

UNIVERSITY OF UTAH.

Salt Lake City—President Kingsbury returned from Cedar City Tuesday evening. He spent Tuesday in Provo where he visited the Brigham Young university and addressed the students.

A valuable gift to the University museum has been received from Mr. T. Farnsworth of Salt Lake City. The specimens comprise some of the richest ores from the famous Horn Silver mine of which Mr. Farnsworth is the chief director. It also contains samples from the Tintic mines, among those of specific value to the university. Dr. Talmage mentions the following: First, excellent specimens of chrysocolla, or copper silicate; second, apatite, or zinc sulphide. This sulphide is unusually phosphorescent, emitting light under friction even when scratched with the finger nail. In this respect it surpasses the famous phosphorescent dolomites of Summit county. Specimens of it have been carried to and supplied in quantity to several state geologists in the east, and their examinations have indicated the presence of certain rare metals including radium. The material of this character so liberally supplied by Mr. Farnsworth is under investigation in Dr. Talmage's laboratory. The third sub-division spoken of by Dr. Talmage contains samples of horn silver (cerargyrite) and silver glance (argenteite) of exceptional richness, also pyrites and pyrrhotite (light and dark ruby silver), together with others of silver and various minerals of lead and iron. Mr. Farnsworth not only presented these specimens but he provided for their transportation to the university.

Investigations as to the radio active properties of certain Utah minerals have been carried on by Dr. Talmage for some time. He says it is evident that Utah is rich in the newly recognized radio active minerals and that rare and costly radium is relatively abundant within our state boundaries. He has on hand a number of excellent negatives or photographs of keys, coins, pieces of tin, lead silver, gold, nickel, copper, platinum, diamonds and other metallic bodies, all taken in absolute darkness, by the radium. Dr. Talmage, of the department of physics is at work determining the radio active intensity in various Utah minerals and the chemically prepared products from them.

To aid him in this research work, Dr. Parsons has secured for temporary use, a spintharion, from Johns Hopkins university. This is a glass plate carrying a small amount of mineral compounds that become phosphorescent on exposure to light, such as barium and calcium sulphides, with which a small amount of radium chloride has been mixed. Under the lens it exhibits the appearance of a shower of meteors or shooting stars. The light and heat incident to this startling manifestation is derived from the radium compound present in the mixture. Dr. Talmage has produced photographic negatives from the extremely small amount of radium contained in the mixture. Several of the advanced students have been invited to observe the interesting phenomenon.

Last night the University Glee club gave a concert and dance in the museum building. They were assisted by Mr. George Skelton, who favored them with two violin solos.

Professor Stewart has secured Dr. J. H. Vincent, the noted originator of the Chautauque system, as an instructor for the state summer normal institute. Dr. Vincent will deliver a course of lectures on Sociology before the sessions of the institute.

Invitations are out announcing the grand ball to be given by the college women in the assembly hall of the museum building next Friday evening.

Among the visitors at the university this week were Mrs. Byron Cummings, Misses Lucile and Geneva Briggs and Supt. D. H. Christensen.

SALT LAKE CITY SCHOOLS.

Salt Lake—The "assembly" held by the West Side High school last Wednesday assumed a very patriotic color, inasmuch as it was the proud recipient of a large national flag, the gift of Mr. W. A. Nelson of the board of education. Rev. Young of the First M. E. church addressed the school on "Common Sense." His remarks were enthusiastically received. At the conclusion of the program, the students left the building in double quick haste, and the bugle sounded amid the cheers of the school.

Supervisor Doxey reports having held three profitable meetings with the Sanpete county teachers last Saturday at Ephraim. Manual training will be introduced in their schools next year.

The students of Miss Perron of the Fremont successfully planned and executed a surprise on their teacher last Wednesday afternoon. After a program, dainty refreshments were served.

The resolutions upon which the principals are soon to act, regarding the "Bad Boy" problem are as follows: That no school boys be employed as messengers at night; that their loitering in questionable districts of the city be prohibited; that boys of decidedly bad character be sent to the Reform school, in such cases where home influences are not conducive to their reformation; that boys of school age be either in school or in regular employment; that the curfew law be enforced.

The lady teachers of the city will meet probably next Thursday at the Bryant. Miss Quattrone has consented to address them.

Owing to the increased burdens of Prof. Cummings in the preparation of the Utah educational exhibit, Prof. Welch, formerly of the Lowell, is assuming temporary charge of the training school.

Miss Mahaffey of Aspen, Colo., has been employed at the Lowell.

