MERCUR MINE.

An Explanation Regarding Payment of Reduced Dividend.

ONE OF \$25,000 DECLARED.

South Swansea Looking Well-Rich Assays from the Young America-Heported Exedus from Nome.

As forecasted in vesterday's "News" the directors of the Mercur Mining company met late yesterday afternoon and declared a quarterly dividend of \$25, 660, or 12% cents a share. It was fully support stimulating short seiling. Fed. expected up almost to the last moment that the regular quarterly dividend of last night's level, and a number of \$50,000 or 25 cents a share would be paid, and the reduction came as a surprise to many of the stockholders. A very good reason is given for the reduced amount. The treasury is not in shape to pay out any more. Manager George H. Dern has issued a statement to the stockholders, which greatly lessens the force of the blow, which such a decrease might give. The statement is as follows:

"The declaration of a reduced divi-dend by the Mercur, at this time, will doubtless cause some surprise and dis-appointment to the shareholders, and it is due them to state the reasons for this action of their board of direc-

March pay-rolls have not been quite completed, so I cannot figure the exact amount of the expenses for the month of March, but I estimate that on the 20th of this month, when the dividend is payable, we will have about \$20,000 on

Reference to our annual report will show that on January 12th we had on hand \$45,376.02. Hence, we not only had no surplus, but we lacked about \$5,000 of having enough to pay our January dividend. This \$5,000 had to come out of the earnings of the first quarter

"Then, our construction work was not port. Since the date of the published statement, we have completed our improvements, and have paid out an addi-tional \$9,000 to \$10,000 on this account. "In February, we made the changes at the mill, adding the new crusher and These three considerations alone account for our deficit, and but for these

extraordinary circumstances, we should now be able to pay our regular dividend comfortably. But in addition to these facts it is to be stated that during a part of Jahuary and most of February, we had a run of "hard luck" at the mill. For no apparent reason, the average values ran very low—somethe average values ran very low—some-thing all mines and miners experience periodically. On top of this, we were bothered with poor extraction in the mill, due probably to more or less base and talcy ore. Naturally our profits were reduced considerably by these conditions. The purchase of two car-loads of cyanide has also meant the outlay of a large sum of money. utlay of a large sum of money, From all of these matters, it is clear that the mine practically earned its regular dividend this quarter, but it

plus to fall back upon to meet its busing the month of March we had very satisfactory results. We produced about \$50,000, and this without any extra effort to fatten the treasury. We are getting out a good tonnage, with time our earnings exceed the rate of 25 cents per share quarterly. Summer work has many advantages anyway.

and I feel very confident that we shall have no trouble at all in paying a \$50,000 dividend in July.

I am not making excuses, but stating

reasons, for our decreased dividend and I believe our stockholders will not only agree with me that there is necession for alarm in this action he directors, but they will appreciat approve of the policy of not paying out more money in dividends than there is on hand, in the anticipation of making up the shortage. I have no doubt but that the Mercur could pay \$50,000 this month, and earn enough in the next quarter to make up the deficit, and pay the full dividend in July. But in the first place, that would not be good business policy, and in the second place, we do not want to get our treasury into that sort of condition with the prospect or amalgamating the Mercur with De La Mare's Mercur Mines com-

We have not done much talking about inform the stockholders that the physical condition of the property has greatly improved during the past two months. We have paid considerable attention to developing our base cres. and the result is that we find we have very much larger hodies of this materia than we had supposed, and the value of the mine has accordingly materially

ncreased.
As for the proposed Mercur-Golden Cate consolidation, there is nothing new o give out yet. Nothing has been igreed upon, but the negotiations and work of examination are progressing nicely, and the outlook is favorable for the consummation of the deal.

SACRAMENTO MEETING.

New Board Elected-Roasting Plant to be Installed-Cash Balance. At the annual meeting of the Sacra-

nento Mining Company held yesterday afternoon a new board of directors will elected, consisting of Glen R. Bothwell R. E. McConaughy and Fred J. Leonard, of Salt Lake; R. A. Deal, of Spring ard, of Sait Lage: R. A. Deat, of Spring, ville, and G. S. Hanna, of Elcomington, III. Glen R. Bothwell is president of the company and R. E. McConaughy will continue to fill the position of sec-

retary and treasurer.

