to expectations.

"Some people," said Mr. Weir, "have been inclined to believe that there was something mysterious about my connection with the Ohio company. This has given rise to many rumors and statements have even been made that an option had been given on the property."

"It is simply this way," continued Mr. Weir. "I was asked by Mr. Catrow to examine the property and report to him on what line of development should be carried out in the future and make recommendations relative to the equipment of the mine with new machinery. Before deciding on the latter, I informed Mr. Catrow that I should prefer to do some prospecting in certain parts of the mine and this work is now being done under the direction of Mr. Zeigler, the superintendent. The work includes the sinking of a mine and the running of certain drifts, cross-cuts and upraises."

"The fact is the Ohio Copper mine is too big for its present equipment."

and that its service now has gone to the limit of its usefulness and I believe a great deal of credit is due to Mr. Catrow and associates for not installing a lot of expensive mine equipment when they did not know that the mine would warrant it. It is a good deal better, to my mind, to be conservative in matters of this kind.

"While the impression has prevailed for some time that there are two vein systems in the Ohio property, Mr. Weir is rather inclined to believe that they are associated; which is one of the points to be determined during the present development.

The mill, Mr. Weir states, is doing splendid work now and it is very doubtful, indeed if there could be any better having of value than is possible now under the present arrangement of the plant. Mr. Zeigler, in addition to putting in another battery of concentrating tables, has installed equipment to save the metals which formerly went off in the slimes. The plant is handling about 200 tons of ore daily and all of it comes from that taken out in course of development. No stoping, whatever, is now being done.

CONCENTRATES.

Mill Superintendent F. B. Whitmore of the Columbus Con. mill at Alta is down from camp.

The Taylor & Brunton sampler released today several cars of ore from Tintic, one from Idaho and one from Tintic.

Manager Lafayette Hanchett of the Newhouse mine today to Bingham this morning to look over the situation at the Boston Consolidated mines.

Samuel Newhouse and D. H. Peery are reported to have acquired a quarter interest in the Alliance group in the Bullfrog, Nevada, district.

One hundred De Forest Wireless stock at \$3.00. Must be sold at once, so give us a bid. E. M. West & Co., Tel. 165. 327 D. P. Walker block.

A STRANGE DEATH.

Man Dies While Telling How He Expected to Go to Heaven.

Sioux City, Ia., July 4.—While he was telling friends at a Holmes camp meeting at Morningside that he expected soon to pass through the pearly gates of heaven, Pierce Ratliff dropped dead of heart failure a few minutes before 1 o'clock this morning. Ratliff was a well-known business man of Oskaloosa, Iowa.

UNION JACK HAULED DOWN.

Lincoln, Neb., July 4.—Miss Anna Tompsett today hoisted the Union Jack over her cottage. She came from Canada and did not understand the full meaning of the Fourth of July celebration. A large crowd gathered and were threatening to haul down the flag when the matter was reported to the police and Miss Tompsett was compelled to haul down the flag.

HIS WIFE DISAPPEARS.

New Orleans, July 4.—Edward Bruns of Los Angeles, Cal., last night notified the police that his wife, Mrs. Susan Bruns, whom he married six months ago, has disappeared. He said his wife left their hotel last Saturday and had failed to return, and that she wore a money belt containing about \$3,400 in bills when she went away. Mrs. Bruns' home was at Lexington, Ky.

BIG LUMBER FIRE.

Beaumont, Tex., July 4.—The Sibley mills of the Kirby Lumber company, with yards containing 5,000,000 feet of lumber and numerous dwellings, were destroyed by fire this afternoon and are still burning at midnight, though it is not thought that it will spread. The loss of lumber will reach half a million dollars, while the loss of machinery will exceed \$200,000.

GEORGIA SOCIALISTS.

Atlanta, Ga., July 4.—The Socialist state convention today nominated a full state ticket, headed by J. B. Osborne of Atlanta for governor. The convention extended an invitation to the Populist state convention to unite interests, but the invitation was not accepted.

MAKES THE LIVER LIVELY.

Orino Laxative Fruit Syrup gives permanent relief in cases of habitual constipation as it stimulates the liver and restores the natural action of the bowels without irritating the system or causing ordinary cathartics. Does not nauseate or gripe and is mild and pleasant to take. Remember the name ORINO and refuse substitutes. For sale by F. J. Hill Drug Co.