An arithmetic test will be given in all the grammar grades from 9 to 12 o'clock next Thursday.

Mr. Newman was a visitor at the principals' meeting last Wednesday.

Mr. Young was at the Bonneville last week.

The Clark lectures netted the committee \$300. They suggest that this fund be applied as a nucleus for a lecture fund.

Miss Stella Dunford has returned from her trip to Kimberley, and is again at the Lowell.

Supervisor Wetzel has been examining work in reading in the sixth grade throughout the city schools last week.

The German comedy and dance pro-

mises to draw a large crowd to Unity hall next Friday evening.

The seventh month of the present school year closed Friday last.

The principals have been assigned positions as committeemen to revise courses of study for the ensuing year. Their reports will be submitted to the superintendent.

L. D. S. UNIVERSITY.

Student Noel Pratt led the assembly in practicing some of the school songs last Wednesday morning.

We shall take our Conference and spring vacation together, beginning today and lasting till next Thursday. Thus we "kill two birds with one stone."

Principal Goddard delivered a lecture to the conjoint M. I. A. at Forest Dale on Sunday evening last.

A large number of missionary reunions will be held in the L. D. S. U. buildings during conference.

Prof. J. T. Miller lectured at the County Teachers' Institute at Ephraim, Sanpete Co., last Friday and Saturday. On Sunday night he gave a public lecture at Draper.

The young ladies in the sewing department have made the following articles this year: 10 skirts, five coats, eight lined waists, 45 lined waistcoats, nine dressing gowns, four children's dresses, three wrappers, two night dresses, 19 corset covers, three aprons, one pair bloomers and several other smaller articles. Every article is cut by the students herself under the direction of the instructor.

The teachers and students of the night school closed the last regular work Thursday evening with a regular peanut festival, during which the committee that had been appointed Wednesday evening, reported that arrangements had been completed for a dance to be given as a closing feature of the night school, on Thursday evening, April 7, in the gymnasium. It is desired that all night school students of all departments attend.

The students of the first year class met in Y. 33 on Thursday for the purpose of organizing a first year class society. Miss Ives Rhoads was elected president, and the meeting then adjourned until Tuesday, March 29, when the organization was completed. The elections were as follows: Wm. Dobson, vice president; Manie Smith, secretary; and Henry Wood, treasurer.

The words of the school song Alma Mater have been changed so as to coincide exactly with the old English song "Annie Lisle." Now the meter is like this:

Alma Mater, 'tis for thee
Our voices now we raise;
Every tongue be bold and free
In truth to sing thy praise!
"Right," thy motto and thy shield,
Eternal glory thine;
Truth is the sword thy children wield,
Till peace on earth shall reign.

Recent issues of the "Gold and Blue" show improvement in the solidity and spice of the articles. The variety and novelty of the contents, as well as the free and unaffected "swing" which the student contributors are acquiring in their writing, are features that deserve commendation. The latest cover has also a more substantial appearance; and, altogether the students' paper, filled entirely with their own thoughts and truly representative of their daily work in the institution, is a really valuable publication that shows what the students are doing and thinking.

BRIGHAM YOUNG UNIVERSITY.

Provo.—In consequence of the persistent sleet and snow, the work on the campus has been postponed for the present. March will soon have passed, however, and with it, we hope, the instability of the weather.

Prof. A. C. Lund went to Salt Lake the other evening to hear the great pianist, Prof. Bauer. He declares that in point of force and technique this artist surpasses Paderewski.

The officers of the Alumni association met Wednesday night with a view to preparing for the next session of the association, which will be held during the commencement week in May.

An enlarged issue of the White and Blue, published by the faculty, came out yesterday with an unusual array of timely and well written articles. A double page cut of the faculty embellishes the edition.

Two of the papers especially commented upon during the late Sunday school convention were respectively by Miss Aretta Young of this institution and Miss Mary May Baker of the University of Utah. Mr. Willard Andelin was also greatly applauded for a solo during the first session.

Teachers and students were pleased to welcome in their midst last Monday the president of Utah University, Mr. Kingsbury occupied part of the hour usually given to theology. His address was on the purpose of an education. He mentioned the Underwood have given such marked satisfaction that these alone will be purchased in the new assignment.

It has been a number of years since the University was fortunate enough to hear from one of its old friends and patrons, President Lyman. Brother Lyman was with us during devotional exercises last Monday morning, and spoke to the students for half an hour, during which he took occasion to pay a high compliment to our sister institution, the University of Utah.

A letter recently received from Supt.

CASTORIA

For Infants and Children.

