Open every evening from 6 till 10. d320

GREAT inducements offered to wholesale purchasers in Lamps, Coal Oil, etc., at Reid & Kinsey's.

GRATITUDE.—I hereby certify that my son has been cured of *catarrh* of the bladder by Dr. E. L. Plant, and desire through the medium of your Journal to express gratitude publicly for this blessing.

THOMAS J. WILLIAMS, 16th Ward, S. L. City. March 25, 1875.

UNWHOLESOME FOOD.—By the unnatural combination of different articles by ignorant persons for baking powders, (even if articles are pure) they render the food very indigestible, as the chemical action, when they enter the stomach, prevents their being digested. Of these mixtures it requires but a small quantity to make food very unwholesome. Dr. Price's Cream Baking Powder is the only powder prepared by the application of scientific principles, combining all the elements of a perfect powder, thus making it safe, economical, and nutritious, and only to be equalled in purity and strength by his True Flavoring Extracts, with which every housekeeper should be supplied.

Dr. Pierce's Favorite Prescription is very strongly recommended by the Medical Faculty and is largely prescribed among their Female Patients. It is worthy of all confidence, as may be seen from the following testimonials:

Dr. G. B. Chapman, Plattsburgh, N.Y., writes: I have under treatment a lady, who, for the past seven years has been afflicted, and after trying several physicians without receiving benefit, is gaining rapidly on your favorite prescription.

ATLANTA, Ill. Dr. R. V. Pierce, Buffalo, N. Y.: Dear Sir—I have not words to express my gratitude to you for your advice and assistance in my case. There is not one who has used your medicine since they have been brought here, but that can say with me they have been greatly benefited. Since I have been so helped by its use, six or seven more around me left off all doctors and other medicines, and now use it in their families, after being cured of the same disease as mine. You do not know what a wonder it created in our city, by its restoring my sister I wrote you about, for she had been under the care of three of our best doctors, but could not sit up but for a few minutes at one time. I begged of her to try your medicine, and before she had used half the bottles she could go all around the city, and has now just come home from a visit five miles away.

MRS. THOMAS MCFARLAND. Dr. Pierce's Favorite Prescription is sold by dealers in medicines generally.

TREMBLOUS RUSH for "Compton's Surprise" Potatoes, at Crocheron's. Be in time. d117

IMPORTANT TO THE TRAVELING PUBLIC.

It is the duty of all persons before starting on a journey to ascertain by what route they can reach their destination with the least trouble, and if there are two or more roads leading to the same point, to decide which is the safest and pleasantest to travel.

We take pleasure in stating that the CHICAGO & NORTH-WESTERN RAILWAY is the oldest, and several miles the shortest, route between Omaha and Chicago. Within the last two years the road bed has been put in admirable condition, and almost the entire line has been relaid with steel rails.

The Depot in Chicago is centrally located, and as their trains arrive there thirty minutes in advance of all other lines, passengers can always be sure of making Eastern connections.

Close connections are made at Chicago with the Lake Shore & Michigan Southern, Michigan Central, Baltimore & Ohio, Pittsburg, Fort Wayne & Chicago, Kankakee

Line and Pan Handle Routes, for all points EAST and SOUTH-EAST.

If you are going to Chicago, or East, you should by all means purchase your tickets by the Old Pioneer Route—

The Chicago and North-Western.

You will find on all through trains Pullman Sleepers, new and magnificent Day Coaches, and the best Smoking and Second Class Cars now on any road in the United States.

Particular information with maps, time tables, etc., may be had at any of the Through Ticket Offices in the West, or upon personal or written application to J. W. Irons, Ticket Agent, Salt Lake City, A. H. Earl, Ticket Agent at Ogden, or to J. H. Mountain, Western Traveling Agent, Omaha, Neb., or to W. H. Stenquist, General Passenger Agent, Chicago.

PRICE OF GOLD. Corrected daily by Deseret National Bank. SALT LAKE CITY, April 12, 1875. Buying at \$1.13; selling at \$1.15.

EVENING NEWS. Wednesday, April 14, 1875.

Local and Other Matters.

Thermometer 65 degrees F in the shade at 1 p.m. to-day. Fine.

Early.—Some Utah rhubarb, of excellent quality, was exhibited for sale in some of the vegetable stores to-day.

That Lost Mule.—If the young man residing in the 16th Ward who found Mr. James T. Wilson's mule will call at the office of President D. H. Wells, Main St., Mr. Wilson will satisfy him for his trouble.

Getting Ready to Retail.—The Superintendent and employees of Z. C. M. I. are fitting up a portion of their establishment for retail, trade which they are now recommending.

That Lost Pig.—Some time ago a resident of the 20th Ward advertised for a pig that he had lost. If he wishes to learn the whereabouts of that pig he can do so by inquiring at this office.

Popular.—One of the most popular seed potatoes just now is the Compton's Surprise, which will be pretty generally planted hereabout. So far as we have been able to learn, it is one of the best kinds ever introduced to this part of the country.

