6

DESERET EVENING NEWS: THURSDAY, MARCH 15, 1906.

shape for the initial start, which is scheduled for tomorrow. The Copper Bar Mining company is the name of a new corporation that has just been launched in Ogden, to operate a group of 14 lode mining claims near Brigham City. There are 600,000 shares in the company, one half of which have been left in the treasury to be sold for development purposes. Among the parbeen left in the treasury to be sold for development purposes. Among the par-tiles mentioned as incorporators are W. B. Wilson and W. D. Pyper of Ogden an M. Benson of Brigham City. The property will be developed by a tunnel, which has been started, and which shows a four-foot body of copper ore, two of which carry high grade values.

#### BRITISH COLUMBIA MINES.

Profits Can be Had Only by Operation Upon Large Scale.

things, has made the statement that the well has been driven to the depth The operations of the Granby, Do-The operations of the Grandy, Do-minion and British Columbia Copper companies operating in British Colum-bia, says a correspondent, during the past few years have demonstrated that have been so encouraging that it has been decided to draw the six-inch pipe When this is accomplished the drills will be started again with the view of dropping the hole to a depth of 2,500feet. At 900 feet, it has been stated, considerable asphaltum oil was enthe only way copper operations can be successfully conducted in the Boundary district is through mining upon a large scale. The Gauby company was not a highly successful proposition until its smelter was able to handle 2,000 tons of ore per day. It is now handling 2,700 tons per day and over, and it is planned to increase this. may shore be every indication presented was favorable and has continued so ever since. So the Salt Lake valley may yet become the location of some good producing wells. With one good one to start with, others will follow.

Both the Dominion Copper and the British Columbia companies have smelters in the Boundary, and their operations have been limited to a ton-nage of from 569 to 750 tons per day. Both these companies, however, have been developing their mines, and are now prepared to extend their smelting operations. The British Columbia com-pany has ordered a smelter and conyerter equipment capable of treating 2,000 tons of ore per day, while the Dominion Copper company is prepar-ing to take action whereby it will build a smelter with a capacity of 2,500 to the sum of \$9,472.87. There was some demand for Daly-Judge and sales of this Park City stock were noted at \$10,75 and \$10.90; a lot of Daly went at \$1.15, while Uncle Sam sold down to 40½ cents. Tetro opened at 16 cents, closing slightly lower. The de-mand for May Day slackened, which was followed by a display of weak-ness. South Columbus was on the ac-tive list and the transfer of 1,500 shares at 19 cents was noted. The closing quotations and sales

a smeller with a capacity of 2,500 to 3,000 tons per day, or as large a plant as that of the Granby company. Both the Dominion Copper and the British Columbia company's mines have ore in sight to permit of such a tonnage, while the railroad facilities in the Boundary are now adequate to handle an unlimited tonnage. Promhandle an unlimited tonnage. From finent interests are now identified with both of these companies. Colgate Hoyt, Edwin Hawley, E. D. Under-wood and Col. John Weir have large wood and Col. John Weir have large

Limbourne, secretary-treasurer of the Daily-Judge company: C. O. Elling-wood, general manager of the Western Exploration company: H. H. Green, as-sistant general manager of the Bing-ham Consolidated: J. E. Darmer, gen-eral manager of the May Day, and many others of prominence in the minmany others of prominence in the min-ing circles of the state.

by the witnesses placed on th stand yesterday that a large percentage of the population of the state is dependent on the operation of the mines nd smelters for a livelihood and it was olated out that if the smelters were ompelled to shut down, the mines ould also be forced out of commission, a addition to bringing out much information as to the number of men em ployed in the minnes, wares paid, num-ber of people directly benefited by mine operation, cost of supplies, where they were purchased, etc., was brought out. It was also shown that about four perong are dependent on every one em-loyed in the mines. It will probably be several weeks to conclude the takng of testimony, after which the mas-er in chancery must make up his find-ngs and report the same to Judge Mar-thall of the federal court. This will

The smelting companies believe a precedence has been established which would tend in their favor in the Cali-fornia case of the United States vs. Mountain Copper company, in which the government alleged the destruction of value be timber by smelter furner valuable timber by smelter fumes, in the cases of the Deer Lodge val-Montana farmers against the minand smelting companies of Butte and Apsonda.