The Kind You Have Always Bought

Bears the Signature of J. C. Watson

J. M. Tanner was addressed from Havana, Cuba, and dated March 12. Dr. Tanner is taking a vacation in that delightful climate and says he has much enjoyed his visit to the island. He is at present visiting in the province of Pinar del Rio, before he shall penetrate into the interior as far as time will permit.

A uniquely gotten-up invitation was issued last week to teachers and students. This is the way one of them read: "The Fourth grade would like you to come and see their play, 'King Alfred and the Danes,' Thursday, March 24, 1904, from 1 to 1:30 p. m. Judging by the aspirations of the boys and girls in the training school there lie hidden among them some future dramatists and poets."

President J. G. Duffin of the south-western mission occupied a few minutes of the time Wednesday morning at devotional exercises discussing the status of public sentiment in the missionary fields relative to the Smoot investigation. He declared that it was opening up opportunities to preach the Gospel in places that had been closed before. Anyone that enters were being invited to the homes of intelligent and unbiased people everywhere.

Nearly a thousand Sunday school teachers were at the convention held in the halls of the university during Saturday night and Sunday. The ladies of Provo gave them a banquet Saturday night in room D. The most interesting fact in the personnel of the visiting teachers was the fact that most of them were former students of the institution. Anyone that suppose the Sunday school movement is not keeping pace with the progress of the times, should have listened to the papers and discussions of these various meetings.

The McMillans of New York are just now reading the manuscript of Prof. Nelson's new book, "The Scientific Aspect of Mormonism." The report upon it has been delayed through the illness of the reader, so writes Mr. B. F. Cummings, who is the editor of the book. "I have not deemed it judicious to urge too strongly immediate decision. The McMillans are a big house and I hope they will publish it. Somehow I have a great deal of faith that they will, but the constant investigation may influence them adversely."

One of the enduring monuments left to the university is the Century grove on the south of the high school building. No matter what the season, one feels a perpetual delight in looking at it. In the winter it is adorned with snow frost and the weight of snow, and musical with the chirp of the sparrow. In the summer it makes a grateful shade both for the school and the people of the town. While we are praising those students who have planted the Century grove, let us not forget that the Century class gave us a grove, a gift which renews their memory in loving green with every passing year. Unlike books, which wear out and come to naught unless renewed by a constant stream of funds, the grove is replenished out of nature's own bounty, and its dewy fragrance and freshness are benedictions, as it were, from the hand of God Himself.

BRIGHAM YOUNG COLLEGE.

Logan, Utah, April 1.—G. Gessel, a former student of the college visited school on Tuesday and addressed the students in devotional exercises. Elder Gessel has just returned from Germany where he has been laboring as a missionary during the past two years. He congratulated the students very warmly on the excellent opportunities and advantages which surround them in this great institution, and he strongly advised them to make good use of their time.

The Beacon Light society holds its closing meeting next Friday night in the assembly hall. The ladies have decided to make this meeting an open one by extending cordial invitations to all. The following program is arranged: "Summary of the Drama," Miss Bush; "Summary of Work in Music," Mrs. Edna Ridges; reading, Miss Perry; "Serenade," Schubert, Prof. C. M. Harris; "Gypsy Rondo," Hayden, "Spring Song," Mendelssohn; "Harmonious Blacksmiths," Handel; Miss Little Busby; "Trauerlied," Shuman; Miss Eva Nebeker; "The Joyful Heart," Shuman; Miss Mabel Greenhalgh; "Rigoletto," Verdi; Miss Lillian Oliver; "Hymn to the Emperor," Hayden; H. G. Smurthwaite.

Brother Burnham, father to the noted "opera" company, visited school on Wednesday and gave a very interesting and profitable talk to the students in devotional exercises. Among other things mentioned by Brother Burnham, he very highly commended the opera company, and especially Prof. Robinson, on the successful performance of all taking part in the opera "Pauline."

There will be two games of basketball played in the gymnasium tomorrow (Friday). The first game will be played at 2 o'clock by the lady teams of the college and the W. S. A. Following this game, the class of 1905 will play with the junior team of the W. S. A. No doubt both games will be very interesting.

The opera company, in the two performances, last Tuesday afternoon and night, certainly reached the highest limit of amateur perfection. The performance was grand, the solos, duets, quartets, choruses, etc., were rich and beautiful. A great many people of Logan and surrounding cities have witnessed the opera, and have made very favorable comments have been heard. Prof. Robinson and the musical department are certainly to be complimented.