The Assault Case.—The trial of the parties charged with brutally assaulting and beating John Wallen night before last, commenced yesterday afternoon, by a jury of six persons, before Justice Pyper. The case was given to the jury at one o'clock to-day.

After being out for some time they returned with a verdict of acquittal.

Col. Dame Again in the Penitentiary.—Yesterday Col. W. H. Dame was brought back from Beaver, remained in the City over night, and was taken to the penitentiary to-day. Thus an at least presumably innocent person is deprived of his liberty, incarcerated in a vile prison for long weary months, unconstitutionally and therefore illegally, the constitution guaranteeing to all parties charged with crime a fair and speedy trial.

Col. Dame is anxious that his case should go to trial, but every effort that is made in that direction is met by the miserable subterfuge, "The prosecution are not ready."

We understand that Col. Dame was considerably treated while at Beaver, by the Marshal.

Pitch In.—Now is the time to commence the destruction of the scolding moths. Several orchardists have already commenced the onslaught by scraping the rough, loose bark from pear, apple and other trees under which they are lodged in myriads. After taking the bark off thus it should invariably be burned. Every other possible hiding place for the grubs should be examined and treated with a view to destroying the pests. We would respectfully suggest that it would probably be productive of general good for the gentlemen of the Horticultural Society to advise the public regarding the proper steps to take, a little at a time, as the season advances. Our columns are open.

City Council.—The regular weekly meeting of the City Council was held last evening, Mayor Wells presiding.

L. B. Mattison was granted the privilege of constructing a platform over the water ditch opposite Snell's premises, between Second South and First East streets.

Petition of Wasatch Fire Company, for additional accommodation at their engine house; referred to committee on fire department.

Certified bills amounting to \$55.01, presented by the committee on improvements, for work done at the Bath House; allowed.

Petition of Adam Spiers and others, asking that Fourth South street, between Tenth and Eleventh streets, be placed under repair; referred to committee on streets and alleys.

The committee on claims reported that they had examined the Chief Engineer's and Marshal's report of expenditures for March and the bill of the City Gas Company for the same month, and found them correct; report received and amounts appropriated.

Severe Accident.—Day before yesterday, as a young man named David Davis and another person were engaged in logging, three miles up Mill Creek Canyon, the falling of a tree by Davis caused the snow to give way, with which he was carried down the mountain into a gulch. When his companion looked down the slope, all he could see of him was his heels sticking out of the snow, his body being submerged. The man hastened to the spot, and went to work vigorously to dig him out, the task being

accomplished after a hard labor of two hours. We believe he had no shovel or other tool save his hands.

Davis was alive when taken out, and his companion lashed him to a bough, with which he dragged him two miles over the snow, to the nearest house.

Dr. Benedict, being sent for to attend the injured man, went up the canyon, yesterday. Davis' right shoulder bone and one of the ribs of the left side were broken, besides several bruises on various parts of the body. The Doctor passed over five slides on his way to the patient. He got along very well going, but had much difficulty in coming back, the sun having softened the surface of the snow so that he had to get off his horse and walk.

A Triumph For Home Manufacturers.—To-day our reporter visited the works of the Salt Lake City Iron Company, south of the railroad depot, where there has just been completed what may be justly considered a triumph in home manufactures, in the shape of another of those steam plunger pumps, for which the inventor and maker, Mr. William J. Silver, holds the patent from the United States, England, France and Belgium. The one just finished is a splendid piece of workmanship, and is not only a triumph as being indicative of local inventive genius and engineering skill, but is gratifying also as being manufactured almost entirely of native iron, from the Great Western Company's Works, at Iron City, Iron County. This pump is somewhat smaller in capacity than that made not long since for the Emma Mine, but throws the water to a greater height. It throws 450 gallons a minute a height of 400 feet.

Considerable has been said regarding the quality of the Utah iron compared with that imported. Mr. Silver states that the Utah article is 25 per cent. the better, and in consequence of having used it in the construction of this pump he considers it one third stronger than the one for the Emma, the castings being much more dense than when produced from the iron generally imported. This pump is for the Ontario mine, of Farley's Park.

The production of machinery from Utah iron may be considered to have been fairly inaugurated with the making of this huge pump, and it is to be hoped that the home iron will be exclusively used for such purposes from this time forth.

The machine shop of the establishment is splendidly fitted up with a complete outfit of machinery and machine tools, and the foundry and pattern shops are in the same well equipped condition.

A drawing school is held in the pattern shop every Monday and Wednesday evening, which is attended by sixteen pupils, who make good progress under the efficient tuition of Mr. Silver.

The Reynolds Case.—Messrs. Carey and Baskin made an argument before the District Court to-day with a view to having the judgment passed on Mr. George Reynolds executed, pending the final decision of the case in the Supreme Court.

Our Country Contemporaries.

Ogden Junction, April 13.—

Nineteen cars of emigrants went West last Saturday, and we are informed there are 17,000 between Ogden and Omaha, and 12,000 at the latter city waiting for cars to convey them towards the Pacific Coast. This western emigration is being overdone.