#### GREAT WESTERN STRIKE.

Property Near Pocatello Will Soon Report With Shipment.

#### Special Correspondence. Logan, March 15 .-- L. S. Cardon

returned from Pocatello yesterday. He brings a very flattering report from the Great Western mine in which many logan people are interested. A large ody of valuable ore has been uncovered and shipmnts will be made as soon as the snow goes off so that a road can be opened to the mine.

#### UNITED STATES DIVIDEND.

One Will be Paid in April Amounting To \$656,250. At their meeting yesterday, the di-rectors of the United States Smelting, Refining and Mining company posted a dividend of 1% per cent, or 87% cents a share on the preferred stock of that corporation. The books of the com-pany close on April 2 and open on April 20. Date of payment, April 16. The amount of the dividend is \$656,-

#### STUDYING MILL METHODS.

Henry M. Adkinson is in Park City for That Purpose. For the purpose of studying the mill-ing methods being employed in Park

City, Henry M. Adkinson departed for

that camp this morning. Mr. Adkinson is manager of the New England Gold & Copper company's mine at Bingham, in which a number of Boston capitalists are extensively in-terested, including E. E. Abercromble, who is managing director. Since the association of the latter with the New England it has been de-cided to carry on a much more exten-

years, rich carbonate copper ore was re-duced. The Dyer was formerly owned by the Summit Copper company, but has cently changed hands for the sum of recently changed hands for the sum of \$25,000 — a comparatively small amount, considering the amount of its output in the past. Under the new management it is believed that the smelter will be sending out a steady stream of copper matte, or bullion. In the near future. The old camp is now the near future. The old camp is now witnessing a revival of activity, it bay-ing had little spurts of prosperity, off and on, since the year 1879, when con-siderable work was done on the lead denotic that its four south of the eposits that he just south of the over copper mide. At the present time he Colorado Fuel & Iron company has force the Colorado Fuel & Iron company has a force of men employed on the great iron ledges about one mile southwest of the Dyer, where the hematile iron is from 25 to 30 feet thick. This pro-perty was acquired by the C. F. & I. people about the first of last Decem-ber, and it certainly looks as if the company meant business. With the coming of spring there will be concoming of spring there will be con-siderable stir in this part of the coun-The camp is known as Carbonat mining district, and if it was near a railroad there would be "something doing," as the whole country is heavily mineralized, and rich ore is found in many places in the camp.

#### CONCENTRATES.

The Guggenheim party pulled out for the coast last night.

W. F. Snyder expects to leave for New York on mining business tomorrow. The smelter at Mackey, Ida., steady operation on ore from the White Knob leasers.

A. B. Greeson, manager of the Min-ing review, returned from a trip to Ogden last night. Walter Fitch returned from a trlp to

Los Angeles yesterday, whithen he went with Thomas F. Cole.

The Beaver-Harrison Mining com-pany is preparing to patent all of its Beaver county holdings.

General Manager C. E. Allen has re-turned from a trip to the local mines operated by the United States Smelting, Refining & Mining company.

The annual meeting of shareholders of the West Quincy Mining company is being held this afternoon at the offices of the company in the Dooly block. The ore and bullion settlements re-ported late yesterday by McCornick &

Company were as follows: Crude ore and concentrate, \$32,400; base bullion, Crude ore \$47,300; gold bars, \$5,500.

It is stated that Peter Haack, the purchaser of the Snyder interest in the Honerine mine at Stockton, has been given a call on the holdings of the Kinpiven a call on the holdings of the kin-berly estate and that he pulled out for Chicago yesterday afternoon for the purpose of closing up a deal with Ad-ministrator Baird. Apparently Mr. Haack has outgeneraled the Guggen-heim crowd in the acquisition of this mine.