As intimated in the last night's "News" the principal subject of disroasting plant advocated in the presi-dent's report. This matter was decided upon and the beard was authorized to upon and the board was authorized to proceed at once to put in a roaster. The cash balance on hand amounts to \$17,-\$71.77. The total receipts during the year amounted to \$109,288.97, from which the deduction of \$35,000 raid in divi-dends during the year, and \$72.491.90 for operating expenses, leaves a halance of \$2.507.70 from the year's run. With the amount of \$15,065.70 on hand in cash and cyanides at last meeting, the total W. L. Andrew, who has been in Bos-

a hand amounts as stated, to \$17,572.77 Abount 760,000 shares were represented at the meeting and a vote of confidence in the management was adopted before an adjournment was taken.

NEW INCORPORATIONS.

1 Gold Mountain Company Organized -Primrose Amends its Articles. The Providence Gold Mining Company was filed yesterday afternoon with the county elerk. The capital stock is \$30,000, divided into 300,000 shares of the face value of 10 cents each. John Meyerhoffer is president of the company; W. F. Rowe, vice president; F. W. Brokjier, treasurer and accretary; who, with Samuel Ryser and Anton F. C. Gatheroy, form the directorate. The company owns the Switzerland and other mining claims in Gold Mountain mining district, Plute

zerland and other mining claims in Gold Mountain mining district, Plute county, this State.

The Primrose Mining Company has filed an amendment to its articles in the county clerk's office, by which the capital stock is increased from \$20,000, divided into 200,000 shares of the parvalue of 10 cents each, to \$35,000, divided into 350,000 shares of 10 cents each. The number of directors is also increased from five to seven. reased from five to seven.

WASHINGTON COUNTY MINES. Reports of Matters There by St. George News.

E. M. McArthur left for his mining claim yesterday accompanied by a Salt Laker, who came down expressly to look over the property.

The local manager for the St. George Copper Mining Co., George Lawrence, states that he expects the smeller to resume running about the 16th list.

Harry Jennings came in from the
Grand Gulch mine Wednesday, and left
for Salt Lake City Thursday. He reorts everything looking first-class at

Thursday morning over forty laborers went out to the Chloride to work on the Arizona and Utah extensions. Two caroads of horses, cookhouse and other supplies were also sent out. Over one hundred men and forty or fifty teams re now at work on the grade.-King-

man Miner, George Moore, manager of the Consolidated Kansas City Smelting & Re-ining company's Salt Lake offices, arrived in St. George Friday, the 29th inst. Mr. Moore is reticent regarding the object of his visit, but he spenf considerable time at the Dixie mining property. He left here for Deer Lodge Friday.

REGARDING NOME.

A Canadian Paper Says There Is an Exodus of Disappointed Men. The Rosland (B. C.) Miner has the

following to say of the Nome fever which is spreading so rapidly: We never placed any faith in highly sensation), purposely exaggerated re-ports of huge profits, stated to accrue to the industrious gold-seeker on the sands about that bleak and barren Alaskan point, Cape Nome, Though doubtless a limited number of men there made last season fair finds, they usually paid heavily enough for them in general dis-comfort, heavy cost of living and im-paired health, whilst many others re-turned with little but bitter experience,

trading companies and their agents—especiall in Scattle—have continued to picture the Cape Nome region as a may pick up wealth from literally gold-en sands. Thither, accordingly, went many early this year, to find little but small in aggregate value to repay the elevator, and shifting same of the other machinery, which necessitated a shutdown of nearly a week. This, of course, curtailed our receipts by several thou-

from exposure or disease.

"The result of this is the beginning already of a big exodus of badly disappointed men from Cape Nome, an event which will, we trust, so far at any rate as Canada is concerned, prevent all but a very few at the most from spending much money and risking health in a probably fruitless quest of gold on Alas. ka's inhospitable foreshores."

AGAIN EXTRACTING ORE.

Connection Made With Old Works ings of Grand Guleh Mine.

Word has come from the South that a force of men have ben but to work taking out ore at the Grand Gulch mine in northern Arizona. After shipping a number of curs from the 50 foot level, which averaged 45 per cent copper, management found it necessary to a a new shaft to a death of 100 feet. W known. A crosscut has been run a c tance of 70 feet from the bottom of shaft to the vein and an upraise o feet was made to connect with the ob-workings, affording at the same time splendid air connection. The vein has been proved bigger and richer with depth and a phenomenal output of rich copper ore may now be looked for.

SHOWS GOOD VALUES.

Recent Assays from the Young

America Bun High in Gold. Some excellent assays are being received from the Young American mine at Tuscarora, Nevada. The last two returns showed the presence of \$26.80 \$2.40 in gold. These were taken from an upraise off the 200-foot level. One assay taken from the top of the upraise shows as high as \$42.00 in the yellow metal. The vein from which these values are taken is said to be blocked out for one hundred feet on the dip and about the same distance on its strike. It is also said to be about four feet wide. The management is feeling much encouraged over the showing. mill is still bung up awaiting t rival of certain pieces of machinery from San Francisco.