TEMPLE OF MUSIC.

Everything in Music

That's a broad, far-reaching assertion, but none too broad for us to make. We have the goods to back up the statement.

STOCKS DISPLAYED BUOYANCY AGAIN.

Trading at Opening Was Very Active and the Market Broad.

REALIZING CAUSED SETBACK.

New Buying Followed by a Rise, With Stocks Strong But Heavy.

New York, July 5.—Stocks today a buoyant opening here today helped by the advances effected in London during the holiday interval, under the influence of the more cheerful speculative outlook abroad. Great Northern preferred was raised by 1/4, Northern Pacific, 1/2, Louisville & Nashville, Reading and Anaconda about 1/4. Southern Pacific and Smelting 1/4, and Pennsylvania, Union Pacific, New York Central, Amalgamated Copper, the United States Steel stocks, Tennessee Coal, American Ice, International Paper and Consolidated Gas about a point. Gains ran to a large fraction quote generally in other stocks quoted. Trading was very active and the market broad.

Outside of a few belated advances prices did not expand further before realizing which was encouraged by the substantial character of the advances, caused a setback. A renewal of the liquidation in the ice stocks, contributed its influence in lowering prices. A feature of the trading that was commented upon was the fact that the market became duller under reaction whereas recently the reverse has been the case. Reading, Pennsylvania and Northern Pacific received a point from the best, Great Northern preferred 1/4, and the remainder of the list a good fraction. There was a recovery later. Smelting rising more than a point, St. Paul and Union Pacific 1/4.

The new points of strength held prices by sympathy but trading became very dull at the advances. Union Pacific's rise reached 2 1/2, other advances were Northern Pacific, 1 1/2, Louisville & Nashville, Reading and Anaconda 1 1/4, Kansas & Texas preferred and Pressed Steel Car 1 1/4, and Baltimore & Ohio, Canadian Pacific, American Car, Interborough Metropolitan and Republic Steel preferred about a point.

Bonds were irregular at noon. Quiet strength in the market, prices rising on new buying at intervals. The market was rather heavy again at 1 o'clock. St. Paul, Union Pacific and Reading leading the reaction with a decline of a point. Great Northern preferred extended its rise to 1/4, Northern Pacific 1/4, Reading 3/4, St. Paul, New York Central 3/4, Denver & Rio Grande, Sugar, Locomotive and Pacific Mail 1, Tennessee Coal ran off 1/4.

The afternoon selling made large inroads on the previous advances. Northern Pacific and Great Northern preferred falling off 1/4 and 3/4, respectively. The market recovered and moved forward with some recovery from the lowest. Great Northern preferred rose 1/4 in all.

LIVESTOCK.

CHICAGO.

Chicago, July 5.—Cattle—Receipts, 13,000; market strong to 10 cents higher. Steers, 1,500 to 2,000; cows and heifers, 1,000 to 1,500; stockers and feeders, 2,500 to 3,000; Texas, 4,000 to 5,000; calves, 5,000 to 6,000.

Hogs—Receipts, 2,000; market weak. Estimated tomorrow, 2,000. Mixed and butchers, 6,000 to 7,000; heavy, 6,000 to 7,000; rough heavy, 6,000 to 7,000; light, 6,000 to 7,000; pigs, 5,000 to 6,000; bulk of sales, 6,000 to 7,000.

Sheep—Receipts, 15,000; market 5 to 10 cents higher. Sheep, 3,000 to 4,000; lambs, 5,000 to 6,000.

OMAHA.

Omaha, July 5.—Cattle—Receipts, 2,000; market steady. Native steers, 2,500 to 3,000; cows and heifers, 2,000 to 2,500; stockers and feeders, 2,500 to 3,000; calves, 2,500 to 3,000; bulls and stags, 2,500 to 3,000.

Hogs—Receipts, 4,000; market dull. Heavy, 6,000 to 7,000; mixed, 6,000 to 7,000; light, 6,000 to 7,000; bulk of sales, 6,000 to 7,000.

Sheep—Receipts, 2,500; market dull. Yearlings, 2,500 to 3,000; ewes, 2,500 to 3,000; lambs, 2,500 to 3,000.