Arthur Carson, superintendent of the North Butte and United Copper prop-ertles, has finished his inspection of all the mines of the latter, the Minnie Healey and Belmont being the last to receive his attention. The Belmont is now yielding a lot of fairly good ore and will be kept in operation. The Min-nie Healey is also a good producer, but nle Healey is also a good producer, but the shaft is still a source of annoyance. Although no official announcement has been made, it is rumored that this mine will be eventually worked through the Leonard or one of the other mines close

Leonard of one of the other mines close to it. Both North Butte and United Copper have maintained their custo-mary output of one during the last week, the combined yield being about 2,500 tons a day.—Anaconda Standard.

#### LOWERING CHARGES.

#### Method Used in British Columbia May Be Adopted by A. S. & R. Co.

At the conclusion of the meeting of the executive committee of the American Smelting and Refining company in Denver last week, President Daniel Guggenheim announced that new processes were to be introduced in Colo-, rado and Utah which would so cheapen

the cost of smelting that many mines containing vast bodies of low grade ores, worthless under present condi-tions, can be operated profitably. Just what these new processes are, was not stated by Mr. Guggenheim during his late visit to this city, but it has been intimated that the Hunt-inston Heberlein method will be am ington-Heberlein method will be em-ployed. This process is in use in the British Columbia smelters and has proved a success there.

#### THE TRIPPLE LINK.

#### New Company Formed to Operate in American Fork Canyon.

Articles of incorporation of the Trip-ple Link Mining & Milling company have been filed with the county clerk of Utah county. The principal office of the company is in Provo. The capital stock is \$40,000 in shares of the par value of 10 cents each based on the valuation of the following unping claims owned by the following uning claims owned by the company and situated in an un-organized district near the south fork in American Fork canyon: L. J. Milner Nos. 1 and 2, and Bull Frog Nos. 1 and 2. The officers and directors are: Louis 1. Milner president: Thomas L. Via. The officers and directors are: Louis J. Milner, president; Thomas L. Vin-cent, vice president; Samuel G. Ray, secretary and treasurer; John Westphal and Ellnor E. Corfman.

#### CHANNING AT BUTTE.

#### Mining Expert Has Not Concluded Examination of Amazon.

amination of Amazon. The development in progress at the Amazon or Brundy property south of the entrance to Columbia gardens, Butte, says the Anaconda Standard, is getting the water pretty well down in the old shaft on the Altoona. That sec-tion of the district is wet at this season of the year, but the company is well equipped for the work it is undertaking and will soon see the bottom of the hole. As soon as the water is out J. Parke ChanDing, expert for Adolph Lewisohn, who holds the lease sod bond on the group, will return from Utah and make an examination of the lower and an examination of the lower workings with a view of determining a future course of operations. The old shaft was sunk by Stanlaus Hirbour about 10 years ago and is said to be in fairly good condition new. At the time the worlt was done Mr. Hirbour was using his own money and found the ex-pense so great that when the opening reached a depth of between 300 and 400 feet he abandoned the job.

#### THE SMOKE CASES.

#### BOUGHT NEVADA PROPERTY.

Fallon, Nev., March 15.—The property of the Eagle's Nest Mining company, including three of the most promising claims at Fairview, was purchased yesterday by William H. Dale. Ben D. Luce, John T. Hodson and E. H. Mead, all of Salt Lake City. The price paid was \$25,000.

### DYER COPPER DEPOSIT. .

One of the Richest Ever Found in Utah, Says a Correspondent.