THE SOUTH SWANSEA.

Supt. J. V. Wheeler Reports the Mine to be in Excellent Condition. Supt. J. V. Wheler of the South Swansea, arrived in the city today from Tintic district and reports the mine tooking well. There is said to be no sensational changes at the mine, Work in the new shaft is going forward at the rate of about 50 feet a month. The work is being done by hand, which makes the process slower than if manine drills were used. Connection was ade some time ago with the old work ugs on the 400 level, since which time e shaft has been put down about feet deeper. The mine is said to in a condition to send out a great-increased output as goon as the new shaft enables the management to do

MINING NOTES.

The Continental Eureka had 10 cars of ore on the market today. The Mammoth of Tintle had four cars

f ore on the market today. The Conklin sampler reported 11 car ads of ore from Tintic today. The Lower Mammoth of Tintle had a car of ore on the market today, Three cars of ore were on the market

narket today from the Swansea of The Galena King of Stockton reported the market today with a car load f galena ore.

ton for several weeks past, expects to get home during the next few days, Sales of Horn Silver stock are reported in the Engineering and Mining Journal at \$1.25 and \$1.15 in New York last

The Taylor-Brunton sampler reported for the past two days, 14 cars of ore from Tintic, one from Stockton and one from Nevada.

Washington County News: E. M. Mc-Arthur left for his mining claim yester-day, accompanied by a Salt Laker, who came down expressly to look over the property.

H. A. Cohen is back from Mercur, where he has been on business connect-ed with the Golden Gate-Mercur reports needed by Capt. De Lamar, who is in Italy.

W. H. Nutting, who has charge of the construction of the Bingham Cop-per and Gold company's new smelter, went out to Bingham Junction today see about letting the contract for grading the smelter site. James Andrus of St. George, who has been in the city for several days past, expected to leave for home today. Mr. Andrus is one of the original owners

of the Dixie group of copper claims. A party of Kansas City capitalists have been looking over the Red Wing and York properties in Bingham and are much pleased with the merits of the wo properties in which they have made

Austin Reveille: J. F. Mitchell has turned to Salt Lake City after a visit of several days. He is expected back the first of next week with a party of mining men who will make an examination of the New Pass mines.

Price Advocate: It is said that Uncle Jesse Knight of Provo, who lately bought a coal mine north of Price some eight miles off the Grundtvigs, will let the same lay idle to hold as an invest-ment. He believes it will become more valuable as the years go by. J. T. Breckon left today for Gold Mountain to inspect the Annie Laurie mine. Messrs. Kimberley and Huck

J. R. Snively, of Kansas City, has returned to the city after a sojourn of several weeks in the Deep Creek country, with which he is deeply impressed, Mr. Snively leaves for his home with samples of Deep Creek ore which he

will use in advertising the country and inducing capital to enter the promising Grand Valley Times: The copper listricts of Grand and San Juan counties have been developed far enough to show that there are large bodies of opper ore, ranging from three to tet ver. It is mostly a deposit in sand-stone and is difficult to *smelt into matte. A leaching process, or a mechanical, of extracting the metal is needed to make it a paying proposition There are several processes offered, but the existance of processes do no good

********* A SALE OF SOAP

HERE'S NEWS for Soap buyers, and most everybody needs soap. We've been lucky, and want you to share it, We run across this soap and bought it in such quantities that I we're able to sell it at 35c a box which is about 15c less than such soap goodness ought to bring. It's made by the maker of the celebrated 4711 soap. There are \$ odors to choose from. It's going fast-better step quick. And while we're selling soap, I we're filling prescriptions just

Etreet, (Postoffice corner).

THE MEALS ARE ALWAYS GOOD.

"The train is crowded with agrecable surprises, but it is in the dining car that one is most impressed with the Burlington's superiority. Now, withburington's superiority. Now, with-out being too utterly dainty, I am ex-ceedingly particular about my meals, and about the way they are served. For breakfast all I want is eggs, rolls, and coffee. In a Burlington dining car I am able to get just what I want, just what I would have at my own table, and for the small sum of fifty cents. The eventuality neathers of the papers. The exquisite neatness of the naper makes a good meal taste all the better Interview with a Denver merchant, Two trains a day from Denver to the East—the Chicago Special at 8:00 a. m.; the Vestibuled Fiyer at 10:00 p. m.— Omaha, Chicago, Kansas City, St. Louis, Through sleepers daily, Ogden to Chicago via Denver and the Burling-
