TOO MUCH RED TAPIS.

The British Admiralty is Sail to be Enmeshed With it.

New York, June 25 .- A dispatch to the Tribune from London says: The British admiralty, being enmeshed with red tape, does not give out dis-patches as promptly as the navy de-partment at Washington, but it has confirmed the previous accounts of the repulse of the relief column which attempted to enter Tien Tsin on Friday. The bulletin is short and depressing The foreign settlement at Tien Tsin was almost entirely destroyed and the Europeans were fighting hard.

There is nothing about a relief col-umn of Russians and Americans being cut to pieces, but the repulse is decribed as attended with some Only one runner had entered Taku from Tien Tsin in five days, and not a word had been received from the relief columns which started for Pekin two reeks ago, nor from the legations

The foreign relief force may be described as a chain consisting mainly of missing links. There is a mixed force of between 2,000 and 3,000 men at Taku, including a portion of Chinese regiments from Wel-Hal-Wel. This column, with the Russian and American contingent of over 500 men, must cut its way through a superior Chinese force which s said to have sixty guns, although his seems incredible. The foreigners it Tien Tsin are clearly in a desper ate state, with the garrison surrounded n and supplies running short.

CONTAGIOUS BLOOD POISON

The first sore or ulcer is followed by little red pimples on the body, mouth and throat become sore, the glands enlarge and inflame, copper colored splotches appear, and hair and eyebrows fall out. These are some of the milder symptoms; they increase in severity, finally attacking the vital organs; the body is tortured with rheumatic Jains and covered with offensive eating sores. It is a peculiar poison, and so highly contagious that an innocent person handling the same articles used by one infected with this loathsome disease, may be inoculated with the virus. It can be transmitted from parent to child, appearing as the same disease or in a modified form—like Rezema or Scrofula.
