**Lost Child.**

Brother James Lemon, of Moutthville, Dry Creek, Utah county, says that his son, James Lemon, Jr., about 20 months old, was playing at his door on the 19th of Sept., sun one hour high, p.m., since which time the child has not been seen or heard from, Oct. 9, although his tracks were discovered in the bed of the dry creek, not far from the house, the same afternoon, and his whip or stick that he had been playing with, a little below, in the creek bottom, where it is supposed the child fell from a plank which was lying across the bed of the creek. The Indians had some time previous taken a fancy to the child, and offered to buy him for berries; and it has been reported that Indians have been in the mountains near the place, killing Bear. Any information concerning the child will be gratefully received by the parents.

We understand the sugar train (which at latest accounts, was in the rear of the emigration) has lost many cattle, during the late severe snow storms in the mountains, partly by freezing, and partly by straying; but the strays have been found, and other teams have been provided—so that the camp is making good progress, and will be in next week.

**SIGNS OF THE TIMES IN CHRISTENDOM.**—The Whitehall Democrat in brief.—On July 21, at night, a French woman, ontars strangr, was gugg'd, and forcibly conducted to a field, about half a mile from the village, by a gang of 12 or 14 ruffians, who accomplished their fiendish and beastly purposes, and left their victim insensible, and nearly dead, where she was found next morning and properly cared for. Four of the villains have been arrested. This is the third instance of the kind, within the precincts of the village, in a short time, and the offenders yet at large; except the last case, and no notice has been taken by the authorities.

**VIOLIN SCHOOL.**

MR. JOHN M. JONES respectfully informs the citizens of G. S. L. city, that he will open a Violin school, when he will give instructions on the violin. School to commence as soon as a sufficient number of pupils are obtained.

**SUGAR FACTORY.**

Many people who have raised Beets, are desirous of knowing whether the Sugar Factory will commence this season or not; I take this opportunity of informing the public, that our machinery is expected to arrive in eight or ten days from this date; that our buildings are progressing as speedily as possible, and that we anticipate being able to commence the manufacturing of Sugar in five or six weeks from this time.

As we have not yet tested the saccharine properties of the Beets, we are not prepared to give an accurate estimate of their value, or of the amount of sugar that we can give per ton, but we expect to be able to give from six to eight hundred weight of sugar, for the amount of Beets that would grow on an average acre of ground, (estimating that at twenty tons to the acre which is a very low estimate) delivered at the Factory. I think there is no doubt but that there will be six or eight, but as the Beets are generally large, and as large Beets do not yield the same amount of saccharine as the small, in proportion to weight, it is doubtful.

Should it be inconvenient for some to do the hauling according to President Young's counsel, they can easily arrange with their neighbors who have teams, and give them their proper proportion of the sugar. The best way to save your Beets is to put them in rows on the top of the ground in a conical shape, say three or four feet at the bottom, and tapering to a point at the top, cover them with earth, slightly, and if the weather should increase in cold, put a little more earth on the straw four or six inches in diameter, placed with one end on the ground in the center of the pile and conical toward the earth on the top; this is to admit of the escaping of gas, and preventing fermentation. Great care should be taken not to bruise the Beets, by knocking them together, or handling them carelessly; neither should the roots be cut off, except near the points, otherwise they will bleed, and lose their saccharine properties. A little carelessness in any of these points may injure them thirty per cent.

Should it suit the convenience of the brethren to commence hauling immediately, we will furnish ground for them to deposit them in, near the mill, which is at Provo city.

In a short time we shall send Mr. Joseph Horn to give further instructions about all these matters, and to adjust in making arrangements. Persons in Great Salt Lake City can see him now at his residence in the 14th Ward.

In regard to quantity; furnish us the Beets and you shall have one hundred tons of sugar this season.

For the Deseret manufacturing company. JOHN TAYLOR.

**DESERET TANNERY.**

THE Proprietors tender their thanks to their friends who have patronized them by bringing them bark, oils, lumber, and the comforts of life, to assist in starting their business, and particularly to those who have thrown the mantle of charity over the products of the infant tannery—they will be remembered.

A strong desire to assist in establishing an order of independence, as far as our ability can extend, has prompted us to spare no pains or expense to enlarge our conveniences for the public benefit. We have a number of Boil and Blue makers steady, making up our stock. We want more help in that branch of our business; none need apply but first rate stogy workmen. We want to employ a good last maker, for the winter at least.

Our harness shop is in operation. We have on hand, Bridles, Lines and Halter straps of all kinds, and waiting your orders for making and repairing harness.

We have in our employ for some length of time men who are experienced in the manufacture of leather having devoted their lives from boyhood to advanced age in that business, both in Britain and America, but as yet we have not been able to procure all the tools necessary for that business. We wish to purchase: any person having tools will please call.

We are also prepared as usual to receive your hides, skins, sunags, squaw bush, oak shrubs, as also your oils and tallow for which we will pay you on delivery. We wish you to call and see our progress in home manufacture, and bring us some flour, meal, beef, pork, mutton, butter, cheese, potatoes, and other comforts, such as cloths of all kinds, socks, &c., &c., we will trade our boots and shoes, for anything that is useful for our comfort, we wish to establish a business independent of cash if possible. We are in want of two good cast or sheet iron shop stoves; also a quantity of pipe, and a drum for heating, or we will purchase a quantity of sheet iron; any person having any of the above articles, please call.

MULLINER & ALLEN.