Look out for complete destruction of our fruit unless we kill off the scolding moths. The eggs just hatching into worms are in the rough bark on the trees and cedar posts in fences. Rasp off the rough bark from the fruit trees, and strip off the cedar bark from the posts and burn it. Everybody should attend to this, right now.

Last Saturday evening the danger of throwing rocks, indulged in by many of our boys, was painfully illustrated. Some boys were playing near the residence of Mr. John Reeve, when a large stone was thrown, in play, but it struck a son of Mr. Reeve, 14 years of age, in the face, breaking his nose and inflicting a wound over the eye. The injured boy is in a fair way of speedy recovery, but the danger of this practice might have received a fatal illustration, and this should be a warning to the juveniles.

Beaver Enterprise, April 8.—

Granite District. Very flattering reports come to us from this district. George Reed exhibits from his mines some large and very rich looking specimens of ore. Rev. Smith, Judge Bowen and several officers of Fort Cameron are interested in the mines of this district, and it is said that Charles Woodhouse and others are making arrangements to put up a smelting furnace in connection with George Reed's mine. We wish them success in their enterprise.

The Elephant mine in Star District is reported to be improving in quantity of ore and grade; the owners are having large timbers procured from Pole Canyon by contract with Damon & Co., for the purpose of timbering, and putting the mine in first-class condition for profitable working.

Lincoln district. This camp has become all the rage since the advent of Judge Spicer in it. The town of Lincoln has been laid off, the plat recorded, and the town now contains Spicer & Smith's smelter, Dupax's store, a saloon, two blacksmith shops, a hotel, and about twenty houses with over a dozen families. The County Court of Beaver Co., at its last session, organized this district into a civil precinct, by the appointment of Judge Wells Spicer as Justice of the Peace, H. Guyman as constable and John Blackburn as road supervisor.

The furnace has been doing a splendid business, having made its runs without "freezing" or "chilling" from the beginning.

The Rollins mine, formerly known as the "old lead mine," under the working of Judge Spicer is turning out to be the number one mine of Utah, and is said to be improving daily in quantity of ore and grade as it approaches the depth of 200 feet.

Spicer is also working several other mines, among them the Ontario, which promises to be a very valuable property, having at present a very wide vein of galena and carbonates. The camp is in many respects promising, having by

the mines plenty of wood and water, and will soon have a post office, telegraph and express office.

TEMPERANCE IN MAINE.—A Portland, Maine, correspondent of the Boston Journal says—The temperance reform movement in this State is doing wonders in reclaiming those addicted to intemperate habits. In Bangor, Lewiston, Auburn, Ellsworth, Biddeford, and other places, the movement just now is making great headway. Nothing like it has been seen for years. Those who are giving up the cup that inebriates and entering upon a life of sobriety can be counted by hundreds. The pledge that is signed also forbids the drinking of cider. In Lewiston and Auburn the meetings draw immense numbers. An enthusiasm prevails which has not been witnessed before for years. Most of the speakers are men who have just been rescued from the evils of intemperance. Some of them have been looked upon as hopeless cases. Their experience and the pathetic appeals made rarely fail to move the most obstinate heart. The movement is striking a deadlier blow at the rum shops than was ever before seen in the pinkest days of prohibition, whereas reformers relied upon the efficacy of law. By this movement new and fresher men are coming to the front in Maine in the temperance ranks, who will hereafter lead off in the crusade against the demon of intemperance.

## NEW ADVERTISEMENTS.

# SPRING OF 1875

## TO THE GENERAL PUBLIC

throughout Utah and the neighboring Territories. Z. C. M. I. offer a large and well selected line of Merchandise of every description.

The advantages of capital and experience possessed by this Institution enable it to offer a general stock of Merchandise at lower figures than any other house equally remote from manufacturing centres.

The Wholesale Dry Goods Department

Is displaying a large and attractive line of Spring Prints and other Dress Goods, together with all the popular brands of Bleached and Brown Goods, Ticks, Denims, Hickories, Cheviots, and our usual full line of Notions, beside many attractive Novelties recently selected in the East.

THE WHOLESALE GROCERY and HARDWARE DEPT

Constantly replenished by large shipments and dealing principally with manufacturers, offer all goods at popular prices. An immense and varied stock of Staple and Fancy Groceries, Heavy and Shelf Hardware, Hazard and Giant Powders, Fuse, Mining Outfits, Plows and other Agricultural Implements, Stoves, Stove Furniture, Etc.

SPECIAL.

The Boot and Shoe Department has been enlarged to double its former capacity and is now displaying a superior class of goods, embracing the most staple and popular Styles known in American markets, among which, for Ladies' and Children's wear, we call attention to the Specialties of Edwin C. Burt, Sollers & Co, Sausser, Dangler & Co, and many other styles of Shoes justly esteemed and sought for.

Particular attention is called to immense additions recently made in our stock of Foreign and Domestic Leather and Shoe Findings.

FRENCH STOCK

THESE GOODS, FOR QUALITY AND FINISH, ARE SUPERIOR TO ANYTHING KNOWN.