A fine new 60-horse power boiler has arrived and will at once be installed in the engine and boiler house. This will obviate a difficulty that we have met heretofore, in thoroughly heating the building during the time it is lighted, as much of the steam was used for the power plant.

William Griffiths of Clarkston was visiting school last week with his son William who is a student.

A leap-year matinee will be given in the gymnasium tomorrow afternoon. The young ladies are determined to show the gentlemen a lesson in giving parties.

Robert Henderson, who for four years past has been a student of the college, is now teaching school near Blackfoot, was a visitor this week. Rob has just entered matrimony during his stay in Logan, and has many of his old class mates with him and his beautiful bride much joy in their wedded life.

The choir rendered a remarkably beautiful Easter anthem in devotional exercises on Thursday morning. Everyone was spell bound during the rendition.

President Linford went to Salt Lake

City to visit with the board of examiners last Saturday. He will go to the city again next Saturday for a similar purpose.

Bulletin No. 3 is now printed and ready for distribution. It contains an article from the department of theology that is well worth any one's time to carefully study. It is a paper on the parable of our Savior, written by Prof. N. H. Chamberlain.

Prof. Farland, the great banjole, will appear at the college and give a recital on Saturday night. He comes on splendid recommendations and it is probable that something very fine will be witnessed.

The students of Hyrum stake meet tonight in the assembly hall and renders an interesting program.

STATE BRANCH NORMAL.

Cedar City—The program at students' chapel last Friday was a reading by Ann McMullin, instrumental music by Messrs. Edwards and Morris, recitation by Pearl Higbee.

President J. T. Kingsbury spent the greater part of last week at the Branch Normal inspecting the new building and participating in the "house warming." He gave a very instructive talk to the students in chapel, pointing out the means of success in school and life.

The new apparatus for the gymnasium has arrived and the boys are reaping a benefit from it in the way of sprained wrists, etc.

The history students have begun to read and discuss their exposition papers.

Since the warm weather has come a number of classes are conducted at 7:30.

The entertainment Friday evening, April 1, is to be given by the students' society. It will consist of an illustrated lecture on the Grand Canyon of the Colorado, by members of the faculty. Dancing is to be indulged in before and after.

The Branch Normal next year will have the benefit of the system of waterworks now being installed by the citizens of Cedar City.

The domestic science department has been moved into its new quarters in the science building.

An athletic meet was held on the campus Saturday afternoon, first second and third prizes were awarded. Instructor William T. Ward gave a talk at the ward tabernacle Sunday evening.

The "house warming" which took place last Saturday afternoon and evening was a grand success. Patrons of the school from all over southern Utah were present. In the afternoon impromptu addresses were given by President Porter, Hon. J. H. Tolton of Beaver City, President J. T. Kingsbury, Ex-Senator J. R. Tanner, Hon. John Parry, President W. T. Jones, student R. E. Lee Wikom and Dr. George Middleton. The visitors were then shown through the building. Refreshments were served by the instructors to those who had come from a distance. The dance in the evening was crowded and an enjoyable social time was had by all.

Nothing Equal to Chamberlain's Colic, Cholera and Diarrhoea Remedy for Bowel Complaints to Children.

"We have used Chamberlain's Colic, Cholera and Diarrhoea Remedy in our family for years," says Mrs. J. B. Cooke, of Netherlands, Texas. "We have given it to all of our children. We have used other medicines for the same purpose, but never found anything to equal Chamberlain's. If you will use it as directed it will always cure." For sale by all druggists.

The Pioneer Nurseries Company.

The poet wrote, years ago, that he who makes two blades of grass grow where but one grew before, is a public benefactor. There is both truth and poetry in his line. How much more of a benefactor, then, is he who replaces these blades of grass with smiling flowers and generous orchards! Most of us are tree-worshippers; yet it is the practical, rather than the poetical, that appeals to us moderns in our utilitarian age. And here is where the tree-producer makes his greatest score; for, while substituting for the sage-brush, trees for shade and food, he enriches the purchaser of his product at the same time.

A farm, for example, worth \$100 an acre, when planted with the proper kinds of fruit trees, immediately jumps in value to \$200 an acre or more. We predict as this practical side becomes more fully understood, that this beautiful inter-mountain country will become one vast orchard, supplying the eastern over-crowded cities with luscious and health-giving fruits.

The Pioneer Nurseries Company, as its name indicates, is the oldest in this section, having been established here in Salt Lake as far back as 1850. The business built up through a half century of toil and study of local conditions, is the best guarantee of the quality of its output and the honesty of its business dealings. Besides the large nurseries south of the city, the company owns a model fruit farm and experimental orchard at Provo.