A correspondent of the Sait Lake Mining Review, writing from Vernal, Utah, makes the statement that prob-ably there has never been a richer deably there has hever been a richer de-posit of copper ore opened in any camp in Utai than the one opened on the sur-face of the Dyer property near that place. From this deposit, or pocket, measuring 90 feet across in the widest place, by 100 feet in length, and 50 feet deep, there has been mined and smelt-ed copper ore to the value of \$300,000, and this, too, when the market price of copper product was much leas than it is

and this, too, when the market price of copper product was much less than it is now. This ore was all a high grad-copper product, running as high as 70 per cent, with silver and gold associat-ed to the value of \$20 a ton. In the early history of this mine the ore was hauled by wagon a distance of nearly 100 miles to the railroad, and thence by rail to the smelter. Even then it paid handsomely for the labor and expense incurred. So far no effort has ever been made to attain depth in the development of the Dyer, but all work has been done on the surface, the only has been done on the surface, the only apparent object being to get all of the ore possible out of the mine with the smallest expenditure, the result of this method being that the property is not

the state are too large and coarse to handle profitably in this market. The The northern cabbage weighs from 8 to 13 pounds per head. The usual consign-ments of oranges and bananas, and small vegetables are being received. In a short time, a fine run of small veg-etables will begin arriving from Mo-apa, Nev. Poultry continues scarce, although the eastern article is still ar-riving. The prices obtaining today are streap below: given below:

Liverpool. March 75.-Close: Wheat-March, 6s. 6%d; May, 6s. 5%d; July, 6s. 5%d. Weather overcast.

Mrs. B. W Evans, Charwater, Kan., writes: "My hurband lay sick for three mouths. The doctors said he had quick consumption. We procured a hottle of Ballard's Horehound Syrup, and it cured him. That was six years ago and since then we have always kept a bottle in the heuse. We cannot do without it. For coughs and colds it has no equal." So, so and \$1.00. Sold by Z. C. M. I. Drug Dept., 12 and 114 South Main Street. B

the canine uptown, and as it was late, concluded to put him in a safe place for the night, so he tied him up se-curely in the office. The Masons as-sembled in the lodge room above, however, objected on account of the racket made, and when Adamson made his last call, they lodged a complaint. It was then that the goung man conceive! the bright idea of shutting the dog up n Mr. Oglesby's private office. This morning the first man

the dark hours. By way of a prelim-inary, the captive chewed himself loose from the retaining cord and then in-vestigated a feasible route for depart-ure. Apparently he prospected with thoroughness. After having scattered the waste paper basket to the four points of the compass and scratched all the paint off the door, he appar-ently had made strenuous attempts to fump over the partition. From the chair to the top of the handsome desk was easy with a good claw hold. From this point of vantage he wiped the picthis point of vantage he wiped the pic-tures off the walls, and finally made the top of the partition from whence he scrambled to the floor. Then it was that he really began to get in his fine work.

The wreckage that met the eye this morning was appalling. His dogship had morning was appalling. His dogship had tried to leave via the cellar route, and during the process had ripped several yards of carpet. Then he got all tied up in a ball of string and chewed every available window shade in reach, dur-ing the process he knocked down every ploture in the windows. Then he took a whirl at the cuspidors, plowed deep furrows in the oak desk and furniture furrows in the oak desks and furniture and mauled the tariff sheets all over the floor.

The office force is now awaiting the return of Mr. Drake. In the meantime the dog is at large, homeless and with out a friend in the world.

#### CONDEMNATION SUIT

The Western Pacific Raliway com-pany today filed suit in the district court against the Oregon Short Lina Rallroad company to condemn a right-of-way across part of lots 7 and 8 block 54, plat C. Salt Lake City survey. The momenty involved is located by The property involved is located be-tween South Temple and First South streets and between Tenth and Elev-enth West streets, and the Short Lins already has some tracks on the same.

An Exponent of Conservation Com-bined with Enterprise. A. H. PEABODY, Asst. Cashier. 0. R. & N. Will Spend \$600,000 on Much Needed Improvements.

Much Needed Improvements. Portland, March 15.-J. P. O'Brien, general manager of the Harriman lines in the Pacific Northwest, has been ad-vised that the expenditure of \$600,000 has been authorized by the toard of directors of the O. R. & N., for the straightening of curves and the practi-cal rebuilding of the line from Trout-dale to Bonneville, Or. It is expected to complete the work late next fall. The road to be improved runs through
