THE EVENING NEWS. GEORGE Q. CAT.NON. ROTTAL AND PULLISURA TWO D', TS' MEETINGS.

Two days' meetings will be held n the New Tabernacle in this city on Saturday and Sunday, comexpected, both from the city and the country. There is room enough ble dust of many able and impaipain the Tabernacle for all who may wish to assemble. These two days' meetings are largely attended in nearly every place in which they are held, and judging by the numbers and ex-

gregations, they result in good-the people being strengthened and built up in their most holy faith, and rejoicing therein exceedingly.

The people of Salt Lake City are seldom called together in meetings of this kind; but they are as well

able to appreciate and enjoy, and have perhaps as much need of, good time and instructions in their duties as Saints as the people who reside in other cities and settlements; hence they are invited to attend, cn masse, the special meetings to be held in the Taber-

nacle to-morrow and Sunday.

SEASON AND SICKNESS.

THE hot season is fast passing away. It is much more than half gone, and the days are rapidly growing shorter, while the nights lengthen with corresponding rapidity and grow gradually cooler.

The hot months of the year, in this climate, are not favorable to great and prolonged exertion, either in work or recreation, for many reasons. The heat is very exhausting and debilitating, and if great exertion is made the body should be nourished accordingly, but the appetite is usually by no means sharp and consequently the stomach can take and digest much less food than in colder seasons. Besides the

iends. WASHINGTON, D. C.-It is mani-writ of habeas corpus.

WASHINGTON, D. C.—It is mani-fest that the officially published denial regarding the health of Vice-president Wilson, are of a diplomatic character, as there is the best authority for the statement that his physicians contemplate the application of a secon, in the base of the brain, as the only possi-ble cure for his disorder; and it is also certain that his most intimate friends have the gravest approhen-sions of the result. It is stated that this application has been de. in colder sensors. Besides the stomach and bowels are particular-ly liable to get out of order in hot weather, and such disorder is an un-failing cause of rapid debility, in children being a difficult affection to manage, and causing a great in-composed for mortality among them. Description of the result. It is stated that this application has been de-layed, in order to permit Mr. Wit-son to so regain his general health that he may endure this radical treatment with more safety. There is a project to take the Wednesday European mail from the Williams & Guion line and give it to the Cumarders. The point made is that the ships are tog slow.

The winninge, and contaility among them. Remedies for diarrhozal attacks are numerous, and sometimes are much more effective than at others. It is generally an easy matter to check the diarrhozal discharge, but it is often difficult to restore the intestines to a perfectly sound and healthy condition. Perhaps one of the most certain means of doing that would be to remove the patient to a colder climate, which may easily be done if similernt time and means are at command. This, however, is only the case with a comparatively small portion of the commanity, owing to the incessant strain which the civiliza-tion of the day induces with the large majority of the people, for the context and refused to carry the mails with-out increased compensation.
